PART A: GENERAL DISCLOSURE

INTRODUCTION

This simplified prospectus contains selected important information to help you make an informed decision about investing in the funds listed on the cover (individually, each is a “**Fund**” and, collectively, they are referred to as the “**Funds**”). Included in the Funds, unless otherwise noted, are the Mackenzie Private Wealth Pools, which are sometimes also referred to as the “**Pools**”.

It is important that you select the appropriate series in which to invest, in order to properly address your personal circumstances and investment needs.

This simplified prospectus will help you understand your rights as an investor in the Funds.

To make this document easier to read and understand, we have used personal pronouns throughout much of the text. References to “**Mackenzie Investments**”, “**Mackenzie**”, “**our**”, “**we**” or “**us**” generally refer to Mackenzie Financial Corporation in its capacity as trustee and manager of the Funds. References to “**you**” are directed to the reader as a potential or actual investor in the Funds.

In this document we refer to “**financial advisors**” and “**dealers**”. The financial advisor is the individual with whom you consult for investment advice and the dealer is the company or partnership that employs your financial advisor, and may include, at our discretion, a company or partnership that has received an exemption from the dealer registration requirements from the Canadian securities regulators.

In this document, all of the mutual funds that we manage, including the Funds, are referred to, collectively, as the “**Mackenzie Funds**” or, each individually, as a “**Mackenzie Fund**”. Not all Mackenzie Funds are offered under this simplified prospectus. All Funds, including the Pools, are mutual funds which are subject to National Instrument 81-102 *Investment Funds* (“**NI-81-102**”).

This simplified prospectus contains information about each Fund, including the series that comprise each Fund, and the risks of investing in mutual funds generally, as well as the names of the firms responsible for the portfolio management of the Funds.

This document is divided into two parts:

- **Part A**, from pages 1 to 49, contains general information about all of the Funds.
- **Part B**, from pages 50 to 283, contains specific information about each of the Funds described in this document.

Additional information about each Fund is available in the following documents:

- the annual information form;
- the most recently filed fund facts;
- the most recently filed annual financial statements;
- any interim financial reports filed after those annual financial statements;

- the most recently filed annual management report of fund performance; and
- any interim management report of fund performance filed after that annual management report of fund performance.

These documents are incorporated by reference into this document, which means that they legally form part of this document just as if they were printed as a part of this document. You can get a copy of these documents at your request, and at no cost, by calling us toll-free at **1-800-387-0614**, e-mailing us at **service@mackenzieinvestments.com** or from your financial advisor.

These documents are available on our website at **www.mackenzieinvestments.com** and are also available on the website of SEDAR at **www.sedar.com**.

WHAT IS A MUTUAL FUND AND WHAT ARE THE RISKS OF INVESTING IN A MUTUAL FUND?

What is a Mutual Fund?

A mutual fund is a pool of money contributed by people with similar investment objectives. Investors share the fund’s income and expenses, and also the gains and losses that the fund makes on its investments, in proportion to their investment in the fund.

The Funds were established as unit trusts and issue units to investors.

Please refer to the front cover of this simplified prospectus, or to the specific information about each of the Funds in Part B, for the series that are available for each Fund pursuant to this document. Some of the Funds may also offer other series of units under separate simplified prospectuses and related annual information forms, and/or offer series which are only available on an exempt-distribution basis. The different series of units available under this simplified prospectus are described under the heading “**Purchases, Switches and Redemptions**”. We may offer additional series of units of the Funds in the future without notification to, or approval of, investors.

WHAT ARE THE GENERAL RISKS OF INVESTING IN A MUTUAL FUND?

A mutual fund may own many different types of investments – stocks, bonds, securities of other mutual funds, derivatives, cash – depending on the fund’s investment objectives. The values of these investments vary from day to day, reflecting changes in interest rates, economic conditions, stock market developments and individual company news. As a result, a mutual fund’s net asset value (“**NAV**”) will go up and down on a daily basis, and the value of your investment in a mutual fund may be more, or less, when you redeem it than when you purchased it.

We do not guarantee that the full amount of your original investment in a Fund will be returned to you. Unlike bank accounts or guaranteed investment certificates, mutual fund securities are not covered by the Canada Deposit Insurance Corporation or any other government deposit insurer.

Under exceptional circumstances, mutual funds may suspend redemptions. Please see the heading “**Purchases, Switches and Redemptions**” for more details.

Mutual funds are subject to a variety of risks. These risks may cause you to lose money on your mutual fund investment. This section provides a list of the risks of investing in mutual funds. The risks that apply to each Fund offered by this simplified prospectus are listed under the sub-heading “**What are the Risks of Investing in the Fund?**” for each Fund described in **Part B**. To the extent that a Fund invests, directly or indirectly, in another mutual fund, the risks of investing in that Fund are similar to the risks of investing in the other mutual fund in which such Fund invests.

Capital Depletion Risk

Some series of the Funds aim to make monthly distributions at a target rate. These monthly distributions will generally be comprised, in whole or in part, of return of capital. When we return your capital, this reduces the amount of your original investment and may result in the return of the entire amount of your original investment. Return of capital that is not reinvested will reduce the NAV of the Fund, which could reduce the Fund’s ability to generate future income. You should not draw any conclusions about the Fund’s investment performance from the amount of this distribution. To the extent that the balance in the capital account becomes, or is at risk of becoming, zero, monthly distributions may be reduced or discontinued without prior notice. See “**Series Offering Regular Cash Flow**” for the list of series and Funds that offer monthly distributions.

Commodity Risk

A mutual fund may invest in commodities or in companies engaged in commodity-focused industries and may obtain exposure to commodities using derivatives or by investing in exchange-traded funds, the underlying interests of which are commodities. Commodity prices can fluctuate significantly in short time periods, which will have a direct or indirect impact on the value of such a mutual fund.

Company Risk

Equity investments, such as stocks and investments in trusts, and fixed-income investments, such as bonds, carry several risks that are specific to the company that issues the investments. A number of factors may cause the price of these investments to fall. These factors include specific developments relating to the company, conditions in the market where these investments are traded, and general economic, financial and political conditions in the countries where the company operates. While these factors impact all securities issued by a company, the values of equity securities generally tend to change more frequently and vary more widely than fixed-income securities. As a mutual fund’s NAV is based on the value of its portfolio securities, an overall decline in the value of portfolio securities that it holds will reduce the value of the mutual fund and, therefore, the value of your investment.

Concentration Risk

A mutual fund may invest a large portion of its net assets in a small number of issuers, in a particular industry or geographic region, or

may use a specific investment style, such as growth or value. A relatively high concentration of assets in or exposure to a single issuer, or a small number of issuers, may reduce the diversification of a mutual fund and may result in increased volatility in the mutual fund’s NAV. Issuer concentration may also increase the illiquidity of the mutual fund’s portfolio if there is a shortage of buyers willing to purchase those securities.

A mutual fund concentrates on a style or sectors either to provide investors with more certainty about how the mutual fund will be invested or the style of the mutual fund or because a portfolio manager believes that specialization increases the potential for good returns. If the issuer, industry or region faces difficult economic times or if the investment approach used by such mutual fund is out of favour, the mutual fund will likely lose more than it would if it diversified its investments or style. If a mutual fund’s investment objectives or strategies require concentration, it may continue to suffer poor returns over a prolonged period of time.

Convertible Securities Risk

Convertible securities are fixed-income securities, preferred stocks or other securities that are convertible into common stock or other securities. The market value of convertible securities tends to decline as interest rates increase and, conversely, to increase as interest rates decline. A convertible security’s market value, however, tends to reflect the market price of the issuer’s common stock when that price approaches or exceeds the convertible security’s “conversion price”. The conversion price is defined as the predetermined price at which the convertible security could be exchanged for the associated stock. As the market price of the common stock declines, the price of the convertible security tends to be influenced more by the yield of the convertible security. Thus, it may not decline in price to the same extent as the underlying common stock.

In the event of a liquidation of the issuing company, holders of convertible securities would be paid before the company’s common stockholders but after holders of any senior debt obligations of the company. Consequently, the issuer’s convertible securities generally entail less risk than its common stock but more risk than its senior debt obligations.

Credit Risk

An issuer of a bond or other fixed-income investment, including asset-backed securities, may not be able to pay interest or to repay the principal at maturity. The risk of such a failure to pay is known as credit risk. Some issuers have more credit risk than others. Issuers with higher credit risk typically pay higher interest rates than interest rates paid by issuers with lower credit risk because higher credit risk companies expose investors to a greater risk of loss. Credit risk can increase or decline during the term of the fixed-income investment.

Companies, governments and other entities, including special purpose vehicles that borrow money, and the debt securities they issue, are assigned credit ratings by specialized rating agencies. The ratings are a measure of credit risk and take into account many factors, including the value of any collateral underlying a fixed-income investment. Issuers with low or no ratings typically pay

higher yields but can subject investors to substantial losses. Credit ratings are one factor used by the portfolio managers of the mutual funds in making investment decisions. A credit rating may prove to be wrong, which can lead to unanticipated losses on fixed-income investments. If the market perceives that a credit risk rating is too high, then the value of the investments may decrease substantially. A downgrade in an issuer's credit rating or other adverse news regarding an issuer can reduce a security's market value.

The difference in interest rates between an issuer's bond and a government-issued bond that are otherwise identical in all respects except for the credit rating is known as the credit spread. Credit spreads widen if the market determines that a higher return is necessary to compensate for the increased risk of owning a particular fixed-income investment. An increase in credit spread after the purchase of a fixed-income investment decreases the value of that investment.

Cryptocurrency Risk

Mackenzie Maximum Diversification Global Multi-Asset Fund may invest up to 10% of its assets in ETFs that invest in cryptocurrencies; specifically, Bitcoin and Ethereum ("Ether"). Bitcoin and Ether are digital assets whose ownership and behaviour are determined by participants in an online, peer-to-peer network connecting publicly accessible computers, or "open source", software that follows the rules and procedures governing the cryptocurrency network or "protocol". It is possible that Bitcoin and/or Ether's protocol has undiscovered flaws which could result in the loss of some or all of the assets held by an underlying cryptocurrency ETF. The value of cryptocurrencies is not backed by any government, corporation or other identified body. Investing in cryptocurrencies is therefore speculative, prices are highly volatile, and market movements are difficult to predict. Supply and demand for Bitcoin and Ether can change rapidly and is affected by a variety of factors, including regulation and general economic trends. Cryptocurrencies have only recently gained commercial acceptance, and further development of the cryptocurrency network, which is part of a new and rapidly changing industry, is subject to a variety of factors that are difficult to evaluate. Supply is determined by a computer code, not by a central bank, and prices can be extremely volatile. Markets for Bitcoin and Ether are sensitive to new developments, and since volumes are still maturing, any significant changes in market sentiment (by way of sensationalism in the media or otherwise) can induce large swings in volume and subsequent price changes. The value of Bitcoin and Ether held by the underlying cryptocurrency ETFs could decline rapidly in future periods, including to zero. Additionally, digital trading platforms may suffer from operational issues, such as delayed execution, that could have an adverse effect on the underlying cryptocurrency ETFs. Some digital asset trading platforms have been closed due to fraud, failure or security breaches. There is no assurance that Bitcoin and Ether will maintain their long-term value in terms of purchasing power in the future, or that mainstream retail merchants will accept Bitcoin and Ether as a form of payment.

There may also be network-scale attacks against Bitcoin and/or Ether's protocol or advancements in quantum computing that could break a Bitcoin and/or Ether's cryptographic rules, which could result in the loss of some or all of Bitcoin and/or Ether held by an underlying

ETF that Mackenzie Maximum Diversification Global Multi-Asset Fund invests in.

Digital assets including Bitcoin and Ether currently face an uncertain regulatory landscape in many jurisdictions including Canada and the United States. Various foreign jurisdictions may, in the near future, adopt laws, regulations or directives that affect Bitcoin and Ether and other digital assets which may conflict with those of Canada or the United States and may negatively impact the acceptance of Bitcoin and Ether by users, merchants and service providers. This may impede the growth or sustainability of the digital asset economy or otherwise negatively affect the value of Bitcoin and Ether.

Cyber Security Risk

Due to the widespread use of technology in the course of business, the Funds have become potentially more susceptible to operational risks through breaches in cyber security. Cyber security is the risk of harm, loss, and liability resulting from a failure, disruption or breach of an organization's information technology systems. It refers to both intentional and unintentional events that may cause a Fund to lose proprietary information, suffer data corruption, or lose operational capacity, which could cause us and/or a Fund to experience disruptions to business operations; reputational damage; difficulties with a Fund's ability to calculate its NAV; or incur regulatory penalties, additional compliance costs associated with corrective measures, and/or financial loss. Cyber attacks may involve unauthorized access to a Fund's digital information systems (e.g., through "hacking" or malicious software coding) for purposes of misappropriating assets or sensitive information, or corrupting data, equipment or systems. Other cyber attacks do not require unauthorized access, such as denial-of-service attacks (i.e., efforts to make network services unavailable to intended users). In addition, cyber attacks on a Fund's third-party service providers (e.g., administrators, custodians and sub-advisors) or issuers that a Fund invests in can also subject a Fund to many of the same risks associated with direct cyber attacks. Similar to operational risks in general, we have established risk management systems designed to reduce the risks associated with cyber security. However, there is no guarantee that such efforts will be successful.

Derivatives Risk

Some mutual funds may use derivatives to pursue their investment objectives. Generally, a derivative is a contract between two parties, whose value is determined with reference to the market price of an asset, such as a currency, commodity or stock, or the value of an index or an economic indicator, such as a stock market index or a specified interest rate (the "underlying interest").

Most derivatives are options, forwards, futures or swaps. An option gives the holder the right, but not the obligation, to buy or sell the underlying interest at an agreed price within a certain time period. A call option gives the holder the right to buy; a put option gives the holder the right to sell. A forward is a commitment to buy or sell the underlying interest for an agreed price on a future date. A future is similar to a forward, except that futures are traded on exchanges. A swap is a commitment to exchange one set of payments for another set of payments.

Some derivatives are settled by one party's delivery of the underlying interest to the other party; others are settled by a cash payment representing the value of the contract.

The use of derivatives carries several risks:

- There is no guarantee that a market will exist for some derivatives, which could prevent the mutual fund from selling or exiting the derivative prior to the maturity of the contract. This risk may restrict the mutual fund's ability to realize its profits or limit its losses.
- It is possible that the other party to the derivative contract ("**counterparty**") will fail to perform its obligations under the contract, resulting in a loss to a mutual fund.
- When entering into a derivative contract, the mutual fund may be required to provide margin or collateral to the counterparty. If the counterparty becomes insolvent, the mutual fund could lose its margin or its collateral or incur expenses to recover it.
- Some mutual funds may use derivatives to reduce certain risks associated with investments in foreign markets, currencies or specific securities. Using derivatives for these purposes is called hedging. Hedging may not be effective in preventing losses. Hedging may also reduce the opportunity for gain if the value of the hedged investment rises, because the derivative could incur an offsetting loss. Hedging may also be costly or difficult to implement.
- Securities and commodities exchanges could set daily trading limits on options and futures. Such rule changes could prevent the mutual fund from completing a futures or options transaction, causing the mutual fund to realize a loss because it cannot hedge properly or limit a loss.
- Where a mutual fund holds a long or short position in a future whose underlying interest is a commodity, the mutual fund will always seek to close out its position by entering into an offsetting future prior to the first date on which the mutual fund might be required to make or take delivery of the commodity under the future. There is no guarantee that the mutual fund will be able to do so. This could result in the mutual fund having to make or take delivery of the commodity.
- The *Income Tax Act* (Canada) (the "**Tax Act**"), or its interpretation, may change the tax treatment of derivatives.

Emerging Markets Risk

Emerging markets have the risks described under foreign currency risk and foreign markets risk. In addition, they are more likely to experience political, economic and social instability and may be subject to corruption or have lower business standards. Instability may result in the expropriation of assets or restrictions on payment of dividends, income or proceeds from the sale of a mutual fund's securities. In addition, accounting and auditing standards and practices may be less stringent than those of developed countries, resulting in limited availability of information relating to a mutual

fund's investments. Further, emerging market securities are often less liquid and custody and settlement mechanisms in emerging market countries may be less developed, resulting in delays and the incurring of additional costs to execute trades of securities and/or reduce liquidity.

ESG Investment Objective or Strategy Risk

Some Funds have fundamental investment objectives based on one or more environmental, social and governance ("**ESG**") criteria. Other Funds use ESG criteria as a component of their investment strategies. Applying ESG criteria to the investment process may limit the number and types of investment opportunities available and as a result, a Fund that has an ESG focus may perform differently compared to similar funds that do not focus on ESG or apply ESG criteria. Funds that apply ESG criteria to their investment process may forgo opportunities to buy certain securities when it might otherwise be economically advantageous to do so or may sell securities for ESG reasons when it might otherwise be economically disadvantageous to do so. Furthermore, ESG criteria are subject to uncertainty, discretion and subjective application. The determination of the ESG criteria to apply and the assessment of the ESG characteristics of a company or industry by a portfolio management team may differ from the criteria or assessment applied by others. As a result, securities selected by a portfolio management team may not always reflect the values or principles of any particular investor.

ETF Risk

A mutual fund may invest in a fund whose securities are listed for trading on an exchange (an "**exchange-traded fund**" or "**ETF**"). The investments of ETFs may include stocks, bonds, commodities and other financial instruments. Some ETFs, known as index participation units ("**IPUs**") attempt to replicate the performance of a widely quoted market index. Not all ETFs are IPUs. While investment in an ETF generally presents the same risks as investment in a conventional mutual fund that has the same investment objectives and strategies, it also carries the following additional risks, which do not apply to investment in conventional mutual funds:

- The performance of an ETF may be significantly different from the performance of the index, assets, or financial measure that the ETF is seeking to track. There are several reasons that this might occur, including that ETF securities may trade at a premium or a discount to their NAV or that ETFs may employ complex strategies, such as leverage, making tracking with accuracy difficult.
- An active trading market for ETF securities may fail to develop or fail to be maintained.
- There is no assurance that the ETF will continue to meet the listing requirements of the exchange on which its securities are listed for trading.

Also, commissions may apply to the purchase or sale of ETF securities. Therefore, investment in ETF securities may produce a return that is different than the change in the NAV of these securities.

Extreme Market Disruptions Risk

Certain extreme events, such as natural disasters, war, civil unrest, terrorist attacks, and public health crises like epidemics, pandemics or outbreaks of new infectious diseases or viruses (including, most recently, the novel coronavirus (COVID-19)) can materially adversely affect a Fund's business, financial condition, liquidity or results of operations. The current COVID-19 pandemic is significantly impacting the global economy and commodity and financial markets. The COVID-19 pandemic has resulted in a slowdown in economic activity, higher unemployment, reduced consumer activity, extreme volatility in financial markets and commodity prices, and a global recession. Public health crises, such as the COVID-19 outbreak, can also result in operating, supply chain and project development delays that can materially adversely affect the operations of third parties in which a Fund has an interest. The duration of any business disruptions and related financial impact of the COVID-19 outbreak is unknown. It is difficult to predict how a Fund may be affected if a pandemic, such as the COVID-19 outbreak, persists for an extended period of time. Similarly, the effects of terrorist acts (or threats thereof), military action or similar unexpected disruptive events on the economies and securities markets of countries cannot be predicted. Natural disasters, war and civil unrest can also have materially adverse impacts on economic enterprises in the impacted countries. All such extreme events may impact Fund performance.

Foreign Currency Risk

The NAVs of most mutual funds are calculated in Canadian dollars. Foreign investments are generally purchased in currencies other than Canadian dollars. When foreign investments are purchased in a currency other than Canadian dollars, the value of those foreign investments will be affected by the value of the Canadian dollar relative to the value of the foreign currency. If the Canadian dollar rises in value relative to the other currency but the value of the foreign investment otherwise remains constant, the value of the investment in Canadian dollars will have fallen. Similarly, if the value of the Canadian dollar has fallen relative to the foreign currency, the value of the mutual fund's investment will have increased.

Some mutual funds may use derivatives such as options, futures, forward contracts, swaps and customized types of derivatives to hedge against losses caused by changes in exchange rates. Please see the "Investment Strategies" section of each Fund description in Part B of this simplified prospectus.

Foreign Markets Risk

Certain Funds invest in global equity or debt securities or may focus their investments in a particular region or country. The value of an investment in a foreign issuer depends on general global economic factors and specific economic and political factors relating to the country or countries in which the foreign issuer operates. The regulatory environment in some foreign countries may be less stringent than in Canada, including legal and financial reporting requirements. There may also be less information available with respect to foreign companies. Further, the legal systems of some foreign countries may not adequately protect investor rights and laws may change without sufficient warning. Stock markets in foreign countries may have lower trading volumes and sharper price

corrections. Some or all of these factors could make a foreign investment more volatile than a Canadian investment.

In some countries, the political climate might be less stable and social, religious and regional tensions may exist. There could also be a risk of nationalization, expropriation or the imposition of currency controls. Certain foreign economies may be susceptible to market inefficiency, volatility and pricing anomalies that may be connected to government influence, a lack of publicly available information, political and social instability and/or the potential application of trade tariffs or protectionist measures with key trading partners. These risks and others can contribute to larger and more frequent price changes among foreign investments. As a result, the value of certain foreign securities, and potentially the value of the funds that hold them, may rise or fall more rapidly and to a greater degree than Canadian investments.

Many foreign countries impose tax on dividends and interest paid or credited to persons who are not resident in such countries. While the Funds generally aim to make investments in such a manner as to minimize the amount of foreign taxes incurred, investments in global equity and debt securities may subject the Funds to foreign taxes on dividends and interest paid or credited to them or any gains realized on the disposition of such securities. Any foreign taxes incurred by a Fund will generally reduce the value of the Fund's portfolio. Under certain tax treaties, the Funds may be entitled to a reduced rate of tax on foreign income. Some countries require the filing of a tax reclaim or other forms to receive the benefit of the reduced tax rate. Whether or when a Fund will receive the tax reclaim is within the control of the particular foreign country. If a Fund obtains a refund of foreign taxes, the net asset value of the Fund will not be restated, and the amount will remain in the Fund to the benefit of the then-existing securityholders.

High Yield Securities Risk

Mutual funds may be subject to high yield securities risk. High yield securities risk is the risk that securities that are rated below investment grade (below "BBB-" by S&P or by Fitch Rating Service Inc., or below "Baa3" by Moody's® Investor's Services, Inc.) or are unrated at the time of purchase may be more volatile than higher-rated securities of similar maturity. High yield securities may also be subject to greater levels of credit or default risk than higher-rated securities. The value of high yield securities can be adversely affected by overall economic conditions, such as an economic downturn or a period of rising interest rates, and high yield securities may be less liquid and more difficult to sell at an advantageous time or price or to value than higher-rated securities. In particular, high yield securities are often issued by smaller, less creditworthy companies or by highly leveraged firms, which are generally less able than more financially stable firms to make scheduled payments of interest and principal.

Illiquidity Risk

A mutual fund may hold up to 15% or more of its net assets in illiquid securities. A security is illiquid if it cannot be sold at an amount that at least approximates the amount at which the security is valued. Illiquidity can occur (a) if the securities have sale restrictions; (b) if the securities do not trade through normal market facilities; (c) if there is simply a shortage of buyers; or (d) for other reasons. In

highly volatile markets, such as in periods of sudden interest rate changes or severe market disruptions, securities that were previously liquid may suddenly and unexpectedly become illiquid. Illiquid securities are more difficult to sell, and a mutual fund may be forced to accept a discounted price.

Some high-yield debt securities, which may include but are not limited to security types commonly known as high-yield bonds, floating-rate debt instruments and floating-rate loans, as well as some fixed-income securities issued by corporations and governments in emerging market economies, may be more illiquid in times of market stress or sharp declines. In addition, the liquidity of individual securities may vary widely over time. Illiquidity in these instruments may take the form of wider bid/ask spreads (i.e., significant differences in the prices at which sellers are willing to sell and buyers are willing to buy that same security). Illiquidity may take the form of extended periods for trade settlement and delivery of securities. In some circumstances of illiquidity, it may be more difficult to establish a fair market value for particular securities, which could result in losses to a fund that has invested in these securities.

Some of the Funds may from time to time invest in vehicles that, in turn, invest in a portfolio of private and illiquid assets (“**Private Vehicles**”). These Private Vehicles are intended for long-term investors and may include private credit, private equity, or real estate assets. Due to the illiquid nature of their underlying assets, Private Vehicles often have partial or full restrictions on the withdrawal of capital by investors over a set term which can be 10 years or longer. It may not be possible for a Fund to sell its investment to a third party prior to the end of the term, and generally, these types of investments are highly illiquid over the course of their life.

Interest Rate Risk

Interest rates have an impact on a whole range of investments. Interest rates impact the cost of borrowing for governments, companies and individuals, which in turn impacts overall economic activity. Interest rates may rise during the term of a fixed-income investment. If interest rates rise, then the value of that fixed-income investment generally will fall. Conversely, if interest rates fall, the value of the investment will generally increase.

Longer-term bonds and strip bonds are generally more sensitive to changes in interest rates than other kinds of securities. The cash flow from debt instruments with variable rates may change as interest rates fluctuate.

Changing interest rates can also indirectly impact the share prices of equity securities. When interest rates are high, it may cost a company more to fund its operations or pay down existing debt. This can impair a company’s profitability and earnings growth potential, which can negatively impact its share price. Conversely, lower interest rates can make financing for a company cheaper, which can potentially increase its earnings growth potential. Interest rates can also impact the demand for goods and services that a company provides by impacting overall economic activity as described above.

Large Transaction Risk

The securities of some mutual funds are bought by: (a) other mutual funds, investment funds or segregated funds, including Mackenzie Funds; (b) financial institutions in connection with other investment

offerings; and/or (c) investors who participate in an asset allocation program or model portfolio program. Independently or collectively, these other parties may, from time to time, purchase, hold or redeem a large proportion of a mutual fund’s securities.

A large purchase of a mutual fund’s securities will create a relatively large cash position in that mutual fund’s portfolio. The presence of this cash position may adversely impact the performance of the mutual fund, and the investment of this cash position may result in significant incremental trading costs, which are borne by all of the investors in the mutual fund.

Conversely, a large redemption of a mutual fund’s securities may require the mutual fund to sell portfolio investments so that it can pay the redemption proceeds. This sale may impact the market value of those portfolio investments and result in significant incremental trading costs, which are borne by all of the investors in the mutual fund, and it may accelerate or increase the payment of capital gains distributions to these investors.

Legislation Risk

Securities, tax, or other regulators make changes to legislation, rules, and administrative practice. Those changes may have an adverse impact on the value of a mutual fund.

Market Risk

There are risks associated with being invested in the equity and fixed-income markets generally. The market value of a mutual fund’s investments will rise and fall based on specific company developments and broader equity or fixed-income market conditions. Market value will also vary with changes in the general economic and financial conditions in the countries where the investments are based.

Portfolio Manager Risk

A mutual fund is dependent on its portfolio manager or sub-advisor to select its investments. A balanced fund or an asset allocation fund is also dependent on its portfolio manager or sub-advisor to decide what proportion of the mutual fund’s assets to invest in each asset class. Mutual funds are subject to the risk that poor security selection or asset allocation decisions will cause a mutual fund to underperform relative to its benchmark or other mutual funds with similar investment objectives.

Prepayment Risk

Certain fixed-income securities, including mortgage-backed or other asset-backed securities, can be prepaid before maturity. If a prepayment is unexpected or if it occurs faster than predicted, the fixed-income security may pay less income and its value may decrease. In addition, because issuers generally choose to prepay when interest rates are falling, the mutual fund may have to reinvest this money in securities that have lower rates.

Securities Lending, Repurchase and Reverse Repurchase Transaction Risk

Certain mutual funds are eligible to enter into securities lending, repurchase and reverse repurchase transactions. In a securities

lending transaction, the mutual fund lends its securities through an authorized agent to another party (often called a “**counterparty**”) in exchange for a fee and a form of acceptable collateral. In a repurchase transaction, the mutual fund sells its securities for cash through an authorized agent, while, at the same time, it assumes an obligation to repurchase the same securities for cash (usually at a lower price) at a later date. In a reverse repurchase transaction, the mutual fund buys securities for cash while, at the same time, it agrees to resell the same securities for cash (usually at a higher price) at a later date. We have set out below some of the general risks associated with securities lending, repurchase and reverse repurchase transactions:

- When entering into securities lending, repurchase and reverse repurchase transactions, the mutual fund is subject to the credit risk that the counterparty may go bankrupt or may default under the agreement and the mutual fund would be forced to make a claim in order to recover its investment.
- When recovering its investment on a default, a mutual fund could incur a loss if the value of the securities loaned (in a securities lending transaction) or sold (in a repurchase transaction) has increased relative to the value of the collateral held by the mutual fund.
- Similarly, a mutual fund could incur a loss if the value of the portfolio securities it has purchased (in a reverse repurchase transaction) decreases below the amount of cash paid by such mutual fund to the counterparty, plus interest.

Senior Loans Risk

The risks associated with senior loans are similar to the risks of high-yield bonds, although senior loans are typically senior and secured, whereas high-yield bonds are often subordinated and unsecured. Investments in senior loans are typically below investment grade and are considered speculative because of the credit risk of their issuers.

Historically, such companies have been more likely to default on their payments of interest and principal owed than companies that issue investment-grade securities, and such defaults could reduce the NAV and monthly income distributions of these Funds. These risks may be more pronounced in the event of an economic downturn. Under certain market conditions, the demand for senior loans may be reduced, which may, in turn, reduce prices. No active trading market may exist for certain senior loans, which may impair the ability of a holder of a senior loan to realize full value in the event of the need to liquidate such asset. Adverse market conditions may impair the liquidity of some actively traded senior loans. Although these loans are generally secured by specific collateral, there can be no assurance that such collateral would be available or would otherwise satisfy the borrower’s obligation in the event of non-payment of scheduled interest or principal or that such collateral could be readily liquidated. In these circumstances, the holder of a loan may not receive payments to which it is entitled.

Senior loans may also be subject to certain risks due to longer settlement periods than the settlement periods associated with other securities. Settlement of transactions in most securities occurs two days after the trade date and is referred to as “T+2” settlement. In

contrast, transactions in senior loans may have longer than normal settlement periods and have settlement periods that exceed T+2. Unlike equities trades, there is no central clearinghouse for loans, and the loan market has not established enforceable settlement standards or remedies for failure to settle. This potentially longer settlement timeline may create a mismatch between the settlement time for a senior loan and the time in which an investment fund holding the senior loan as an investment must settle redemption requests from its investors.

Series Risk

A mutual fund may offer more than one series, including series that are sold under different simplified prospectuses. If one series of such a mutual fund is unable to pay its expenses or satisfy its liabilities, then the assets of the other series of that mutual fund will be used to pay the expenses or satisfy the liability. This could lower the investment returns of the other series.

Short-Selling Risk

Certain mutual funds are permitted to engage in a limited amount of short selling. A short sale is a transaction in which a mutual fund sells, on the open market, securities that it has borrowed from a lender for this purpose. At a later date, the mutual fund purchases identical securities on the open market and returns them to the lender. In the interim, the mutual fund must pay compensation to the lender for the loan of the securities and provide collateral to the lender for the loan.

Short selling involves certain risks:

- There is no assurance that the borrowed securities will decline in value during the period of the short sale by more than the compensation paid to the lender, and securities sold short may instead increase in value.
- A mutual fund may experience difficulties in purchasing and returning borrowed securities if a liquid market for the securities does not exist at that time.
- A lender may require a mutual fund to return borrowed securities at any time. This may require the mutual fund to purchase such securities on the open market at an inopportune time.
- The lender from whom a mutual fund has borrowed securities, or the prime broker who is used to facilitate short selling, may become insolvent and the mutual fund may lose the collateral it has deposited with the lender and/or the prime broker.

Small Company Risk

A mutual fund may make investments in equities and, sometimes, fixed-income securities issued by smaller capitalization companies. These investments are generally riskier than investments in larger companies for several reasons. Smaller companies are often relatively new and may not have an extensive track record. This lack of history makes it difficult for the market to place a proper value on these companies. Some of these companies do not have extensive financial resources and, as a result, they may be unable to react to

events in an optimal manner. In addition, securities issued by smaller companies are sometimes less liquid, meaning there is less demand for the securities in the marketplace at a price deemed fair by sellers.

Small/New Fund Risk

A new or smaller mutual fund's performance may not represent how the mutual fund is expected to or may perform in the long term if and when it becomes larger and/or has fully implemented its investment strategies. For both new mutual funds or smaller mutual funds, investment positions may have a disproportionate impact, either positive or negative, on the mutual fund's performance. New and smaller mutual funds may also require a period of time before they are fully invested in a representative portfolio that meets their investment objectives and strategies. A mutual fund's performance may be more volatile during this "ramp-up" period than it would be after the mutual fund is fully invested. Similarly, an investment strategy of a new or smaller mutual fund may require a longer period of time to show returns that are representative of the strategy. New mutual funds have limited performance histories for investors to evaluate and they may not attract sufficient assets to achieve investment and trading efficiencies. If a new or smaller mutual fund were to fail to successfully implement its investment objective or strategies, performance may be negatively impacted, and any resulting redemptions could create larger transaction costs for the mutual fund and/or tax consequences for investors.

Taxation Risk

Each of the Funds is expected to qualify at all material times as a "mutual fund trust" under the Tax Act. If a Fund does not qualify or ceases to qualify as a mutual fund trust under the Tax Act, the income tax considerations described under the heading "**Income Tax Considerations**" could be materially and adversely different in some respects. For example, if a Fund does not qualify or ceases to qualify as a mutual fund trust (and is not a registered investment) the units of the Fund will not be qualified investments for registered plans under the Tax Act. The Tax Act imposes penalties on the annuitants of an RRSP or RRIF, the holder of a TFSA or RDSP or the subscriber of an RESP (each as defined below) for the acquisition or holding of non-qualified investments.

There can be no assurance that the Canada Revenue Agency (the "CRA") will agree with the tax treatment adopted by the Fund in filings its tax return. The CRA could reassess the Fund on a basis that results in tax being payable by the Fund or in an increase in the taxable component of distributions considered to have been paid to

securityholders. A reassessment by the CRA may result in the Fund being liable for unremitted withholding tax on prior distributions to non-resident securityholders. Such liability may reduce the NAV of units of the Fund.

Tracking Risk

Certain mutual funds may invest substantially all of their assets in one or more other funds. This occurs where the mutual fund owns securities issued by another fund (an "**Underlying Fund**").

The performance of a mutual fund that invests in an Underlying Fund may differ from the performance of the fund(s) in which it invests in the following respects:

- The fees and expenses of the mutual fund may differ from the fees and expenses of the funds(s) in which it invests.
- There may be a lag between the date on which the mutual fund issues securities to its investors and the date on which the mutual fund invests in other funds.
- Instead of investing in other funds, the mutual fund may hold cash or short-term debt securities in order to satisfy anticipated redemption requests.

US Dollar Funds

The NAV for each of Mackenzie USD Ultra Short Duration Income Fund, Mackenzie USD Unconstrained Fixed Income Fund and Mackenzie USD Global Strategic Income Fund (the "**US Dollar Funds**") is calculated in U.S. dollars. For these Funds, most investments in non-U.S. based issuers (including Canadian issuers) will be purchased in currencies other than U.S. dollars. When these non-U.S. investments are purchased in a currency other than U.S. dollars, the value of the investment will be affected by the value of the U.S. dollar relative to the value of the other currency. If the U.S. dollar rises in value relative to the other currency but the value of the non-U.S. based investment otherwise remains constant, the value of the investment in U.S. dollars will have fallen. Similarly, if the value of the U.S. dollar has fallen relative to the other currency, the value of the US Dollar Fund's investment will have increased.

Some US Dollar Funds may use derivatives such as options, futures, forward contracts, swaps and customized types of derivatives to hedge against losses caused by changes in exchange rates. Please see the "**Investment Strategies**" section of each Fund description in **Part B** of this simplified prospectus.

ORGANIZATION AND MANAGEMENT OF THE FUNDS

<p>Manager Mackenzie Financial Corporation 180 Queen Street West Toronto, Ontario M5V 3K1</p>	<p>We manage the overall business of each of the Funds, including selecting the portfolio management team for each Fund's portfolio, providing each Fund with accounting and administration services, and promoting sales of each Fund's units through independent financial advisors in each province and territory of Canada.</p>
<p>Trustee Mackenzie Financial Corporation Toronto, Ontario</p>	<p>Each of the Funds is organized as a unit trust. When you invest in the Funds, you are buying units of the trust. The trustee holds the actual title to the cash and securities owned by the Funds on your behalf.</p>

ORGANIZATION AND MANAGEMENT OF THE FUNDS

<p>Portfolio Manager Mackenzie Financial Corporation Toronto, Ontario</p>	<p>In our capacity as manager, we have ultimate responsibility for and directly provide, unless indicated, the portfolio management services provided to the Funds.</p> <p>Some of the Funds use sub-advisors appointed by us to provide advice for a portion or for the entire portfolio. If a sub-advisor has been appointed, they are named in the Fund's "Fund Details" in Part B.</p> <p>The portfolio manager or sub-advisor makes the purchase and sale decisions for securities in a Fund's portfolio.</p> <p>Under securities law, we are required to advise you that, where portfolio management services are provided by a portfolio manager or sub-advisor located outside of Canada, it may be difficult to enforce any legal rights against them because all or a substantial portion of their assets are likely to be outside of Canada. The sub-advisors China Asset Management Company, Mackenzie Investments Corporation, Impax Asset Management, LLC, Rockefeller Capital Management, TOBAM S.A.S. and The Putnam Advisory Company, LLC are located outside of Canada. International sub-advisors are not fully subject to the requirements of Canadian securities legislation, including proficiency, capital, insurance, record keeping, segregation of funds and securities, and statements of account and portfolio. We are responsible for the investment advice given to the Mackenzie Funds by international sub-advisors.</p> <p>Furthermore, our international sub-advisors may, on behalf of the Funds, trade in commodity future contracts and commodity future options traded on commodity future exchanges outside of Canada and cleared through clearing corporations outside of Canada. There may be difficulty in enforcing any legal rights against these sub-advisors because they are resident outside of Canada and all or substantially all of their assets are situated outside of Canada. However, we are responsible for any loss that arises out of the failure of the sub-advisor to meet their standard of care.</p>
<p>Custodian Canadian Imperial Bank of Commerce ("CIBC") Toronto, Ontario</p>	<p>Except as otherwise stated, the custodian has custody of the units in each Fund's portfolio.</p>
<p>Registrar Mackenzie Financial Corporation Toronto, Ontario</p>	<p>As registrar, we keep track of the owners of units of the Funds, process purchase, switch and redemption orders, issue investor account statements and issue annual tax-reporting information.</p>
<p>Auditor Deloitte LLP Toronto, Ontario</p>	<p>The auditor audits the annual financial statements of each Fund and provides an opinion on whether or not the annual financial statements are fairly presented in accordance with International Financial Reporting Standards.</p>
<p>Securities Lending Agents CIBC Toronto, Ontario The Bank of New York Mellon New York, New York</p>	<p>CIBC and The Bank of New York Mellon act as agents for securities lending transactions for the Funds that engage in securities lending.</p>
<p>Mackenzie Funds' Independent Review Committee</p>	<p>The mandate of the Mackenzie Funds' Independent Review Committee ("IRC") is to review, and provide input on, our written policies and procedures that deal with conflict-of-interest matters in respect of a Fund and to review and, in some cases, approve conflict-of-interest matters. This includes reviewing a Fund's holdings, purchases and sales of securities of companies related to us. The IRC may also approve certain mergers involving the Funds and any change of the auditor of the Funds. Investor approval will not be obtained in these circumstances, but the affected Fund's investors will be sent a written notice at least 60 days before the effective date of any such merger or change of auditor. The IRC presently consists of the following four members: Robert Hines (Chair), George Hucal, Scott Edmonds and Atul Tiwari.</p> <p>Each member of the IRC is independent of us, the Mackenzie Funds and any party related to us. The IRC prepares, at least annually, a report of its activities for investors. This report is available on our website at www.mackenzieinvestments.com, or you may request a copy, at no cost to you, by contacting us at service@mackenzieinvestments.com.</p> <p>Additional information about the IRC is available in the annual information form.</p>

Fund of Funds

Under NI 81-102, a mutual fund may invest some or all of its assets in an Underlying Fund.

We may vote the securities of any Underlying Fund that are owned by a Fund if the Underlying Fund is not managed by us. If an Underlying Fund is managed by us or one of our associates or affiliates, we will not vote the securities of any Underlying Fund

owned by a Fund but will instead decide if it is in your best interests for you to vote individually on the matter. Generally, for routine matters, we will decide that it is not in your best interests for you to vote individually. However, if we decide that it is in your best interests, then we will ask you for instructions on how to vote your proportionate share of the Underlying Fund securities owned by the Fund, and we will vote accordingly. We will only vote the proportion of the Underlying Fund securities for which we have received instructions.

PURCHASES, SWITCHES AND REDEMPTIONS

Funds and Series

Each Fund is entitled to the total return (including realized and unrealized gains) on the portfolio assets of that Fund less certain fees and expenses.

Series of Units

Each Fund may issue an unlimited number of series of units and may issue an unlimited number of units within each series. The Funds may offer new series, or cease to offer existing series, at any time, without notification to, or approval from you. The expenses of each series of each Fund are tracked separately and a separate NAV is calculated for each series. Although the money which you and other investors pay to purchase units of each series, and the expenses of each series, are tracked on a series-by-series basis in your Fund's administration records, the assets of all series of your Fund are combined into a single pool to create one portfolio for investment purposes.

There are currently 37 series of units available under this simplified prospectus: Series A, AR, B, C, D, DA, DF, F, F5, F8, FB, FB5, G, GP, I, O, O5, PW, PWR, PWB, PWF, PWF5, PWF8, PWFB, PWFB5, PWT5, PWT8, PWX, PWX5, PWX8, S5, S8, SC, T5, T8, R and Investor Series units. The particular series available within each Fund under this simplified prospectus are listed on the front cover and in the Part B of each Fund. The minimum investment and eligibility requirements of the series offered under this simplified prospectus are detailed below.

Some of the Funds have additional series which are offered under separate simplified prospectuses. Series R units are only offered on an exempt-distribution basis. Some Funds have other series that are closed to new sales. These series do not generally appear on the front cover or in Part B of any Fund and are not offered under this simplified prospectus.

Series Eligibility and/or Suitability Requirements

The series are subject to their respective minimum investment requirements, as detailed below under "**Minimum Initial and Subsequent Investment Requirements**".

In addition to the minimum investment requirements, the table below describes the suggested series suitability (your financial advisor can best assist you with determining the right series for you) and any further series eligibility requirements you must meet to qualify to purchase the series. Mackenzie does not monitor the appropriateness of any particular series of a Fund for you, including units that you hold through a discount broker account.

SERIES	SUGGESTED SUITABILITY	ADDITIONAL ELIGIBILITY REQUIREMENTS
Series A, B, C, SC, S5, S8, T5, T8 & Investor Series	Retail investors; Series S5, S8, T5 and T8 are for investors who want to receive a monthly cash flow.	None.
Series AR	Retail investors in a Registered Disability Savings Plan offered by Mackenzie Investments (" Mackenzie Investments RDSP ").	Only permitted if purchased in your Mackenzie Investments RDSP account.
Series D	Retail investors.	Only permitted with confirmation from your dealer that you are investing through a discount brokerage account or other account approved by us, and your dealer has entered into an agreement with us relating to the distribution of these units.
Series DA & DF	Retail investors in our One-Step Dollar Cost Averaging Service.	Only permitted if you are part of our One-Step Dollar-Cost Averaging Service. Please refer to " Optional Services " for details about this service. Series DF is only permitted with confirmation from your dealer that you are enrolled in a dealer-sponsored fee-for-service or wrap program, you are subject to an asset-based fee rather than commissions on each transaction and your dealer has entered into an agreement with us relating to the distribution of these units. Also available to our employees and employees of our subsidiaries*, our directors, and, at our discretion, to former employees of our subsidiaries.

SERIES	SUGGESTED SUITABILITY	ADDITIONAL ELIGIBILITY REQUIREMENTS
Series F, F5 & F8	Retail investors; Series F5 and F8 are for investors who want to receive a monthly cash flow.	Only permitted with confirmation from your dealer that you are enrolled in a dealer-sponsored fee-for-service or wrap program, you are subject to an asset-based fee rather than commissions on each transaction and your dealer has entered into an agreement with us relating to the distribution of these units. Also available to our employees and employees of our subsidiaries*, our directors, and, at our discretion, to former employees of our subsidiaries.
Series FB & FB5	Retail investors; Series FB5 is for investors who want to receive a monthly cash flow.	Only permitted if you negotiate an advisor service fee with your dealer, which is specified within a Series FB/FB5 agreement with us, and if your dealer has entered into an agreement with us relating to the distribution of these units.
Series G	Retail investors in Group Plans.	Only permitted if you are a member of a group registered retirement savings plan, deferred profit-sharing plan, tax-free savings account or pension plan (a “ Group Plan ”). We may, at any time and in our sole discretion, make this series available for purchase by other group plan types.
Series GP	Retail investors in our Guided Portfolio Service.	Only available in Mackenzie Canadian Money Market Fund and permitted if you are participating in our Guided Portfolio Service. Please refer to “ Optional Services ” for details about this service.
Series I	Retail investors in a Qualified Group Plan (“ Series I for Qualified Group Plans ”).	Only permitted if you are in a Qualified Group Plan, which is a Group Plan, approved by us, with a minimum of \$10,000,000 in assets.
Series O & O5	For investors enrolled in Mackenzie Portfolio Architecture Service or Open Architecture Service and certain institutional investors; Series O5 is for investors who want to receive a monthly cash flow. Individual clients may hold Series O through an account with a dealer pursuant to a separate agreement with such dealer.	Only permitted if you have entered into a Series O or O5 account agreement with us, which specifies the fees applicable to your account. Also available to certain of our employees and employees of our subsidiaries and, at our discretion, to former employees and to relatives of current and former employees.
Series PW, PWB, PWT5 & PWT8	For certain high net worth investors through our Private Wealth Program; Series PWT5 and PWT8 are for investors who want to receive a monthly cash flow. These investors typically have large investments in the Funds, and may include high net worth investors, institutional investors, other investment funds, and other investors.	None.
Series PWR	For certain high net worth investors through our Private Wealth Program; Series PWR is for investors in a Registered Disability Savings Plan offered by Mackenzie Investments (“ Mackenzie Investments RDSP ”).	Only permitted if purchased in your Mackenzie Investments RDSP account.
Series PWF, PWF5, & PWF8	For certain high net worth investors through our Private Wealth Program who are invested in the Pools ; Series PWF5, and PWF8 are for investors who want to receive a monthly cash flow. These investors typically have large investments in the Funds, and may include high net worth investors, institutional investors, other investment funds, and other investors.	Only permitted with confirmation from your dealer that you are enrolled in a dealer-sponsored fee-for-service or wrap program, you are subject to an asset-based fee rather than commissions on each transaction and your dealer has entered into an agreement with us relating to the distribution of these units.
Series PWFB & PWFB5	For certain high net worth investors through our Private Wealth Program; Series PWFB5 is for investors who want to receive a monthly cash flow. These investors typically have large investments in the Funds, and may include high net worth investors, institutional investors, other investment funds, and other investors.	Only permitted if you negotiate an advisor service fee with your dealer, which is specified within a Series PWFB/PWFB5 agreement with us, and if your dealer has entered into an agreement with us relating to the distribution of these units.
Series PWX, PWX5 & PWX8	For certain high net worth investors through our Private Wealth Program; Series PWX5 and PWX8 are for investors who want to receive a monthly cash flow. These investors typically have large investments in the Funds and may include high net worth investors, institutional investors, other investment funds, and other investors.	Only permitted if you negotiate an advisor service fee with your dealer, which is specified within a Series PWX/PWX5/PWX8 agreement with us.

SERIES	SUGGESTED SUITABILITY	ADDITIONAL ELIGIBILITY REQUIREMENTS
--------	-----------------------	-------------------------------------

* If the employee is the Chief Investment Officer or lead portfolio manager of the Fund, then, for Series F, the employee will receive a management fee reduction, as described in the "Management Fees" section of the "Fees and Expenses Payable by the Funds" table. The effect of this management fee reduction is that the employee will not pay management fees but will still bear his or her pro rata share of fund administration fees and fund costs borne by all Series F investors.

Fund Eligibility Requirements

You may not purchase units of any series of these Funds if you hold these securities within a Mackenzie Investments-administered registered plan:

- Mackenzie USD Unconstrained Fixed Income Fund,
- Mackenzie USD Global Strategic Income Fund,
- Mackenzie USD Ultra Short Duration Income Fund.

Please see the "Optional Services" – "Registered Plans" section of this document for more information on which plan types are considered registered plans.

Minimum Initial and Subsequent Investment Requirements

There is currently no minimum initial investment requirement for Series AR. For other series, the minimum initial investment requirements are described in the table below. **Please note that we reserve the right to increase, decrease, waive or remove the minimum initial investment requirement to purchase any series of the Funds at any time.**

Table 1: Minimum Initial Investment Requirements

Series	Minimum Initial Investment ¹
Series A, B, C, D, F, FB, FB5, G, GP, I and SC units	\$500
Series DA and DF units	\$1,000
Series F5, F8, S5, S8, T5, T8 and Investor Series units	\$5,000
For Series PW, PWB, PWF, PWF5, PWF8, PWFB, PWFB5, PWR, PWT5, PWT8, PWX, PWX5 and PWX8 units	\$100,000
Series O and O5 units	\$500,000

¹ For the US Dollar Funds, the above minimums are calculated in U.S. dollars.

The minimum subsequent investment amount varies as follows:

- For Series DA and DF, which are available in connection with our One-Step Dollar-Cost Averaging Service, no subsequent investments may be made into an existing dollar-cost averaging program that you have established through our One-Step Dollar-Cost Averaging Service. Instead, any subsequent investments of \$1,000 or greater will be applied to start a new dollar-cost averaging program through that service.

- For all other series, the minimum subsequent investment is \$100 per Fund unless you buy through a pre-authorized contribution plan, in which case, the minimum is \$50 per Fund.

We reserve the right to change or waive the minimum subsequent investment requirement to purchase any series of the Funds.

Account Aggregation Rules for Minimum Investment Requirements

For the purpose of satisfying the minimum investment requirements described in this section, each of the following is an "Eligible Account":

- an account belonging to you;
- an account belonging to your spouse, or a family member residing at the same address;
- an account belonging to you and your spouse jointly;
- an account belonging to your dependent minor(s);
- an account belonging to a corporation of which you or your spouse own more than 50% of the equity, and control more than 50% of the voting shares;
- Mackenzie Investments Charitable Giving Program account(s) for which you, or any family member residing at the same address as you, act as a donor.

For Series O or O5 units, you may combine the value of up to two Eligible Accounts, excluding the value of any of our segregated funds held in these accounts, to satisfy the minimum initial investment requirements. If you satisfy the minimum initial investment requirements in this way, you may purchase any of these series in any of your Eligible Accounts, provided you meet all other eligibility requirements for those series.

In this Prospectus, Series PW, PWR, PWB, PWF, PWF5, PWF8, PWFB, PWFB5, PWT5, PWT8, PWX, PWX5 and PWX8 are collectively referred to as the "Private Wealth Series". For the Private Wealth Series of the Funds other than the Pools, as applicable, if you invest more than \$100,000 (calculated at par for any US dollar Funds that you hold) in units of Mackenzie Funds across your Eligible Accounts, we may waive the minimum initial investment amount for an Eligible Account in any Private Wealth Series of the Funds other than the Pools. For the Private Wealth Series of the Pools, as applicable, if you invest more than \$250,000 (calculated at par for any US Dollar Funds that you hold) in securities of Mackenzie Funds across your Eligible Accounts, we may waive the minimum initial investment amount for an Eligible Account in any Private Wealth Series of the Pools. You are responsible for ensuring your advisor is aware of all Eligible Accounts that should be linked

in order to waive the minimum initial investment amount. We will link your Eligible Accounts only after your advisor has communicated your Eligible Account information to us. Generally, neither Mackenzie nor your advisor has the ability to independently determine what accounts should be linked. Mackenzie will, however, automatically link accounts belonging to one individual if the address associated with each account is identical and they have the same dealer representative code. This means that if you have two or more accounts with the same advisor, provided your advisor maintains these accounts under the same dealer representative code, they will be automatically linked by us. **Accounts will not be automatically linked if you hold Funds with more than one advisor or dealer.** For example, if you also hold Funds in a discount brokerage account, that account will not be automatically linked with an account you hold with your advisor.

Failure to Maintain the Minimum Investment Requirements

The table below sets out the switches or redemptions that we may process if the market value of your investment in a series falls below the specified minimum investment because you redeem units:

Table 2

If you are invested in this series:	We may redeem your investment or switch it into this series ¹ :
Series A, B, C, D, DA, DF, F, F5, F8, FB, FB5, G, GP, I, S5, S8, SC, T5, T8, and Investor Series ³	We may redeem your units, close the account, and return the proceeds of redemption to you.
Series PW, PWX, PWF, PWF5, PWF8, PWFB, PWFB5, PWX5 & PWT5 of the Pools ^{2,3}	We may redeem your units, close the account, and return the proceeds of redemption to you.
Series O & Series O5 ³	Series PWX or Series PWX5, if available, as applicable. Otherwise, Series SC or S5, if available; otherwise, Series A or T5, as applicable.
Series PWX, PWX5 & PWX8 of the Funds other than the Pools ³	Series SC, S5 or Series S8, if available, as applicable; otherwise, Series A, T5 or T8, if available, as applicable.
Series PW, PWT5 & PWT8 of Funds other than the Pools	Series SC, S5, S8, if available, as applicable; otherwise, Series A, T5 or T8, as applicable.
Series PWB	Series B
Series PWR	Series AR
Series PWFB & PWFB5 of Funds other than the Pools	Series FB or Series FB5, as applicable.

¹ For the US Dollar Funds, the amounts above are calculated in U.S. dollars.

² If the Series PW, PWX, PWF, PWFB, PWFB5, PWF5, PWF8, PWX5 or PWT5 securities of the Pools are held as part of the Charitable Giving Program then we will not redeem your units.

³ The switch or redemption will only be processed after we have provided you with 30 days' prior notice.

You should be aware that the management fee rate and administration fee rate charged to the series to which you are

switched to may be higher than the series of units in which you were invested. You should discuss investing additional money in your account with your financial advisor or dealer during the notice period so that the status of your investment can be maintained. We will not switch or redeem your investment or ask for the increase to the specified minimum investment amount if the account has fallen below that level as a result of a decline in the NAV rather than a redemption of your units.

Failure to Maintain Eligibility Requirements

The table below sets out the switches that we may process if you are no longer eligible for Series D, DF, F, F5, F8, FB, FB5, PWF, PWF5, PWF8, PWFB or PWFB5 units because, as applicable, you are no longer enrolled in a dealer-sponsored fee-for-service or wrap program; you no longer pay a negotiated advisor service fee to your dealer; or you no longer hold your units through a discount brokerage account.

Table 3

If you are invested in this series:	We may switch your investment into this series:
Series D, F, FB or PWFB	Series SC, if available; otherwise, Series A, B or C
Series DF	Series DA
Series F5, FB5 or PWFB5	Series S5, if available; otherwise, Series T5
Series F8	Series S8, if available; otherwise, Series T8
Series PWF, PWF5, PWF8, PWFB or PWFB5 of the Pools	Series PW, PWT5 or PWT8, if available and if you continue to meet the eligibility requirements for this series; otherwise, we may redeem your units, close the account and return the proceeds of redemption to you.

If you are no longer eligible for a Mackenzie Investments RDSP and therefore can no longer hold Series AR units, we may redeem your units and return the proceeds to the beneficiary. If a request is received to transfer the proceeds (less the assistance holdback amount) to another account type, the Series AR units will be redeemed and the proceeds will be transferred to Series SC of the Fund (if available; otherwise, Series A, B, or C) in the beneficiary's name. The assistance holdback amount is the total amount of grants and bonds received from the government within the last 10 years. If you redeem prior to this period, the assistance holdback amount must be repaid to the government.

For Series G units, if you are no longer part of a group plan or if your dealer no longer agrees to sell Series G units, you will no longer be permitted to purchase or switch into Series G units. For Series I units, if you are no longer in a Qualified Group Plan, you will no longer be permitted to purchase or switch into Series I units.

Changes in Series Minimum Investment Requirements or Eligibility Conditions

We may change the minimum investment requirements or terms of eligibility for prospective investors in the various series of units at any time.

We may redeem your units, without notice, if we determine in our discretion that

- you are engaging in inappropriate or excessive short-term trading;
- for purposes of applicable securities law or tax law, you have become a resident of a foreign jurisdiction where such foreign residency may have negative legal, regulatory or tax implications for a Fund; or
- it would be in the best interest of the Fund to do so.

You remain responsible for all tax consequences, costs and losses, if any, associated with the redemption of units of a Fund upon the exercise by us of our right to switch or redeem your units.

Series Offering Regular Cash Flow

Certain series (each a “**Fixed Rate Distribution Series**”) are designed specifically for investors who wish to receive a regular monthly cash flow from a Fund. Each Fixed Rate Distribution Series offered by a Fund is identified by an asterisk (*) in the Fund’s “**Fund Details**” table in Part B.

For each Fixed Rate Distribution Series, the amount of the monthly distribution will equal the NAV per security of that series on the last day of the previous calendar year (or on the start date of the series, if the series started in the current calendar year), multiplied by the distribution rate applicable to that series and divided by 12. **The distribution rates may be adjusted from time to time at our discretion. You should be aware that the distribution rate may be higher than the Fund’s rate of return or the yield of its portfolio.**

The monthly distributions on a Fixed Rate Distribution Series will be reinvested, without charge, in additional units of that series, unless you elect in advance to receive them in cash. You may customize the amount of the monthly distributions that you receive in cash by participating in our Flexible Payout Service. You may not elect to receive these distributions in cash if your units are held in a Mackenzie Investments-administered registered plan, unless that registered plan is a TFSA, in which case you may elect to have these distributions paid from the TFSA. Your Fund holdings that result from any reinvested distributions on Fixed-Rate Distribution Series units may be subject to redemption fees if you purchased the Fund under a Deferred Sales Charge purchase option (defined below). The applicable redemption fee rate will be based on the original date that you purchased the applicable Fixed-Rate Distribution Series units. See the “**Buying, Selling and Switching Units of the Funds**” section below for more information on Deferred Sales Charge purchase options.

Buying, Selling and Switching Units of the Funds

You may purchase units of the Funds or request switches through your financial advisor or dealer. You may redeem units of the Funds through your financial advisor or dealer or through us. The financial advisor or dealer you select is your agent to provide you with investment recommendations to meet your own risk/return objectives and to place orders to purchase, switch, or redeem on your behalf. We are not liable for the recommendations given to you by your financial advisor and we are entitled to rely on electronic or other instructions that a financial advisor or dealer provides to us without verifying your instructions.

If we receive your order before 4:00 p.m. (Toronto time) on any day on which the Toronto Stock Exchange (the “**TSX**”) is open for trading (a “**trading day**”), we will process your order at the NAV calculated later that day. Otherwise, we will process your order at the NAV calculated on the next trading day. We may process orders at an earlier time if the TSX closes for trading earlier on a particular day. (Orders received after that earlier closing time would be processed on the next trading day.)

We calculate the NAV of each Fund at the close of trading on the TSX on each trading day. We calculate a NAV for each series of units of each Fund in the following manner:

- **adding** up the series’ proportionate share of the cash, portfolio securities and other assets of the Fund;
- **subtracting** the liabilities applicable to that series of units (which includes the series’ proportionate share of common liabilities, plus liabilities directly attributable to the series); and
- **dividing** the net assets by the total number of units of that series owned by investors.

We must receive the appropriate documentation and payment for the units purchased within two (2) trading days of receiving your purchase order (one (1) trading day for Mackenzie Canadian Money Market Fund). We are entitled to reject any purchase order, but we can only do so within one (1) day of receiving it. If we reject an order, we will return immediately to your dealer any monies we have received from you in connection with that order, without interest.

If we have received your payment but the documentation for your purchase is incomplete, we will invest your money in Series SC units of Mackenzie Canadian Money Market Fund, unless your account is a Mackenzie Investments RDSP, in which case, we will invest your money in Series AR units of Mackenzie Canadian Money Market Fund.

Once we know the Fund(s) you have selected and we have received your documentation in good order, we will switch this investment into the Fund(s) you have selected, without any additional charge, at the NAV(s) of the Fund(s) on that switch date.

We offer four main purchase options:

- the sales charge purchase option (“**SCS**”),
- the low-load 2 purchase option (“**LL2**”),
- the low-load 3 purchase option (“**LL3**”), and

- the redemption charge purchase option (“RCS”).

Each of the low-load 2 purchase option, the low-load 3 purchase option and the redemption charge purchase option is a “Deferred Sales Charge” purchase option. **Please note all Deferred Sales Charge purchase options will cease in accordance with the Ontario Securities Commission’s proposed rule 81-502 Restrictions on the Use of the Deferred Sales Charge Option for Mutual Funds, which is expected to come into effect on June 1, 2022.** The table below sets out the availability of these purchase options by series.

Table 4

Series	SCS	LL2	LL3	RCS
A, AR, B, C, GP, T5**and T8	✓*	✓	✓	✓
DA	✓		✓	✓
All other series	✓			

* Certain Funds offer Series SC units under the sales charge purchase option. Where a Fund offers Series SC under the sales charge purchase option, it will not offer Series A under the sales charge purchase option because purchasing Series SC under the sales charge purchase option is a lower cost option. For the same reason, Funds that offer Series S5 units under the sales charge purchase option do not offer Series T5 units under this purchase option, and Funds that offer Series S8 units under the sales charge purchase option do not offer Series T8 units under this purchase option.

** LL2 is not offered for Series A, AR, T5 and T8 of the Maximum Diversification Funds, the ETF Portfolio Funds and the Mackenzie Global Women’s Leadership Fund

You may be required to pay a redemption charge on your Series A, AR, B, C, DA, GP, T5 or T8 units purchased under any of the Deferred Sales Charge purchase options in the table above. The redemption charge is a percentage of the value of your investment at the time of redemption and declines at the rates shown under “Redemption Charge Purchase Option”, “Low-Load 2 Purchase Option” and “Low-Load 3 Purchase Option” in the “Fees and Expenses Payable Directly by You” table, which may be found in the “Fees and Expenses” section of this document.

We may waive such redemption charges, in our discretion, where

- the charge is incurred because there are unforeseen and extraordinary personal circumstances related to the settlement of an estate; or
- you redeem your Series AR units because you no longer meet the requirements to qualify for a Mackenzie Investments RDSP or because you are deceased, and the entire proceeds of the redemption are used to purchase a different series of a Fund under the sales charge purchase option.

If you are redeeming Series A, AR, B, C, DA, GP, T5 or T8 units that were purchased under a Deferred Sales Charge purchase option and switched from another Mackenzie Fund, the redemption charge rate is based on the date the original units were purchased in the other Fund or the Mackenzie Fund in order to reduce your redemption charge. If, however, you are redeeming Series AR units that were purchased under a Deferred Sales Charge purchase option through a regular investment plan (such as a PAC), and your Series AR units were switched from another series, currently, the

redemption charge rate may be determined on an annual basis, such that, for each year that you owned the original series, we may deem the date of your first purchase of the series in that year as the “original purchase date” for all series purchased in that year.

If you own Series A, B, C, T5 or T8 units that were purchased under a Deferred Sales Charge purchase option (and the series were not purchased as part of our Charitable Giving Program), we will automatically switch your units into the sales charge purchase option of the same series of the same Fund on the second Friday of the month following the expiry of your redemption fee schedule, subject to certain exceptions outlined in the paragraph below. In all cases where we are switching you within the same series, your management fees will not change. If instead you would like such units, upon the expiry of your redemption schedule, to be switched to a fee-for service series, you may participate in our **Systematic DSC to Fee-for-Service Series Switching Program**. Please see the “Optional Services” section of this simplified prospectus for more details about this service.

For series of certain Funds, outlined in the table below, that do not offer both a Deferred Sales Charge purchase option and a sales charge purchase option, we will switch your securities into the sales charge purchase option of a different series of the same Fund on the second Friday of the month following the expiry of your redemption fee schedule. In all cases where we are switching you into a different series of a Fund, your management fees will be reduced. See the “Fees and Expenses” section of this document.

Table 5

Fund	Deferred Sales Charge purchase option Series	Sales charge purchase option Series
Mackenzie Canadian Bond Fund; Mackenzie Canadian Money Market Fund; Mackenzie Canadian Short Term Income Fund; Mackenzie USD Ultra Short-Duration Income Fund; Mackenzie Global Tactical Investment Grade Bond Fund; Mackenzie Investment Grade Floating Rate Fund; Mackenzie USD Unconstrained Fixed Income Fund	A	SC
Mackenzie Floating Rate Income Fund; Mackenzie Global Tactical Bond Fund; Mackenzie North American Corporate Bond Fund; Mackenzie Strategic Bond Fund;	A T5	SC S5
Mackenzie Unconstrained Fixed Income Fund	A T8	SC S8

Upon the automatic switch into the sales charge purchase option, the trailing commission paid to your dealer will be as shown in the “Dealer Compensation” section of this document. Note that the increase in trailing commission on the switch, as shown in “Dealer Compensation”, would have increased in any case since, generally,

the trailing commission automatically increased upon the completion of your redemption fee schedule to the equivalent amount of the trailing commission paid in respect of the sales charge purchase option of the applicable Fund.

There are no charges levied when we implement this switch.

If you originally purchased your Deferred Sales Charge securities under the U.S. Dollar Settlement Option and you are automatically switched into the sales charge purchase option, you will continue to hold your securities under the U.S. Dollar Settlement Option after the automatic switch. Please see the “**U.S. Dollar Settlement Option**” in the “**Optional Services**” section of this simplified prospectus for more details about this service.

If you hold Series A, AR, B, C, DA, GP, T5 or T8 securities of a Fund purchased under a Deferred Sales Charge purchase option, you can redeem the following amounts of those series of securities of a Fund each calendar year without paying a redemption charge (the “**free redemption amount**”):

- up to 10% of the market value of securities of a Fund owned by you as of December 31 of the previous calendar year; plus
- up to 10% of the cost of any new purchases of those securities of that Fund in the current calendar year before the redemption order; less
- any cash distributions from the Fund that you received on the securities of that Fund in the current year.

If your free redemptions plus cash distributions received exceed your free redemption amount in a given year, the excess will carry forward to reduce your free redemption amount in the following year. You cannot carry forward any unused portion of the free redemption amount to another year. Some investors may not be eligible to receive the free redemption amount if they switched securities of other Mackenzie Funds without a free redemption right into securities of the Funds. Refer to the simplified prospectus and annual information form of the Mackenzie Funds originally purchased to determine whether you are eligible. Please refer to the simplified prospectus of the Mackenzie Funds you originally purchased to determine whether you are eligible for a free redemption amount or speak to your financial advisor or dealer. Please refer to the annual information form for additional details in calculating the free redemption amount.

Your choice of purchase option affects the sales charges you, or we, will pay to your dealer, if any, and the amount of sales commissions and other compensation that is paid to your dealer. See the tables in the “**Fees and Expenses**” and “**Dealer Compensation**” sections of this document.

We follow the principles listed below to reduce your redemption charges for Fixed Rate Distribution Series units that you purchase under a Deferred Sales Charge purchase option:

- we will always redeem any available free redemption amounts first;
- then, we will redeem units that you purchased the earliest;

- we will give your units acquired as an automatic reinvestment of Fund distributions the same date of issue as the units on which the distribution was paid; and
- we will give units that you switch within the same purchase option, the same date of issue as the units which you owned before the switch. If the switch is not between units purchased under the same purchase option, the units switched will be dated as of the date of the switch.

The amount that you will receive for your redemption order is based on the Fund’s NAV for the series of units next calculated after your redemption order has been received in good order. Your redemption order must be in writing or, if you have made arrangements with your dealer, by electronic means through your dealer. If you have a security certificate, you must present the certificate at the time of your redemption request. To protect you from fraud, redemptions above certain dollar amounts require that your signature on your redemption order (and certificate, if applicable) be guaranteed by one of a bank, trust company, member of a recognized stock exchange or any other organization satisfactory to us.

Under exceptional circumstances we may be unable to process your redemption order of a Fund. This would most likely occur if market trading has been suspended on stock exchanges, options exchanges or futures exchanges on which more than 50% by value of the Fund’s assets are listed and if the Fund’s portfolio securities cannot be traded on any other exchange that represents a reasonably practical alternative to that Fund. During these periods, securities of the Fund will also not be issued or switched. For the purposes of making this determination, the Fund will be considered to own directly the units owned by any Underlying Funds whose units are owned by the Fund.

You can switch your investment among the series of a Fund available for sale within a Fund or from any of the Funds to another Mackenzie Fund available through your dealer, with the following exceptions:

- you may not switch from a Fund to a mutual fund offered exclusively under the Mackenzie Canada Life Mutual Funds simplified prospectus; and
- if you are in a Mackenzie Investments RDSP, you may only switch your Series AR units to Series AR units of another Fund.

You are permitted to switch from a Canadian-dollar-denominated Mackenzie Fund to a US Dollar Fund. If you do this, there will be a currency conversion between the two currencies using an exchange rate posted at the close of the North American markets. This rate is used to determine the number of US Dollar Fund units you will be issued to implement the switch. You are also permitted to switch from a US Dollar Fund to another Fund that is not a US Dollar Fund. If you do this, there will be a currency conversion, as described above. See the “**Currency Purchase Option**” section of this document for information on purchases of US Dollar Funds.

You are also permitted to make switches among purchase options in accordance with our policies and procedures. **However, if you do this, you may incur additional sales or redemption charges.** To avoid those charges, units you purchased under a particular type of Deferred Sales Charge purchase option should only be switched

for other units to be purchased under that same type of Deferred Sales Charge purchase option.

You may not switch units you bought under the redemption charge purchase option to other units to be purchased under a low-load purchase option, you may not switch between low-load purchase options, and you may not switch units bought under a low-load purchase option to other units to be purchased under the redemption charge purchase option.

For units purchased under the redemption charge purchase option, the low-load 2 purchase option and the low-load 3 purchase option, you may wish to switch your annual free redemption amount to the sales charge purchase option of the Fund you are switching into in order not to lose that entitlement, since the free redemption amount cannot be carried forward to succeeding years. We do not make an automatic switch of the free redemption amount to the sales charge purchase option and only act on proper instructions.

Your dealer is paid a higher trailing commission on sales charge units and, in most cases, will be paid a higher trailing commission if your redemption charge units are switched into another series of units. Please refer to the “**Trailing Commissions**” section of this document.

We have created Series DA and DF of Mackenzie Canadian Money Market Fund to assist you in making investments in other Funds over time, through our One-Step Dollar-Cost Averaging Service. Partial switches out and redemptions of Series DA and DF are available, however they may shorten the duration of your initial 52-week One-Step DCA period. Please refer to the “**Optional Services**” section of this document for a full description of this service.

We have created Series GP units of Mackenzie Canadian Money Market Fund to assist you in making investments into our Guided Portfolio Service. By signing our GPS Client Agreement, when you purchase Series GP units of Mackenzie Canadian Money Market Fund, you have instructed us, on the business day following the settlement of your purchase (and subject to the receipt of a signed Schedule “A” to your Mackenzie GPS Client Agreement, if applicable) to automatically switch your Series GP units to units of the Funds and, where applicable, other Mackenzie Funds, that comprise your chosen portfolio, according to your target allocations. “**Business day**” means any day a Fund is open to accept orders to purchase or redeem units. Please refer to the “**Optional Services**” section of this document for a full description of this service.

The following table summarizes which switch transactions will be taxable to you if your units are held outside a registered plan.

Table 6

Type of Switch	Taxable	Non-Taxable
From any series and/or purchase option to any other series and/or purchase option of the same Fund		✓
All other switches	✓	

Short-Term Trading

We have adopted policies and procedures to detect and deter inappropriate and excessive short-term trading.

We define an inappropriate short-term trade as a combination of a purchase and redemption, including switches between Mackenzie Funds, made within 30 days, which we believe is detrimental to Fund investors and that may take advantage of Funds with investments priced in other time zones or illiquid investments that trade infrequently.

We define excessive short-term trading as a combination of purchases and redemptions, including switches between Mackenzie Funds, that occurs with such frequency within a 30-day period that we believe is detrimental to Fund investors.

Inappropriate short-term trading may harm Fund investors who do not engage in these activities by diluting the NAV of their Fund units as a result of the market timing activities of other investors. Inappropriate and excessive short-term trading may cause a Fund to carry an abnormally high cash balance and/or high portfolio turnover rate, both of which may reduce a Fund’s returns.

All trades that we determine to be inappropriate short-term trades will be subject to a 2% fee. All trades that we determine to be part of a pattern of excessive short-term trading will be subject to a 1% fee. The fees charged will be paid to the Fund.

We may take such additional action as we consider appropriate to prevent further similar activity by you. These actions may include the delivery of a warning to you, placing you or your account(s) on a watch list to monitor your trading activity and the subsequent rejection of further purchases by you if you continue to attempt such trading activity and/or closure of your account.

In determining whether a short-term trade is inappropriate or excessive, we will consider relevant factors, including the following:

- *bona fide* changes in investor circumstances or intentions;
- unanticipated financial emergencies;
- the nature of the Mackenzie Fund;
- past trading patterns;
- unusual market circumstances; and
- an assessment of harm to the Mackenzie Fund or to us.

The following types of redemptions (including switches) will be exempt from short-term trading fees:

- from money market or similar funds. These Funds are exempt from short-term trading fees because they are unlikely to be exposed to the adverse effects of short-term trading. Currently, this group includes the following Funds; however, we may add or remove Funds from this list at any time without notice to you:
 - Mackenzie Canadian Money Market Fund;
 - Mackenzie Canadian Short Term Income Fund; and
 - Mackenzie USD Ultra Short Duration Income Fund.

- from an Underlying Fund by a Fund in a fund-of-funds program or other similar program;
- for our asset allocation programs, excluding manual rebalancing in our Guided Portfolio Service;
- for systematic withdrawal plans;
- redemptions of units received on the reinvestment of income or other distributions;
- redemptions of units to pay management fees, administration fees, operating expenses, fund costs and/or advisor fees with respect to Series FB, FB5, O, O5, PWFB, PWFB5, PWX, PWX5 or PWX8 units;
- redemptions of units to pay Mackenzie Charitable Giving Program fees; and
- automatic rebalancing of your holdings within our Guided Portfolio Service and/or Symmetry Portfolio Service, which will not, in any circumstances other than a manual rebalancing, result in short-term trading fees being charged.

In making these judgments, we seek to act in a manner that we believe is consistent with your best interests. Your interests and the Mackenzie Funds' ability to manage its investments may be adversely affected by inappropriate or excessive short-term trading because, among other things, these types of trading activities can dilute the value of Mackenzie Fund units, can interfere with the efficient management of a Mackenzie Fund portfolio and can result in increased brokerage and administrative costs.

While we will actively take steps to monitor, detect and deter inappropriate and excessive short-term trading, we cannot ensure that such trading activity will be completely eliminated. For example, certain financial institutions may offer alternative investment products to the public that are comprised, in whole or in part, of units of Mackenzie Funds. These institutions may open accounts with us on behalf of multiple investors whose identity and trading activity is not normally recorded on our transfer agent system.

We reserve the right to restrict, reject or cancel, without any prior notice, any purchase or switch order, including transactions that we deem to represent inappropriate or excessive short-term trading.

Currency Purchase Option

The US Dollar Funds conduct all their transactions in U.S. dollars. US Dollar Funds also calculate their NAV per unit in U.S. dollars.

You may purchase securities of a US Dollar Fund with Canadian dollars. If you do this, you will receive the number of units of the US Dollar Fund based on the exchange rate posted at the close of the North American markets on the day you place your trade with us.

Any distributions and redemptions in U.S. dollars are paid by cheque.

OPTIONAL SERVICES

The US Dollar Funds are not eligible for the following Optional Services: Dollar-Cost Averaging Service, Guided Portfolio Service, Open Architecture Service, One-Step Dollar Cost Averaging Service, Portfolio Architecture Service, Pre-Authorized Contribution Plans and Systematic Transfer and Exchange Program.

Flexible Payout Service

If you own units of a Fixed Rate Distribution Series you may participate in our Flexible Payout Service, which will enable you to customize the regular monthly cash distributions you receive on these units.

In order to participate in the Flexible Payout Service, you must first submit a form to us, specifying the Fixed Rate Distribution Series in which you have invested and the portion of the regular monthly distributions paid on these units that you wish to receive in cash. Any distributions not paid to you in cash will be automatically reinvested.

Charitable Giving Program

Our Charitable Giving Program (the "**Program**") is a donor-advised fund program developed by us with the Strategic Charitable Giving Foundation (the "**Foundation**"), a non-profit charitable organization.

Individuals and entities that make irrevocable donations to the Program ("**Donors**") may enjoy the benefits of participating in the Program and setting up a Mackenzie Investments Charitable Giving Program account, which is a donor-advised fund account established within the Program by the Foundation (an "**Account**") that receives the proceeds of donations from a Donor, invests these proceeds in a permitted Mackenzie Fund (an "**Eligible Mackenzie Fund**") and makes grants over a period of years to a Donor's favourite charities and/or other permitted entities ("**Eligible Charities**"). A tax receipt will be issued to the Donor for the "eligible amount" of an accepted donation. Please refer to the Program Guide for the Program for more information.

Although the Foundation has ultimate authority over the assets in the Program, it will generally act on the recommendations of the Donor (or parties authorized by the Donor) with respect to naming the Account, recommending a financial advisor for the Account, recommending an investment among the Eligible Mackenzie Funds, recommending Eligible Charities to receive annual grants, and recommending how the Account will be managed after the Donor's lifetime. The assets in an Account will be invested in only one Eligible Mackenzie Fund at any time.

To open an Account, a donation of \$10,000 or more (comprised of cash, units and/or insurance) must be made to the Foundation. Subsequent donations to an Account must be at least \$500. Once the donation proceeds are transferred to an Account, the Foundation will generally have the proceeds invested in an Eligible Mackenzie Fund recommended by the Donor. These amounts may be reduced at our discretion.

Donors, with the assistance of their financial advisor, can recommend an investment from among the Eligible Mackenzie Funds. Donors may change their investment recommendation at any time.

We will allocate to each Account “**Program Fees**” consisting of up to an annual 0.55% charitable administration fee and may also include operating expenses specific to the Account. We will automatically deduct these Program Fees from each Account semi-annually. The Foundation reserves the right to change the Program Fees at any time with appropriate notice.

Your financial advisor can provide you with additional details about the Program. Further information about the fees payable by each Account for this Program is listed under the “**Mackenzie Charitable Giving Program Fees**” in the “**Fees and Expenses Payable Directly by You**” table, in the “**Fees and Expenses**” section of this document.

Dollar-Cost Averaging Service

Our Dollar-Cost Averaging (“**DCA**”) Service is a systematic way for you to invest in a Fund or Funds over time. On a weekly, bi-weekly or monthly basis, over a six (6) or twelve (12) month period (the “**DCA Period**”), equal amounts (based on your initial instructions, which you may change at a later date) will be switched by redeeming units of one Mackenzie Fund (referred to as the “**Starting Fund**”) and purchasing units of another Mackenzie Fund(s) (referred to as the “**Target Fund(s)**”). Series AR units are not eligible to participate in this service.

Systematic switches under the DCA Service will take place between the same purchase options, namely, sales charge purchase option, redemption charge purchase option, low-load 2 purchase option or low-load 3 purchase option. Short-term trading fees do not apply to units switched through this service.

The DCA Service is only available to you if you purchase units designated by us, from time to time, and complete the required set-up forms.

The scheduled switches will be completed at the applicable NAV of the units on the transaction date. Where the selected switch date is not a trading day, the switch will be moved forward to the next trading day.

At the end of the DCA Service, any distributions paid and reinvested in units of the Starting Fund will automatically be switched by the DCA Service into units of the Target Fund according to the Target Fund’s code. Each Fund has a numerical code assigned to it (“**Fund Code**”). These Fund Codes are used to facilitate electronic transaction processing according to industry standards. If you have more than one Target Fund, the switch will be made to the Target Fund with the lowest Fund Code. If you have more than one DCA program running under the DCA Service and the DCA Periods overlap, the reinvested units of the Starting Fund will be switched into units of the Target Fund(s) at the end of the latest DCA Period.

You can terminate a DCA program at any time before a scheduled switch date, as long as we receive at least three (3) business days’ notice, or by switching all of the applicable units out of the Starting Fund.

Guided Portfolio Service

Our Guided Portfolio Service (“**GPS**”) is an automatic portfolio rebalancing service that allows you to invest in any number of Mackenzie Funds with specific target fund allocations selected by

you, creating your own customized portfolio of investments. We will then rebalance these holdings from time to time, based on your chosen frequency and rebalancing range, to make sure that your portfolio mix is allocated in line with your initial target instructions. Rebalancing is achieved by switching your investments among the Mackenzie Funds selected by you. This may result in a redemption of your units and cause you to realize a capital gain or loss. Please see the “**Purchases, Switches and Redemptions**” section of this document.

With minor exceptions, all of the series of all of the Funds are eligible for this service. You may also hold units of other Mackenzie Funds within the same account and keep them separate from the funds you wish to comprise your rebalancing portfolio.

To participate in this service, you must first complete and sign our GPS Client Agreement. By completing this form, you authorize us to monitor your portfolio and to rebalance it at intervals selected by you (together with the help of your financial advisor), which can be monthly, quarterly, semi-annually, or annually.

In order to facilitate investing in the service, we have created Series GP units of Mackenzie Canadian Money Market Fund. When you enrol in the service, you have the option of using this series to direct your investment into your selected Mackenzie Funds upon the activation of your portfolio rebalancing service. Series GP units are available for purchase under all purchase options, to coincide with your preferred purchase option for the Mackenzie Funds that will comprise your portfolio.

Upon activation of your rebalancing service, your Series GP units of Mackenzie Canadian Money Market Fund will automatically be switched (at no cost) and allocated amongst the various Mackenzie Funds you have elected to include in your Portfolio.

Series GP units are only available for investment to facilitate portfolio construction using this service. If you invest in Series GP and have not submitted the GPS Client Agreement specifying your target fund allocations and rebalancing preferences within 30 days, we will switch your investment to a different series of Mackenzie Canadian Money Market Fund as follows:

- to Series SC if you held your Series GP units under the sales charge purchase option; or
- to Series A if you held your Series GP units under any other purchase option.

Rebalancing will occur at the intervals you specify, provided the current fund allocations are outside of a range anywhere between 2% and 10% (you select the rebalancing range, which must be in increments of 0.5%) above or below your stated target allocation at the time you enroll in the service. Your portfolio will be rebalanced to be within the tolerance range you have selected and not to the target allocation.

If you redeem all of your investments in a Fund that was part of your target fund allocation without providing us with an amended GPS Client Agreement, then, at the time of your next scheduled rebalancing, we will rebalance the remaining Funds in your portfolio and proportionately reallocate your investments amongst the same Funds in your current target fund allocation (including the redeemed Fund).

You always retain the option of changing your target allocation, rebalancing ranges or rebalancing frequency of your portfolio upon further written instructions to us or through your dealer using an Amendment Form to our GPS Client Agreement. You may also request a manual rebalancing of your portfolio outside of the scheduled automatic rebalancing period at any time. Be advised that, in some cases, a manual rebalancing may trigger short-term trading fees. Please see the **“Purchases, Switches and Redemptions”**, **“Short-Term Trading”** section of this document for details of our short-term trading policy.

There are no separate fees for this program. Any applicable mutual fund charges will apply. There is no minimum investment requirement in this service.

All of the terms and conditions of the service are on the GPS Client Agreement, which is available from your dealer or at www.mackenzieinvestments.com.

One-Step Dollar-Cost Averaging Service

Our One-Step Dollar-Cost Averaging (**“One-Step DCA”**) Service provides a systematic way for you to invest in a Fund over time. Each week, we will invest 1/52nd of your original investment from Mackenzie Canadian Money Market Fund, Series DA or DF, as applicable (the **“DA/DF Allocator Fund”**) into the Fund you pre-select from a list of eligible Funds (the **“DA/DF Target Fund”**).

No forms are required to participate in the One-Step DCA Service. With the help of your financial advisor, you need only select the fund code for the Series DA or Series DF security from the DA/DF Allocator Fund that corresponds to the series of the DA/DF Target Fund in which you wish to invest over the ensuing 52-week period.

Systematic switches under the One-Step DCA Service will take place within the same purchase option under which you purchased your Series DA or DF units. Short-term trading fees or switch fees will not apply to units that are automatically switched through this service.

The scheduled switches will be completed at the applicable NAV of the units on the transaction date. Where the switch date is not a trading day, the switch will occur on the next trading day following the switch date.

If you no longer wish to be a part of the One-Step DCA Service, you must switch or redeem all of your Series DA or DF units, as applicable. In this case, you may be subject to switch fees or redemption charges. Please refer to the **“Fees and Expenses Payable Directly by You”** section of this simplified prospectus for further details.

Open Architecture Service

If you meet the minimum investment requirement for the Portfolio Architecture Service (discussed below) you may wish to construct portfolios solely in conjunction with your financial advisor. In this case, we offer certain administrative services that are available in the Portfolio Architecture Service, namely, personalized client statements and portfolio monitoring services, based on instructions provided by you and your financial advisor.

Your financial advisor can provide you with additional details about the Open Architecture Service. The fees payable for this service are listed under **“Open Architecture Service Fees”** in the **“Fees and Expenses Payable Directly by You”** table, in the **“Fees and Expenses”** section of this document.

Portfolio Architecture Service

The Portfolio Architecture Service is a portfolio service that we offer. We have developed a number of model portfolios (the **“Model Portfolios”**) comprised exclusively of a selection of the Funds. The Funds in the Model Portfolios may consist of either equity funds, fixed-income funds, or a combination of such funds. There are Model Portfolios suitable for investors with different time horizons and tolerances for risk. Utilizing a Model Portfolio gives you the ability to invest in a portfolio of investments that are maintained to your specific needs.

To be eligible for this service, you must

- (a) invest a minimum of \$500,000 in Mackenzie Funds, exclusive of any investments in Series AR units; and
- (b) invest at least 51% of your portfolio in Series O, O5 and/or one or more of the Private Wealth Series.

You may combine the value of all your Eligible Accounts in order to satisfy the minimum initial investment requirement for this service.

Under this service, you will meet with your financial advisor to determine your investment objectives, your investment time horizon and your level of appropriate investment risk. To aid in this process, we make available to you and your financial advisor a dedicated Portfolio Architecture Service questionnaire.

Once you complete the questionnaire with your financial advisor, your financial advisor will score the questionnaire and suggest to you an appropriate percentage weighting for your portfolio of equity and fixed-income. Exposure to the different asset classes in a Model Portfolio will be achieved using a recommended list of Funds with specified minimum and maximum percentage ranges (**“Permitted Ranges”**) to be invested in each Fund. Your financial advisor will then propose a Model Portfolio for your consideration.

Your financial advisor will review the proposed Model Portfolio with you and, with your approval, changes may be made with respect to Fund selection, Permitted Ranges and asset class weightings based on your financial advisor's knowledge of your overall financial circumstances and taking into account what is considered suitable to meet your particular investment needs and requirements. **The responsibility for achieving this rests with your dealer and financial advisor.** Once an acceptable Model Portfolio is agreed upon, an agreement is entered into between you, the dealer, your financial advisor and us that sets out the agreed-upon Model Portfolio and the terms and conditions under which it will be managed for you. We will also prepare an Investment Policy Statement for you that we will deliver to your financial advisor for your review. We will then prepare an investment allocation sheet (**“IAS”**) which sets out how your assets will be invested among your various accounts under the Model Portfolio. Once you have reviewed the IAS with your financial advisor, the necessary mutual fund trades to implement your Model Portfolio solution will be executed by your dealer.

We will monitor your agreed upon Model Portfolio, rebalance holdings in the Funds within the Permitted Ranges, which may be adjusted in our discretion. We may, from time to time, replace a Fund (a) due to it being terminated, or for any other similar reason that no longer allows the Fund to participate as part of a Model Portfolio, or (b) when another Fund is considered by us to be more appropriate, provided that the investment objectives and strategies of the two Funds are substantially similar. We may also make changes to the asset classes and Permitted Ranges upon providing you with 60 days prior written notice. All of these changes will be done under the terms of the agreement entered into with you. Changes to your Model Portfolio arising from changes in your financial circumstances or risk profile, which have been reviewed with you by your financial advisor, will be made, with your approval.

Your financial advisor can provide you with additional details about the Portfolio Architecture Service. The fees payable for this service are listed under “**Portfolio Architecture Service Fees**” in the “**Fees and Expenses Payable Directly by You**” table, in the “**Fees and Expenses**” section of this document.

Pre-Authorized Contribution Plans

You can make regular purchases of most units of the Funds through a pre-authorized contribution plan (“**PAC**”). You can invest weekly, bi-weekly, semi-monthly, monthly, bi-monthly, quarterly, semi-annually or annually. Each investment must be at least \$50 per Fund. Ask your financial advisor for an authorization form to start the plan. There is no administrative charge for this service.

When you enrol in a PAC, your dealer will send you a complete copy of the Funds’ or other Mackenzie Funds’ current Fund Facts, along with a PAC form agreement (a “**Form**”) as described below. Upon request, you will also be provided with a copy of the Funds’ simplified prospectus.

You will not receive the Fund Facts when you make any subsequent purchases under the PAC unless you request this at the time of your initial investment, or subsequently send a request. You can get copies of these documents at www.mackenzieinvestments.com or at www.sedar.com, from your dealer, by calling us toll-free at **1-800-387-0614** or by e-mailing us at service@mackenzieinvestments.com. We will only send you an updated copy of the Fund Facts annually upon renewal and any amendments if you have requested them.

You have a statutory right to withdraw from an initial purchase of the Funds under the PAC plan, but you do not have a statutory right to withdraw from subsequent purchases of the Fund under the PAC. However, you will continue to have all other statutory rights under securities law, including a right of action for damages or rescission in the event any Fund Facts or document incorporated by reference in any renewal simplified prospectus contains any misrepresentation, whether or not you have requested the Fund Facts.

You may change or terminate your PAC at any time before a scheduled investment date as long as we receive at least ten (10) business days’ notice.

The Canadian Payments Association has implemented Rule H1, which is intended to protect consumers from unauthorized debits.

On PAC enrolment, you must be given the form or disclosure that describes the PAC terms and conditions and investors’ rights. By enrolling in a PAC, you are deemed to

- waive any pre-notification requirements;
- authorize us to debit your bank account;
- authorize us to accept changes from your registered dealer or financial advisor;
- agree to release your financial institution of all liability if your request to stop a PAC is not respected, except where the financial institution is grossly negligent;
- agree that a limited amount of your information will be shared with the financial institution for the purpose of administering your PAC;
- agree that you are fully liable for any charges incurred if the debits cannot be made due to insufficient funds or any other reason for which you may be held accountable; and
- be aware that you have rights and that you can change your instructions at any time, on ten (10) days’ advance notice to us and that you can find out more about your right to cancel a pre-authorized debit agreement by contacting your financial institution or by visiting www.cdnpay.ca.

Registered Plans

You can open certain registered plans offered by us through your dealer. We offer the following plans (collectively referred to as “**registered plans**”):

- registered retirement savings plans (“**RRSPs**”), including:
 - locked-in retirement accounts (“**LIRAs**”),
 - locked-in retirement savings plans (“**LRSPs**”),
 - restricted locked-in savings plans (“**RLSPs**”),
- registered retirement income funds (“**RRIFs**”), including
 - life income funds (“**LIFs**”),
 - locked-in retirement income funds (“**LRIFs**”),
 - prescribed retirement income funds (“**PRIFs**”),
 - restricted life income funds (“**RLIFs**”),
- tax-free savings accounts (“**TFSAs**”),
- registered education savings plans (“**RESPs**”),
- registered disability savings plans, and
- deferred profit-sharing plans (“**DPSPs**”).

We do not permit units of certain Funds to be held within registered plans. Please see the “**Fund Eligibility Requirements**” section for more information. In addition, US Dollar Funds are not eligible to be held within Mackenzie Investments-administered registered plans. Please also see the “**Income Tax Considerations**” section for more information on registered plans.

B2B Trustco is the trustee of our registered plans.

Systematic Transfer and Exchange Program

Our Systematic Transfer and Exchange Program (“STEP”) allows you to periodically and systematically move money from the Starting Fund to the Target Fund, within the same account or a different account. STEP is applicable to most series offered under this simplified prospectus. You may switch an amount of your choice to another fund on a weekly, bi-weekly, semi-monthly, monthly, bi-monthly, quarterly, semi-annual and annual basis and you may make changes to (a) the Target Fund; (b) the frequency of the switch; and (c) the amount switched, upon three (3) business days’ written notice to us. **We will automatically sell units of the Starting Fund and use the proceeds to buy units of the Target Fund.** Short-term trading fees do not apply to units switched through this service; however, you may have to pay a negotiable switch fee to your financial advisor. If you hold your units outside a registered plan, you may realize a capital gain or loss. Capital gains are taxable. Where the selected switch date is not a trading day, the switch will be moved forward to the next trading day.

You may change or terminate a STEP at any time before a scheduled investment date as long as we receive at least three (3) business days’ notice.

Systematic DSC to Fee-for-Service Series Switching Program

Participating in Systematic DSC to Fee-for-Service Series Switching Program allows you to periodically and systematically switch units purchased under LL2, LL3 or RCS purchase options (together the “Deferred Sales Charge options”) upon the expiry of the redemption fee schedule (“Matured Units”), to the chosen fee-for-service series (Series F, Series F5, Series F8, Series FB, Series FB5, or if eligible, Series PWFB, Series PWFB5, Series PWX, Series PWX5 or Series PWX8) (the “**Fee-for-Service Series**”), of the same Fund. Upon enrolling in the Program, we will automatically switch your Matured Units into the chosen Fee-for-Service Series of the same Fund on the second Friday of the month following the date that your units purchased under a Deferred Sales Charge option become Matured Units. Short-term trading fees do not apply to units switched through this service; however, you may have to pay a negotiable switch fee to your financial advisor.

You may change or terminate this program at any time before a scheduled investment date as long as we receive at least three (3) business days’ notice.

Table 7: U.S. Dollar Settlement Option

FUND	A	F	FB/PWFB	PW	PWX
Mackenzie US All Cap Growth Fund	●	●	●	●	●

If you previously purchased units of a Fund not listed in the above table under the U.S. Dollar Settlement Option, you will be permitted to switch between series of that Fund under the U.S. Dollar Settlement Option. However, no new purchases or switches under

Systematic Withdrawal Plans

You can set up a systematic withdrawal plan (“SWP”) if you have at least \$5,000 invested in Funds in your account or, in respect of the Pools, \$100,000 in your account. You can choose when to withdraw (weekly, bi-weekly, semi-monthly, monthly, bi-monthly, quarterly, semi-annually or annually) and how much to redeem each time. There is no administrative charge for this program. The program is not available for some types of registered plans and for certain series of units. **Please understand that regular withdrawals could eventually eliminate your entire investment if you do not make additional purchases in your account.**

You may change or terminate your SWP at any time before a scheduled withdrawal date as long as we receive at least three (3) business days’ notice.

Redemptions in U.S. dollars are paid by cheque.

Telephone Redemption Service

At times, it may be more convenient for you to telephone us directly to place a redemption order for your Funds. The telephone number is **1-800-387-0614**. Your financial advisor can give you our Telephone Redemption Service application form. **This service is not available to redeem units held in a registered plan or for units in accounts held in your dealer’s or other intermediary’s name.** We recommend that you always consult your financial advisor before placing a redemption order.

Your redemption proceeds will be transferred electronically to your bank account. To protect both you and us from fraud, for redemptions above certain dollar thresholds, your signature on the application form must be guaranteed by one of a bank, trust company, member of a recognized stock exchange or any other organization satisfactory to us. There is no additional charge for using the Telephone Redemption Service.

U.S. Dollar Settlement Option

Except for US Dollar Funds, generally when you purchase Fund units for cash, you must pay in Canadian dollars, and when you receive a cash distribution on Fund units or you redeem Fund units for cash, you will receive Canadian dollars. However, you may also purchase the following units using U.S. dollars (the “**U.S. Dollar Settlement Option**”), unless you hold these units within a Mackenzie Investments-administered registered plan:

the U.S. Dollar Settlement Option will be permitted to Funds not listed in the above table.

If you purchase Fund units under the U.S. Dollar Settlement Option,

- we will process your trade based on the U.S. dollar NAV per security applicable to the Fund units. We will determine this U.S. dollar NAV per security by taking the Canadian dollar NAV per security and converting it to a U.S. dollar amount using the exchange rate on the day your order is received.
- any cash distributions that are paid to you on the Fund units will be paid in U.S. dollars. We will determine the amount of each such payment by taking the Canadian dollar amount that you would have received on the Fund units (if you did not hold them under the U.S. Dollar Settlement Option) and converting it to a U.S. dollar amount using the exchange rate on the day the distribution occurs.
- if your Fund units are redeemed, you will receive your redemption proceeds in U.S. dollars. We will calculate these proceeds based on the U.S. dollar NAV per security, which we will determine by taking the Canadian dollar NAV per security and converting it to a U.S. dollar amount using the exchange rate on the redemption trade date.

The U.S. Dollar Settlement Option is offered as a convenience for investors who prefer to transact in U.S. dollars. **Holding Fund units under the U.S. Dollar Settlement Option has no impact on the overall performance of your investment within the Fund and does not act as a hedge against currency fluctuations between the Canadian and U.S. dollars.**

FEES AND EXPENSES

The tables below list the fees and expenses that you may have to pay if you invest in a Fund. You may have to pay some of these fees and expenses directly. Alternatively, a Fund may have to pay some of these fees and expenses directly, which will therefore reduce the value of your investment in a Fund. Unless otherwise indicated, the Funds pay management fees, administration fees and fund costs.

The management fees and any administration fees are paid to us as manager of the Funds. The management fee is paid in exchange for the investment advisory services provided to the Funds, including portfolio analysis and decision-making, ensuring that all activities of the Funds are in compliance with their investment objectives and strategies, as well as marketing and promotion of the Funds.

As shown in the tables below, the annual management fees and administration fees vary by series. You should make a specific request to purchase any applicable lower fee series you may be eligible to purchase, or to switch your existing units to any applicable lower fee series you are eligible to purchase, through your dealer.

The fees for Series O and O5 units of the Funds are negotiable by you and payable directly to us. Parties related to us and our employees and employees of our subsidiaries may be charged fees that are lower than those available to other investors. For Series O and O5 units, this fee can be paid (1) by cheque or by the redemption of Series O or O5 units you hold, if (i) you have a minimum of \$5,000,000 invested in Series O or O5 units and (ii) you hold your units outside of a registered plan; or (2) by the redemption of Series O or O5 units you hold, if you have less than \$5,000,000 invested in Series O or O5 units. In addition, fund costs will be charged to Series O and O5 units.

The management and administration fees for Series PWX, PWX5 and PWX8 units of the Funds are payable by you directly to us and will be paid by the redemption of Series PWX, PWX5 and PWX8 units you hold. Fund costs will be charged to Series PWX, PWX5 and PWX8 units.

There is no management fee for Series R units as those securities are only offered on an exempt distribution basis to other Funds.

Note that, where multiple Funds are grouped in a single row of the table, the presence of a management fee rate for a particular series does not mean that all of the Funds in that group offer that series. Please refer to the front cover or Part B for information on the series offered by each Fund.

Management Fee, Administration Fee and Fund Cost Reductions

We may reduce the management fee rate, administration fee rate and/or fund costs that we charge with respect to any particular Fund units you may hold.

We will implement any reduction of fees and/or fund costs by reducing the amount charged to the Fund, and the Trust Fund will then make a special distribution (“**Fee Distribution**”) to you that will be reinvested, without charge, in additional units of the series on which they were paid, unless you elect in advance to receive the Fee Distribution in cash. The Fee Distributions paid by the Fund will be paid first out of the Fund’s income and capital gains and then, if necessary, out of capital.

The level of reduction may be typically negotiable between you and us and usually will be based on the size of your account and the extent of Fund services you require.

The tax consequences of Fee Distributions made by the Fund generally will be borne by the unitholders receiving the distributions.

Negotiated Trailing Commissions Implemented by Management Fee Reductions

If you hold Series A, B, C, D, DA, G, I, PW, PWB, PWT5, PWT8, SC, S5, S8, T5, T8 or Investor Series units, you may negotiate with your dealer to reduce the amount of trailing commission that we pay your dealer out of the management fees that we collect. Your dealer will submit to us a form describing the reduced trailing commission amount they are willing to accept, requesting that we reduce your management fee rate accordingly.

We will subtract the reduced trailing commission to which you and your dealer have agreed, from the maximum trailing commission described within the “**Trailing Commissions**” section of this document. We will then reduce your management fee rate for the applicable series that you hold to reflect the difference. These management fee reductions will be implemented as described under the “**Management Fee, Administration Fee and Fund Cost Reductions**” section of this document. Ask your financial advisor for more information on this program.

We may discontinue or change the terms of this program at our discretion and dealers that choose to participate may instruct us to discontinue the program in relation to your investment(s) at any time. It is your dealer’s obligation to provide you with notice in both cases. Your dealer has no obligation to participate in this program.

Switching between Retail Series and Private Wealth Series

We will automatically switch your Series A, AR, B, C, FB, FB5, G, I, SC, S5, S8, T5, T8 and Investor Series (the “**Retail Series**”) into the applicable Private Wealth Series once you have \$100,000 in Eligible Investments (as defined below) within your Eligible Accounts (the “**Eligibility Criteria**”), subject to certain exceptions outlined below and provided your dealer offers Private Wealth Series units. These switches will occur so that you will be invested in the Private Wealth

Series with the lowest combined management and administration fees for which you are eligible. **Please note that Retail Series units that are subject to a redemption charge will not be automatically switched.** Once the redemption fee schedule expires, those Retail Series will become eligible to be automatically switched to Private Wealth Series.

Eligible Investments are (i) the Private Wealth Series that you hold within your Eligible Account(s), and (ii) any Series A, AR, B, C, D, DA, DF, F, F5, F8, FB, FB5, G, GP, I, O, O5, S5, S8, SC, T5, T8 or Investor Series units of Mackenzie Funds and other series of selected Funds that you hold within your Eligible Account(s).

Once you meet the Private Wealth Series Eligibility Criteria through a purchase or a switch transaction you will be automatically switched into the applicable Private Wealth Series the following business day. In addition, we will automatically switch your units into the applicable Private Wealth Series on or about the second Friday of every month if positive market movement has allowed you to meet the Eligibility Criteria. Please note you will never be moved out of a Private Wealth Series because of a decrease in market value.

If you originally purchased your Retail Series units under the U.S. Dollar Settlement Option and you meet the Eligibility Criteria to be switched into Private Wealth Series units, you will continue to hold your units under the U.S. Dollar Settlement Option after the automatic switch. Please see the “**U.S. Dollar Settlement Option**” in the “**Optional Services**” section of this simplified prospectus for more details about this service.

The following Retail Series securities will be excluded from the automatic switches:

- Units held in our Portfolio Architecture Service or Open Architecture Service program; and
- Series C of Mackenzie Canadian Money Market Fund.

You are responsible for ensuring your advisor is aware of all Eligible Accounts that should be linked in order to qualify for Private Wealth Series. We will link your Eligible Accounts only after your advisor has communicated your Eligible Account information to us. Generally, neither Mackenzie nor your advisor have the ability to independently determine what accounts should be linked. Mackenzie will, however, automatically link accounts belonging to one individual if the address associated with each account is identical and they have the same dealer representative code. This means that if you have two or more accounts with the same advisor, provided your advisor maintains these accounts under the same dealer representative code, they will be automatically linked by us. **Accounts will not be automatically linked if you hold Funds with more than one advisor or dealer.** For example, if you also hold Funds in a discount brokerage account, that account will not be automatically linked with an account you hold with your advisor.

The calculation of your total investments with us for purposes of determining whether you are or remain eligible for Private Wealth Series will be determined in accordance with the calculation of a ‘high watermark’. A ‘high watermark’ is the highest peak in value that a fund or account has reached since we began automatically switching investors to Private Wealth Series in April 2017. The ‘high watermark’ is calculated daily and is the greater of either the previous days’ high watermark plus the current day’s additional

purchases and minus the current day's redemptions, or the current day's market value.

Redemptions of your units (except for redemptions from Charitable Giving Accounts, RDSPs and RRFs, including LIFs, LRIFs, PRIFs and RLIFs) will decrease the 'high watermark'. However, market value declines in your Private Wealth Series or Eligible Investments in your Eligible Accounts will not decrease your 'high watermark'.

If you no longer meet the Eligibility Criteria for Private Wealth Series (and the series were not purchased as part of our Charitable Giving Program), we will automatically switch your units back into the appropriate Retail Series, which will have higher management and administration fees than the Private Wealth Series. Such switches will occur on or about the second Friday of every month. Unless your Eligible Investments fall below \$75,000 (for reasons other than a decrease in market value), we do not automatically switch your units back to the applicable Retail Series. This is intended to provide you with flexibility in connection with major life events. We reserve the right to switch your Private Wealth Series to Retail Series if, in our view, you are misusing this flexibility to fall below the Eligibility Criteria for Private Wealth Series.

Please speak with your advisor for more details about this program.

Grandfathering of Management Fee Rates Applicable to Certain Investors in Private Wealth Series Prior to June 1, 2018

If you were invested in a Private Wealth Series of a Fund on May 31, 2018, and were entitled on that date to a management fee rate that is lower than the management fee rate applicable to that particular series of the Fund on or after June 1, 2018, then the lower management fee rate will continue to apply to that series of the Fund (the "**Grandfathered Rate**"), provided you otherwise continue to qualify for the particular series. Additional investment in the same series of the same Fund will also receive the Grandfathered Rate. Please see the section entitled "**Management Fee Reductions Applicable to Private Wealth Series**" in the Mackenzie Mutual Funds prospectus dated September 29, 2017, for more information on the management fee applicable to Private Wealth Series on May 31, 2018.

FEES AND EXPENSES PAYABLE BY THE FUNDS

Administration Fee

We pay all operating expenses, other than "fund costs", for each series, in exchange for a fixed rate annual administration fee (the "Administration Fee"). Administration Fees are paid by each series of each Fund except for Series PWX, PWX5 and PWX8 units, for which Administration Fees are charged directly to you. Administration Fees are subject to applicable taxes, such as G.S.T./ H.S.T. We provide many of the services required for the Funds to operate, although we retain third parties to provide certain services.

In exchange for the Administration Fee, the expenses borne by us on behalf of the series include (i) recordkeeping, accounting and fund valuation costs; (ii) custody safekeeping fees; (iii) audit and legal fees and (iv) the costs of preparing and distributing Fund financial reports, simplified prospectuses, and other investor communications we are required to prepare to comply with applicable laws (other than the costs of complying with any new regulatory requirements, as described in "**Fund Costs**" below).

The Administration Fee is charged separately from the management fee for each series. It is calculated as a fixed annual percentage of the NAV of each series as indicated below.

There are no Administration Fees charged to Series O, O5 and R units of the Funds, although fund costs will still be allocated.

As stated above, the Administration Fees for Series PWX, PWX5 and PWX8 are charged directly to you. Please see the "**Fees and Expenses Payable Directly by You**" table in this section for more details. For all other series, Administration Fees are charged at the rates shown in the following table.

Note that, where multiple Funds are grouped in a single row of the table, the presence of an administration fee rate for a particular series does not mean that all of the Funds in that group offer that series. Please refer to **Part B** for information on the series offered by each Fund.

Fund Costs

Each series of each Fund (other than Series C units of Mackenzie Canadian Money Market Fund) pays “**fund costs**”, which include interest and borrowing costs, brokerage commissions and related transaction fees, taxes (including, but not limited to G.S.T./H.S.T. and income tax), all fees and expenses of the Mackenzie Funds’ IRC, costs of complying with the regulatory requirement to produce Fund Facts, fees paid to external service providers associated with tax reclaims, refunds or the preparation of foreign tax reports on behalf of the Funds, new fees related to external services that were not commonly charged in the Canadian mutual fund industry and introduced after September 29, 2021, and the costs of complying with any new regulatory requirements, including, without limitation, any new fees introduced after September 29, 2021. Interest and borrowing costs and taxes will be charged to each series directly based on usage. Costs of complying with new regulatory requirements will be assessed based on the extent and nature of these requirements. The remaining fund costs will be allocated to each series of each Fund based on their net assets relative to the net assets of all series of the Funds. We may allocate fund costs among each series of a Fund based on such other method of allocation as we consider fair and reasonable to the Fund.

Mackenzie may decide, in its discretion, to pay for some of these fund costs that are otherwise payable by a Fund, rather than having the Fund incur such fund costs. Mackenzie is under no obligation to do so and, if any fund costs are reimbursed by Mackenzie, it may discontinue this practice at any time.

Fund costs are charged separately from the management fee and Administration Fee for each series.

Each IRC member is entitled to an annual retainer of \$40,000 (\$50,000 for the Chair) and a fee of \$1,500 for each meeting attended. In addition, the Chair of an IRC sub-committee is entitled to an annual retainer of \$5,000. Members are also entitled to be reimbursed for all reasonable expenses incurred in the performance of their duties, including reasonable travel and accommodation expenses. We also purchase and maintain insurance liability coverage for the benefit of the IRC members. For the year ended March 31, 2021, the total amount expensed in this regard by the Mackenzie Funds was \$255,269. All fees and expenses were allocated among the Mackenzie Funds managed by us in a manner that was fair and reasonable. Effective July 1, 2021, each IRC member is entitled to an annual retainer of \$50,000 (\$60,000 for the Chair) and a fee of \$3,000 for each quarterly meeting attended. In addition, the IRC members are entitled to \$1,500 for each additional meeting.

General Information on Fees/Expenses of All Funds

We may reduce any Administration Fees or other fees and/or expenses for you, as described in the preceding section of this table (see “**Management Fees**”). There will be no duplication of expenses payable by the Funds as a result of their investments in Underlying Funds. Management expense ratios (“**MERs**”) are calculated separately for each series of units of the Funds and include that series’ management fees, Administration Fees and/or fund costs, if applicable (except as specified below).

Each Fund pays its own brokerage commissions for portfolio transactions and related transaction fees. These expenses are not included in a Fund’s MER but are, for tax purposes, added to the cost base or subtracted from the sale proceeds of its portfolio investments. These expenses constitute a Fund’s trading expense ratio (“**TER**”). Both the MER and the TER are disclosed in each Fund’s annual and semi-annual Management Report of Fund Performance.

We will give you 60 days’ written notice of any change to the basis of the calculation of the fees or expenses that are charged to a Fund by an arm’s length party that could result in an increase in charges, or the introduction of a fee or expense to be charged to a Fund by an arm’s length party that could result in an increase in charges.

Fund of Funds

Where Funds invest in Underlying Funds or Private Vehicles, the fees and expenses payable in connection with the management of the Underlying Fund or Private Vehicle are in addition to those payable by the Fund. However, there will be no management fees or administration fees payable by a Fund that to a reasonable person would duplicate a fee payable by an Underlying Fund or Private Vehicle for the same service. Except in the case of ETF Portfolio Funds, where the Funds invest in ETFs that qualify as IPU’s or in Private Vehicles, the fees and expenses payable in connection with the management of ETFs or Private Vehicles are in addition to those payable by the Fund. Currently,

FEES AND EXPENSES PAYABLE BY THE FUNDS

where we are the manager of such ETFs, we will waive these fees for at least one year from the date of this prospectus. This arrangement is subject to change thereafter. In the case of the ETF Portfolio Funds, there will be no fees and expenses payable in connection with the management of the underlying ETFs.

Except as described below in respect of ETFs managed by Mackenzie, there will not be sales fees (i.e., brokerage commissions or trading expenses) or redemption fees payable by a Fund with respect to the purchase or redemption by it of units of an Underlying Fund managed by us or by one of our affiliates. In addition, a Fund will not pay sales fees or redemption fees with respect to the purchase or redemption by it of units of an Underlying Fund that, to a reasonable person, would duplicate a fee payable by you in the Fund.

Where Funds invest in ETFs managed by Mackenzie, the Funds are permitted to pay brokerage commissions and trading expenses in connection with investing in these ETFs, in accordance with NI 81-102.

Certain Funds may invest in Private Vehicles managed by our affiliates, including by Northleaf Capital Partners (Canada) Ltd. (“**Northleaf**”) and Sagard Credit Partners (“**Sagard**”). On October 28, 2020, we and our affiliate Great-West Lifeco Inc. entered into a strategic relationship with Northleaf whereby we and Great-West Lifeco Inc. jointly acquired and hold a significant ownership interest in Northleaf. Sagard is a wholly owned subsidiary of Power Corporation of Canada.

FEES AND EXPENSES PAYABLE DIRECTLY BY YOU

If you purchase units under the sales charge purchase option, you will pay a sales charge which you negotiate with your financial advisor and which is payable to your dealer at the time you purchase your units. The table below sets out the sales charges applicable to each series, to the extent a series is offered by a Fund:

Series/Option	Maximum Sales Charge (% of Purchase Amount)
Series A, AR, B, C, DA, G, GP, S5, S8, SC, T5 and T8, unless indicated otherwise in this table	5%
Investor Series	2.5%
Series I, PW, PWR, PWB, PWT5 and PWT8, Series AR, C, SC and G of Mackenzie Canadian Money Market Fund	2%
Series O, O5, PWX, PWX5 and PWX8	0%

The Funds will not pay sales charges if they purchase units of any other Mackenzie Fund, unless otherwise indicated. There is no sales charge for Series D, F, F5, F8, FB, FB5, PWFB and PWFB5 units.

Sales Charge Purchase Option

If you purchase units of a Fund under the redemption charge purchase option, you pay a redemption charge to us at the rates listed below if you redeem these units during the time periods specified below, unless otherwise indicated in this document. The redemption charge is based on, and deducted by us from, the NAV of the units on the redemption trade date, and the balance of the NAV is paid to you. Any redemption charges on units acquired by reinvesting a distribution made by a Fund will be determined by the date the original Fund units were purchased, not the date that the reinvestments were made.

Up to 10% of your investment in units of a Fund may be redeemed in each calendar year without a redemption charge. This right is not cumulative if you do not use it in any calendar year. The annual information form has full details of the free redemption amount program.

Please see “**Purchases, Switches and Redemptions**” for more details about the redemption charge purchase option.

Redemption Charge Purchase Option

Period after Purchase	Redemption Charge Rate
First year	5.5%
Second year	5.0%

FEES AND EXPENSES PAYABLE DIRECTLY BY YOU

Third year	5.0%
Fourth year	4.0%
Fifth year	4.0%
Sixth year	3.0%
Seventh year	2.0%
Thereafter	NIL

If you own Series A, B, C, T5 or T8 units that were purchased under a redemption charge purchase option (and the series were not purchased as part of our Charitable Giving Program), we will automatically switch your units into the sales charge purchase option of the same series of the same Fund on the second Friday of the month following the seven (7) year anniversary of your original purchase date, subject to certain exceptions outlined in the paragraph below.

For series of certain Funds, outlined in Table 5 on page 15, that do not offer both a redemption charge purchase option and a sales charge purchase option, we will switch your units into the sales charge purchase option of a different series of the same Fund on the second Friday of the month following the seven (7) year anniversary of your original purchase date. In all cases where we are switching you into a different series of a Fund, your management fees will be reduced. There are no charges levied when we implement this switch.

Low-Load 2 Purchase Option

If you purchase units of a Fund under the low-load 2 purchase option, you pay a redemption charge to us at the rates listed below if you redeem these units during the time periods specified below, unless otherwise indicated in this document. The redemption charge is based on, and deducted by us from, the NAV of the units on the redemption trade date, and the balance of the NAV is paid to you. Any redemption charges on units acquired by reinvesting a distribution made by a Fund will be determined by the date the original Fund units were purchased, not the date that the reinvestments were made.

Up to 10% of your investment in units of a Fund may be redeemed in each calendar year without a redemption charge. This right is not cumulative if you do not use it in any calendar year. The annual information form has full details on the free redemption amount program.

Please see “**Purchases, Switches and Redemptions**” for more details about the low-load 2 purchase option.

Period after Purchase	Redemption Charge Rate
First year	2.0%
Second year	2.0%
Thereafter	NIL

If you own Series A, B, C, T5 or T8 units that were purchased under a low-load 2 purchase option (and the series were not purchased as part of our Charitable Giving Program), we will automatically switch your units into the sales charge purchase option of the same series of the same Fund on the second Friday of the month following the two (2) year anniversary of your original purchase date, subject to certain exceptions outlined in the paragraph below.

For series of certain Funds, outlined in Table 5 on page 15, that do not offer both a low-load 2 purchase option and a sales charge purchase option, we will switch your units into the sales charge purchase option of a different series of the same Fund on the second Friday of the month following the two (2) year anniversary of your original purchase date. In all cases where we are switching you into a different series of a Fund, your management fees will be reduced. There are no charges levied when we implement this switch.

Low-Load 3 Purchase Option

If you purchase units of a Fund under the low-load 3 purchase option, you pay a redemption charge to us at the rates listed below if you redeem these units during the time periods specified below, unless otherwise indicated in this document. The redemption charge is based on, and deducted by us from, the NAV of the units on the redemption trade date, and the balance of the NAV is paid to you. Any redemption charges on units acquired by reinvesting a distribution made by a Fund will be determined by the date the original Fund units were purchased, not the date that the reinvestments were made.

FEES AND EXPENSES PAYABLE DIRECTLY BY YOU

Up to 10% of your investment in units of a Fund purchased may be redeemed in each calendar year without a redemption charge. This right is not cumulative if you do not use it in any calendar year. The annual information form has full details on the free redemption amount program.

Please see “**Purchases, Switches and Redemptions**” for more details about the low-load 3 purchase option.

Period after Purchase	Redemption Charge Rate
First year	3.0%
Second year	2.5%
Third year	2.0%
Thereafter	NIL

If you own Series A, B, C, T5 or T8 units that were purchased under a low-load 3 purchase option (and the series were not purchased as part of our Charitable Giving Program), we will automatically switch your units into the sales charge purchase option of the same series of the same Fund on the second Friday of the month, following the three (3) year anniversary of your original purchase date, subject to certain exceptions outlined in the paragraph below.

For series of certain Funds, outlined in Table 5 on page 15, that do not offer both a low-load 3 purchase option and a sales charge purchase option, we will switch your units into the sales charge purchase option of a different series of the same Fund on the second Friday of the month following the three (3) year anniversary of your original purchase date. In all cases where we are switching you into a different series of a Fund, your management fees will be reduced. There are no charges levied when we implement this switch.

Switch Fees

If you switch between the Funds, or between series of a Fund or to other Mackenzie Funds, then you may pay a switch fee of 0-2% (including when you switch between Series AR units, except for switches from a DA/DF Allocator Fund to a DA/DF Target Fund pursuant to the One-Step DCA Service). This fee is negotiable with your dealer in the circumstances described in the “**Dealer Compensation Sales Commissions**” section of this simplified prospectus.

Inappropriate Short-Term Trading Fee

A fee of 2% of the amount switched or redeemed will be charged by a Fund for inappropriate short-term trading. Inappropriate short-term trading is defined as a combination of a purchase and redemption, including switches between Mackenzie Funds, within 30 days, that we believe is detrimental to Fund investors and that may take advantage of Funds with investments priced in other time zones or illiquid investments that trade infrequently. For further information about our policies on inappropriate short-term trading, please see the “**Short-Term Trading**” section of this simplified prospectus.

Excessive Short-Term Trading Fee

A fee of 1% of the amount switched or redeemed will be charged by a Fund if you invest in a Fund for less than 30 days and your trading is part of a pattern of short-term trading that we believe is detrimental to Fund investors. The short-term trading fees will be paid to the Funds. Under no circumstances will automatic switches out of Series GP, automatic switches in DCA, One-Step DCA or STEP, or automatic rebalancings of your holdings within our Guided Portfolio Service, Symmetry Portfolio Service, Open Architecture Service or Portfolio Architecture Service be subject to short-term trading fees. For further information about our policies on excessive short-term trading, please see the “**Short-Term Trading**” section of this simplified prospectus.

Series FB, FB5, PWFB and PWFB5 Advisor Service Fee

You may negotiate an advisor service fee with your dealer for services provided in connection with your FB, FB5, PWFB and PWFB5 series investments. This service fee will be set out in your FB/FB5/PWFB/PWFB5 series Account Agreement. We will pay the advisor service fee on your behalf by redeeming units of the Funds from your account for an amount equal to the advisor service fee agreed to in your FB/FB5/PWFB/PWFB5 series Account Agreement and remitting the proceeds to your dealer. In all instances, the maximum advisor service fee is 1.50%.

FEES AND EXPENSES PAYABLE DIRECTLY BY YOU

Series O and O5: Fees and Advisor Service Fees

The maximum fee (excluding advisor service fee) payable by you directly to us for Series O units is an amount of up to 1.50% of the units purchased, plus applicable taxes, for all Funds. Series O fees are paid to us in consideration for the management and administration services provided to each Fund.

These fees will be described in your Series O/O5 Account Agreement.

In addition, you may pay an advisor service fee, which is negotiated between you and your financial advisor (on behalf of the dealer). This fee is stipulated in your Portfolio Architecture Service or Open Architecture Service Agreement, in which you may agree to allow us to redeem units of the Funds from your account for an amount equal to that fee and remit the proceeds to the dealer. In all instances, the maximum advisor service fee for Series O and O5 units is 1.50%

Series PWX, PWX5 and PWX8 Fees: Management Fees, Administration Fees and Advisor Service Fees

The maximum fees (excluding advisor service fee) payable by you directly to us for Series PWX, PWX5 and PWX8 units are disclosed in the table below. The advisor service fee will be described in your Series PWX/PWX5/PWX8 Account Agreement.

We will pay the advisor service fee on your behalf by redeeming units of the Funds from your account, in an amount equal to the advisor service fee, and remitting the proceeds to your dealer. For Series PWX, PWX5 or PWX8, you are required to negotiate your advisor service fee with your financial advisor on behalf of the dealer. In all instances, the maximum advisor service fee for Series PWX, PWX5 or PWX8 units is 1.50%.

FEES AND EXPENSES PAYABLE DIRECTLY BY YOU (cont'd)

Mackenzie Charitable Giving Program Fees

Each Account, other than an Account opened with only a donation of life insurance that has not yet received the insurance proceeds, is allocated Program Fees consisting of an annual charitable administration fee of 0.55% and may also include operating expenses specific to the Account. The annual charitable administration fee may be reduced on Account assets above \$2,500,000. The Foundation will also allocate any Series O, O5, PW, PWF, PWF5, PWF8, PWT5, PWT8, PWX, PWX5, PWX8 or wrap account/asset-based fees with respect to the Account payable directly by the Foundation to the Account's dealer or us. The charitable administration fee is currently payable to us as the Foundation's charitable administration service provider. This fee is accrued monthly. The Program Fees are automatically deducted from each Account semi-annually. We may change this fee at our discretion.

Account Balance	Charitable Administration Fee (%)
On Account assets under \$2,500,000	0.55%
On Account assets \$2,500,000 or above	Contact us for details

Impact of Sales Charges

The following table shows the maximum sales charges that you would pay under the different purchase options available to you if you made an investment of \$1,000 in units of a Fund and if you held that investment for periods of one, three, five or ten years, and then redeemed your entire investment immediately before the end of the period.

Table 9: Sales charges under available purchase options

	At time of purchase	1 year	3 years	5 years	10 years
Sales charge purchase option ¹	Up to \$50	–	–	–	–
Low-load 2 purchase option ^{2,3,6}	–	\$18.00	–	–	–
Low-load 3 purchase option ^{2,3,5}	–	\$31.50	\$23.15	–	–
Redemption charge purchase option ^{2,3,4}	–	\$57.75	\$57.88	\$51.05	–

¹ Based on a maximum sales charge rate of 5%, generally. There are no sales charges to purchase Series D, DF, F, F5, F8, FB, FB5, O, O5, PWF, PWF5, PWF8, PWFB, PWFB5, PWX, PWX5 or PWX8. Series F, F5, F8, PWF, PWF5 and PWF8 units are generally available only if you are enrolled in a dealer-sponsored fee-for-service or wrap program and you are subject to an asset-based fee rather than commissions on each transaction, among other eligibility rules. The maximum

Table 10: Sales Commissions payable to your dealer

Series	Sales Charge Purchase Option	Low-Load 2 Purchase Option	Low-Load 3 Purchase Option	Redemption Charge Purchase Option
Series A, AR, B, C, GP, T5 and T8 units of all Funds, unless indicated otherwise in this table	Maximum of 5%	1%	2.5%	5%
Series DA units unless indicated otherwise in this table	Maximum of 5%	N/A	2.5%	5%

sales charge to purchase Series I, PW, PWB, PWR, PWT5, PWT8 securities is 2% and to purchase Investor Series units is 2.5%.

² Series D, DF, F, F5, F8, FB, FB5, G, I, O, O5, PW, PWB, PWF, PWF5, PWF8, PWFB, PWFB5, PWR, PWT5, PWT8, PWX, PWX5, PWX8, S5, S8, SC and Investor Series units cannot be purchased under the low-load 2 purchase option, low-load 3 purchase option or the redemption charge purchase option.

³ The redemption charge rates are shown under "Fees and Expenses Payable Directly by You", above, and are based upon the NAV of your investment at the time you redeem. For purposes of the table only, an assumed annual 5% gain has been included.

⁴ Up to 10% of your investment in Series A, AR, B, C, DA, GP, T5 or T8 units purchased under the redemption charge purchase option may be redeemed in each calendar year without a redemption charge.

⁵ Up to 10% of your investment in Series A, AR, B, C, DA, GP, T5 or T8 units purchased under the low-load 3 purchase option may be redeemed in each calendar year without a redemption charge.

⁶ Up to 10% of your investment in Series A, AR, B, C, GP, T5 or T8 units purchased under the low-load 2 purchase option may be redeemed in each calendar year without a redemption charge.

DEALER COMPENSATION

Sales Commissions

The table below sets out the sales commissions that are payable to your dealer when you purchase the Fund units identified below. Sales commissions are based on the purchase amount and are (a) negotiated and paid by you in the case of the sales charge purchase option; or (b) fixed and paid by us in the case of the low-load 2, low-load 3 and redemption charge purchase options.

Mackenzie does not monitor or make any determination as to the appropriateness of any series of a Fund (or purchase option) for any investor purchased through a registered dealer, including a discount broker.

Series	Sales Charge Purchase Option	Low-Load 2 Purchase Option	Low-Load 3 Purchase Option	Redemption Charge Purchase Option
Series A and AR units of Mackenzie Corporate Bond Fund	Maximum of 5%	1%	2.5%	4.5%
Series A and AR units of Mackenzie Canadian Short Term Income Fund				
Series DA units of Mackenzie Canadian Money Market Fund, if the DA Target Fund is Mackenzie Corporate Bond Fund or Mackenzie Canadian Short Term Income Fund	Maximum of 5%	N/A	2.5%	4.5%
Series AR units of Mackenzie Canadian Money Market Fund	Maximum of 2%	1%	2.5%	5%
Series G, SC, S5 and S8 units, unless indicated otherwise in this table	Maximum of 5%	N/A	N/A	N/A
Investor Series units	Maximum of 2.5%	N/A	N/A	N/A
Series I units	Maximum of 2%	N/A	N/A	N/A
Series C, SC and G units of Mackenzie Canadian Money Market Fund				
Series PW, PWR, PWB, PWT5 and PWT8 units				
Series A units of Mackenzie Canadian Money Market Fund, Mackenzie Canadian Bond Fund, and Mackenzie USD Ultra Short Duration Income Fund	N/A	1%	2.5%	5%
Series A, T5 and T8 units, as applicable, of Mackenzie Floating Rate Income Fund, Mackenzie Global Tactical Bond Fund, Mackenzie Global Tactical Investment Grade Bond Fund, Mackenzie Investment Grade Floating Rate Fund, Mackenzie North American Corporate Bond Fund, Mackenzie Strategic Bond Fund, Mackenzie Unconstrained Fixed Income Fund and Mackenzie USD Unconstrained Fixed Income Fund				
Series DF, F, F5, F8, FB, FB5, PWF, PWF5, PWF8, PWFB and PWFB5 units	No sales charge but you will generally be required to pay your dealer an advisory or asset-based fee in addition to the management fees payable by that series	N/A	N/A	N/A
Series D, O, O5, PWX, PWX5 and PWX8 units	Nil	N/A	N/A	N/A

Series	Sales Charge Purchase Option	Low-Load 2 Purchase Option	Low-Load 3 Purchase Option	Redemption Charge Purchase Option
Series DA units of Mackenzie Canadian Money Market Fund, if the DA Target Fund is Mackenzie Maximum Diversification Emerging Markets Index Fund, Mackenzie Maximum Diversification Developed Europe Index Fund, Mackenzie Maximum Diversification All World Developed Index Fund, Mackenzie Maximum Diversification All World Developed ex North America Index Fund, Mackenzie Maximum Diversification US Index Fund, Mackenzie Global Women's Leadership Fund, Mackenzie Balanced ETF Portfolio, Mackenzie Conservative ETF Portfolio, Mackenzie Conservative Income ETF Portfolio, Mackenzie Growth ETF Portfolio, and Mackenzie Moderate Growth ETF Portfolio	Maximum of 5%	N/A	1.5%	3.5%
Series A, AR, T5 and T8 units, as applicable, of Mackenzie Maximum Diversification Emerging Markets Index Fund, Mackenzie Maximum Diversification Developed Europe Index Fund, Mackenzie Maximum Diversification All World Developed Index Fund, Mackenzie Maximum Diversification All World Developed ex North America Index Fund, Mackenzie Maximum Diversification US Index Fund, Mackenzie Global Women's Leadership Fund, Mackenzie Balanced ETF Portfolio, Mackenzie Conservative ETF Portfolio, Mackenzie Conservative Income ETF Portfolio, Mackenzie Growth ETF Portfolio, and Mackenzie Moderate Growth ETF Portfolio	Maximum of 5%	N/A	1.5%	3.5%

We do not pay commissions when (i) you switch between Mackenzie Funds (including switches between the Funds) and your new Fund units are issued under the same purchase option as your previous Fund units; or (ii) when you switch from units bought under the redemption charge purchase option, the low-load 2 purchase option or low-load 3 purchase option to units to be purchased under the sales charge purchase option. In those cases, a switch fee of up to 2% of the amount you switch may be charged, and retained, by your dealer. The Funds will not pay sales commissions if they purchase units of any other Mackenzie Fund.

The commissions listed above will be paid when you switch from units bought under the sales charge purchase option to units to be purchased under the redemption charge purchase option, the low-load 2 purchase option or the low-load 3 purchase option, including switches within a Fund.

No sales commissions are paid when you receive units from your reinvested Fund distributions.

Trailing Commissions

We may pay dealers a trailing commission at the end of each month or calendar quarter as a percentage of the value of units of the Fund held in your account with your dealer. The table below shows the maximum trailing commission annual rates applicable to the series of units offered under this simplified prospectus.

Series A, AR, B, D, DA, G, I, PW, PWB, PWR, PWT5, PWT8, SC, S5, S8, T5, T8 and Investor Series trailing commissions are paid out of the management fees collected by us. For Series DA, the annual trailing commission ranges between 0.00% and 1.00% and is determined with reference to the rate applicable to the series of the Fund into which the Series DA unit will be switched pursuant to the One-Step DCA Service. No trailing commissions are paid in respect of Series DF, F, F5, F8, FB, FB5, GP, PWF, PWF5, PWF8, PWFB, PWFB5, PWX, PWX5, PWX8, O or O5 units.

You may negotiate an advisor service fee with your financial advisor on behalf of the dealer in your Series O and Series O5 Account Agreement. The maximum advisor service fee for Series O and Series O5 units is 1.50%. Under that agreement, you may agree to allow us to redeem units of the Funds from your account for an amount equal to that fee and remit the proceeds to the dealer. Please see the “**Series O and**” sections in the “**Fees and Expenses Payable Directly by You**” table in this simplified prospectus for more details.

For Series FB, FB5, PWFB, PWFB5, PWX, PWX5 or PWX8, you are subject to an advisor service fee that we will pay on your behalf by redeeming units of the Funds from your account in an amount equal to the advisor service fee and remitting the proceeds to your dealer. You are required to negotiate your advisor service fee with your financial advisor on behalf of the dealer. These advisor service fees are disclosed within a Series FB, FB5, PWFB, PWFB5, PWX, PWX5 or Series PWX8 Account Agreement with us. In all instances, the

maximum advisor service fee for Series FB, FB5, PWFB, PWFB5, PWX, PWX5 or Series PWX8 units is 1.50%.

Note that, where multiple Funds are grouped in a single row of the table below, the presence of a trailing commission rate for a

particular series or purchase option does not mean that all of the Funds in that group offer that series or purchase option. Please refer to the front cover or Part B for information on the series offered by each Fund.

* This table uses the following abbreviations for the purchase options available under this simplified prospectus:

- "SCS" means the Sales Charge Purchase option
- "LL2" means the Low-load 2 purchase option
- "LL3" means the Low-load 3 purchase option

- "RCS" means the Redemption charge purchase option

¹ Except as otherwise noted, this column indicates the trailing commission that applies for (i) LL2, within the first two years following purchase; (ii) LL3, within the first three years of purchase; or (iii) RCS, for the first seven years following purchase. Thereafter, the trailing commission set forth for the SCS shall apply.

² Not all Funds offer all or any of these series of units under this purchase option.

³ Fund also offers Series GP. No trailing commission is paid on these series of the Fund.

⁴ No trailing commission is paid in the first year following the purchase of these units.

⁵ Trailing commission payments on these Funds are generally made in U.S. dollars, unless we receive instructions from a dealer to pay applicable trailing commission amounts in Canadian dollars. When a dealer requests to be paid trailing commissions in Canadian dollars we will calculate the amount using the exchange rate posted at the close of the North American markets on the last business day of that month.

⁶ No later than June 1, 2022, we will stop paying any trail commissions on Series D units and the management fee will be reduced by this amount.

In addition to the table above, we will pay dealers a trailer fee at an annual rate of 0.50% of the value of the Investor Series units placed in the Funds, except for Investor Series units of Mackenzie Canadian Bond Fund for which we pay a trailer fee at an annual rate of 0.25%, and Series C and Investor Series units of Mackenzie Canadian Money Market Fund for which no trailing commissions are paid. In the event that B2B Bank Securities Services Inc. or its affiliate acts as a dealer for an account held by our employees or directors or our subsidiary, in addition to the amounts set out above, we may pay B2B Bank Securities Services Inc. up to an extra 0.25% for administering that particular staff account.

In circumstances where Mackenzie Fund units are purchased through discount brokerage accounts, we may also pay trailing commissions to the discount broker.

We may change the terms of the trailing commission program or cancel it at any time.

Other Kinds of Dealer Compensation

We pay for marketing materials that we give to dealers to help support their sales efforts. These materials include reports and commentaries on securities, the markets, Mackenzie Funds and the services we offer to you.

We may share with dealers up to 50% of their costs in marketing the Mackenzie Funds. For example, we may pay a portion of the costs of a dealer in advertising the availability of the Mackenzie Funds through the financial advisors of the dealer. We may also pay part of the costs of a dealer in running a seminar to inform you about the Mackenzie Funds or generally about the benefits of investing in mutual funds.

We may pay up to 10% of the costs of some dealers to hold educational seminars or conferences for their financial advisors in order to teach them about, among other things, new developments in the mutual fund industry, financial planning or new financial products. The dealer makes all decisions about where and when the conference is held and who can attend.

We also arrange seminars and conferences for financial advisors where we inform them about new developments in the Mackenzie Funds, our products and services and mutual fund industry matters. We invite dealers to send their financial advisors to our seminars and conferences, but we do not decide who attends. The financial advisors must pay their own travel, accommodation and personal expenses for attending our seminars and conferences.

Disclosure of Equity Interests

We are an indirect, wholly owned subsidiary of IGM Financial Inc. (“IGM”), a financial services company listed on the TSX. IGM is a majority-owned subsidiary of Power Corporation of Canada (“Power”). Great-West Lifeco Inc. (“GWL”) is also a majority-owned subsidiary of Power. IGM’s activities are principally carried out through us, Investors Group Inc. and Investment Planning Counsel Inc. (“IPCI”). Other indirect, wholly owned subsidiaries of IGM who are therefore affiliated with us and who, as dealers, may hold, sell and/or recommend units of the Mackenzie Funds include (a) Investors Group Securities Inc. and IPC Securities Corporation (each an investment dealer), and (b) Investors Group Financial Services Inc. and IPC Investment Corporation (each a mutual fund dealer). Each of the Investors Group companies is wholly owned by Investors Group Inc. Each of the IPC companies is wholly owned by IPCI.

GWL’s activities are principally carried out through its subsidiary The Canada Life Assurance Company. Other indirectly owned subsidiaries of GWL who are therefore affiliated with us and who, as dealers, may hold, sell and/or recommend units of the Mackenzie Funds include Quadrus Investment Services Ltd. (a mutual fund dealer). All investment dealers and mutual fund dealers referenced above are, collectively, “participating dealers”. From time to time, representatives of any of the participating dealers may own, directly or indirectly, shares of IGM, GWL or Power.

Please refer to the annual information form for additional details on the relevant corporate relationships within the Power Group of Companies.

DEALER COMPENSATION FROM MANAGEMENT FEES

During our financial year ended December 31, 2020, we paid to dealers who distributed units of Mackenzie Funds total cash compensation (sales commissions, trailing commissions and other kinds of cash compensation) representing approximately 43.87% of the total management fees which we received from all of our funds in that year.

INCOME TAX CONSIDERATIONS

This is a general summary of certain Canadian federal income tax considerations applicable to you as an investor in the Funds. This summary assumes that you are an individual (other than a trust) resident in Canada and that you hold your units directly, as capital property or within a registered plan, and are not affiliated with and deal with the Fund at arm’s length. **This summary is not intended to be legal advice or tax advice. We have tried to make this discussion easy to understand. As a result, it may not be technically precise or cover all the tax consequences that may be relevant to you. Accordingly, you should consult your own tax advisor, having regard to your own particular circumstances when you consider purchasing, switching or redeeming units of a Fund.**

This summary is based on the current provisions of the Tax Act, the regulations under the Tax Act, all proposals for specific amendments to the Tax Act or the regulations that have been publicly announced by the Minister of Finance (Canada) before the date hereof and our understanding of the current published administrative practices and

assessing policies of the CRA. Except for the foregoing, this summary does not take into account or anticipate any change in law, whether by legislative, regulatory, administrative or judicial action. Furthermore, this summary does not take into account provincial, territorial or foreign income tax legislation or considerations.

This summary is also based on the assumptions that: (i) none of the issuers of securities held by a Fund will be a foreign affiliate of the Fund or any unitholder, (ii) none of the securities held by a Fund will be a “tax shelter investment” within the meaning of section 143.2 of the Tax Act; (iii) none of the securities held by the Fund will be an interest in a trust (or a partnership which holds such an interest) which would require the Fund (or the partnership) to report significant amounts of income in connection with such interest pursuant to the rules in section 94.1 or 94.2 of the Tax Act, or an interest in a non-resident trust other than an “exempt foreign trust” as defined in the Tax Act; and (iv) no Fund will enter into any arrangement where the result is a dividend rental arrangement for the purposes of the Tax Act.

How the Funds are Taxed

The following paragraphs describe some of the ways in which mutual funds can earn income:

- Mutual funds can earn income in the form of interest, dividends or income from the investments they make, including in other mutual funds, and can be deemed to earn income from investments in certain foreign entities. All income must be computed in Canadian dollars, even if earned in a foreign currency.
- Mutual funds can realize a capital gain by selling an investment for more than its adjusted cost base (“ACB”). They can also realize a capital loss by selling an investment for less than its ACB. A mutual fund that invests in foreign-denominated securities must calculate its ACB and proceeds of disposition in Canadian dollars based on the conversion rate on the date the securities were purchased and sold, as applicable. As a result, a mutual fund may realize capital gains and losses due to changes in the value of the foreign currency relative to the Canadian dollar.
- Mutual funds can realize gains and losses from using derivatives or engaging in short selling. Generally, gains and losses from derivatives are added to or subtracted from the mutual fund’s income. However, if derivatives are used by a mutual fund as a hedge to limit its gain or loss on a specific capital asset or group of capital assets and there is sufficient linkage, then the gains and losses from these derivatives are generally capital gains or capital losses. Generally, gains and losses from short selling Canadian securities are treated as capital, and gains and losses from short-selling foreign securities are treated as income. The derivative forward agreement rules in the Tax Act (the “DFA Rules”) target certain financial arrangements (described in the DFA Rules as “derivative forward agreements”) that seek to reduce tax by converting, through the use of derivative contracts, the return on investments that would have the character of

ordinary income to capital gains. The DFA Rules will generally not apply to derivatives used to closely hedge gains or losses due to currency fluctuations on underlying capital investments of a Fund. Hedging, other than currency hedging on underlying capital investments, which reduces tax by converting the return on investments that would have the character of ordinary income to capital gains through the use of derivative contracts, will be treated by the DFA Rules as on income account.

- Gains and losses from trading in precious metals and bullion will be treated on income account, rather than as capital gains and losses.

In certain circumstances, a Fund may be subject to loss restriction rules that deny or defer the deduction of certain losses. For example, a capital loss realized by a Fund will be suspended if, during the period that begins 30 days before and ends 30 days after the date on which the capital loss was realized, the Fund or an affiliated person (as defined in the Tax Act) acquires property that is, or is identical to, the property on which the loss was realized and continues to own that property at the end of the period.

If a Fund invests in another fund that is a Canadian resident trust (an “Underlying Canadian Fund”), other than a specified investment flow-through trust, the Underlying Canadian Fund may designate to the Fund a portion of the distributed amounts as may reasonably be considered to consist of (i) taxable dividends (including eligible dividends) received by the Underlying Canadian Fund on shares of taxable Canadian corporations; and (ii) net taxable capital gains realized by the Underlying Canadian Fund. Any such designated amounts will be deemed for tax purposes to be received or realized by the Fund as such a taxable dividend or taxable capital gain, respectively. An Underlying Canadian Fund that pays foreign withholding tax may make designations such that a Fund may be treated as having paid its share of such foreign tax for purposes of the foreign tax credit rules in the Tax Act.

Since the Funds are organized as trusts, the following sections describe the taxation of these types of entities.

The Funds

Each Fund computes its income or loss separately. All of a Fund’s deductible expenses, including management fees, will be deducted in calculating the Fund’s income for each taxation year. The Fund will be subject to tax on its net income, including net taxable capital gains, not paid or payable to its investors for the taxation year after taking into consideration any loss carry-forwards and any capital gains refund. Each Fund intends to pay to investors enough of its income and capital gains for each taxation year so that it will not be liable for ordinary income tax under Part I of the Tax Act.

The losses of a Fund may be restricted when a person or partnership becomes a “majority-interest beneficiary” of the Fund (generally by holding units representing more than 50% of NAV of the Fund) unless the Fund qualifies as an “investment fund” by satisfying certain investment diversification and other conditions.

Each Fund will be entitled for each taxation year throughout which it is a mutual fund trust to reduce (or receive a refund in respect of) its liability, if any, for tax on its net realized capital gains by an account

determined under the Tax Act based on the redemptions of its units during the year (“**capital gains refund**”). The Manager may in its discretion utilize the capital gains refund mechanism for a Fund in any particular year. The capital gains refund in a particular taxation year may not completely offset the tax liability of the Fund for such taxation year which may arise upon the sale of its investments in connection with redemption of units.

Funds that do not qualify as “mutual fund trusts”

A Fund that does not qualify as a “**mutual fund trust**” for purposes of the Tax Act throughout its taxation year is not eligible for the capital gains refund and could be subject to alternative minimum tax for the year, as well as other taxes under the Tax Act. In addition, if one or more “**financial institutions**”, as defined in the Tax Act, owns more than 50% of the fair market value of the units of such a Fund, that Fund will be a “**financial institution**” for income tax purposes and thus is subject to certain “**mark-to-market**” tax rules. In this case, most of the Fund’s investments would be considered mark-to-market property, with the result that

- it will be deemed to have disposed of and re-acquired its mark-to-market property at the end of each taxation year, as well as at such time as it becomes, or ceases to be, a financial institution; and
- the gains and losses from these deemed dispositions will be on income account, not capital account.

In any year throughout which the Funds do not qualify as a mutual fund trust under the Tax Act, the Funds could be subject to tax under Part XII.2 of the Tax Act. Part XII.2 of the Tax Act provides that certain trusts (excluding mutual fund trusts) that have an investor who is a “designated beneficiary” under the Tax Act at any time in the taxation year are subject to a special tax under Part XII.2 of the Tax Act on the trust’s “designated income” under the Tax Act. “Designated beneficiaries” generally include non-resident persons, non-resident owned investment corporations, certain trusts, certain partnerships, and certain tax-exempt persons in certain circumstances where the tax-exempt person acquires units from another beneficiary. “Designated income” generally includes income from businesses carried on in Canada and taxable capital gains from dispositions of taxable Canadian property. Where the Fund is subject to tax under Part XII.2, provisions in the Tax Act are intended to ensure that Unitholders who are not designated beneficiaries receive an appropriate refundable tax credit.

The following Funds were established in 2021, and do not yet qualify as a “mutual fund trust” but are each expected to qualify as a mutual fund trust by the time it files its first tax return in which it will make an election to be deemed to be a mutual fund trust effective from the date of its creation:

- Mackenzie ChinaAMC Multi-Asset Fund,
- Mackenzie Global Green Bond Fund,
- Mackenzie Global Sustainable Bond Fund,
- Mackenzie Greenchip Global Environmental Balanced Fund,
- Mackenzie Maximum Diversification Global Multi-Asset Fund, and
- Mackenzie Monthly Income Growth Portfolio.

The following Trust Funds will not meet the requirements to become “mutual fund trusts” during their 2021 taxation years, and are expected to qualify as “mutual fund trusts” throughout their 2022 and later taxation years:

- Mackenzie Private Global Conservative Income Balanced Pool, and
- Mackenzie Private Global Fixed Income Pool.

Each of Mackenzie Anti-Benchmark Global High Yield Fund, Mackenzie Canadian Sustainable Bond Fund and Mackenzie Greenchip Global Environmental Equity Fund does not qualify as a mutual fund trust and is not expected to qualify in the future and, as a result, could be subject to alternative minimum tax. These Funds will be managed to avoid tax under Part XII.2 of the Tax Act and the application of the “mark-to-market” tax rules.

Taxation of the Fund if Investing in Foreign-Domiciled Underlying Trusts

Section 94.2

A Fund may invest in foreign-domiciled underlying investment funds that qualify as “exempt foreign trusts” (the “**Underlying Foreign Funds**”) for purposes of the non-resident trust rules in sections 94 and 94.2 of the Tax Act.

If the total fair market value at any time of all fixed interests of a particular class in an Underlying Foreign Fund held by the Fund, persons or partnerships not dealing at arm’s length with the Fund, or persons or partnerships that acquired their interests in the Underlying Foreign Fund in exchange for consideration given to the Underlying Foreign Fund by the Fund, is at least 10% of the total fair market value at the time of all fixed interests of the particular class of the Underlying Foreign Fund, the Underlying Foreign Fund will be a “foreign affiliate” of the Fund and will be deemed by section 94.2 of the Tax Act to be at the time a “controlled foreign affiliate” of the Fund.

If the Underlying Foreign Fund is deemed to be a “controlled foreign affiliate” of the Fund at the end of the particular taxation year of the Underlying Foreign Fund and earns income that is characterized as “foreign accrual property income” as defined in the Tax Act (“**FAPI**”) in that taxation year of the Underlying Foreign Fund, the Fund’s proportionate share of the FAPI (subject to deduction for grossed up “foreign accrual tax” as discussed below) must be included in computing its income for Canadian federal income tax purposes for the taxation year of the Fund in which that taxation year of the Underlying Foreign Fund ends, whether or not the Fund actually receives a distribution of that FAPI. It is expected that the full amount of the income, as determined for Canadian federal income tax purposes, allocated or distributed to an Underlying Foreign Fund by the issuers that it holds securities of will be FAPI. FAPI will also include any net realized taxable capital gains, as determined for Canadian federal income tax purposes, of the Underlying Foreign Fund from the disposition of those securities.

To the extent an amount of FAPI will be required to be included in computing the income of a Fund for Canadian federal income tax purposes, a grossed-up amount may be deductible in respect of the “foreign accrual tax” as defined in the Tax Act (“**FAT**”), if any,

applicable to the FAPI. Any amount of FAPI included in income (net the amount of any FAT deduction) will increase the adjusted cost base to the Fund of its units of the Underlying Foreign Fund in respect of which the FAPI was included.

How You Are Taxed on a Fund Investment

How you are taxed on an investment in the Funds depends on whether you hold the investment inside or outside a registered plan.

If you own the Funds outside a registered plan

Distributions

You must include in your income for a taxation year the taxable portion of all distributions (including Fee Distributions) paid or payable (collectively, “paid”) to you from a Fund during the year, computed in Canadian dollars, whether these amounts were paid to you in cash or reinvested in additional units. In the case of the US Dollar Funds, you will be paid in U.S. dollars; however, you will have to convert the amounts paid to you into Canadian dollars for tax purposes. The amount of reinvested distributions is added to the ACB of your units to reduce your capital gain or increase your capital loss when you later redeem. This ensures that you do not pay tax on the amount again at a later date.

Distributions paid by a Fund may consist of capital gains, ordinary taxable dividends, foreign-source income, other income and/or return of capital.

Ordinary taxable dividends are included in your income, subject to the gross-up and dividend tax credit rules. Capital gains distributions will be treated as capital gains realized by you, one-half of which will generally be included in calculating your income as a taxable capital gain. A Fund may make designations in respect of its foreign-source income so that you may be able to claim any foreign tax credits allocated to you by that Fund.

You may receive a return of capital from your Fund. You will not be taxed on a return of capital, but it will reduce the ACB of your units of that Fund such that, when you redeem your units, you will realize a greater capital gain (or smaller capital loss) than if you had not received the return of capital. If the ACB of your units is reduced to less than zero, the ACB of your units will be deemed to be increased to zero and you will be deemed to realize a capital gain equal to the amount of this increase.

The higher the portfolio turnover rate of a Fund in a year, the greater the chance that you will receive a capital gains distribution. There is not necessarily a relationship between a high turnover rate and the performance of a Fund.

When units of a Fund are acquired by purchasing or switching into that Fund, a portion of the acquisition price may reflect income and capital gains of the Fund that have not yet been realized or distributed. Accordingly, unitholders who acquire units of a Fund just before a distribution date, including at year-end, may be required to include in their income amounts distributed from the Fund, even though these amounts were earned by the Fund before the unitholder acquired the units and were included in the price of the units.

Sales and redemption charges and fees

A sales charge paid on the purchase of units is not deductible in computing your income but is added to the ACB of your units. A redemption charge paid on the redemption of units is not deductible in computing your income but effectively reduces the proceeds of disposition of your units.

The fees that you pay for Series O, O5, PWX, PWX5 and PWX8 units (“**Unbundled Fees**”) consist of advisory fees that you pay to your dealer and management fees that you pay to us. To the extent that such fees are collected by redemption of units, you will realize gains or losses in non-registered accounts. The deductibility of Unbundled Fees, for income tax purposes, will depend on the exact nature of services provided to you and the type of investment held. Fees relating to services provided to registered accounts are not deductible for income tax purposes, regardless of whether such fees were charged to the registered account. You should consult with your tax advisor regarding the deductibility of Unbundled Fees paid in your particular circumstance.

Switches

You will not realize a capital gain or capital loss when you switch the purchase option under which you hold units of a series of a Fund.

You will not realize a capital gain or capital loss when you switch between series of the same Fund. The cost of the acquired units will be equal to the ACB of the units that you switched.

Other switches involve a redemption of the units being switched and a purchase of the units acquired on the switch.

Redemptions

You will realize a capital gain (capital loss) if any of your units in a Fund are redeemed. Generally, your capital gain (capital loss) will be the amount by which the NAV of the redeemed units is greater (less) than the ACB of those units. You may deduct redemption charges and other expenses of redemption when calculating your capital gain (capital loss). Generally, one-half of your capital gain is included in your income for tax purposes as a taxable capital gain and one-half of your capital loss can be deducted against your taxable capital gains, subject to the provisions of the Tax Act.

In certain circumstances, loss restriction rules will limit or eliminate the amount of a capital loss that you may deduct. For example, a capital loss that you realize on a redemption of units will be deemed to be nil if, during the period that begins 30 days before and ends 30 days after the day of that redemption, you acquired identical units (including through the reinvestment of distributions or a Fee Distribution paid to you) and you continue to own these identical units at the end of that period. In this case, the amount of the denied capital loss will be added to the ACB of your units. This rule will also apply where the identical units are acquired and held by a person affiliated with you (as defined in the Tax Act).

Calculating Your ACB

Your ACB must be calculated separately for each series of units that you own in each Fund and must be calculated in Canadian dollars.

The total ACB of your units of a particular series of a Fund is generally equal to

- the total of all amounts you paid to purchase those units, including any sales charges paid by you at the time of purchase;

plus

- the ACB of any units of another series and/or Fund that were switched on a tax-deferred basis into units of the particular series;

plus

- the amount of any reinvested distributions on that series;

less

- the return of capital component of distributions on that series;

less

- the ACB of any units of the series that were switched on a tax-deferred basis into units of another series and/or Fund;

less

- the ACB of any of your units of that series that have been redeemed.

The ACB of a single security is the average of the total ACB. Where you switch between series and/or purchase options of the same Fund, the cost of the new units acquired on the switch will generally be equal to the ACB of the previously owned units switched for those new securities.

For example, suppose you own 500 units of a particular series of a Fund with an ACB of \$10 each (a total of \$5,000). Suppose you then purchase another 100 units of the same series of the Fund for an additional \$1,200, including a sales charge. Your total ACB is \$6,200 for 600 units so that your new ACB of each unit of the series of the Fund is \$6,200 divided by 600 units or \$10.33 per unit.

Taxes on U.S. Dollar Income

The CRA requires any income and any capital gains and losses to be reported in Canadian dollars. As a result, when you receive a distribution from a US Dollar Fund, you will need to calculate the amount in Canadian dollars using the exchange rate posted at the close of the North American markets on that trading day. Additionally, when you redeem units of a US Dollar Fund, you will need to calculate any gains or losses based on the Canadian dollar value of the Fund units on the date they were purchased and the date they were redeemed.

You should consult your own tax advisor regarding the tax consequences of receiving income and proceeds of redemption in U.S. dollars.

Alternative minimum tax

Amounts included in your income as distributions of Canadian dividends or capital gains, as well as any capital gains realized by

you on the disposition of units, may increase your liability for alternative minimum tax.

Tax statements and reporting

If applicable, we will send tax statements to you each year identifying the taxable portion of your distributions, the return of capital component of distributions and redemption proceeds paid to you for each year. Tax statements will not be sent to you if you did not receive distributions or redemption proceeds, or if units are held in your registered plan. You should keep detailed records of your purchase cost, sales charges, distributions, redemption proceeds and redemption charges in order to calculate the ACB of your units. You may wish to consult a tax advisor to help you with these calculations.

Generally, you will be required to provide your financial advisor with information related to your citizenship or residence for tax purposes, and, if applicable, your foreign tax identification number. If you, or your controlling person(s) are (i) identified as a U.S. Person (including a U.S. resident or citizen), (ii) identified as a tax resident of a country other than Canada or the U.S., or (iii) do not provide the required information and indicia of U.S. or non-Canadian status are present, details about you and your investment in a Fund will be reported to the CRA unless units are held inside a registered plan. The CRA will provide the information to the relevant foreign tax authorities under exchange of information treaties.

If you own the Funds inside a registered plan

When units of a Fund are held in your registered plan, generally, neither you nor your registered plan will be taxed on distributions received from the Fund or capital gains realized on the disposition of the units of the Fund provided the units are a qualified investment and are not a prohibited investment for the registered plan. However, a withdrawal from a registered plan may be subject to tax.

The units of each Fund, other than the Mackenzie Anti-Benchmark Global High Yield Fund, Mackenzie Canadian Sustainable Bond Fund and the Mackenzie Greenchip Global Environmental Equity Fund, are expected to be a qualified investment for registered plans at all times.

A unit of a Fund may be a prohibited investment for your registered plan (other than a DPSP) even though it is a qualified investment. If your registered plan holds a prohibited investment, you become liable to a 50% potentially refundable tax on the value of the prohibited investment and a 100% tax on income and capital gains attributable to, and capital gains realized on, the disposition of the prohibited investment.

The following Funds were recently established:

- Mackenzie Anti-Benchmark Global High Yield Fund
- Mackenzie Canadian Sustainable Bond Fund
- Mackenzie ChinaAMC Multi-Asset Fund
- Mackenzie Greenchip Global Environmental Equity Fund
- Mackenzie Global Green Bond Fund
- Mackenzie Global Sustainable Bond Fund
- Mackenzie Greenchip Global Environmental Balanced Fund

- Mackenzie Maximum Diversification Global Multi-Asset Fund
- Mackenzie Monthly Income Growth Portfolio

Under a safe harbour rule for new mutual funds, units of these Funds will not be a prohibited investment for your registered plan at any time during the first 24 months of the Fund's existence provided that the Fund is a mutual fund trust under the Tax Act during that time and is in substantial compliance with NI 81-102 or follows a reasonable policy of investment diversification.

You should consult with your own tax advisor regarding the special rules that apply to each type of registered plan, including whether or not a particular unit of a Fund would be a prohibited investment for your registered plan. It is your responsibility to determine the tax consequences to you and your registered plan of establishing the registered plan and causing it to invest in the Funds. Neither we nor the Funds assume any liability to you as a result of making the Funds and/or series available for investment within registered plans.

WHAT ARE YOUR LEGAL RIGHTS?

Securities legislation in some provinces gives you the right to withdraw from an agreement to buy securities of a mutual fund within two (2) Business Days of receiving the Fund Facts, or to cancel your purchase within forty-eight (48) hours of receiving confirmation of your order.

Securities legislation in some provinces and territories also allows you to cancel an agreement to buy securities of a mutual fund and get your money back, or to make a claim for damages, if (i) the Fund Facts are not sent or delivered to you within the time required under securities legislation, or (ii) the simplified prospectus, annual information form, Fund Facts or financial statements misrepresent any facts about the mutual fund. These rights must usually be exercised within certain time limits.

For more information, refer to the securities legislation of your province or territory or consult your lawyer.

PART B: SPECIFIC INFORMATION ABOUT EACH OF THE MUTUAL FUNDS DESCRIBED IN THIS DOCUMENT

INTRODUCTION TO PART B

Part B provides specific fund descriptions of each of the Funds in this simplified prospectus. It supplements the general information concerning these Funds that is contained in Part A.

This **Introduction to Part B** explains most of the terms and assumptions which appear in this Part B, and the information common to many of the Funds, so that we do not have to repeat that information for each Fund.

Fund Details

This section of each Fund's Part B gives you information such as the Fund's type, its start date or when it was first publicly sold to investors, the nature of the units offered by the Fund, the series offered by the Fund, whether units are qualified investments under the Tax Act for registered plans, and the name of the Fund's sub-advisor(s) (if no sub-advisor is cited, then we directly provide portfolio management services to the Fund).

What Does the Fund Invest In?

Investment Objectives and Strategies

Each Fund's Part B describes the Fund's investment objectives and investment strategies. The investment objectives can only be changed with the consent of the investors in the Fund at a meeting called for that purpose. The investment strategies explain how the Fund intends to achieve its investment objectives. As manager of the Funds, we may change the investment strategies from time to time, but will give you notice, by way of a press release, of our intention to do so if it would be a material change as defined in National Instrument 81-106 – Investment Fund Continuous Disclosure ("**NI 81-106**"). Under NI 81-106, a change in the business, operations or affairs of a Fund is considered to be a "material change" if a reasonable investor would consider it important in deciding whether to purchase or continue to hold units of the Fund.

Use of Derivatives

Most of the Funds may use derivatives for "**hedging**" purposes to reduce the Fund's exposure to changes in securities prices, interest rates, exchange rates or other risks. Derivatives may also be used for "**non-hedging**" purposes, which may include the following: (i) as substitute investments for stocks or a stock market; (ii) to gain exposure to other currencies; (iii) to seek to generate additional income; or (iv) for any other purpose that is consistent with the Fund's investment objectives.

If a Fund intends to use derivatives as part of its investment strategy, we have indicated in the Fund's description of investment strategies whether derivatives may be used for hedging purposes, non-hedging purposes or both. Please visit our website at www.mackenzieinvestments.com/currency for more information about a Fund's use of currency hedging. For more information on

derivatives used by a particular Fund for hedging and non-hedging purposes as at the last day of the applicable financial reporting period, please refer to the Fund's most recent financial statements. Please also refer to the explanation of risks that accompany the use of derivatives under "**Derivatives Risk**" in the "**What are the Risks of Investing in a Mutual Fund?**" section of this document.

Securities Lending, Repurchase and Reverse Repurchase Transactions

Most of the Funds may engage in securities lending, repurchase and reverse repurchase transactions. These transactions are described in the "**What are the Risks of Investing in a Mutual Fund?**" section of this simplified prospectus. Securities lending, repurchase and reverse repurchase transactions may earn additional income for mutual funds. That income comes from the fees paid by the transaction counterparty and interest paid on the cash or securities held as collateral.

On any securities lending, repurchase and reverse repurchase transaction, a Fund must, unless it has been granted relief,

- deal only with counterparties who meet generally accepted creditworthiness standards and who are unrelated to the Fund's portfolio manager, manager or trustee as defined in NI 81-102;
- hold collateral equal to a minimum 102% of the market value of the portfolio securities loaned (for securities lending transactions), sold (for repurchase transactions) or purchased (for reverse repurchase transactions);
- adjust the amount of the collateral on each business day to ensure the value of the collateral relative to the market value of the portfolio securities loaned, sold or purchased remains at or above the minimum 102% limit; and
- limit the aggregate value of all portfolio securities loaned or sold through securities lending and repurchase transactions to no more than 50% of the total assets of the Fund (without including the collateral for loaned securities and cash for sold securities).

Short Selling

Most of the Funds may engage in a limited amount of short selling in accordance with securities regulations. A short sale is a transaction in which a mutual fund sells, on the open market, securities that it has borrowed from a lender for this purpose. At a later date, the mutual fund purchases identical securities on the open market and returns them to the lender. In the interim, the mutual fund must pay compensation to the lender for the loan of the securities and provide collateral to the lender for the loan. If a Fund engages in short selling, it must adhere to securities regulations, where such regulations include the following conditions:

- the aggregate market value of all securities sold short by the Fund will not exceed 20% of the total net assets of the Fund;
- the aggregate market value of all securities of any particular issuer sold short by the Fund will not exceed 5% of the total net assets of the Fund;

- the Fund will hold cash cover equal to at least 150% of the aggregate market value of all securities sold short;
- the Fund will not deposit collateral with a dealer in Canada unless the dealer is registered in a jurisdiction of Canada and is a member of IIROC; and
- the Fund will not deposit collateral with a dealer outside Canada unless that dealer (a) is a member of a stock exchange that requires the dealer to be subjected to a regulatory audit; and (b) has a net worth in excess of CDN \$50 million.

Exemptions from NI 81-102

The Funds are subject to certain restrictions and practices contained in securities legislation, including NI 81-102, which are designed, in part, to ensure that the investments of mutual funds are diversified and relatively liquid and to ensure the proper administration of mutual funds. We intend to manage the Funds in accordance with these restrictions and practices or to obtain relief from the securities regulatory authorities before implementing any variations. The following provides a description of the exemptions that certain Funds have received from the provisions of NI 81-102, and/or a description of the general investment activity.

A) Oil and Natural Gas Futures Relief

A commodity futures contract is an agreement between two parties to buy or sell a commodity at an agreed upon price at a future date. The value of the contract is based on the value of the underlying commodity. Each of the following Funds has obtained regulatory approval for an exemption from certain requirements in NI 81-102 in order to trade in commodity futures contracts whose underlying interest is sweet crude oil or natural gas (“oil or natural gas futures”) for the purpose of hedging the Fund’s portfolio investments in securities whose value may fluctuate with oil or natural gas prices:

Fund	Exposure Limit
Mackenzie Cundill Canadian Balanced Fund	10%
Mackenzie Cundill Canadian Security Fund	10%
Mackenzie Canadian Dividend Fund	20%
Mackenzie Strategic Income Fund	20%
Mackenzie Global Resource Fund	75%

A Fund will not purchase oil or natural gas futures if, immediately following the purchase, the aggregate value of such investments would exceed this percentage of the total net assets of the Fund at that time.

In addition to the Exposure Limit in the table above, each Fund’s trades in oil or natural gas futures are subject to certain conditions. The trades must be otherwise made in accordance with the securities regulations relating to the use of derivatives for hedging purposes. A Fund will only trade oil or natural gas futures for cash and must close out its position in oil or natural gas futures by entering into an offsetting position in these futures prior to the first date on which the Fund could be required to make or take delivery of the underlying interest. The sub-advisor and/or portfolio manager making purchase and sale decisions for the Fund must be registered

as a Commodity Trading Manager under the CFA or have been granted an exemption from this registration requirement. Each trade of oil or natural gas futures will be made through the New York Mercantile Exchange or the ICE Futures Europe.

B) Precious Metals Relief

All Funds, other than money market funds, may purchase and hold silver, permitted silver certificates and derivatives whose underlying interest is silver on an unlevered basis (collectively, “Silver Products”), provided that

- a Fund’s investment in Silver Products is in accordance with its fundamental investment objectives; and
- a Fund may not purchase Silver Products if, immediately after the transaction, the Fund’s aggregate market value exposure (whether direct or indirect through Commodity ETFs, as defined in the “U.S. Listed ETF Relief” below) to all physical commodities (including gold), exceeds 10% of its NAV, taken at market value at the time of the transaction.

C) Foreign Sovereign Debt Investment Relief

The following Funds have obtained regulatory approval for an exemption from certain requirements in NI 81-102 in order to invest in foreign sovereign debt.

1. Each of Mackenzie Global Sustainable Balanced Fund, Mackenzie Ivy Foreign Equity Fund, Mackenzie Greenchip Global Environmental Balanced Fund, Mackenzie Ivy Global Balanced Fund, [Mackenzie Canadian Sustainable Bond Fund, Mackenzie Global Green Bond Fund, Mackenzie Anti-Benchmark Global High Yield Fund,] Mackenzie Private Global Conservative Income Balanced Pool, Mackenzie Private Global Fixed Income Pool, Mackenzie Private Global Income Balanced Pool, Mackenzie Global Strategic Income Fund, Mackenzie Global Tactical Bond Fund, Mackenzie USD Global Strategic Income Fund, Mackenzie Global Tactical Investment Grade Bond Fund and all future funds launched after September 16, 2021 that have investment objectives and strategies that permit a majority investment in fixed income securities has obtained regulatory approval to invest up to
 - (a) 20% of its net assets, taken at market value at the time of purchase, in government and/or supranational agency-issued or guaranteed debt securities of any one issuer with a credit rating of “AA” or higher; and
 - (b) 35% of its net assets, taken at market value at the time of purchase, in government and/or supranational agency-issued or guaranteed debt securities of any one issuer with a credit rating of “AAA” or higher.

This approval includes the following conditions:

- (a) and (b) above may not be combined for any one issuer;
- the securities that are purchased must be traded on a mature and liquid market; and
- the acquisition of the securities purchased must be consistent with the fundamental investment objectives of the Fund.

The following additional conditions apply to each of Mackenzie Ivy Foreign Equity Fund and Mackenzie Ivy Global Balanced Fund:

- the purchases of debt securities under the approval must be restricted to debt securities, of the government of a sovereign state, that qualify as “**cash equivalents**” under NI 81-102; and
 - the Fund shall not purchase additional debt securities rated “**AA**” that are issued by any one foreign government if, immediately after the transaction, more than 20% of the net assets of the Fund, taken at market value at the time of the transaction, would be invested in debt securities issued by that one foreign government; and the Fund shall not purchase additional debt securities rated “**AAA**” that are issued by any one foreign government if, immediately after the transaction, more than 35% of the net assets of the Fund, taken at market value at the time of the transaction, would be invested in debt securities issued by that one foreign government.
2. Mackenzie Strategic Income Fund has obtained regulatory approval to invest up to
- (a) 20% of the proportion of its net assets then invested in evidences of indebtedness, taken at market value at the time of purchase, in government and/or supranational agency-issued or guaranteed debt securities of any one issuer with a credit rating of “**AA**” or higher; and
 - (b) 35% of the proportion of its net assets then invested in evidences of indebtedness, taken at market value at the time of purchase, in government-issued or guaranteed debt securities of any one issuer with a credit rating of “**AAA**” or higher.

This approval includes the following conditions:

- (a) and (b) above may not be combined for any one issuer;
- the securities that are purchased must be traded on a mature and liquid market; and
- the acquisition of the securities purchased must be consistent with the fundamental investment objectives of the Fund.

D) Mortgage Relief

Mackenzie Canadian Short Term Income Fund may purchase residential mortgages from our affiliates, provided these mortgages comply with Canada Mortgage and Housing Corporation guidelines and are insured under the *National Housing Act* (“**NHA-insured**”). Mackenzie Canadian Short Term Income Fund may also purchase NHA-insured mortgages and uninsured mortgages from arm’s length lending institutions. The mortgage portfolio will be valued on a daily basis.

Mackenzie Canadian Short Term Income Fund has obtained regulatory relief that exempts it from the requirement to comply with (i) the restrictions in subsections 2.3(b) and 2.3(c) of NI 81-102 (dealing with the purchase of mortgages) where the provisions set out in National Policy Statement No. 29 apply; (ii) the practices in section 2.4 of NI 81-102 (dealing with liquidity) where the provisions

set out in National Policy Statement No. 29 apply; and (iii) the practices in subsection 4.2(1) of NI 81-102 (dealing with the purchase and sale of portfolio securities from related parties) where the Fund will follow the practices set out under “**Purchase and Sale of Mortgages**” in its dealings with affiliated parties. Notwithstanding subsection 2.6(a) of NI 81-102, Mackenzie Canadian Short Term Income Fund may, as permitted by Section III, Clause (1)(b) of National Policy Statement No. 29, borrow an amount not exceeding 10% of its net assets to provide liquidity for redemption purposes only. Please see “**Mackenzie Canadian Short Term Income Fund: Mortgage Disclosure**” in the annual information form for more details.

E) U.S. Listed ETF Relief

Given the incorporation of the alternative mutual funds into NI 81-102, this ETF Relief is only relevant for U.S. listed exchange traded funds.

1. The Funds, other than money market funds, have obtained regulatory approval for an exemption from the Canadian securities regulatory authorities which allows them to purchase and hold securities of the following types of ETFs (collectively, the “**Underlying ETFs**”):
 - (a) ETFs that seek to provide daily results that replicate the daily performance of a specified widely quoted market index (the ETF’s “**Underlying Index**”) by a multiple of up to 200% (“**Leveraged Bull ETFs**”), inverse multiple of up to 100% (“**Inverse ETFs**”), or an inverse multiple of up to 200% (“**Leveraged Bear ETFs**”);
 - (b) ETFs that seek to replicate the performance of gold or silver, or the value of a specified derivative whose underlying interest is gold or silver on an unlevered basis (“**Underlying Gold or Silver Interest**”), or by a multiple of up to 200% (collectively, the “**Leveraged Gold/Silver ETFs**”); and
 - (c) ETFs that invest directly, or indirectly through derivatives, in physical commodities, including but not limited to agriculture or livestock, energy, precious metals and industrial metals, on an unlevered basis (“**Unlevered Commodity ETFs**”), and, together with the Leveraged Gold/Silver ETFs, the “**Commodity ETFs**”).

This relief is subject to the following conditions:

- a Fund’s investment in securities of an Underlying ETF must be in accordance with its fundamental investment objectives;
- the securities of the Underlying ETF must be traded on a stock exchange in Canada or the United States;
- a Fund may not purchase securities of an Underlying ETF if, immediately after the transaction, more than 10% of the NAV of the Fund, taken at market value at the time of the transaction, would consist of securities of Underlying ETFs;
- a Fund may not purchase securities of Inverse ETFs or securities of Leveraged Bear ETFs or sell any securities short if, immediately after the transaction, the Fund’s

aggregate market value exposure represented by all such securities purchased and/or sold short would exceed 20% of the NAV of the Fund, taken at market value at the time of the transaction; and

- immediately after entering into a purchase, derivatives or other transaction to obtain exposure to physical commodities, the Fund's aggregate market value exposure (whether direct or indirect, including through Commodity ETFs) to all physical commodities (including gold) does not exceed 10% of the NAV of the Fund, taken at market value at the time of the transaction.

F) Cover Relief in Connection with Certain Derivatives

All Funds, except for money market funds, have received exemptive relief to permit each Fund to use, as cover, a right or obligation to sell an equivalent quantity of the underlying interest of the standardized future, forward or swap when (i) it opens or maintains a long position in a debt-like security that has a component that is a long position in a forward contract or in a standardized future or forward contract; or (ii) it enters into or maintains a swap position and during the periods when the Fund is entitled to receive payments under the swap. Please see "**Cover relief in connection with certain derivatives**" in the annual information form for more details.

G) Substantial Securityholder Relief

All Funds obtained an exemption from the Canadian securities regulatory authorities which allows them to invest up to 10% of their net asset value in Private Vehicles that are offered by Northleaf despite the fact that Great-West Lifeco Inc., our affiliate, may be a significant investor in a Northleaf Private Vehicle. This relief is subject to the following conditions:

- the purchase or holding of securities of a Private Vehicle offered by Northleaf (a "**Northleaf Fund**") is consistent with, or necessary to meet, the investment objectives and strategies of the Fund; and
- at the time of entering into any commitment of capital to a Northleaf Fund, the Fund's IRC has approved the transaction.

What are the Risks of Investing in the Fund?

We provide a list of the risks of mutual fund investing in the "**What are the General Risks of Investing in a Mutual Fund?**" section of this document. The risks that apply to each Fund are identified under the sub-heading "**What are the Risks of Investing in the Fund?**" for each Fund described in this **Part B**. Those risks are based upon each Fund's expected investments, investment practices and are related to the material risks of investing in that Fund under normal market conditions when considering a Fund's portfolio as a whole, not each individual investment within the portfolio.

We have classified each of the applicable risks as either "primary", "secondary" or "low or not a risk". We consider the primary risks to be the more significant risks in respect of a particular Fund because they occur more frequently and/or because their occurrence will have a more significant impact on a Fund's value. We consider the secondary risks relatively less significant because they occur less

frequently and/or because their occurrence will have a less significant impact on a Fund's value. Low or not a risk means that we consider the risk to be either very remote or non-existent. **All of the applicable risks should be understood and discussed with your financial advisor before making any investment in a Fund.**

Risk classification methodology

The risk ratings referred to in this section help you decide, along with your advisor, whether a Fund is right for you. This information is only a guide. The investment risk level of each Fund is required to be determined in accordance with the Canadian Securities Administrators' standardized risk classification methodology, which is based on the historical volatility of the Fund, as measured by the most recent 10-year standard deviation of the returns of the Fund. Standard deviation is used to quantify the historical dispersion of returns around the average returns over the 10-year period. In this context, it can provide an indication of the amount of variability of returns that occurred relative to the average return over the 10-year measurement period. The higher the standard deviation of a Fund, the greater the range of returns it experienced in the past. In general, the greater the range of returns, the higher the risk.

You should know that other types of risks, both measurable and non-measurable, exist. Also, just as historical performance may not be indicative of future returns, historical volatility may not be indicative of future volatility, especially since the risk rating is based on the standard deviation of the most recent 10-year period.

For any Fund that is new, or for a Fund that has less than 10 years of performance history, we calculate the investment risk level of these Funds using a reference index that reasonably approximates or, for a newly established Fund that is reasonably expected to approximate, the standard deviation of the Fund. If the Fund has less than 10 years of performance history but there is another mutual fund with 10 years of performance history that is managed by us and that is highly similar to the Fund (a "**Reference Fund**"), we calculate the investment risk level using the return history of the Reference Fund rather than that of the reference index. For Funds that have 10 years of performance history, the methodology will calculate the standard deviation of the Fund using the return history of the Fund rather than that of the reference index. In each case, the Funds are assigned an investment risk rating in one of the following categories: low, low to medium, medium, medium to high or high risk.

- **Low** – for Funds with a level of risk that is typically associated with investments in money market funds and/or Canadian fixed-income funds;
- **Low to Medium** – for Funds with a level of risk that is typically associated with investments in balanced funds and global and/or corporate fixed-income funds;
- **Medium** – for Funds with a level of risk that is typically associated with investments in equity portfolios that are diversified among a number of large-capitalization Canadian and/or international equity securities;
- **Medium to High** – for Funds with a level of risk that is typically associated with investments in equity funds that may concentrate their investments in specific regions or specific sectors of the economy; and

- **High** – for Funds with a level of risk that is typically associated with investment in equity portfolios that may concentrate their investments in specific regions or specific sectors of the economy where there is a substantial risk of loss (e.g., emerging markets, resource).

We may exercise discretion and assign a Fund a higher risk classification than indicated by the 10-year standard deviation if we believe that the Fund may be subject to other foreseeable risks that the 10-year standard deviation does not reflect. The following chart sets out a description of the reference index or Reference Funds used for each Fund that has less than 10 years of performance history:

Table 12: Reference Indexes / Reference Funds

Reference Index Definitions

The **Bloomberg Barclays Asia Ex-Japan USD Credit China High Yield Index** tracks the performance of high-yield, fixed-rate US dollar-denominated debt issued by government-related and corporate Chinese issuers. This index is a subset of the flagship EM Asia USD Credit Index.

The **Bloomberg Barclays China Treasury + Policy Bank Index** is a market capitalisation weighted index that aims to reflect the performance of the fixed rate RMB-denominated treasury bonds and policy bank bonds listed on the PRC interbank bond market.

The **Bloomberg Barclays MSCI Green Bond Index (CAD Hedged)** is an objective and robust measure of the global market for fixed income securities issued to fund projects with direct environmental benefits. An independent research driven methodology is used to evaluate index-eligible green bonds to ensure they adhere to established Green Bond Principles and to classify bonds by their environmental use of proceeds.

The **FTSE Environmental Opportunities All-Share Index** measures the performance of global companies that have significant involvement in environmental business activities as defined by the FTSE Environmental Markets Classification System (EMCS). These include Renewable & Alternative Energy, Energy Efficiency, Water Infrastructure and Technology, Waste Management & Technologies, Pollution Control, Environmental Support Services, and Food, Agriculture & Forestry.

The **FTSE TMX Canada All Government Bond Index** is a capitalization weighted index that provides a broad measure of Canadian federal, provincial and municipal bonds.

The **FTSE TMX Canada 91-Day T-Bill Index** is an index of Government of Canada treasury bills with maturities of less than 91 days.

The **FTSE TMX Canada Floating Rate Note Index** comprises Canadian dollar-denominated government or corporate floating-rate bonds having a face value of \$300 million or more, a remaining term to maturity of at least three months and a rating of "A" or higher.

The **FTSE TMX Canada Universe Bond Index** is a broad measure of Canadian bonds with terms to maturity of more than one year. It includes federal, provincial, municipal and corporate bonds rated "BBB" or higher.

The **ICE BofAML 0–1 Year U.S. Corporate Index** tracks the performance of U.S. dollar-denominated investment-grade corporate debt publicly issued in the U.S. domestic market with maturities of less than a year.

The **ICE BofAML Global Broad Market (Hedged to CAD) Index** tracks the performance of investment-grade debt publicly issued in the major domestic and Eurobond markets, including sovereign, quasi-government, corporate, securitized and collateralized securities. Qualifying bonds must be rated "BBB" or higher and have a remaining term to maturity of at least one year. The foreign currency exposure is hedged back to the Canadian dollar.

The **ICE BofAML Global High Yield (Hedged to CAD) Index** tracks the performance of non-investment-grade corporate debt publicly issued in the major domestic or Eurobond markets and denominated in U.S. dollars, Canadian dollars, British pounds, or euros. The foreign currency exposure is hedged back to the Canadian dollar.

The **ICE BofAML Green Bond (Hedged to CAD) Index** tracks the performance of securities issued for qualified "green" purposes. Qualifying bonds must have a clearly designated use of proceeds that is solely applied toward projects or activities that promote climate change mitigation or adaptation or other environmental sustainability purposes as outlined by the ICMA Green Bond

Principles. General debt obligations of corporations that are involved in green industries are not included. The foreign currency exposure is hedged back to the Canadian dollar.

The **ICE BofAML High Yield Canadian Issuers (Hedged to CAD) Index** tracks the performance of non-investment-grade debt publicly issued by Canadian issuers. Qualifying bonds must have at least one year remaining term to maturity, a fixed coupon schedule and a minimum amount outstanding of C\$100 million. The foreign currency exposure is hedged back to the Canadian dollar.

The **ICE BofAML U.S. High Yield (Hedged to CAD) Index** tracks the performance of non-investment-grade U.S. dollar-denominated corporate bonds publicly issued in the U.S. domestic market. Qualifying bonds must have at least one year remaining term to maturity, a fixed coupon schedule and a minimum amount outstanding of US\$100 million. The foreign currency exposure is hedged back to the Canadian dollar.

The **MSCI AC (All Country) World (Net) Index** is a free float adjusted, market capitalization weighted index that is designed to measure the equity market performance of developed and emerging markets. The index consists of 23 developed and 24 emerging market country indices. Net total returns are after the deduction of withholding tax from the foreign income and dividends of its constituents.

The **MSCI AC (All Country) World SMID Cap (Net) Index** captures mid and small cap representation across 23 Developed Markets countries and 26 Emerging Markets countries.

The **MSCI AC (All Country) World Small Cap (Net) Index** captures small-cap representation across 23 developed and 26 emerging market country indices. The index covers approximately 14% of the free float adjusted market capitalization in each country. Net total returns are after the deduction of withholding tax from the foreign income and dividends of its constituents.

The **MSCI China All Shares (Net) Index** captures large- and mid-cap representation across all China securities listed in China and Hong Kong as well as in the United States and Singapore. The index includes A-shares, H-shares, B-shares, red-chips and P-chips, along with China securities (including American depositary receipts, or ADRs) that are listed on the NYSE Euronext (New York), the NASDAQ, the New York AMEX and the Singapore exchanges. Net total returns are after the deduction of withholding tax from the foreign income and dividends of its constituents.

The **MSCI China (Net) Index** captures large and mid cap representation across China H shares, B shares, Red chips, P chips and foreign listings (e.g., ADRs). Net total returns are after the deduction of withholding tax from the foreign income and dividends of its constituents.

The **MSCI EAFE (Europe, Australasia, Far East) (Net) Index** is a free float adjusted, market capitalization weighted index that is designed to measure the equity market performance of developed markets, excluding the United States and Canada. It consists of 21 developed market country indices. Net total returns are after the deduction of withholding tax from the foreign income and dividends of its constituents.

The **MSCI Emerging Markets Investable Market (Net) Index** is a free-float-adjusted, market-capitalization-weighted index that is designed to measure the large, mid and small cap equity market

performance of emerging markets. It consists of 26 emerging market country indices. Net total returns are after the deduction of withholding tax from the foreign income and dividends of its constituents.

The **MSCI World (Net) Index** is a free float adjusted, market capitalization weighted index that is designed to measure the equity market performance of developed markets. It consists of 23 developed market country indices. Net total returns are after the deduction of withholding tax from the foreign income and dividends of its constituents.

The **MSCI World (Net) Index (USD)** is a free float adjusted, market capitalization weighted index that is designed to measure the equity market performance of developed markets. It consists of 23 developed market country indices. Net total returns are after the deduction of withholding tax from the foreign income and dividends of its constituents.

The **Russell Mid Cap Index (Hedged to CAD)** measures the performance of the 800 smallest companies in the Russell 1000 Index. The foreign currency exposure is hedged back to the Canadian dollar.

The **S&P 500 Index** is a market capitalization weighted index of 500 widely held securities, designed to measure broad U.S. equity performance.

The **S&P/LSTA Leveraged Loan (Hedged to CAD) Index** is a broad index designed to reflect the performance of U.S. dollar facilities in the leveraged loan market. The foreign currency exposure is hedged back to the Canadian dollar.

The **S&P/TSX Composite Index** is a capitalization weighted index that represents some of the largest float adjusted stocks trading on the Toronto Stock Exchange.

There may be times when we believe this methodology produces a result that does not reflect a Fund's risk based on other qualitative factors. As a result, we may place a Fund in a higher risk rating category, but we will never place a Fund in a lower risk rating category.

You should know that other types of risks, both measurable and non-measurable, exist. Also, just as historical performance may not be indicative of future returns, historical volatility may not be indicative of future volatility. The risk rating of each Fund is identified under the sub-heading "**Who Should Invest in this Fund?**" for each Fund described in this **Part B** and is reviewed annually and at anytime that the risk rating is no longer reasonable in the circumstances. A more detailed explanation of the risk classification methodology used to identify the risk ratings of the Funds is available on request, at no cost, by calling toll free at 1-800-387-0614 or by writing to Mackenzie Financial Corporation, 180 Queen Street West, Toronto, Ontario M5V 3K1.

Who Should Invest in this Fund?

This section will help you decide, with your financial advisor's help, whether a Fund is right for you. **This information is only a guide.** In this section, we state the risk rating of the Fund, as based on the categories discussed above, and what type of investor should consider an investment in the Fund. For example, you may want to grow your capital over the long term or want to protect your

investment or receive regular cash flows. You may wish to invest outside of a registered plan or may wish to invest in a specific region or industry.

A Fund may be suitable for you as an individual component within your entire portfolio, even if the Fund's risk rating is higher or lower than your personal risk tolerance level. When you choose investments with your financial advisor, you should consider your whole portfolio, investment objectives, your investment time horizon, and your personal risk tolerance level.

Distribution Policy

This section explains the frequency, amount and composition of distributions that you may receive from a Fund. It also explains when you may receive these distributions in cash.

Distribution rules applicable to all series

Each December, a Fund may distribute any undistributed net income and any net capital gains for the year to investors who own units on the distribution record date, but only to the extent required to ensure that the Fund itself will not pay income tax.

The distributions described above will be reinvested, without charge, in additional units of the series on which they were paid, unless you elect in advance to receive them in cash. You may not elect to receive these distributions in cash if your units are Fixed Rate Distribution Series units, Series AR or PWR units, or units that you purchased under a Deferred Sales Charge purchase option (unless otherwise stated below). If your units are of any other type, you may not elect to receive these distributions in cash if your units are held in a Mackenzie Investments-administered registered plan (unless that registered plan is a TFSA, in which case you may elect to have these distributions paid from the TFSA).

If you purchased Series A or Series B units under any purchase option, including a Deferred Sales Charge purchase option of any of the Funds below, you may elect to receive the December distributions described above in cash, unless your securities are held in a Mackenzie Investments-administered registered plan:

- Mackenzie Canadian Dividend Fund
- Mackenzie Floating Rate Income Fund
- Mackenzie Strategic Bond Fund
- Mackenzie Strategic Income Fund
- Mackenzie Diversified Alternatives Fund
- Mackenzie Global Tactical Bond Fund
- Mackenzie Global Tactical Investment Grade Bond Fund
- Mackenzie Investment Grade Floating Rate Fund
- Mackenzie Unconstrained Fixed Income Fund
- Mackenzie USD Unconstrained Fixed Income Fund
- Mackenzie USD Ultra Short Duration Income Fund
- Mackenzie Canadian Bond Fund
- Mackenzie Ivy Canadian Balanced Fund
- Mackenzie Canadian Short Term Income Fund
- Mackenzie Canadian Growth Balanced Fund
- Mackenzie Cundill Canadian Balanced Fund
- Mackenzie Corporate Bond Fund
- Mackenzie US All Cap Growth Fund
- Symmetry Fixed Income Portfolio

- Mackenzie North American Corporate Bond Fund
- Mackenzie US Dividend Fund
- Mackenzie Global Green Bond Fund

Additional distribution rules applicable to monthly distributions on Fixed Rate Distribution Series

A Fund will make monthly distributions on each of its Fixed Rate Distribution Series.

For each Fixed Rate Distribution Series, the amount of the monthly distribution will equal the NAV per security of that series on the last day of the previous calendar year (or on the start date of the series, if the series started in the current calendar year), multiplied by the distribution rate applicable to that series and divided by 12. The distribution rates may be adjusted from time to time at our discretion. You should be aware that the distribution rate may be higher than the Fund's rate of return or the yield of its portfolio.

Each monthly distribution will consist of net income to the extent of the Fund's allocation of net income to that series for that month, and any amount of the distribution that is in excess of the net income for that series will consist of return of capital. Return of capital may, over time, result in the return of the entire amount of the original investment to you. You should not confuse this fixed rate distribution with the Fund's rate of return or the yield of its portfolio.

You must inform us if you wish to receive the monthly distributions from a Fixed Rate Distribution Series in cash; otherwise, the monthly distributions will be reinvested, without charge, in additional units of that series. You may customize the amount of the monthly distributions that you receive in cash by participating in our Flexible Payout Service. You may not receive these distributions in cash if your units are held in a Mackenzie Investments-administered registered plan, unless that registered plan is a TFSA, in which case you may elect to have these distributions paid outside the TFSA.

Your Fund holdings that result from any reinvested distributions on Fixed Rate Distribution Series securities may be subject to redemption fees if you purchased the Fund under a Deferred Sales Charge purchase option. The applicable redemption fee rate will be based on the original date that you purchased the applicable Fixed Rate Distribution Series units.

Fund Expenses Indirectly Borne by Investors

With certain exceptions as described under "Fees and Expenses", the Administration Fees, management fees and fund costs, are generally paid out of each Fund's assets, reducing the investment return on your units. This section contains an example table of the amount of expenses that would be payable by the Fund (for each series of the Fund's units) on a \$1,000 investment, assuming that each Fund earns a constant 5% per year and the MERs for each series of units remain the same as for the past year, for the complete 10 years shown in the example. In the event we have waived a portion of our management fees or Administration Fees, or absorbed some of each Fund's fund costs during the past financial year, the MER would have been higher had it not done so and, consequently, that would have increased the Fund expenses indirectly borne by you. The fees and expenses which you pay directly, and which are

not included in each Fund's MERs, are described in the "Fees and Expenses Payable Directly by You" section of this document.

The example table will help you to compare the cumulative costs of investing in the Funds with the similar costs of investing in other mutual funds. Please remember that it is only an example and that each Fund's actual expenses will vary each year.

There is no table provided of Fund expenses indirectly borne by investors for the Funds listed below because they are new; similarly, there is no such table for a series of a Fund that has not yet completed a financial year as a mutual fund:

- Mackenzie Anti-Benchmark Global High Yield Fund
- Mackenzie Canadian Sustainable Bond Fund
- Mackenzie ChinaAMC Multi-Asset Fund
- Mackenzie Greenchip Global Environmental Equity Fund
- Mackenzie Global Green Bond Fund
- Mackenzie Global Sustainable Bond Fund
- Mackenzie Greenchip Global Environmental Balanced Fund
- Mackenzie Maximum Diversification Global Multi-Asset Fund
- Mackenzie Monthly Income Growth Portfolio

ADDITIONAL INFORMATION

Sustainable Investment at Mackenzie

We define sustainable investing as 1) investment approaches that integrate financially material ESG factors that aim to mitigate investment risk and enhance financial returns, which we consider to be "responsible investing" and/or 2) investment approaches that seek to generate a positive impact on one or more ESG factors, which we consider to be "sustainable solutions", or Funds with ESG as part of their fundamental investment objective. At Mackenzie, all of our investment teams and sub-advisors aim to follow the responsible investing approach, regardless of their investment objective and they use both internal and external evaluation metrics to evaluate investment decisions. With respect to our sustainable solutions, these Funds fall into three categories: a) sustainable core funds which invest in companies or issuers with positive ESG practices that are expected to enhance overall value, b) sustainable thematic funds which target specific ESG micro-trends or themes that aim to generate competitive returns and c) sustainable impact funds that target specific ESG challenges or opportunities.

As part of our process to incorporate ESG factors into our investment process, we are committed to engaging companies and issuers. As long-term investors and stewards of capital, we believe in company and debt issuer engagement and proxy voting to promote good governance and management of material ESG issues. The use of shareholder rights to influence company or issuer behaviour, including through engagement is key to our process. Rather than applying broad based exclusions across all our portfolios, we believe that our role as owners is best suited for constructive dialogue with companies or issuers that are deemed to present the highest ESG risks. Portfolio managers engage in dialogue with companies held in the portfolio of certain Funds with the aim of alerting companies to identified ESG risks, proposing solutions to ESG challenges and improving the outcomes of ESG performance. From a debt

perspective, our portfolio managers will engage with corporate debt issuers and sovereign debt agencies to encourage greater ESG-labeled debt issuances and reinforce the values associated with sustainable investing. We vote proxies in the best interests of the Funds, taking into consideration material ESG risks. When appropriate, we work with industry peers and partners to bring attention to specific ESG risks and opportunities. Mackenzie Investments is a participant of the Climate Action 100+, a signatory to the Principles for Responsible Investment (PRI), a founding signatory of the Responsible Investment Association's Canadian Diversity and Inclusion Investor Statement and is also signatory to the BlackNorth Initiative Pledge.

For more information, please see our Sustainable Investing Policy, available on our website at <https://www.mackenzieinvestments.com/content/dam/mackenzie/en/mutual-funds/mi-sustainable-investing-policy-en.pdf> which sets out our overall approach to sustainable investing.

MACKENZIE ANTI-BENCHMARK GLOBAL HIGH YIELD FUND

Fund Details

Type of Fund	Fixed Income Fund
Start Date	September 29, 2021
Units Offered	Series Start Date
Series R	September 29, 2021
Registered Plan Qualified	No
Sub-Advisor	TOBAM S.A.S. Paris, France

What Does the Fund Invest In?

Investment Objectives

The Fund seeks to generate income with the potential for long-term capital appreciation by investing primarily in global high-yield fixed-income securities of issuers located anywhere in the world. The Fund will invest in a manner that aims to enhance the diversification of its investments.

The Fund will pursue this objective by employing the TOBAM S.A.S. Anti-Benchmark® Global High Yield strategy, which seeks to allocate assets across credit quality, duration, structures, sectors, currencies and countries in a risk efficient manner. It may also use derivatives.

Any change to the investment objectives must be approved by a majority of votes cast at a meeting of security holders held for that reason.

Investment Strategies

The Fund will follow the Anti-Benchmark® Global High Yield strategy, which seeks exposure to the full risk premium by aiming to maximize diversification when selecting securities. The Fund seeks to achieve this goal through a portfolio that is generally fully invested, well-diversified and composed of securities that are attractive from a fundamental and technical standpoint.

The sub-advisor's Anti-Benchmark® Global High Yield strategy is designed to access the credit risk premium from as many independent and effective risk factors as possible by employing a mathematical definition of diversification, which TOBAM defines as the "Diversification Ratio®". This ratio is designed to enhance diversification by selecting securities that have a low correlation to each other, subject to certain constraints.

By monitoring the Diversification Ratio® on a continuous basis, the sub-advisor can employ fundamental analysis and discretionary bonds selection while ensuring that holdings have a low correlation to each other, and therefore seek a high level of diversification to the overall portfolio. As such, the investment philosophy combines a quantitative approach with fundamental analysis to achieve its objectives.

Generally, the Fund will invest no less than 60% of its assets in global credit and fixed-income markets, including global high-yield debt securities that have a credit rating below "BBB-" or an equivalent rating from another recognized credit rating organization and may invest in unrated debt instruments. Security selection is achieved through technical and fundamental analysis, conducted within a universe of well diversified bonds, in order to deliver a highly diversified portfolio of attractive issues.

The Fund will generally have a duration of zero to ten years, but it will manage this in a flexible manner to react to or anticipate changing market opportunities and risks.

Generally, the Fund will be fully invested. However, the Fund may hold cash and/or short-term debt securities in anticipation of, or in response to, unfavourable market conditions; and/or for liquidity purposes.

The Fund considers material environmental, social and/or governance factors in its investment evaluation process.

The Fund has received regulatory approval to invest up to 20% of its net assets, taken at market value at the time of purchase, in government and/or supranational agency-issued or guaranteed debt securities of any one issuer with a credit rating of "AA" or higher and, similarly, up to 35% of its net assets in government and/or supranational agency-issued or guaranteed debt securities of any one issuer with a credit rating of "AAA" or higher. These investments may increase the Fund's exposure to concentration risk, credit risk and foreign markets risk as described under "**What are the General Risks of Investing in a Mutual Fund?**". Please see the "**Introduction to Part B – What Does the Fund Invest In?**" section of this simplified prospectus for more details regarding this regulatory approval.

The Fund may hold a portion of its net assets in securities of other investment funds, including ETFs, which may be managed by us, in accordance with its investment objectives. For more information see the "**Fund of Funds**" disclosure under "**Fees and Expenses**".

In accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described in the "**Introduction to Part B – What Does the Fund Invest In?**" section of this simplified prospectus, the Fund may

- use derivatives for hedging and non-hedging purposes;
- engage in securities lending, repurchase and reverse repurchase transactions; and
- engage in short selling (the portfolio manager does not currently engage in short selling but may do so in the future without further notice to investors).

If the Fund employs any of these strategies, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

What are the Risks of Investing in the Fund?

This Fund invests in fixed-income securities, which subjects the Fund to market risk. Fixed-income securities are subject to company risk, credit risk, interest rate risk, and prepayment risk. The Fund will make use of derivatives and is also subject to derivatives risk. Since

the Fund invests outside of Canada, it is subject to foreign markets risk and foreign currency risk. These and other risks are described starting on page 2. The following table shows which risks apply to this Fund:

Who Should Invest in this Fund?

You should consider this Fund if you

- are looking for a low to medium risk, global fixed income fund to hold as part of your portfolio,
- want a medium-term investment,
- can handle the volatility of bond markets.

Distribution Policy

Refer to the “**Introduction to Part B – Distribution Policy**” section of this simplified prospectus. In addition, the Fund will make monthly distributions of net income. These distributions may be adjusted or discontinued at our discretion. You should not confuse these distributions with the Fund’s rate of return or the yield of its portfolio. You must inform us if you wish to receive these distributions in cash, otherwise they will be reinvested, without charge, in additional securities of the series on which they were paid.

Fund Expenses Indirectly Borne by Investors

This information is not available because the Fund is new.

* A Fixed Rate Distribution Series.

What Does the Fund Invest In?

Investment Objectives

The Fund seeks to provide investors with a diversified portfolio designed to provide a balance of income and long-term capital appreciation.

The Fund seeks to accomplish its objectives by investing primarily in exchange traded funds to gain exposure to Canadian and foreign equity and fixed-income securities and other asset categories.

The Fund may also invest in other mutual funds or invest directly in Canadian and foreign equity and fixed-income securities and other asset categories where the Fund considers it would be beneficial to unitholders to do so.

Any change to the investment objectives must be approved by a majority of votes cast at a meeting of unitholders held for that reason.

Investment Strategies

The Fund's asset mix will generally be kept within the following ranges:

- 40% - 60% equity securities

- 30% - 60% fixed-income securities.

In addition to fixed income and equity exposures, the Fund may also invest in alternative mutual funds.

The asset allocation portfolio manager employs a disciplined total portfolio management approach to constructing the Fund. The Fund is built upon long-term strategic allocations to different equity markets, fixed income markets, and other asset classes. The Fund will be allocated tactically over the short- to medium-term based on changes to the market outlook and risk assessment for each asset class.

The Fund will seek to diversify its equity and fixed-income assets in terms of one or more of these factors:

- geographic exposure
- equity factor exposure
- sector exposure
- company market capitalization
- investment style
- credit quality
- duration.

As a result of this diversification, the Fund may have exposure to securities issued by companies of any size and governments located anywhere in the world, including emerging markets.

The Fund seeks to manage currency exposure on a total portfolio basis through the use of derivatives or foreign currency cash holdings. This means that the asset allocation portfolio manager will take into account the Fund's overall currency exposure across all of its holdings.

The Fund may hold cash and/or short-term debt securities in anticipation of, or in response to, unfavourable market conditions; and/or for liquidity purposes.

The Fund considers material environmental, social and/or governance factors in its investment evaluation process.

The Fund will obtain exposure to equity securities, fixed-income securities and other asset categories primarily by investing in ETFs, managed by Mackenzie, in accordance with its investment objectives. For more information, see the "Fund of Funds" disclosure under "Fees and Expenses".

In accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described in the "Introduction to Part B – What Does the Fund Invest In?" section of this simplified prospectus, the Fund may

- use derivatives for hedging and non-hedging purposes;
- engage in securities lending, repurchase and reverse repurchase transactions;
- engage in short selling (the portfolio manager does not currently engage in short selling but may do so in the future without further notice to investors); and
- invest in gold and silver, and other instruments (such as derivatives and ETFs) that provide exposure to these

metals, and in certain other ETFs that replicate an index on a leveraged basis and/or that invest in physical commodities.

If the Fund employs any of these strategies, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

What are the Risks of Investing in the Fund?

This Fund has exposure to equity securities, which subjects the Fund to market risk, and which are more volatile than other types of investments, such as fixed-income investments. A significant portion of the Fund's exposure is to assets outside of Canada, which means that it is subject to foreign markets risk and foreign currency risk. This Fund also has exposure to fixed-income securities, subjecting it to risks including company risk, credit risk, interest rate risk, and prepayment risk. Any indirect investment in securities may subject the Fund to tracking risk. These and other risks are described starting on page 1. The following table shows which risks apply to this Fund:

* This risk applies only to the Fixed Rate Distribution Series.

Who Should Invest in this Fund?

You should consider this Fund if you

- are looking for a low- to medium-risk, managed asset portfolio fund to hold as a key part of your portfolio,
- want a medium-term investment,
- can handle the ups and downs of stock and bond markets.

You should consider the Fund's Fixed Rate Distribution Series if you want to receive a monthly cash flow.

Distribution Policy

Refer to the "Introduction to Part B – Distribution Policy" section of this simplified prospectus.

On its Fixed Rate Distribution Series, the Fund will make monthly distributions at the following rates:

Fixed Rate Distribution Series	Distribution Rate
F5	5%
F8	8%
FB5	5%
PWFB5	5%

Fixed Rate Distribution Series	Distribution Rate
PWX5	5%
PWT5	5%
PWT8	8%
T5	5%
T8	8%

These fixed rate distributions will consist of net income to the extent of the Fund's allocation of net income to that series for that month, and any amount of the distribution that is in excess of the net income for that series will consist of return of capital. **You should not confuse these distributions with the Fund's rate of return or the yield of its portfolio.**

Fund Expenses Indirectly Borne by Investors

Estimated cumulative expenses payable by each series of securities of the Fund for each \$1,000 investment (see "Introduction to Part B" for an explanation of the assumptions used in this example) for the time periods shown:

What Does the Fund Invest In?

Investment Objectives

The Fund pursues a steady flow of income by investing mainly in Canadian government and corporate fixed-income securities and asset-backed securities with maturities of more than one year.

The Fund also pursues capital gains by actively trading fixed-income securities.

Preservation of capital is an important factor in the selection of portfolio investments.

Any proposed change in the fundamental investment objectives of the Fund must be approved by a majority of the votes cast at a meeting of the Fund's investors called for that purpose.

Investment Strategies

The Fund maintains an investment-grade portfolio. The Fund's investments are generally expected to have a weighted average credit quality of "AA-", as rated by a recognized credit rating organization. The Fund does not invest in securities which are rated

below "BBB-" at the time of purchase. The portfolio manager may vary the weighted average credit quality.

Portfolio maturities are adjusted to take advantage of different stages in the economic cycle: typically, longer maturities will be used when interest rates are falling, and shorter maturities will be used in periods of rising interest rates.

The portfolio manager's ability to select appropriate maturities to adjust to interest rate changes, along with other yield enhancement strategies, will have a significant effect on Fund performance.

The investment approach follows a value investment style. For high-quality bonds an analysis of macroeconomic factors, such as economic growth, inflation, and monetary and fiscal policy, is done in order to position the maturity and credit quality of the portfolio for different stages in the business cycle. Securities that typically have a lower credit quality are analyzed using a bottom-up approach to determine their valuation. This company-specific analysis focuses on stability of cash flows and recovery value of the bonds.

Generally, the Fund will not invest more than 30% of its assets in foreign securities.

The Fund may hold cash and/or short-term debt securities in anticipation of, or in response to, unfavourable market conditions; and/or for liquidity purposes.

The Fund considers material environmental, social and/or governance factors in its investment evaluation process.

Depending on market conditions, the portfolio manager's investment style may result in a higher portfolio turnover rate than less actively managed funds. Although generally the higher the Fund's portfolio turnover rate, the higher its trading expenses, in the case of this Fund, which holds fixed-income products that are traded over the counter (rather than on an exchange), there may be situations where increased turnover actually reduces trading costs. The higher the portfolio turnover rate the greater the probability that you will receive a distribution of capital gains from the Fund, which may be taxable if you hold the Fund outside a registered plan. There is no proven relationship between a high turnover rate and the performance of a mutual fund.

The Fund may hold a portion of its net assets in securities of other investment funds, including ETFs, which may be managed by us, in accordance with its investment objectives. For more information see the "Fund of Funds" disclosure under "Fees and Expenses".

In accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described in the "Introduction to Part B – What Does the Fund Invest In?" section of this simplified prospectus, the Fund may

- use derivatives for hedging and non-hedging purposes;
- engage in securities lending, repurchase and reverse repurchase transactions;
- engage in short selling (the portfolio manager does not currently engage in short selling but may do so in the future without further notice to investors); and
- invest in gold and silver, and other instruments (such as derivatives and ETFs) that provide exposure to these metals.

If the Fund employs any of these strategies, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

What are the Risks of Investing in the Fund?

This Fund invests in fixed-income securities, which subjects the Fund to market risk. Fixed-income securities are subject to company risk, credit risk, interest rate risk, and prepayment risk. These and other risks are described starting on page 1. The following table shows which risks apply to this Fund:

As of September 3, 2021, two securityholders held 18.21% and 13.41%, respectively, of the Fund by market value. **This may subject the Fund to Large Transaction risk.**

Who Should Invest in this Fund?

You should consider this Fund if you

- are looking for a low-risk, Canadian fixed-income fund to hold as part of your portfolio,
- want a short- to medium-term investment,
- can handle the volatility of bond markets.

Distribution Policy

Refer to the “Introduction to Part B – Distribution Policy” section of this simplified prospectus.

In addition, the Fund will make monthly distributions of net income. **These distributions may be adjusted or discontinued at our discretion. You should not confuse these distributions with the Fund’s rate of return or the yield of its portfolio. You must inform us if you wish to receive these distributions in cash, otherwise they will be reinvested, without charge, in additional securities of the series on which they were paid.** You may not elect to receive these distributions in cash if your securities are held in a Mackenzie Investments-administered registered plan, unless that registered plan is a TFSA, in which case you may elect to have these distributions paid from the TFSA.

Fund Expenses Indirectly Borne by Investors

Estimated cumulative expenses payable by each series of securities of the Fund for each \$1,000 investment (see “Introduction to Part B” for an explanation of the assumptions used in this example) for the time periods shown:

Effective December 11, 2017, Series G securities was closed to any new investment, except that investors that hold Series G securities as of this date, and continue to hold these securities, are permitted to make additional purchases

What Does the Fund Invest In?

Investment Objectives

The Fund seeks to achieve superior long-term investment returns through capital growth and dividend yield with below average risk by investing primarily in common and preferred shares of Canadian corporations.

Any proposed change in the fundamental investment objectives of the Fund must be approved by a majority of the votes cast at a meeting of the Fund's investors called for that purpose.

Investment Strategies

The investment approach follows a disciplined investment process to construct a portfolio of attractively valued companies that combines above-average yield with the potential for growth. Stock selection is the primary contributor to value added, with attention

paid to both upside potential and downside risk. Sector allocation is employed to manage overall portfolio risk.

Generally, the portfolio manager seeks to manage the Fund's portfolio so that its yield exceeds the yield of the S&P/TSX Composite Dividend Index.

Generally, the Fund will not invest more than 30% of its assets in foreign securities.

The Fund may hold cash and/or short-term debt securities in anticipation of, or in response to, unfavourable market conditions; and/or for liquidity purposes.

The Fund considers material environmental, social and/or governance factors in its investment evaluation process.

Depending on market conditions, the portfolio manager's investment style may result in a higher portfolio turnover rate than less actively managed funds. Generally, the higher the Fund's portfolio turnover rate, the higher its trading expenses, and the higher the probability that you will receive a distribution of capital gains from the Fund, which may be taxable if you hold the Fund outside a registered plan. There is no proven relationship between a high turnover rate and the performance of a mutual fund.

The Fund may hold a portion of its net assets in securities of other investment funds, including ETFs, which may be managed by us, in accordance with its investment objectives. For more information see the "Fund of Funds" disclosure under "Fees and Expenses".

In accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described in the "Introduction to Part B – What Does the Fund Invest In?" section of this simplified prospectus, the Fund may

- use derivatives for hedging and non-hedging purposes;
- engage in securities lending, repurchase and reverse repurchase transactions;
- engage in short selling (the portfolio manager does not currently engage in short selling but may do so in the future without further notice to investors); and
- invest in gold and silver, and other instruments (such as derivatives and ETFs) that provide exposure to these metals.

If the Fund employs any of these strategies, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

What are the Risks of Investing in the Fund?

This Fund invests in Canadian equities, which subjects the Fund to market risk. Equity securities are more volatile than other types of investments, such as fixed-income investments, and the Canadian economy is more dependent on a small number of industries than other global economies. These and other risks are described starting on page 1. The following table shows which risks apply to this Fund:

Risk Checklist

* This risk applies only to the Fixed Rate Distribution Series.

As of September 3, 2021, three securityholders held 19.76%, 13.81% and 13.41%, respectively, of the Fund by market value. **This may subject the Fund to Large Transaction risk.**

Who Should Invest in this Fund?

You should consider this Fund if you

- are looking for a low- to medium-risk, Canadian income-oriented equity fund to hold as part of your portfolio,
- want a medium- to long-term investment,
- can handle the volatility of stock markets.

You should consider the Fund's Fixed Rate Distribution Series if you want to receive a monthly cash flow.

Distribution Policy

Refer to the "Introduction to Part B – Distribution Policy" section of this simplified prospectus.

On its Fixed Rate Distribution Series, the Fund will make monthly distributions at the following rates:

Fixed Rate Distribution Series	Distribution Rate
F5	5%
F8	8%
FB5	5%
O5	5%
PWFB5	5%
PWT5	5%
PWT8	8%
T5	5%
T8	8%

These fixed rate distributions will consist of net income to the extent of the Fund's allocation of net income to that series for that month, and any amount of the distribution that is in excess of the net income for that series will consist of return of capital. **You should not confuse these distributions with the Fund's rate of return or the yield of its portfolio.**

In addition, on its non-Fixed Rate Distribution Series, the Fund will make monthly distributions of net income. These distributions may be adjusted or discontinued at our discretion. **You must inform us if you wish to receive these distributions in cash, otherwise they will be reinvested, without charge, in additional securities of the series on which they were paid.** You may not elect to receive these distributions in cash if your securities are held in a Mackenzie Investments-administered registered plan, unless that registered plan is a TFSA, in which case you may elect to have these distributions paid from the TFSA.

Fund Expenses Indirectly Borne by Investors

Estimated cumulative expenses payable by each series of securities of the Fund for each \$1,000 investment (see "Introduction to Part B" for an explanation of the assumptions used in this example)

for the time periods shown:

Series (\$)	For 1 Year	For 3 Years	For 5 Years	For 10 Years

What Does the Fund Invest In?

Investment Objectives

Significant long-term capital growth by investing primarily in a well-diversified portfolio of Canadian equity securities.

The fundamental investment objective may only be changed with the approval of a majority of unitholders at a meeting called for that purpose.

Investment Strategies

The investment approach follows a value investment style. By constructing diversified portfolios based on a disciplined, statistically grounded, bottom-up and value-oriented investment approach, the investment team believes it can mitigate risk and maximize long-term investment returns for Fund investors.

Generally, the Fund will not invest more than 30% of its assets in foreign securities.

Generally, the Fund will be fully invested. However, the Fund may hold cash and/or short-term debt securities in anticipation of, or in response to, unfavourable market conditions; and/or for liquidity purposes.

The Fund considers material environmental, social and/or governance factors in its investment evaluation process.

The Fund may hold a portion of its net assets in securities of other investment funds, including ETFs, which may be managed by us, in accordance with its investment objectives. For more information see the “Fund of Funds” disclosure under “Fees and Expenses”.

In accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described in the “Introduction to Part B – What Does the Fund Invest In?” section of this simplified prospectus, the Fund may

- use derivatives for hedging and non-hedging purposes;
- engage in securities lending, repurchase and reverse repurchase transactions;
- engage in short selling (the portfolio manager does not currently engage in short selling but may do so in the future without further notice to investors); and
- invest in gold and silver, and other instruments (such as derivatives and ETFs) that provide exposure to these metals.

If the Fund employs any of these strategies, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

What are the Risks of Investing in the Fund?

This Fund invests in Canadian equities, which subjects the Fund to market risk. Equity securities are more volatile than other types of investments, such as fixed-income investments, and the Canadian economy is more dependent on a small number of industries than other global economies. What Does the Fund Invest In?

Investment Objectives

The Fund pursues long-term capital growth consistent with reasonable safety of capital and a steady flow of current income.

The Fund invests mainly in a combination of Canadian fixed-income securities, equity securities and securities convertible into equity and fixed-income securities.

Any proposed change in the fundamental investment objectives of the Fund must be approved by a majority of the votes cast at a meeting of the Fund's investors called for that purpose.

Investment Strategies

The Fund's asset mix will generally be kept within the following ranges:

- 60-90% equity securities
- 10-40% fixed-income securities, including cash and cash equivalents.

The asset allocation portfolio manager will adjust the percentage of the Fund invested in each asset class based on changes in the market outlook for each asset class.

The equity portfolio manager employs a company-focused investing style, seeking companies with strong management, good growth prospects and a solid financial position. The equity portfolio manager seeks to pay reasonable prices for the free cash flow growth that companies in the portfolio are expected to achieve.

The fixed-income portfolio manager employs a value investment style. For high-quality bonds, the fixed-income portfolio manager analyzes macroeconomic factors, such as economic growth, inflation, and monetary and fiscal policy, in order to position the maturity and credit quality of the fixed-income portfolio for different stages in the economic cycle. The fixed-income portfolio manager analyzes securities that typically have a lower credit quality, such as high-yield debt securities, using a bottom-up approach to assess their valuation. This company-specific analysis focuses on stability of cash flows and recovery value of the debt instruments.

Generally, the Fund will not invest more than 40% of its assets in foreign securities.

The Fund may hold cash and/or short-term debt securities in anticipation of, or in response to, unfavourable market conditions; and/or for liquidity purposes.

The Fund considers material environmental, social and/or governance factors in its investment evaluation process.

Depending on market conditions, the portfolio manager's investment style may result in a higher portfolio turnover rate than less actively managed funds. Generally, the higher the Fund's portfolio turnover rate, the higher its trading expenses, and the higher the probability that you will receive a distribution of capital gains from the Fund, which may be taxable if you hold the Fund outside a registered plan. There is no proven relationship between a high turnover rate and the performance of a mutual fund.

The Fund may hold a portion of its net assets in securities of other investment funds, including ETFs, which may be managed by us, in accordance with its investment objectives. For more information see the "Fund of Funds" disclosure under "Fees and Expenses".

The Fund may invest up to 10% of its net assets in illiquid assets, measured at the time of investment, which may include securities of a Private Vehicle offered by Northleaf and/or Sagard.

In accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described in the "Introduction to Part B – What Does the Fund Invest In?" section of this simplified prospectus, the Fund may

- use derivatives for hedging and non-hedging purposes;

- engage in securities lending, repurchase and reverse repurchase transactions;
- engage in short selling (the portfolio manager does not currently engage in short selling but may do so in the future without further notice to investors); and
- invest in gold and silver, and other instruments (such as derivatives and ETFs) that provide exposure to these metals.

If the Fund employs any of these strategies, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

What are the Risks of Investing in the Fund?

This Fund invests in a combination of Canadian equity and fixed-income securities, which subjects the Fund to market risk. This combination subjects the Fund to a variety of risks inherent in both types of investments, including company risk, credit risk, interest rate risk, and prepayment risk. Also, the Canadian economy is more dependent on a small number of industries than other global economies. The Fund may also invest a portion of its assets outside of Canada, which means that it is subject to foreign markets risk and foreign currency risk. These and other risks are described starting on page 1. The following table shows which risks apply to this Fund:

Risk Checklist

	Primary Risk	Secondary Risk	Low or Not a Risk

Who Should Invest in this Fund?

You should consider this Fund if you

- are looking for a low- to medium-risk, Canadian balanced fund to hold as part of your portfolio,
- want a medium-term investment,
- can handle the volatility of stock and bond markets.

You should consider the Fund's Fixed Rate Distribution Series if you want to receive a monthly cash flow.

Distribution Policy

Refer to the "Introduction to Part B – Distribution Policy" section of this simplified prospectus.

On its Fixed Rate Distribution Series, the Fund will make monthly distributions at the following rates:

Fixed Rate Distribution Series	Distribution Rate
F5	5%
F8	8%
FB5	5%
O5	5%
PWFB5	5%
PWT5	5%

Fixed Rate Distribution Series	Distribution Rate
PWT8	8%
T5	5%
T8	8%
PWX8	8%

These fixed rate distributions will consist of net income to the extent of the Fund's allocation of net income to that series for that month, and any amount of the distribution that is in excess of the net income for that series will consist of return of capital. **You should not confuse these distributions with the Fund's rate of return or the yield of its portfolio.**

In addition, on its non-Fixed Rate Distribution Series, the Fund will make quarterly distributions of net income. These distributions may be adjusted or discontinued at our discretion. **You must inform us if you wish to receive these distributions in cash, otherwise they will be reinvested, without charge, in additional securities of the series on which they were paid.** You may not elect to receive these distributions in cash if your securities are held in a Mackenzie Investments-administered registered plan, unless that registered plan is a TFSA, in which case you may elect to have these distributions paid from the TFSA.

What Does the Fund Invest In?

Investment Objectives

The Fund invests mainly in Canadian equity securities issued by Canadian corporations to achieve long-term capital growth and provide a reasonable rate of return.

Any proposed change in the fundamental investment objectives of the Fund must be approved by a majority of the votes cast at a meeting of the Fund's investors called for that purpose.

Investment Strategies

The investment approach follows a company-focused investment style, seeking companies with strong management, good growth prospects and a solid financial position. Emphasis is placed on paying reasonable prices for the free cash flow growth that companies in the portfolio are expected to achieve.

Generally, the Fund will not invest more than 49% of its assets in foreign securities.

The Fund may hold cash and/or short-term debt securities in anticipation of, or in response to, unfavourable market conditions; and/or for liquidity purposes.

The Fund considers material environmental, social and/or governance factors in its investment evaluation process.

Depending on market conditions, the portfolio manager's investment style may result in a higher portfolio turnover rate than less actively managed funds. Generally, the higher the Fund's portfolio turnover rate, the higher its trading expenses, and the higher the probability that you will receive a distribution of capital gains from the Fund, which may be taxable if you hold the Fund outside a registered plan. There is no proven relationship between a high turnover rate and the performance of a mutual fund.

The Fund may hold a portion of its net assets in securities of other investment funds, including ETFs, which may be managed by us, in accordance with its investment objectives. For more information see the "Fund of Funds" disclosure under "Fees and Expenses".

In accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described in the "Introduction to Part B – What Does the Fund Invest In?" section of this simplified prospectus, the Fund may

- use derivatives for hedging and non-hedging purposes;
- engage in securities lending, repurchase and reverse repurchase transactions;
- engage in short selling (the portfolio manager does not currently engage in short selling but may do so in the future without further notice to investors); and
- invest in gold and silver, and other instruments (such as derivatives and ETFs) that provide exposure to these metals.

If the Fund employs any of these strategies, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

What are the Risks of Investing in the Fund?

This Fund invests in Canadian equities, which subjects the Fund to market risk. Equity securities are more volatile than other types of investments, such as fixed-income investments, and the Canadian economy is more dependent on a small number of industries than other global economies. The Fund may also invest a significant portion of its assets outside of Canada, which means that it is subject to foreign markets risk and foreign currency risk. These and other risks are described starting on page 1. The following table shows which risks apply to this Fund:

Risk Checklist

	Primary Risk	Secondary Risk	Low or Not a Risk

* This risk only applies to the Fixed Rate Distribution Series.

Who Should Invest in this Fund?

You should consider this Fund if you

- are looking for a low- to medium-risk, Canadian equity fund to hold as part of your portfolio,
- want a medium- to long-term investment,
- can handle the volatility of stock markets.

You should consider the Fund's Fixed Rate Distribution Series if you want to receive a monthly cash flow.

Distribution Policy

Refer to the "Introduction to Part B – Distribution Policy" section of this simplified prospectus.

On its Fixed Rate Distribution Series, the Fund will make monthly distributions at the following rates:

Fixed Rate Distribution Series	Distribution Rate
F5	5%
F8	8%
FB5	5%
PWFB5	5%
PWT5	5%
PWT8	8%
PWX8	8%
T5	5%
T8	8%

These fixed rate distributions will consist of net income to the extent of the Fund's allocation of net income to that series for that month, and any amount of the distribution that is in excess of the net income for that series will consist of return of capital. **You should not confuse these distributions with the Fund's rate of return or the yield of its portfolio.**

Fund Expenses Indirectly Borne by Investors

Estimated cumulative expenses payable by each series of securities of the Fund for each \$1,000 investment (see "Introduction to Part B" for an explanation of the assumptions used in this example) for the time periods shown:

What Does the Fund Invest In?

Investment Objectives

The Fund pursues a steady flow of income with reasonable safety of capital and liquidity.

The Fund invests mainly in money market securities and bonds issued by Canadian governments and corporations, with maturities of up to one year, and in floating-rate notes and asset-backed securities.

Any proposed change in the fundamental investment objectives of the Fund must be approved by a majority of the votes cast at a meeting of the Fund's investors called for that purpose.

Investment Strategies

The Fund intends to maintain a portfolio whose liquidity, maturity and diversification satisfy all of the legal requirements for money market funds.

The Fund intends to maintain a portfolio with a high credit quality.

The Fund may, from time to time, invest a portion of its net assets in securities of other money market funds. There will be no duplication of management fees, incentive fees or sales charges between the funds.

The Fund considers material environmental, social and/or governance factors in its investment evaluation process.

In accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described in the "Introduction to Part B – What Does the Fund Invest In?" section of this simplified prospectus, the Fund may engage in securities lending, repurchase and reverse repurchase transactions.

If the Fund employs this strategy, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

What are the Risks of Investing in the Fund?

This Fund invests in fixed-income securities, which subjects the Fund to market risk. Fixed-income securities are subject to company risk, credit risk, interest rate risk, and prepayment risk. These and other risks are described starting on page 1. The following table shows which risks apply to this Fund:

As of September 3, 2021, one securityholder held 23.66% of the Fund by market value. **This may subject the Fund to Large Transaction risk.**

Although the Fund seeks to maintain a constant NAV per security of \$10 for each series, this price could change due to one or more of the risks identified above.

Who Should Invest in this Fund?

You should consider this Fund if you

- are looking for a low-risk, money market fund to hold as part of your portfolio,
- want a short-term investment.

You should only invest in the Series GP securities of this Fund if you want to invest in cash temporarily as a method of entering our Guided Portfolio Service. **Don't buy this series if you don't plan to use our Guided Portfolio Service.**

You should only invest in Series DA or DF securities of this Fund if you want to invest in cash temporarily as a method of entering our One-Step Dollar-Cost Averaging Service. For these investments in Series DA or DF securities, please refer to "**Who Should Invest in this Fund?**" and "**What are the Risks**" sections that correspond to each DA/DF Target Fund that you selected under our One-Step DCA

Service. Don't buy this series if you don't plan to use the One-Step DCA Service.

Distribution Policy

Net income of the Fund accrues to investors daily. On Series AR, PWR, DA and DF, the Fund will make monthly distributions of net income. On all other series, the Fund will make weekly distributions of net income. These distributions are reinvested, without charge, in additional securities of the series on which they were paid, except for distributions on Series DA and DF, which are invested in the DA/DF Target Fund that you select pursuant to our One-Step Dollar-Cost Averaging Service. You may not elect to receive these distributions in cash.

Fund Expenses Indirectly Borne by Investors

Estimated cumulative expenses payable by each series of securities of the Fund for each \$1,000 investment (see "**Introduction to Part B**" for an explanation of the assumptions used in this example) for the time periods shown:

Series (\$)	For 1 Year	For 3 Years	For 5 Years	For 10 Years

Effective December 11, 2017, Series G securities was closed to any new investment, except that investors that hold Series G securities as of this date, and continue to hold these securities, are permitted to make additional purchases.

What Does the Fund Invest In?

Investment Objectives

The Fund seeks to provide a steady flow of income with an emphasis on capital preservation by investing mainly in fixed-income securities issued in Canada by governments, government-related entities and corporations. The Fund will generally invest in high-quality fixed-income securities with relatively short terms to maturity. The portfolio manager may also invest in residential first mortgages insured or guaranteed by Canadian or provincial governments or crown corporations thereof, either directly or indirectly, through pooled mortgage investments, such as mortgage-backed securities.

Any proposed change in the fundamental investment objectives of the Fund must be approved by a majority of votes cast at a meeting of the Fund's investors called for that purpose.

Investment Strategies

The Fund's investments are expected to have a weighted average credit quality of "BBB-" or higher, as rated by a recognized credit rating organization. The portfolio manager may vary the weighted average credit quality and the Fund may invest in bonds that are below investment grade.

In order to limit price volatility, the Fund will limit the weighted average term to maturity of its investments to five years or less.

The portfolio manager will maintain a minimum holding in government issued debt securities of 30%.

The portfolio manager attempts to minimize NAV fluctuations through, among other things, credit analysis, security selection and adjustments to the weighted average term to maturity of the Fund's portfolio.

The investment approach follows a value investment style. For high-quality bonds, an analysis of macroeconomic factors, such as economic growth, inflation, and monetary and fiscal policy, is done in order to position the maturity and credit quality of the portfolio for different stages in the business cycle. Securities that typically have a lower credit quality, such as high-yield debt securities, are analyzed using a bottom-up approach to determine their valuation. This company-specific analysis focuses on stability of cash flows and recovery value of the bonds.

The Fund may purchase term deposits, treasury bills and money market instruments.

The Fund may also invest in a diversified pool of NHA-insured residential first mortgages with a stated maturity of up to five years, which may include single-family or multiple-dwelling securities.

When the Fund invests in mortgages, the maturities of the Fund's mortgage portfolio are managed to respond to the portfolio manager's interest rate forecasts. In periods of anticipated low or falling long-term interest rates when the Fund holds mortgages, longer maturity mortgages will be selected. In periods of anticipated high or increasing long-term interest rates when the Fund holds mortgages, the portfolio manager will attempt to move to shorter-term mortgage investments. The Fund's mortgage investments will comply with the restrictions contained in National Policy Statement No. 29 – Mutual Funds Investing in Mortgages.

The Fund has obtained regulatory approval permitting it not to comply with certain restrictions in NI 81-102 regarding the purchase of mortgages, liquidity practices, and practices dealing with the purchase and sale of portfolio securities from related parties. Please see the "Introduction to Part B – What Does the Fund Invest In?" section of this simplified prospectus for more details regarding this regulatory approval.

Generally, the Fund will not invest more than 30% of its assets in foreign securities.

Depending on market conditions, the portfolio manager's investment style may result in a higher portfolio turnover rate than less actively managed funds. Although generally the higher the Fund's portfolio turnover rate, the higher its trading expenses, in the case of this Fund, which holds fixed-income products that are traded over the counter (rather than on an exchange), there may be situations where increased turnover actually reduces trading costs. The higher the portfolio turnover rate the greater the probability that you will receive a distribution of capital gains from the Fund, which may be taxable if you hold the Fund outside a registered plan. There is no proven relationship between a high turnover rate and the performance of a mutual fund.

The Fund may hold a portion of its net assets in securities of other investment funds, including ETFs, which may be managed by us, in accordance with its investment objectives. For more information see the "Fund of Funds" disclosure under "Fees and Expenses".

The Fund considers material environmental, social and/or governance factors in its investment evaluation process.

In accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described in the “**Introduction to Part B – What Does the Fund Invest In?**” section of this simplified prospectus, the Fund may

- use derivatives for hedging and non-hedging purposes;
- engage in securities lending, repurchase and reverse repurchase transactions;
- engage in short selling (the portfolio manager does not currently engage in short selling but may do so in the future without further notice to investors); and
- invest in gold and silver, and other instruments (such as derivatives and ETFs) that provide exposure to these metals.

If the Fund employs any of these strategies, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

What are the Risks of Investing in the Fund?

This Fund invests in fixed-income securities, which subjects the Fund to market risk. Fixed-income securities are subject to company risk, credit risk, interest rate risk, and prepayment risk.

When the Fund holds mortgages, its mortgage portfolio will be partially diversified by geographic region in Canada, as well as by maturity to mitigate risk. In such circumstances, the Fund is subject to the risk that its mortgages could be pre-paid, resulting in a potential loss of interest payments at higher interest rates. This is partially offset by the requirement of the mortgagor to pay a penalty for any prepayments in excess of stated provisions. These and other risks are described starting on page 1. The following table shows which risks apply to this Fund:

Risk Checklist

	Primary Risk	Secondary Risk	Low or Not a Risk

Who Should Invest in this Fund?

You should consider this Fund if you

- are looking for a low-risk, Canadian fixed-income fund to hold as part of your portfolio,
- want a short-term investment, and
- can handle the volatility of bond markets.

Distribution Policy

Refer to the “**Introduction to Part B – Distribution Policy**” section of this simplified prospectus.

In addition, the Fund will make monthly distributions of net income. **These distributions may be adjusted or discontinued at our discretion. You must inform us if you wish to receive these distributions in cash, otherwise they will be reinvested, without**

charge, in additional securities of the series on which they were paid. You may not elect to receive these distributions in cash if your securities are held in a Mackenzie Investments-administered registered plan, unless that registered plan is a TFSA, in which case you may elect to have these distributions paid from the TFSA.

Fund Expenses Indirectly Borne by Investors

Estimated cumulative expenses payable by each series of securities of the Fund for each \$1,000 investment (see “**Introduction to Part B**” for an explanation of the assumptions used in this example) for the time periods shown:

Effective December 11, 2017, Investor Series securities was closed to any new investment, except that investors that hold Investor Series securities as of this date, and continue to hold these securities, are permitted to make additional purchases.

What Does the Fund Invest In?

Investment Objectives

Significant long-term capital growth by investing primarily in a well-diversified portfolio of smaller Canadian companies with below-average market capitalization.

Any proposed change in the fundamental investment objectives of the Fund must be approved by a majority of votes cast at a meeting of the Fund's investors called for that purpose.

Investment Strategies

The investment approach follows a blended growth and value investment style. By constructing diversified portfolios based on a disciplined, statistically grounded, bottom-up investment approach, the investment team believes it can mitigate risk and maximize long-term investment returns for Fund investors.

Generally, the Fund will not invest more than 30% of its assets in foreign securities.

Generally, the Fund will be fully invested. However, the Fund may hold cash and/or short-term debt securities in anticipation of, or in response to, unfavourable market conditions; and/or for liquidity purposes.

The Fund may hold a portion of its net assets in securities of other investment funds, including ETFs, which may be managed by us, in accordance with its investment objectives. For more information see the "Fund of Funds" disclosure under "Fees and Expenses".

The Fund considers material environmental, social and/or governance factors in its investment evaluation process.

In accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described in the "Introduction to Part B – What Does the Fund Invest In?" section of this simplified prospectus, the Fund may

- use derivatives for hedging and non-hedging purposes;
- engage in securities lending, repurchase and reverse repurchase transactions;
- engage in short selling (the portfolio manager does not currently engage in short selling but may do so in the future without further notice to investors); and
- invest in gold and silver, and other instruments (such as derivatives and ETFs) that provide exposure to these metals.

If the Fund employs any of these strategies, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

What are the Risks of Investing in the Fund?

This Fund invests in Canadian equities offered by smaller Canadian companies, which subjects the Fund to market risk. Small company securities are more volatile than other types of investments and the Canadian economy is more dependent on a small number of industries than other global economies. These and other risks are described starting on page 1. The following table shows which risks apply to this Fund:

Risk Checklist

	Primary Risk	Secondary Risk	Low or Not a Risk
Capital Depletion			●

As of September 3, 2021, one securityholder held 13.90% of the Fund by market value. **This may subject the Fund to Large Transaction risk.**

Who Should Invest in this Fund?

You should consider this Fund if you

- are looking for a medium-risk, Canadian equity fund to hold as part of your portfolio,

- want a long-term investment,
- can handle the volatility of stock markets.

Distribution Policy

Refer to the “**Introduction to Part B – Distribution Policy**” section of this simplified prospectus.

Fund Expenses Indirectly Borne by Investors

Estimated cumulative expenses payable by each series of securities of the Fund for each \$1,000 investment (see “**Introduction to Part B**” for an explanation of the assumptions used in this example) for the time periods shown:

MACKENZIE CANADIAN SUSTAINABLE BOND FUND

Fund Details

Type of Fund	Canadian Fixed Income Fund
Start Date	September 29, 2021
Units Offered	Series Start Date
Series R	September 29, 2021
Registered Plan Qualified	No

What Does the Fund Invest In?

Investment Objectives

The Fund seeks to provide income with the potential for some long-term capital growth by investing primarily in Canadian government and corporate fixed-income instruments and asset-backed securities with maturities of more than one year.

The Fund follows an approach to investing that focuses primarily on sustainable and responsible issuers.

Any proposed change in the fundamental investment objectives of the Fund must be approved by a majority of votes cast at meeting of Fund investors called for that purpose.

Investment Strategies

The Fund follows an approach to investing that focuses primarily on sustainable and responsible issuers and will combine qualitative, quantitative, and fundamental research with the analysis of environmental, social, and governance (“ESG”) factors into investment selection. The integration of ESG factors into research provides additional insights into the sustainability of issuers.

The Fund will invest in labeled green bonds, social bonds, sustainable bonds and sustainability-linked bonds as well as other debt instruments that are used to finance environmental and sustainable solutions, allocating across credit quality, yields, structures, sectors, currencies, and countries.

Generally, the Fund will not invest more than 30% of its assets in foreign securities. The Fund may invest up to 100% of its fixed-income exposure in any one sector and can invest in all types of fixed-income securities from around the world, including, but not limited to, high-yield corporate and government bonds, which are bonds that have a credit rating below investment grade (rated below “BBB-” by a recognized credit rating organization) and are sometimes non-rated, investment-grade corporate and government bonds, and floating-rate instruments.

The Fund has received regulatory approval to invest up to 20% of its net assets, taken at market value at the time of purchase, in government-issued or guaranteed debt securities of any one issuer with a credit rating of “AA” or higher and, similarly, up to 35% of its net assets in government-issued or guaranteed debt securities of any one issuer with a credit rating of “AAA” or higher. These investments may increase the Fund’s exposure to concentration risk, credit risk and foreign markets risk as described under “**What are**

the General Risks of Investing in a Mutual Fund?” Please see the “Introduction to Part B – What Does the Fund Invest In?” section of this simplified prospectus for more details regarding this regulatory approval.

The Fund may invest up to 25% of its assets in securities that have a credit rating below “BBB-” as rated by a recognized credit rating organization and intends to maintain an average credit rating of “BBB-” or higher. The Fund may also invest in unrated debt instruments and preferred shares.

The Fund may hold cash and/or short-term debt securities in anticipation of, or in response to, unfavourable market conditions; and/or for liquidity purposes.

The Fund may hold a portion of its net assets in securities of other investment funds, including ETFs, which may be managed by us, in accordance with its investment objectives. For more information see the “Fund of Funds” disclosure under “Fees and Expenses”.

In accordance with applicable securities regulations or as permitted by the exemptions from these regulations and as further described in the “Introduction to Part B – What Does the Fund Invest In?” section of this simplified prospectus, the Fund may:

- use derivatives for hedging and non-hedging purposes;
- engage in securities lending, repurchase and reverse repurchase transactions;
- engage in short selling; and
- invest in gold and silver, and other instruments (such as derivatives and ETFs) that provide exposure to these metals.

If the Fund employs any of these strategies, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

What are the Risks of Investing in the Fund?

This Fund invests in fixed-income securities, which subjects the Fund to market risk. Fixed-income securities are subject to company risk, credit risk, interest rate risk, and prepayment risk. The Fund may invest a portion of its assets outside of Canada, which subjects the Fund to foreign markets risk and to a lesser extent, foreign currency risk. These and other risks are described starting on page 2. The following table shows which risks apply to this Fund:

Who Should Invest in this Fund?

You should consider this Fund if you

- are looking for a low risk, Canadian fixed-income fund that focuses on sustainable issuers to hold as part of your portfolio,
- want a medium to long-term investment,
- can handle the volatility of bond markets.

You should consider the Fund's Fixed Rate Distribution Series if you want to receive a monthly cash flow.

Distribution Policy

Refer to the "Introduction to Part B – Distribution Policy" section of this simplified prospectus.

In addition, the Fund will make monthly distributions of net income. These distributions may be adjusted or discontinued at our discretion. You should not confuse these distributions with the Fund's rate of return or the yield of its portfolio. You must inform us if you wish to receive these distributions in cash, otherwise they will be reinvested, without charge, in additional securities of the series on which they were paid.

Fund Expenses Indirectly Borne by Investors

This information is not available because the Fund is new.

Sub-Advisor	China Asset Management Company Limited, Beijing, China. Mackenzie Investments is responsible for the currency hedging strategy of this Fund.

* A Fixed Rate Distribution Series.

What Does the Fund Invest In?

Investment Objectives

The Fund seeks to provide long-term capital growth by investing primarily in equity securities of companies located in China, Hong Kong, and Taiwan and in companies that derive the majority of their revenues from the Greater China region.

Any proposed change in the fundamental investment objectives of the Fund must be approved by a majority of the votes cast at a meeting of the Fund's investors called for that purpose.

Investment Strategies

The investment approach follows a blended growth and value investment style. The sub-advisor utilizes strong fundamental bottom-up stock selection overlaid with top-down analysis. The strategy aims to invest in mid-to-large capitalization companies that

have industry leading position, sustainable cash generation, attractive valuation, sustainable competitive advantages, excellent management and sound corporate governance.

The Fund may hold cash and/or short-term debt securities in anticipation of, or in response to, unfavourable market conditions; and/or for liquidity purposes.

The Fund considers material environmental, social and/or governance factors in its investment evaluation process.

Depending on market conditions, the portfolio manager's investment style may result in a higher portfolio turnover rate than less actively managed funds. Generally, the higher the Fund's portfolio turnover rate, the higher its trading expenses, and the higher the probability that you will receive a distribution of capital gains from the Fund, which may be taxable if you hold the Fund outside a registered plan. There is no proven relationship between a high turnover rate and the performance of a mutual fund.

The Fund may hold a portion of its net assets in securities of other investment funds, including ETFs, which may be managed by us, in accordance with its investment objectives. For more information see the "Fund of Funds" disclosure under "Fees and Expenses".

In accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described in the "Introduction to Part B – What Does the Fund Invest In?" section of this simplified prospectus, the Fund may

- use derivatives for hedging and non-hedging purposes;
- engage in securities lending, repurchase and reverse repurchase transactions;
- engage in short selling (the portfolio manager does not currently engage in short selling but may do so in the future without further notice to investors); and
- invest in gold and silver, and other instruments (such as derivatives and ETFs) that provide exposure to these metals.

If the Fund employs any of these strategies, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

What are the Risks of Investing in the Fund?

This Fund invests in Chinese equities, which subjects the Fund to market risk. Chinese securities may be traded less frequently and price movement may be more volatile than in developed countries. Equity securities are more volatile than other types of investments, such as fixed-income investments. Since the Fund invests outside of Canada, it is subject to foreign markets risk and foreign currency risk. As the Fund will be concentrated in China, it is subject to concentration risk. These and other risks are described starting on page 1. The following table shows which risks apply to this Fund:

* This risk applies only to the Fixed Rate Distribution Series.

During the past year, the Fund's holdings of Tencent Holdings Shares exceeded 10% of the Fund's net assets at a maximum level of 10.28%. Holding in excess of 10% of a Fund's net assets in a

single issuer may subject the Fund to the risks described in "Concentration Risk" on page 2.

Who Should Invest in this Fund?

You should consider this Fund if you

- are looking for a high risk, Chinese equity fund to hold as part of your portfolio,
- want a long-term investment,
- can handle the volatility of stock markets.

You should consider the Fund's Fixed Rate Distribution Series if you want to receive a monthly cash flow.

Distribution Policy

Refer to the "Introduction to Part B – Distribution Policy" section of this simplified prospectus.

On its Fixed Rate Distribution Series, the Fund will make monthly distributions at the following rates:

Fixed Rate Distribution Series	Distribution Rate
F5	5%
F8	8%
FB5	5%
PWFB5	5%
PWT5	5%
PWT8	8%
PWX8	8%
T5	5%
T8	8%

These fixed rate distributions will consist of net income to the extent of the Fund's allocation of net income to that series for that month, and any amount of the distribution that is in excess of the net income for that series will consist of return of capital. **You should not confuse these distributions with the Fund's rate of return or the yield of its portfolio.**

Fund Expenses Indirectly Borne by Investors

Estimated cumulative expenses payable by each series of securities of the Fund for each \$1,000 investment (see "Introduction to Part B" for an explanation of the assumptions used in this example) for the time periods shown:

What Does the Fund Invest In?

Investment Objectives

The Fund seeks capital growth and current income by investing primarily in Chinese equity and fixed income securities. The Fund will pursue this objective by investing in securities directly and/or by investing in other investment funds.

Any proposed change in the fundamental investment objectives of the Fund must be approved by a majority of the votes cast at a meeting of the Fund's investors called for that purpose.

Investment Strategies

The Fund's asset mix will generally be kept within the following ranges:

- 60-90% equity securities
- 10-40% fixed-income securities, including cash and cash equivalents.

The asset allocation decision will be adjusted based on market outlook and risk tolerance of the Fund, and implemented by investing in Mackenzie ChinaAMC All China Bond Fund and Mackenzie ChinaAMC All China Equity Fund.

The equity portfolio manager employs strong fundamental bottom-up stock selection overlaid with top-down analysis. The strategy aims to invest in mid-to-large capitalization companies that have industry leading position, sustainable cash generation, attractive valuation, sustainable competitive advantages excellent management and sound corporate governance.

Equity securities may include, but are not limited to, ordinary shares, preferred shares, deposit receipts and funds that primarily invest in equity securities.

The fixed-income portfolio manager employs both a top-down and bottom-up selection process. The team utilizes a discipline investment process to systematically identify investment opportunities. The Fund will generally have exposure to a combination of the Onshore CNY rate bond market, the Onshore CNY credit market, the Offshore Chinese HY credit market, and the Offshore Chinese Investment Grade credit market. The Fund will invest in fixed-income securities with a non-investment-grade credit rating and thus may invest in securities that have a credit rating below "BBB-" as rated by a recognized credit rating organization and may invest in unrated debt instruments.

Fixed income investments may include, but are not limited to, central government and policy bank issues, corporates, short-term bank deposits, local government funding vehicles, real estate company issues, state owned enterprises, financials, and funds that primarily invest in fixed income securities.

Generally, the Fund will obtain exposure to these securities primarily by investing in other investment funds, including ETFs, which may be managed by us, in accordance with its investment objectives. For more information see the "Fund of Funds" disclosure under "Fees and Expenses".

The Fund may hold cash and/or short-term debt securities in anticipation of, or in response to, unfavourable market conditions; and/or for liquidity purposes.

The Fund considers material environmental, social and/or governance factors in its investment evaluation process.

In accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described in the "Introduction to Part B – What Does the Fund Invest In?" section of this simplified prospectus, the Fund may

- use derivatives for hedging and non-hedging purposes; and
- engage in securities lending, repurchase and reverse repurchase transactions.

If the Fund employs any of these strategies, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

What are the Risks of Investing in the Fund?

This Fund invests in a combination of Chinese equity and fixed-income securities, which subjects the Fund to market risk. This combination subjects the Fund to a variety of risks inherent in both types of investments. Any indirect investment in securities may subject the Fund to tracking risk. Since the Fund invests outside of Canada, it is subject to foreign markets risk and foreign currency risk. As the Fund will be concentrated in China, it is subject to concentration risk. These and other risks are described starting on page 1. The following table shows which risks apply to this Fund:

Who Should Invest in this Fund?

You should consider this Fund if you

- are looking for a medium-risk, Chinese managed asset fund to hold as part of your portfolio,
- want a long-term investment,
- can handle the volatility of stock markets and bond markets.

Distribution Policy

Refer to the “**Introduction to Part B – Distribution Policy**” section of this simplified prospectus.

On its Fixed Rate Distribution Series, the Fund will make monthly distributions at the following rates:

Fixed Rate Distribution Series	Distribution Rate
F5	5%
F8	8%
FB5	5%
PWFB5	5%
PWT5	5%
PWT8	8%

What Does the Fund Invest In?

Investment Objectives

The Fund seeks to provide investors with a diversified portfolio designed to provide a steady stream of income and some long-term capital appreciation.

The Fund seeks to accomplish its objectives by investing primarily in exchange traded funds to gain exposure to Canadian and foreign equity and fixed-income securities and other asset categories.

The Fund may also invest in other mutual funds or invest directly in Canadian and foreign equity and fixed-income securities and other asset categories where the Fund considers it would be beneficial to unitholders to do so.

Any change to the investment objectives must be approved by a majority of votes cast at a meeting of unitholders held for that reason.

Investment Strategies

The Fund's asset mix will generally be kept within the following ranges:

- 25% - 45% equity securities
- 45% - 75% fixed-income securities.

In addition to fixed income and equity exposures, the Fund may also invest in alternative mutual funds.

The asset allocation portfolio manager employs a disciplined total portfolio management approach to constructing the Fund. The Fund is built upon long-term strategic allocations to different equity markets, fixed income markets, and other asset classes. The Fund will be allocated tactically over the short- to medium-term based on changes to the market outlook and risk assessment for each asset class.

The Fund will seek to diversify its equity and fixed-income assets in terms of one or more of these factors:

- geographic exposure
- equity factor exposure
- sector exposure
- company market capitalization
- investment style
- credit quality
- duration.

As a result of this diversification, the Fund may have exposure to securities issued by companies of any size and governments located anywhere in the world, including emerging markets.

The Fund seeks to manage currency exposure on a total portfolio basis through the use of derivatives or foreign currency cash holdings. This means that the asset allocation portfolio manager will take into account the Fund's overall currency exposure across all of its holdings.

The Fund may hold cash and/or short-term debt securities in anticipation of, or in response to, unfavourable market conditions; and/or for liquidity purposes.

The Fund considers material environmental, social and/or governance factors in its investment evaluation process.

The Fund will obtain exposure to equity securities, fixed-income securities and other asset categories primarily by investing in ETFs, managed by Mackenzie, in accordance with its investment objectives. For more information, see the "Fund of Funds" disclosure under "Fees and Expenses".

In accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described in the "Introduction to Part B – What Does the Fund Invest In?" section of this simplified prospectus, the Fund may

- use derivatives for hedging and non-hedging purposes;
- engage in securities lending, repurchase and reverse repurchase transactions;

- engage in short selling (the portfolio manager does not currently engage in short selling but may do so in the future without further notice to investors); and
- invest in gold and silver, and other instruments (such as derivatives and ETFs) that provide exposure to these metals, and in certain other ETFs that replicate an index on a leveraged basis and/or that invest in physical commodities.

If the Fund employs any of these strategies, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

What are the Risks of Investing in the Fund?

This Fund has exposure to equity securities, which subjects the Fund to market risk, and which are more volatile than other types of investments, such as fixed-income investments. A significant portion of the Fund's exposure is to assets outside of Canada, which means that it is subject to foreign markets risk and foreign currency risk. This Fund also has exposure to fixed-income securities, subjecting it to risks including company risk, credit risk, interest rate risk, and prepayment risk. Any indirect investment in securities may subject the Fund to tracking risk. These and other risks are described starting on page 1. The following table shows which risks apply to this Fund:

Who Should Invest in this Fund?

You should consider this Fund if you

- are looking for a low -risk, managed asset portfolio fund to hold as a key part of your portfolio,
- want a medium-term investment,
- can handle the ups and downs of stock and bond markets.

You should consider the Fund's Fixed Rate Distribution Series if you want to receive a monthly cash flow.

Distribution Policy

Refer to the "Introduction to Part B – Distribution Policy" section of this simplified prospectus.

On its Fixed Rate Distribution Series, the Fund will make monthly distributions at the following rates:

What Does the Fund Invest In?

Investment Objectives

The Fund seeks to provide investors with a diversified portfolio designed to provide a steady stream of income with some emphasis on capital preservation.

The Fund seeks to accomplish its objectives by investing primarily in exchange traded funds to gain exposure to Canadian and foreign equity and fixed-income securities and other asset categories.

The Fund may also invest in other mutual funds or invest directly in Canadian and foreign equity and fixed-income securities and other asset categories where the Fund considers it would be beneficial to unitholders to do so.

Any change to the investment objectives must be approved by a majority of votes cast at a meeting of unitholders held for that reason.

Investment Strategies

The Fund's asset mix will generally be kept within the following ranges:

- 15% - 35% equity securities

- 55% - 85% fixed-income securities.

In addition to fixed income and equity exposures, the Fund may also invest in alternative mutual funds.

The asset allocation portfolio manager employs a disciplined total portfolio management approach to constructing the Fund. The Fund is built upon long-term strategic allocations to different equity markets, fixed income markets, and other asset classes. The Fund will be allocated tactically over the short- to medium-term based on changes to the market outlook and risk assessment for each asset class.

The Fund will seek to diversify its equity and fixed-income assets in terms of one or more of these factors:

- geographic exposure
- equity factor exposure
- sector exposure
- company market capitalization
- investment style
- credit quality
- duration.

As a result of this diversification, the Fund may have exposure to securities issued by companies of any size and governments located anywhere in the world, including emerging markets.

The Fund seeks to manage currency exposure on a total portfolio basis through the use of derivatives or foreign currency cash holdings. This means that the asset allocation portfolio manager will take into account the Fund's overall currency exposure across all of its holdings.

The Fund may hold cash and/or short-term debt securities in anticipation of, or in response to, unfavourable market conditions; and/or for liquidity purposes.

The Fund considers material environmental, social and/or governance factors in its investment evaluation process.

The Fund will obtain exposure to equity securities, fixed-income securities and other asset categories primarily by investing in ETFs, managed by Mackenzie, in accordance with its investment objectives. For more information, see the "Fund of Funds" disclosure under "Fees and Expenses".

In accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described in the "Introduction to Part B – What Does the Fund Invest In?" section of this simplified prospectus, the Fund may

- use derivatives for hedging and non-hedging purposes;
- engage in securities lending, repurchase and reverse repurchase transactions;
- engage in short selling (the portfolio manager does not currently engage in short selling but may do so in the future without further notice to investors); and
- invest in gold and silver, and other instruments (such as derivatives and ETFs) that provide exposure to these

metals, and in certain other ETFs that replicate an index on a leveraged basis and/or that invest in physical commodities.

If the Fund employs any of these strategies, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

What are the Risks of Investing in the Fund?

This Fund has exposure to equity securities, which subjects the Fund to market risk, and which are more volatile than other types of investments, such as fixed-income investments. A significant portion of the Fund's exposure is to assets outside of Canada, which means that it is subject to foreign markets risk and foreign currency risk. This Fund also has exposure to fixed-income securities, subjecting it to risks including company risk, credit risk, interest rate risk, and prepayment risk. Any indirect investment in securities may subject the Fund to tracking risk. These and other risks are described starting on page 1. The following table shows which risks apply to this Fund:

What Does the Fund Invest In?

Investment Objectives

The Fund seeks above-average income with the potential for long-term growth of accumulated capital.

The Fund invests primarily in higher yielding Canadian corporate securities (both equity and fixed-income securities).

Any proposed change in the fundamental investment objectives of the Fund must be approved by a majority of the votes cast at a meeting of the Fund's investors called for that purpose.

Investment Strategies

The Fund's investments are generally expected to have a weighted average credit quality of "BB-" or higher, as rated by a recognized credit rating organization. The portfolio manager may vary the weighted average credit quality.

The investment approach follows a fundamental analysis to select investments for the Fund, by reviewing the values of the Fund's investments on an ongoing basis, paying particular attention to credit quality. The Fund seeks to diversify the issuers of the securities in the portfolio by industry sector, size, geography and credit rating.

A portion of the Fund may be invested in debt securities issued or guaranteed by governments or their agencies.

The Fund may also invest in mortgage- and asset-backed securities, preferred shares, convertible securities and floating-rate debt

instruments such as leveraged loans. These floating-rate debt instruments are generally below investment grade and pay interest at rates that are variable or reset periodically at a margin above a recognized base lending rate such as the prime rate, the Secured Overnight Financing Rate (SOFR), or any applicable Alternative Replacement Rate (ARR). The portfolio manager may vary the weighted average credit quality of the Fund, but the average credit quality is expected to remain below investment grade.

Generally, the Fund will not invest more than 10% of its assets in equity securities, in addition to any preferred shares it may hold.

Generally, the Fund will not invest more than 49% of its assets in foreign securities.

The Fund may hold cash and/or short-term debt securities in anticipation of, or in response to, unfavourable market conditions; and/or for liquidity purposes.

The Fund considers material environmental, social and/or governance factors in its investment evaluation process.

The Fund may invest up to 10% of its net assets in illiquid assets, measured at the time of investment, which may include securities of a Private Vehicle offered by Northleaf and/or Sagard.

In accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described in the "Introduction to Part B – What Does the Fund Invest In?" section of this simplified prospectus, the Fund may

- use derivatives for hedging and non-hedging purposes;
- engage in securities lending, repurchase and reverse repurchase transactions;
- engage in short selling (the portfolio manager does not currently engage in short selling but may do so in the future without further notice to investors); and
- invest in gold and silver, and other instruments (such as derivatives and ETFs) that provide exposure to these metals.

If the Fund employs any of these strategies, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

What are the Risks of Investing in the Fund?

This Fund invests in fixed-income securities, which subjects the Fund to market risk. Fixed-income securities are subject to company risk, credit risk, interest rate risk, and prepayment risk. The Fund may also invest a significant portion of its assets outside of Canada, which means that it is subject to foreign markets risk and to a lesser extent, foreign currency risk. These and other risks are described starting on page 1. The following table shows which risks apply to this Fund:

Who Should Invest in this Fund?

You should consider this Fund if you

- are looking for a low- to medium-risk, Canadian fixed-income fund to hold as part of your portfolio,
- want a short- to medium-term investment,
- can handle the volatility of bond markets.

Distribution Policy

Refer to the “**Introduction to Part B – Distribution Policy**” section of this simplified prospectus.

In addition, the Fund will make monthly distributions of net income. **These distributions may be adjusted or discontinued at our discretion. You should not confuse these distributions with the Fund’s rate of return or the yield of its portfolio. You must inform us if you wish to receive these distributions in cash, otherwise they will be reinvested, without charge, in additional securities of the series on which they were paid.** You may not elect to receive these distributions in cash if your securities are held in a Mackenzie Investments-administered registered plan, unless that registered plan is a TFSA, in which case you may elect to have these distributions paid from the TFSA.

Fund Expenses Indirectly Borne by Investors

Estimated cumulative expenses payable by each series of securities of the Fund for each \$1,000 investment (see “**Introduction to Part B**” for an explanation of the assumptions used in this example) for the time periods shown:

Effective December 11, 2017, Series G securities was closed to any new investment, except that investors that hold Series G securities as of this date, and continue to hold these securities, are permitted to make additional purchases.

What Does the Fund Invest In?

Investment Objectives

The Fund pursues long-term capital growth by investing mainly in Canadian equity and fixed-income securities.

The levels of fixed-income and equity securities will range between 30% and 70% of the Fund's assets, depending on the manager's assessment of economic and market factors.

Any proposed change in the fundamental investment objectives of the Fund must be approved by a majority of the votes cast at a meeting of the Fund's investors called for that purpose.

Investment Strategies

The Fund's asset mix will generally be kept within the following ranges:

- 60-70% equity securities
- 30-40% fixed-income securities, including cash and cash equivalents.

The asset allocation portfolio manager will adjust the percentage of the Fund invested in each asset class based on changes in the market outlook for each asset class.

The equity portfolio manager employs a fundamental value investment style. The equity portfolio manager seeks to invest in securities that are trading below their estimated intrinsic value, determined by analyzing financial statements, business prospects, management strengths and potential catalysts to realize shareholder value.

The fixed-income portfolio manager employs a value investment style. For high-quality bonds, the fixed-income portfolio manager analyzes macroeconomic factors, such as economic growth, inflation, and monetary and fiscal policy, in order to position the maturity and credit quality of the fixed-income portfolio for different stages in the economic cycle. The fixed-income portfolio manager analyzes securities that typically have a lower credit quality, such as high-yield debt securities, using a bottom-up approach to assess their valuation. This company-specific analysis focuses on stability of cash flows and recovery value of the debt instruments.

Generally, the Fund will not invest more than 40% of its assets in foreign securities.

The Fund may hold cash and/or short-term debt securities in anticipation of, or in response to, unfavourable market conditions; and/or for liquidity purposes.

The Fund considers material environmental, social and/or governance factors in its investment evaluation process.

The Fund may hold a portion of its net assets in securities of other investment funds, including ETFs, which may be managed by us, in accordance with its investment objectives. For more information see the "Fund of Funds" disclosure under "Fees and Expenses".

In accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described in the "Introduction to Part B – What Does the Fund Invest In?" section of this simplified prospectus, the Fund may

- use derivatives for hedging and non-hedging purposes;
- engage in securities lending, repurchase and reverse repurchase transactions;
- engage in short selling (the portfolio manager does not currently engage in short selling but may do so in the future without further notice to investors); and
- invest in gold and silver, and other instruments (such as derivatives and ETFs) that provide exposure to these metals.

If the Fund employs any of these strategies, it will do so in conjunction with its other investment strategies in a manner

considered appropriate to pursuing its investment objectives and enhancing its returns.

What are the Risks of Investing in the Fund?

This Fund invests in a combination of equity and fixed-income securities, which subjects the Fund to market risk. This combination subjects the Fund to a variety of risks inherent in both types of investments, including company risk, credit risk, interest rate risk, and prepayment risk. The Fund may also invest a portion of its assets outside of Canada, which means that it is subject to foreign markets risk and foreign currency risk. These and other risks are described starting on page 1. The following table shows which risks apply to this Fund:

Risk Checklist

* This risk applies only to the Fixed Rate Distribution Series.

Who Should Invest in this Fund?

You should consider this Fund if you

- are looking for a low- to medium-risk, Canadian balanced fund to hold as part of your portfolio,
- want a medium-term investment,
- can handle the volatility of stock and bond markets.

You should consider the Fund's Fixed Rate Distribution Series if you want to receive a monthly cash flow.

Distribution Policy

Refer to the "Introduction to Part B – Distribution Policy" section of this simplified prospectus.

On its Fixed Rate Distribution Series, the Fund will make monthly distributions at the following rates:

Fixed Rate Distribution Series	Distribution Rate
F5	5%
F8	8%
FB5	5%
O5	5%
PWFB5	5%
PWT5	5%
PWT8	8%
PWX8	8%
T5	5%
T8	8%

These fixed rate distributions will consist of net income to the extent of the Fund's allocation of net income to that series for that month, and any amount of the distribution that is in excess of the net income for that series will consist of return of capital. **You should not**

confuse these distributions with the Fund's rate of return or the yield of its portfolio.

In addition, on its non-Fixed Rate Distribution Series, the Fund will make quarterly distributions of net income. These distributions may be adjusted or discontinued at our discretion. **You must inform us if you wish to receive these distributions in cash, otherwise they will be reinvested, without charge, in additional securities of the series on which they were paid.** You may not elect to receive these distributions in cash if your securities are held in a Mackenzie Investments-administered registered plan, unless that registered plan is a TFSA, in which case you may elect to have these distributions paid from the TFSA.

Fund Expenses Indirectly Borne by Investors

Estimated cumulative expenses payable by each series of securities of the Fund for each \$1,000 investment (see "Introduction to Part B" for an explanation of the assumptions used in this example) for the time periods shown:

What Does the Fund Invest In?

Investment Objectives

The Fund pursues long-term capital growth from investments mainly in Canadian equity and fixed-income securities.

Any proposed change in the fundamental investment objectives of the Fund must be approved by a majority of the votes cast at a meeting of the Fund's investors called for that purpose.

Investment Strategies

The investment approach follows a fundamental value philosophy: invest in securities which are trading below their estimated intrinsic value, determined by analyzing financial statements, business prospects, management strengths and potential catalysts to realize shareholder value.

Generally, the Fund will not invest more than 49% of its assets in foreign securities.

The Fund may hold cash and/or short-term debt securities in anticipation of, or in response to, unfavourable market conditions; and/or for liquidity purposes.

The Fund considers material environmental, social and/or governance factors in its investment evaluation process.

The Fund may hold a portion of its net assets in securities of other investment funds, including ETFs, which may be managed by us, in accordance with its investment objectives. For more information see the "Fund of Funds" disclosure under "Fees and Expenses".

In accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described in the "Introduction to Part B – What Does the Fund Invest In?" section of this simplified prospectus, the Fund may

- use derivatives for hedging and non-hedging purposes;
- engage in securities lending, repurchase and reverse repurchase transactions;
- engage in short selling (the portfolio manager does not currently engage in short selling but may do so in the future without further notice to investors); and
- invest in gold and silver, and other instruments (such as derivatives and ETFs) that provide exposure to these metals.

If the Fund employs any of these strategies, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

What are the Risks of Investing in the Fund?

This Fund invests in Canadian equities, which subjects the Fund to market risk. Equity securities are more volatile than other types of investments, such as fixed-income investments, and the Canadian economy is more dependent on a small number of industries than other global economies. The Fund may also invest a significant portion of its assets outside of Canada, which means that it is subject to foreign markets risk and foreign currency risk. These and other risks are described starting on page 1. The following table shows which risks apply to this Fund:

Risk Checklist

	Primary Risk	Secondary Risk	Low or Not a Risk

Who Should Invest in this Fund?

You should consider this Fund if you

- are looking for a medium-risk, Canadian equity fund to hold as part of your portfolio,
- want a medium- to long-term investment,
- can handle the volatility of stock markets.

You should consider the Fund's Fixed Rate Distribution Series if you want to receive a monthly cash flow.

Distribution Policy

Refer to the "Introduction to Part B – Distribution Policy" section of this simplified prospectus.

On its Fixed Rate Distribution Series, the Fund will make monthly distributions at the following rates:

Fixed Rate Distribution Series	Distribution Rate
F5	5%
F8	8%
FB5	5%
PWFB5	5%
PWT5	5%
PWT8	8%
T5	5%
T8	8%

These fixed rate distributions will consist of net income to the extent of the Fund's allocation of net income to that series for that month, and any amount of the distribution that is in excess of the net income for that series will consist of return of capital. **You should not confuse these distributions with the Fund's rate of return or the yield of its portfolio.**

Fund Expenses Indirectly Borne by Investors

Estimated cumulative expenses payable by each series of securities of the Fund for each \$1,000 investment (see "Introduction to Part B" for an explanation of the assumptions used in this example) for the time periods shown:

* A Fixed Rate Distribution Series.

Effective December 11, 2017, Series G securities was closed to any new investment, except that investors that hold Series G securities as of this date, or that acquire Series G securities by way of a Fund merger, and continue to hold these securities, are permitted to make additional purchases.

What Does the Fund Invest In?

Investment Objectives

The Fund pursues long-term capital growth from investments primarily in equity securities. The Fund may invest the majority of its assets in the securities of companies in a single country or a single industry, depending on prevailing market conditions.

The Cundill investment approach is based on a fundamental value philosophy: invest in securities which are trading below their estimated intrinsic value, determined by reviewing corporate balance sheets, earnings statements, dividend records, business prospects, management strengths and potential catalysts to realize securityholder value. Preservation of invested capital is the

hallmark of the contrarian value-based approach followed by the Cundill investment team.

Any change to the investment objectives of the Fund must be approved by a majority of the votes cast at a meeting of securityholders held for that reason.

Investment Strategies

The Fund may invest in other types of securities, such as fixed-income securities, including convertible and high-yield bonds and government securities of emerging or other countries. The Fund may invest in corporate debt and sovereign fixed-income securities that are rated below investment grade (below “BBB-”) a recognized credit rating organization, including debt of entities that are in bankruptcy.

The Fund may hold cash and/or short-term debt securities in anticipation of, or in response to, unfavourable market conditions; and/or for liquidity purposes.

The Fund considers material environmental, social and/or governance factors in its investment evaluation process.

Depending on market conditions, the portfolio manager’s investment style may result in a higher portfolio turnover rate than less actively managed funds. Generally, the higher the Fund’s portfolio turnover rate, the higher its trading expenses, and the higher the probability that you will receive a distribution of capital gains from the Fund, which may be taxable if you hold the Fund outside a registered plan. There is no proven relationship between a high turnover rate and the performance of a mutual fund.

The Fund may hold a portion of its net assets in securities of other investment funds, including ETFs, which may be managed by us, in accordance with its investment objectives. For more information see the “Fund of Funds” disclosure under “Fees and Expenses”.

In accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described in the “Introduction to Part B – What Does the Fund Invest In?” section of this simplified prospectus, the Fund may

- use derivatives for hedging and non-hedging purposes;
- engage in securities lending, repurchase and reverse repurchase transactions;
- engage in short selling (the portfolio manager does not currently engage in short selling but may do so in the future without further notice to investors); and
- invest in gold and silver, and other instruments (such as derivatives and ETFs) that provide exposure to these metals.

If the Fund employs any of these strategies, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

What are the Risks of Investing in the Fund?

This Fund invests in global equities, which subjects the Fund to market risk, and may invest the majority of its assets in a single country or single industry at a given time, meaning that the Fund

may be subject to greater concentration risk and volatility. Since the Fund invests outside of Canada, it is subject to foreign markets risk and foreign currency risk. These and other risks are described starting on page 1. The following table shows which risks apply to this Fund:

Risk Checklist

	Primary Risk	Secondary Risk	Low or Not a Risk

Who Should Invest in this Fund?

You should consider this Fund if you

- are looking for a medium-risk, global equity fund to hold as part of your portfolio,
- want a medium- to long-term investment,
- can handle the volatility of stock markets.

You should consider the Fund's Fixed Rate Distribution Series if you want to receive a monthly cash flow.

Distribution Policy

Refer to the "Introduction to Part B – Distribution Policy" section of this simplified prospectus.

On its Fixed Rate Distribution Series, the Fund will make monthly distributions at the following rates:

Fixed Rate Distribution Series	Distribution Rate
F5	5%
F8	8%
FB5	5%
O5	5%
PWFB5	5%
PWT5	5%
PWT8	8%
PWX8	8%
T5	5%
T8	8%

These fixed rate distributions will consist of net income to the extent of the Fund's allocation of net income to that series for that month, and any amount of the distribution that is in excess of the net income for that series will consist of return of capital. **You should not confuse these distributions with the Fund's rate of return or the yield of its portfolio.**

What Does the Fund Invest In?

Investment Objectives

The Fund seeks to provide long-term capital appreciation and the potential for income by investing directly or indirectly, including through the use of derivatives, in a diversified portfolio of alternative asset classes, including real estate, infrastructure, currencies, non-traditional equity and fixed-income, and/or other asset classes of issuers located anywhere in the world.

Any change to the investment objectives must be approved by a majority of votes cast at a meeting of security holders held for that reason.

Investment Strategies

The portfolio manager uses proprietary quantitative models to allocate across alternative asset classes, which may also include the following: micro-cap equities, event-driven debt, real-return bonds, asset-backed securities, loan syndicates, commodities, high-yield debt and emerging-markets equities.

The Fund may invest directly in foreign currencies or may gain exposure to foreign currencies through derivatives use.

The Fund may hold cash and/or short-term debt securities in anticipation of, or in response to, unfavourable market conditions; and/or for liquidity purposes.

The Fund considers material environmental, social and/or governance factors in its investment evaluation process.

The portfolio manager expects to gain exposure to these alternative asset classes by investing a significant portion of the Fund in securities of other investment funds, including ETFs, which may be managed by us, in accordance with its investment objectives. For more information see the “Fund of Funds” disclosure under “Fees and Expenses”.

In accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described in the “Introduction to Part B – What Does the Fund Invest In?” section of this simplified prospectus, the Fund may

- use derivatives for hedging and non-hedging purposes;
- engage in securities lending, repurchase and reverse repurchase transactions;
- engage in short selling; and
- invest in gold and silver, and other instruments (such as derivatives and ETFs) that provide exposure to these metals, and in certain other ETFs that replicate an index on a leveraged basis and/or that invest in physical commodities.

If the Fund employs any of these strategies, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

What are the Risks of Investing in the Fund?

This Fund invests directly or indirectly in non-traditional equity and fixed-income securities, including emerging-market equities and lower-rated debt securities, which subjects the Fund to market risk. This combination subjects the Fund to a variety of risks inherent in both types of investments including company risk, credit risk, interest rate risk and prepayment risk. Since the Fund invests outside of Canada, it is subject to foreign markets risk and foreign-currency risk. These and other risks are described starting on page 1. The following table shows which risks apply to this Fund:

Who Should Invest in this Fund?

You should consider this Fund if you

- are looking for a low- to medium-risk, diversified portfolio of non-traditional asset classes to hold as part of your balanced portfolio,
- want a medium-term investment,
- can handle the volatility of stock and bond markets.

You should consider the Fund's Fixed Rate Distribution Series if you want to receive a monthly cash flow.

Distribution Policy

Refer to the "Introduction to Part B – Distribution Policy" section of this simplified prospectus.

On its Fixed Rate Distribution Series, the Fund will make monthly distributions at the following rates:

Fixed Rate Distribution Series	Distribution Rate
F5	5%
F8	8%
FB5	5%
PWFB5	5%
PWT5	5%
PWT8	8%
PWX5	5%
PWX8	8%
T5	5%
T8	8%

These fixed rate distributions will consist of net income to the extent of the Fund's allocation of net income to that series for that month, and any amount of the distribution that is in excess of the net income for that series will consist of return of capital. **You should not confuse these distributions with the Fund's rate of return or the yield of its portfolio.**

In addition, on its non-Fixed Rate Distribution Series, the Fund will make monthly distributions of net income. These distributions may be adjusted or discontinued at our discretion. **You must inform us if you wish to receive these distributions in cash, otherwise they will be reinvested, without charge, in additional securities of the series on which they were paid.** You may not elect to receive these distributions in cash if your securities are held in a Mackenzie Investments-administered registered plan, unless that registered plan is a TFSA, in which case you may elect to have these distributions paid from the TFSA.

Fund Expenses Indirectly Borne by Investors

Estimated cumulative expenses payable by each series of securities of the Fund for each \$1,000 investment (see "Introduction to Part B" for an explanation of the assumptions used in this example) for the time periods shown:

What Does the Fund Invest In?

Investment Objectives

The Fund seeks to provide long-term capital growth by investing primarily in a portfolio of equity securities of companies in emerging markets. Emerging markets include any country that is generally considered to be an emerging or developing country by MSCI. The Fund will focus its investments in those emerging market countries that the portfolio manager believes have strongly developing economies and in which the markets are becoming more sophisticated.

Any change to the investment objectives must be approved by a majority of votes cast at a meeting of unitholders held for that reason.

Investment Strategies

The investment approach follows a core investment style, looking for companies that are undervalued, of high quality and have good growth prospects. The portfolio manager uses a quantitative approach to stock selection, portfolio construction and transaction cost measurement. The portfolio manager employs fundamental ideas in a disciplined, risk-aware manner. The portfolio invests in large, mid-cap, and small-cap emerging and frontier market stocks. Frontier markets are countries with investable stock markets that are less established than those in emerging markets.

The Fund may hold cash and/or short-term debt securities in anticipation of, or in response to, unfavourable market conditions; and/or for liquidity purposes.

The Fund considers material environmental, social and/or governance factors in its investment evaluation process.

Depending on market conditions, the portfolio manager's investment style may result in a higher portfolio turnover rate than less actively managed funds. Generally, the higher the Fund's portfolio turnover rate, the higher its trading expenses, and the higher the probability that you will receive a distribution of capital gains from the Fund, which may be taxable if you hold the Fund outside a registered plan. There is no proven relationship between a high turnover rate and the performance of a mutual fund.

The Fund may hold a portion of its net assets in securities of other investment funds, including ETFs, which may be managed by us, in accordance with its investment objectives. For more information see the "Fund of Funds" disclosure under "Fees and Expenses".

In accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described in the "Introduction to Part B – What Does the Fund Invest In?" section of this simplified prospectus, the Fund may

- use derivatives for hedging and non-hedging purposes;
- engage in securities lending, repurchase and reverse repurchase transactions;
- engage in short selling (the portfolio manager does not currently engage in short selling but may do so in the future without further notice to investors); and
- invest in gold and silver, and other instruments (such as derivatives and ETFs) that provide exposure to these metals, and in certain other ETFs that replicate an index on a leveraged basis and/or that invest in physical commodities.

If the Fund employs any of these strategies, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

What are the Risks of Investing in the Fund?

This Fund invests in securities of emerging market countries, which subjects the Fund to market risk. Emerging market securities may be traded less frequently and price movements may be more volatile than in developed countries. Since the Fund invests outside of Canada, it is subject to foreign markets risk and foreign currency risk. These and other risks are described starting on page 1. The following table shows which risks apply to this Fund:

Risk Checklist

As of September 3, 2021, three securityholders held 61.93%, 11.29% and 18.96% of the Fund by market value. **This may subject the Fund to Large Transaction risk.**

Who Should Invest in this Fund?

You should consider this Fund if you

- are looking for a medium-risk, emerging markets global equity fund to hold as a key part of your portfolio,
- want a medium to long-term investment,
- can handle the volatility of stock markets, including emerging and frontier markets.

Distribution Policy

Refer to the “**Introduction to Part B – Distribution Policy**” section of this simplified prospectus.

Fund Expenses Indirectly Borne by Investors

Estimated cumulative expenses payable by each series of securities of the Fund for each \$1,000 investment (see “**Introduction to Part B**” for an explanation of the assumptions used in this example) for the time periods shown:

* A Fixed Rate Distribution Series.

What Does the Fund Invest In?

Investment Objectives

The Fund seeks to generate current income.

The Fund invests primarily in floating rate debt obligations and other floating rate debt instruments of issuers located anywhere in the world.

Any proposed change in the fundamental investment objectives of the Fund must be approved by a majority of the votes cast at a meeting of the Fund's investors called for that purpose.

Investment Strategies

The Fund may invest in floating rate debt instruments of issuers rated below investment grade, which are those with a credit rating of below "BBB-" as rated by a recognized credit rating organization. These instruments may include senior loans which have seniority in a company's structure with the loans generally secured against the issuing company's assets or other collateral. Senior loans are typically arranged through a lead commercial or investment bank and syndicated to other banks and non-bank investors. The Fund may also invest in high-yield, lower-rated debt securities and unrated debt instruments. The portfolio manager may vary the weighted average credit quality.

The investment approach employs fundamental analysis to select investments for the Fund, by reviewing the values of the Fund's investments on an ongoing basis, paying particular attention to credit

quality. The Fund seeks to diversify the issuers of the securities in the portfolio by a number of factors including industry and sector.

Most floating rate debt instruments pay interest at an established base lending rate that resets periodically plus a fixed percentage rate. The base lending rate may be the Secured Overnight Financing Rate (SOFR) or any applicable Alternative Replacement Rate (ARR), Bankers' Acceptances (BA), a prime rate, or another base lending rate used by commercial banks or lenders.

The Fund may hold cash and/or short-term debt securities in anticipation of, or in response to, unfavourable market conditions; and/or for liquidity purposes.

The Fund considers material environmental, social and/or governance factors in its investment evaluation process.

Depending on market conditions, the portfolio manager's investment style may result in a higher portfolio turnover rate than less actively managed funds. Although generally the higher the Fund's portfolio turnover rate, the higher its trading expenses, in the case of this Fund, which holds fixed-income products that are traded over the counter (rather than on an exchange), there may be situations where increased turnover actually reduces trading costs. The higher the portfolio turnover rate the greater the probability that you will receive a distribution of capital gains from the Fund, which may be taxable if you hold the Fund outside a registered plan. There is no proven relationship between a high turnover rate and the performance of a mutual fund.

The Fund may hold a portion of its net assets in securities of other investment funds, including ETFs, which may be managed by us, in accordance with its investment objectives. For more information see the "Fund of Funds" disclosure under "Fees and Expenses".

The Fund may invest up to 10% of its net assets in illiquid assets, measured at the time of investment, which may include securities of a Private Vehicle offered by Northleaf and/or Sagarid.

In accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described in the "Introduction to Part B – What Does the Fund Invest In?" section of this simplified prospectus, the Fund may

- use derivatives for hedging and non-hedging purposes;
- engage in securities lending, repurchase and reverse repurchase transactions;
- engage in short selling (the portfolio manager does not currently engage in short selling but may do so in the future without further notice to investors); and
- invest in gold and silver, and other instruments (such as derivatives and ETFs) that provide exposure to these metals.

If the Fund employs any of these strategies, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

What are the Risks of Investing in the Fund?

This Fund invests in debt instruments, which subjects the Fund to market risk. Floating or fixed rate instruments are subject to

company risk, credit risk, interest rate risk, and prepayment risk. Since the Fund invests outside of Canada, it is subject to foreign markets risk and foreign currency risk. These and other risks are described starting on page 1. The following table shows which risks apply to this Fund:

* This risk applies only to the Fixed Rate Distribution Series.

As of September 3, 2021, one securityholder held 32.20% of the Fund by market value. **This may subject the Fund to Large Transaction risk.**

Who Should Invest in this Fund?

You should consider this Fund if you

- are looking for the income potential of floating rate instruments linked to interest rate changes,
- are looking for a low- to medium-risk, current-income fund to hold as part of your portfolio,
- are looking to diversify your fixed-income holdings,
- want a short- to medium-term investment,
- can handle the volatility of bond markets.

You should consider the Fund's Fixed Rate Distribution Series if you want to receive a monthly cash flow.

Distribution Policy

Refer to the "Introduction to Part B – Distribution Policy" section of this simplified prospectus.

On its Fixed Rate Distribution Series, the Fund will make monthly distributions at the following rates:

Fixed Rate Distribution Series	Distribution Rate
F5	5%
PWT5	5%
S5	5%

These fixed rate distributions will consist of net income to the extent of the Fund's allocation of net income to that series for that month, and any amount of the distribution that is in excess of the net income for that series will consist of return of capital. **You should not confuse these distributions with the Fund's rate of return or the yield of its portfolio.**

In addition, on its non-Fixed Rate Distribution Series, the Fund will make monthly distributions of net income. These distributions may be adjusted or discontinued at our discretion. **You must inform us if you wish to receive these distributions in cash, otherwise they will be reinvested, without charge, in additional securities of the series on which they were paid.** You may not elect to receive these distributions in cash if your securities are held in a Mackenzie Investments-administered registered plan, unless that registered plan is a TFSA, in which case you may elect to have these distributions paid from the TFSA.

Fund Expenses Indirectly Borne by Investors

What Does the Fund Invest In?

Investment Objectives

The Fund seeks long-term capital growth and current income by investing primarily in equity securities of companies anywhere in the world that pay, or may be expected to pay, dividends. The Fund may also invest in other types of securities that distribute, or may be expected to distribute, income.

Any change to the fundamental investment objectives of the Fund must be approved by a majority of the votes cast at a meeting of securityholders held for that reason.

Investment Strategies

The investment approach follows a disciplined investment process to construct a portfolio of attractively valued companies that combines above-average yield with the potential for growth. Stock selection is the primary contributor to value added, with attention paid to both upside potential and downside risk. Sector allocation is employed to manage overall portfolio risk.

As well as equity securities (including common shares and preferred shares), the Fund may invest in fixed-income securities, trust

securities and other securities (including convertible bonds and warrants).

Generally, the Fund will not invest more than 25% of its assets in emerging markets.

The Fund may hold cash and/or short-term debt securities in anticipation of, or in response to, unfavourable market conditions; and/or for liquidity purposes.

The Fund considers material environmental, social and/or governance factors in its investment evaluation process.

The Fund may hold a portion of its net assets in securities of other investment funds, including ETFs, which may be managed by us, in accordance with its investment objectives. For more information see the "Fund of Funds" disclosure under "Fees and Expenses".

In accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described in the "Introduction to Part B – What Does the Fund Invest In?" section of this simplified prospectus, the Fund may

- use derivatives for hedging and non-hedging purposes;
- engage in securities lending, repurchase and reverse repurchase transactions;
- engage in short selling (the portfolio manager does not currently engage in short selling but may do so in the future without further notice to investors); and
- invest in gold and silver, and other instruments (such as derivatives and ETFs) that provide exposure to these metals.

If the Fund employs any of these strategies, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

What are the Risks of Investing in the Fund?

This Fund invests in global equity securities, which subjects the Fund to market risk. Equity securities are more volatile than other types of investments, such as fixed-income investments. Since the Fund invests outside of Canada, it is subject to foreign markets risk and foreign currency risk. These and other risks are described starting on page 1. The following table shows which risks apply to this Fund:

* This risk applies only to the Fixed Rate Distribution Series.

Who Should Invest in this Fund?

You should consider this Fund if you

- are looking for a low- to medium-risk, global income-oriented equity fund to hold as part of your portfolio,
- want a medium- to long-term investment,
- can handle the volatility of stock markets.

You should consider the Fund's Fixed Rate Distribution Series if you want to receive a monthly cash flow.

Distribution Policy

Refer to the "Introduction to Part B – Distribution Policy" section of this simplified prospectus.

On its Fixed Rate Distribution Series, the Fund will make monthly distributions at the following rates:

Fixed Rate Distribution Series	Distribution Rate
D	5%
F	5%
F8	8%
FB5	5%
I	5%
O	5%
O5	5%
PWFB5	5%
PWT5	5%
PWT8	8%
PWX	5%
PWX8	8%
T5	5%
T8	8%

These fixed rate distributions will consist of net income to the extent of the Fund's allocation of net income to that series for that month, and any amount of the distribution that is in excess of the net income for that series will consist of return of capital. **You should not confuse these distributions with the Fund's rate of return or the yield of its portfolio.**

Fund Expenses Indirectly Borne by Investors

Estimated cumulative expenses payable by each series of securities of the Fund for each \$1,000 investment (see "Introduction to Part B" for an explanation of the assumptions used in this example) for the time periods shown:

What Does the Fund Invest In?

Investment Objectives

The Fund seeks to provide long-term capital growth by investing primarily in equity securities issued by companies of any size, anywhere in the world.

Any change to the fundamental investment objectives of the Fund must be approved by a majority of the votes cast at a meeting of securityholders held for that reason.

Investment Strategies

The investment approach follows a core investment style, looking for companies that are undervalued, of high quality and have good growth prospects. The portfolio manager uses a quantitative approach to stock selection, portfolio construction and transaction cost measurement. The portfolio manager employs fundamental ideas in a disciplined, risk-aware manner. The portfolio invests in large and mid-cap stocks.

The Fund may hold cash and/or short-term debt securities in anticipation of, or in response to, unfavourable market conditions; and/or for liquidity purposes.

The Fund considers material environmental, social and/or governance factors in its investment evaluation process.

Depending on market conditions, the portfolio manager's investment style may result in a higher portfolio turnover rate than less actively managed funds. Generally, the higher the Fund's portfolio turnover rate, the higher its trading expenses, and the higher the probability that you will receive a distribution of capital gains from the Fund, which may be taxable if you hold the Fund outside a registered plan. There is no proven relationship between a high turnover rate and the performance of a mutual fund.

The Fund may hold a portion of its net assets in securities of other investment funds, including ETFs, which may be managed by us, in accordance with its investment objectives. For more information see the "Fund of Funds" disclosure under "Fees and Expenses".

In accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described in the "Introduction to Part B – What Does the Fund Invest In?" section of this simplified prospectus, the Fund may

- use derivatives for hedging and non-hedging purposes;
- engage in securities lending, repurchase and reverse repurchase transactions;
- engage in short selling (the portfolio manager does not currently engage in short selling but may do so in the future without further notice to investors); and
- invest in gold and silver, and other instruments (such as derivatives and ETFs) that provide exposure to these metals.

If the Fund employs any of these strategies, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

What are the Risks of Investing in the Fund?

This Fund invests in global equity securities, which subjects the Fund to market risk. Equity securities are more volatile than other types of investments, such as fixed-income investments. Since the Fund invests outside of Canada, it is subject to foreign markets risk and foreign currency risk. These and other risks are described starting on page 1. The following table shows which risks apply to this Fund:

Who Should Invest in this Fund?

You should consider this Fund if you

- are looking for a medium-risk, global equity fund to hold as part of your portfolio,
- want a medium- to long-term investment,
- can handle the volatility of stock markets.

You should consider the Fund's Fixed Rate Distribution Series if you want to receive a monthly cash flow.

Distribution Policy

Refer to the "Introduction to Part B – Distribution Policy" section of this simplified prospectus.

On its Fixed Rate Distribution Series, the Fund will make monthly distributions at the following rates:

Fixed Rate Distribution Series	Distribution Rate
F5	5%
F8	8%
FB5	5%
PWFB5	5%
PWT5	5%
PWT8	8%
PWX8	8%
T5	5%
T8	8%

These fixed rate distributions will consist of net income to the extent of the Fund's allocation of net income to that series for that month, and any amount of the distribution that is in excess of the net income for that series will consist of return of capital. **You should not confuse these distributions with the Fund's rate of return or the yield of its portfolio.**

Fund Expenses Indirectly Borne by Investors

Estimated cumulative expenses payable by each series of securities of the Fund for each \$1,000 investment (see "Introduction to Part B" for an explanation of the assumptions used in this example) for the time periods shown:

Series (\$)	For 1 Year	For 3 Years	For 5 Years	For 10 Years

What Does the Fund Invest In?

Investment Objectives

The Fund seeks to generate income with the potential for long-term capital appreciation by investing primarily in fixed-income securities of issuers anywhere in the world. The Fund follows an approach to investing that focuses on sustainable and responsible issuers.

The Fund invests primarily in the environmental economy with a focus on labelled green bonds. The Fund will pursue this objective by investing in securities directly and/or by investing in other investment funds.

Any proposed change in the fundamental investment objectives of the Fund must be approved by a majority of the votes cast at a meeting of the Fund's investors called for that purpose.

Investment Strategies

The Fund follows an approach to investing that focuses on sustainable and responsible issuers and will combine qualitative, quantitative, and fundamental research with the analysis of environmental, social, and governance ("ESG") factors into investment selection. The integration of ESG factors into research provides additional insights into the sustainability of issuers.

The Fund will invest primarily in labelled green bonds and other debt instruments that are used to finance environmental and sustainable solutions, allocating across credit quality, yields, structures, sectors, currencies, and countries. The Fund may invest up to 100% of its fixed-income exposure in any one sector, and can invest in all types of fixed-income securities from around the world, including, but not limited to, high-yield corporate and government bonds, which are bonds that have a credit rating below investment grade (rated "BBB-" by a recognized credit rating organization) and are sometimes non-

rated, investment-grade corporate and government bonds, convertible bonds, loans, and floating-rate instruments.

Portfolio maturities may be adjusted to take advantage of different stages in the economic cycle: longer maturities can be used when interest rates are falling and shorter maturities can be used in periods of rising interest rates.

The portfolio manager's ability to select appropriate maturities to adjust to interest rate changes, along with other yield enhancement strategies, may have a significant effect on Fund performance.

The Fund has received regulatory approval to invest up to 20% of its net assets, taken at market value at the time of purchase, in government-issued or guaranteed debt securities of any one issuer with a credit rating of "AA" or higher and, similarly, up to 35% of its net assets in government-issued or guaranteed debt securities of any one issuer with a credit rating of "AAA" or higher. These investments may increase the Fund's exposure to concentration risk, credit risk and foreign markets risk as described under "**What are the General Risks of Investing in a Mutual Fund?**" Please see the "**Introduction to Part B – What Does the Fund Invest In?**" section of this simplified prospectus for more details regarding this regulatory approval.

The Fund may hold cash and/or short-term debt securities in anticipation of, or in response to, unfavourable market conditions; and/or for liquidity purposes.

The Fund may hold a portion of its net assets in securities of other investment funds, including ETFs, which may be managed by us, in accordance with its investment objectives. For more information see the "**Fund of Funds**" disclosure under "**Fees and Expenses**".

In accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described in the "**Introduction to Part B – What Does the Fund Invest In?**" section of this simplified prospectus, the Fund may

- use derivatives for hedging and non-hedging purposes;
- engage in securities lending, repurchase and reverse repurchase transactions;
- engage in short selling (the portfolio manager does not currently engage in short selling but may do so in the future without further notice to investors); and
- invest in gold and silver, and other instruments (such as derivatives and ETFs) that provide exposure to these metals.

If the Fund employs any of these strategies, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

What are the Risks of Investing in the Fund?

This Fund invests in fixed-income securities, which subjects the Fund to market risk. Fixed-income securities are subject to company risk, credit risk, interest rate risk, and prepayment risk. Since the Fund invests outside of Canada, it is subject to foreign markets risk and to a lesser extent, foreign currency risk. These and other risks are described starting on page 1. The following table shows which risks apply to this Fund:

Who Should Invest in this Fund?

You should consider this Fund if you

- are looking for a low risk, global fixed-income fund that invests in issuers focused on green bonds to hold as part of your portfolio,
- want a medium- to long-term investment,
- can handle the volatility of bond markets.

Distribution Policy

Refer to the “**Introduction to Part B – Distribution Policy**” section of this simplified prospectus.

In addition, the Fund will make monthly distributions of net income. These distributions may be adjusted or discontinued at our discretion. You should not confuse these distributions with the Fund’s rate of return or the yield of its portfolio. You must inform us if you wish to receive these distributions in cash, otherwise they will be reinvested, without charge, in additional securities of the series on which they were paid. You may not elect to receive these distributions in cash if your securities are held in a Mackenzie Investments-administered registered plan, unless that registered plan is a TFSA, in which case you may elect to have these distributions paid from the TFSA.

Fund Expenses Indirectly Borne by Investors

This information is not available because the Fund is new.

What Does the Fund Invest In?

Investment Objectives

The Fund seeks capital growth and current income by investing primarily in equity and/or fixed income securities anywhere around the world.

The Fund will pursue this objective by investing in securities directly and/or by investing in other mutual funds.

Any proposed change in the fundamental investment objectives of the Fund must be approved by a majority of votes cast at meeting of Fund investors called for that purpose.

Investment Strategies

The Fund's asset mix will generally be kept within the following ranges:

- 60-90% equity securities
- 10-40% fixed-income securities, including cash and cash equivalents.

The asset allocation portfolio manager will adjust the percentage of the Fund invested in each asset class based on changes in the market outlook for each asset class.

The equity portfolio manager employs a company-focused investment style, seeking companies with strong management, good growth prospects, and a solid financial position. Emphasis is placed on paying reasonable prices for the free cash flow growth that companies in the portfolio is expected to achieve.

The fixed-income portfolio manager employs a flexible approach to meet its fixed-income objectives, allocating across credit quality, yields, structures, sectors, currencies, and countries. The Fund may invest up to 100% of its fixed-income exposure in any one sector, and can invest in all of its fixed-income exposure in all types of fixed-income securities from around the world, including, but not limited to, high-yield corporate and government bonds, which are bonds that have a credit rating below investment grade (rated "BBB-" by a recognized credit rating organization) and are sometimes non-rated, investment-grade corporate and government bonds, convertible bonds, loans, and floating-rate instruments.

The Fund may hold a portion of its net assets in securities of other investment funds, including ETFs, in accordance with its investment objectives. There will be no duplication of management fees, incentive fees or sales charges between the funds.

The Fund considers material environmental, social and/or governance factors in its investment evaluation process.

In accordance with applicable securities regulations or as permitted by the exemptions from these regulations and as further described in the "Introduction to Part B – What Does the Fund Invest In?" section of this simplified prospectus, the Fund may

- use derivatives for hedging and non-hedging purposes;
- engage in securities lending, repurchase and reverse repurchase transactions;
- engage in short selling (the portfolio manager does not currently engage in short selling but may do so in the future without future notice to investors); and
- invest in gold and silver, and other instruments (such as derivatives and ETFs) that provide exposure to these metals.

If the Fund employs any of these strategies, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

What are the Risks of Investing in the Fund?

This Fund invests in a combination of equity and fixed-income securities, which subjects the Fund to market risk. This combination subjects the Fund to a variety of risks inherent in both types of investments, including company risk, credit risk, interest rate risk, and prepayment risk. Since the Fund invests outside of Canada, it is subject to foreign markets risk and to a lesser extent foreign currency risk. These and other risks are described starting on page 1. The following table shows which risks apply to this Fund:

Effective December 11, 2017, Series G securities was closed to any new investment, except that investors that hold Series G securities as of this date, and continue to hold these securities, are permitted to make additional purchases.

What Does the Fund Invest In?

Investment Objectives

The Fund pursues long-term capital growth primarily from investment in shares of companies operating anywhere in the world in the energy and natural resource industries.

At least three different countries will usually be represented in the Fund's overall portfolio holdings.

Any proposed change to the fundamental investment objectives of the Fund must be approved by a majority of votes cast at a meeting of securityholders held for that reason.

Investment Strategies

The investment approach follows various strategies including

- investing in companies expected to increase shareholder value through successful exploration and development;
- seeking out leading companies that typically have lower costs, lower debt and/or outstanding assets;
- taking advantage of commodity prices and emphasizing natural resource sectors and/or individual companies which are out of favour but offer recovery potential over a 1 to 3-year period; and
- reviewing all investment decisions and allowing cash reserves to build up when valuations are unattractive.

The Fund generally maintains a mix of smaller- and larger-capitalization companies, diversified by commodity and by country.

The Fund may hold cash and/or short-term debt securities in anticipation of, or in response to, unfavourable market conditions; and/or for liquidity purposes.

The Fund considers material environmental, social and/or governance factors in its investment evaluation process.

The Fund may hold a portion of its net assets in securities of other investment funds, including ETFs, which may be managed by us, in accordance with its investment objectives. For more information see the "Fund of Funds" disclosure under "Fees and Expenses".

The Bank of Nova Scotia is the sub-custodian of the Fund's gold and silver bullion. Please see the "Introduction to Part B – What Does the Fund Invest In?" section of this simplified prospectus for more details.

In accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described in the "Introduction to Part B – What Does the Fund Invest In?" section of this simplified prospectus, the Fund may

- use derivatives for hedging and non-hedging purposes;
- engage in securities lending, repurchase and reverse repurchase transactions;
- engage in short selling; and
- invest in gold and silver, and other instruments (such as derivatives and ETFs) that provide exposure to these metals.

If the Fund employs any of these strategies, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

What are the Risks of Investing in the Fund?

Direct purchases of gold and silver bullion by the Fund may generate higher transaction and custody costs than other types of investments, which may impact the performance of the Fund.

This Fund invests in equities of a single sector or industry, which subjects the Fund to market risk. This focus subjects the Fund to volatility, commodity risk, and concentration risk. The value of natural resources companies may fluctuate with respect to real and perceived inflationary trends, international commodity price factors and various political developments, irrespective of the companies' own operations. In addition, the resource sector has historically been more volatile than other sectors of the global economy and the Fund's returns will likely show similar volatility. The Fund's investments in precious metals are subject to special risk considerations including substantial price fluctuations over short periods of time. The Fund may also invest a significant portion of its assets outside of Canada, which means that it is subject to foreign markets risk and foreign currency risk. These and other risks are described starting on page 1. The following table shows which risks apply to this Fund:

Risk Checklist

	Primary Risk	Secondary Risk	Low or Not a Risk

As of September 3, 2021, two securityholders held 15.19% and 52.99% of the Fund by market value. **This may subject the Fund to Large Transaction risk.**

Who Should Invest in this Fund?

You should consider this Fund if you

- are looking for a high-risk, global resource sector equity fund to hold as part of your portfolio,
- want a long-term investment,
- can handle the volatility of stock and commodity markets.

Distribution Policy

Refer to the “**Introduction to Part B – Distribution Policy**” section of this simplified prospectus.

What Does the Fund Invest In?

Investment Objectives

The Fund seeks to provide long-term capital growth by investing primarily in equity securities of global small- to mid-capitalization companies.

The Fund will pursue this objective by investing in securities directly and/or by investing in other mutual funds.

Any proposed change in the fundamental investment objectives of the Fund must be approved by a majority of votes cast at meeting of Fund investors called for that purpose.

Investment Strategies

The Fund seeks companies with strong management, good growth prospects and attractive financial metrics. Emphasis is also placed on paying reasonable prices for the growth that companies in the portfolio are expected to achieve.

The Fund may also hold cash and/or short-term debt securities in anticipation of, or in response to, unfavourable market conditions; and/or for liquidity purposes.

The Fund considers material environmental, social and/or governance factors in its investment evaluation process.

Currently, the Fund intends to achieve its investment objective by investing in other mutual funds managed by Mackenzie. The Fund may hold a portion of its net assets in securities of other investment funds, including ETFs, in accordance with its investment objectives. There will be no duplication of management fees, incentive fees or sales charges between the funds.

In accordance with applicable securities regulations or as permitted by the exemptions from these regulations and as further described in the **"Introduction to Part B – What Does the Fund Invest In?"** section of this simplified prospectus, the Fund may:

- use derivatives for hedging and non-hedging purposes;
- engage in securities lending, repurchase and reverse repurchase transactions;
- engage in short selling (the portfolio manager does not currently engage in short selling but may do so in the future without future notice to investors); and
- invest in gold and silver, and other instruments (such as derivatives and ETFs) that provide exposure to these metals.

If the Fund employs any of these strategies, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

What are the Risks of Investing in the Fund?

This Fund invests in global equities, which subjects the Fund to market risk. Equity securities are more volatile than other types of investments, such as fixed-income investments. Since the Fund invests outside of Canada, it is subject to foreign markets risk and foreign currency risk. These and other risks are described on page 1. The following table shows which risks apply to this Fund:

Who Should Invest in this Fund?

You should consider this Fund if you

- are looking for a medium-risk, global equity fund to hold as part of your portfolio,
- want a medium to long-term investment,
- can handle the ups and downs of the stock market.

You should consider the Fund's Fixed Rate Distribution Series if you want to receive a monthly cash flow.

Distribution Policy

Refer to the "Introduction to Part B – Distribution Policy" section of this simplified prospectus.

On its Fixed Rate Distribution Series, the Fund will make monthly distributions at the following rates:

Fixed Rate Distribution Series	Distribution Rate
F5	5%
F8	8%
FB5	5%
PWFB5	5%
PWT5	5%
PWT8	8%
PWX8	8%
T5	5%
T8	8%

These fixed rate distributions will generally consist of return of capital. **You should not confuse these distributions with the Fund's rate of return or the yield of its portfolio.**

Fund Expenses Indirectly Borne by Investors

Estimated cumulative expenses payable by each series of securities of the Fund for each \$1,000 investment (see "Introduction to Part B" for an explanation of the assumptions used in this example) for the time periods shown:

Series (\$)	For 1 Year	For 3 Years	For 5 Years	For 10 Years
Series A	26	81	142	323

* A Fixed Rate Distribution Series.

What Does the Fund Invest In?

Investment Objectives

The Fund seeks income with the potential for long-term capital growth by investing primarily in fixed-income and/or income-oriented equity securities of issuers anywhere in the world.

Any change to the investment objectives must be approved by a majority of votes cast at a meeting of investors held for that reason.

Investment Strategies

The Fund will pursue a flexible approach to investing in fixed-income and/or equity asset classes anywhere in the world. The Fund will generally invest 30% to 70% of its assets in any one asset class but may invest 0% to 100% of its assets in any one asset class. Allocations between asset classes are based on economic conditions and/or the portfolio managers' assessment of relative valuations.

The Fund will employ a flexible approach to meet its fixed-income objectives, allocating assets across credit quality, yields, structures, sectors, currencies and countries. The Fund may invest up to 100% of its fixed-income exposure in any one sector, and it can invest in all types of fixed-income securities from around the world, including but not limited to: high-yield corporate and government bonds, which are bonds that have a credit rating below investment grade (rated

below "BBB-" by a recognized credit rating organization) and are sometimes non-rated, investment-grade corporate and government bonds, and floating-rate instruments.

The investment approach follows a fundamental analysis to identify, select and monitor investments. The portfolio managers perform industry analysis and specific company analysis, including review of financial statements and other relevant factors.

Income-oriented equity securities in which the Fund may invest may include, but are not limited to, dividend-paying common shares, preferred shares and convertible preferred shares and trusts (including income trusts, business trusts, real estate investment trusts ("REITs"), royalty and resource trusts, utilities and infrastructure trusts). Depending on market conditions, the Fund may also invest a portion of its assets in equity securities that are not income oriented.

The Fund has obtained regulatory approval to invest up to 20% of its net assets, taken at market value at the time of purchase, in cash equivalent government issued or guaranteed debt securities of any one issuer with a credit rating of "AA" or higher and, similarly, up to 35% of its net assets in cash equivalent government issued or guaranteed debt securities of any one issuer with a credit rating of "AAA" or higher. Please see the "Introduction to Part B – What Does the Fund Invest In?" section of this simplified prospectus for more details.

The Fund may hold cash and/or short-term debt securities in anticipation of, or in response to, unfavourable market conditions; and/or for liquidity purposes.

The Fund considers material environmental, social and/or governance factors in its investment evaluation process.

The Fund may hold a portion of its net assets in securities of other investment funds, including ETFs, which may be managed by us, in accordance with its investment objectives. For more information see the "Fund of Funds" disclosure under "Fees and Expenses".

The Fund may invest up to 10% of its net assets in illiquid assets, measured at the time of investment, which may include securities of a Private Vehicle offered by Northleaf and/or Sagard.

In accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described in the "Introduction to Part B – What Does the Fund Invest In?" section of this simplified prospectus, the Fund may

- use derivatives for hedging and non-hedging purposes;
- engage in securities lending, repurchase and reverse repurchase transactions;
- engage in short selling (the portfolio manager does not currently engage in short selling but may do so in the future without further notice to investors); and
- invest in gold and silver, and other instruments (such as derivatives and ETFs) that provide exposure to these metals.

If the Fund employs any of these strategies, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

What are the Risks of Investing in the Fund?

This Fund invests in a combination of equity and fixed-income securities, which subjects the Fund to market risk. This combination subjects the Fund to a variety of risks inherent in both types of investments, including company risk, credit risk, interest rate risk, and prepayment risk. Since the Fund invests outside of Canada, it is subject to foreign markets risk and foreign currency risk. These and other risks are described starting on page 1. The following table shows which risks apply to this Fund:

Who Should Invest in this Fund?

You should consider this Fund if you

- are looking for a low- to medium-risk, global balanced income fund to hold as part of your portfolio,
- want a medium-term investment,
- can handle the volatility of stock and bond markets.

You should consider the Fund's Fixed Rate Distribution Series if you want to receive a monthly cash flow.

Distribution Policy

Refer to the “**Introduction to Part B – Distribution Policy**” section of this simplified prospectus.

On its Fixed Rate Distribution Series, the Fund will make monthly distributions at the following rates:

Fixed Rate Distribution Series	Distribution Rate
A	5%
D	5%
F	5%
F8	8%
FB	5%
O	5%
O5	5%
PW	5%
PWFB	5%
PWT5	5%
PWT8	8%
PWX	5%
PWX8	8%
T5	5%
T8	8%

These fixed rate distributions will consist of net income to the extent of the Fund's allocation of net income to that series for that month, and any amount of the distribution that is in excess of the net income for that series will consist of return of capital. **You should not**

confuse these distributions with the Fund's rate of return or the yield of its portfolio.

In addition, Series AR and PWR, the Fund will make monthly distributions of net income. These distributions may be adjusted or discontinued at our discretion.

Fund Expenses Indirectly Borne by Investors

Estimated cumulative expenses payable by each series of securities of the Fund for each \$1,000 investment (see "Introduction to Part B" for an explanation of the assumptions used in this example) for the time periods shown:

Sub-Advisor	Rockefeller Capital Management is responsible for investing the equity portion of the Fund. Mackenzie Investments is responsible for investing the fixed-income portion of the Fund.

* A Fixed Rate Distribution Series.

What Does the Fund Invest In?

Investment Objectives

The Fund seeks to provide a combination of income and capital appreciation by investing primarily in fixed-income and/or equity securities of issuers anywhere in the world. The Fund follows an approach to investing that focuses on sustainable and responsible issuers.

Any proposed change in the fundamental investment objectives of the Fund must be approved by a majority of votes cast at meeting of Fund investors called for that purpose.

Investment Strategies

The Fund follows an approach to investing that focuses on sustainable and responsible issuers. To achieve the Fund's investment objectives, the fixed-income portfolio manager will combine qualitative, quantitative, and fundamental research with the analysis of environmental, social, and governance ("ESG") factors into investment selection. The integration of ESG factors into research provides additional insights into sustainability and social responsibility of issuers.

The Fund will employ a flexible approach to meet its fixed-income objectives, allocating assets across credit quality, yields, capital structures, sectors, currencies and countries. The Fund may invest up to 100% of its fixed-income exposure in any one sector, and it can invest in all types of fixed-income securities from around the world, including but not limited to: high-yield corporate and government bonds, which are bonds that have a credit rating below investment grade (rated below "BBB-" by a recognized credit rating organization) and are sometimes non-rated, investment-grade corporate and government bonds, and floating-rate instruments.

With regard to equities, portfolio companies will be selected based on the sub-advisor's fundamental, sector-based analysis of the company's current and prospective financial condition as well as the sub-advisor's ESG analysis.

The Fund will pursue a flexible approach to investing in equities and/or fixed-income securities. The Fund will generally invest 30% to 70% of its assets in any one asset class, but it may invest 0% to 100% of its assets in any one asset class. Allocations between asset classes are based on economic conditions and/or the portfolio managers' assessment of relative valuations.

The Fund has obtained regulatory approval to invest up to 20% of its net assets, taken at market value at the time of purchase, in government-issued or guaranteed debt securities of any one issuer with a credit rating of "AA" or higher and, similarly, up to 35% of its net assets in government-issued or guaranteed debt securities of any one issuer with a credit rating of "AAA" or higher. These investments may increase the Fund's exposure to concentration risk, credit risk and foreign markets risk as described under "**What are the General Risks of Investing in a Mutual Fund?**" Please see the "**Introduction to Part B – What Does the Fund Invest In?**" section of this simplified prospectus for more details regarding this regulatory approval.

Depending on market conditions, the portfolio manager's investment style may result in a higher portfolio turnover rate than less actively managed funds. Generally, the higher the Fund's portfolio turnover rate, the higher its trading expenses, and the higher the probability that you will receive a distribution of capital gains from the Fund, which may be taxable if you hold the Fund outside a registered plan. There is no proven relationship between a high turnover rate and the performance of a mutual fund.

The Fund may hold cash and/or short-term debt securities in anticipation of, or in response to, unfavourable market conditions; and/or for liquidity purposes.

The Fund may hold a portion of its net assets in securities of other investment funds, including ETFs, which may be managed by us, in accordance with its investment objectives. For more information see the "**Fund of Funds**" disclosure under "**Fees and Expenses**".

In accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described in the “**Introduction to Part B – What Does the Fund Invest In?**” section of this simplified prospectus, the Fund may

- use derivatives for hedging and non-hedging purposes;
- engage in securities lending, repurchase and reverse repurchase transactions;
- engage in short selling (the portfolio manager does not currently engage in short selling but may do so in the future without further notice to investors); and
- invest in gold and silver, and other instruments (such as derivatives and ETFs) that provide exposure to these metals.

If the Fund employs any of these strategies, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

What are the Risks of Investing in the Fund?

This Fund invests in a combination of equity and fixed-income securities, which subjects the Fund to market risk. This combination subjects the Fund to a variety of risks inherent in both types of investments, including company risk, credit risk, interest rate risk, and prepayment risk. Since the Fund invests outside of Canada, it is subject to foreign markets risk and foreign currency risk. These and other risks are described starting on page 1. Who Should Invest in this Fund?

You should consider this Fund if you

- are looking for a low- to medium-risk, global balanced fund that invests in companies focused on socially responsible investing to hold as part of your portfolio,
- want a medium-term investment,
- can handle the volatility of stock and bond markets.

You should consider the Fund's Fixed Rate Distribution Series if you want to receive a monthly cash flow.

Distribution Policy

Refer to the “**Introduction to Part B – Distribution Policy**” section of this simplified prospectus.

On its Fixed Rate Distribution Series, the Fund will make monthly distributions at the following rates:

Fixed Rate Distribution Series	Distribution Rate
F5	5%
F8	8%
FB5	5%

Fixed Rate Distribution Series	Distribution Rate
PWFB5	5%
PWT5	5%

What Does the Fund Invest In?

Investment Objectives

The Fund seeks to provide a steady flow of income and moderate capital growth by investing primarily in fixed-income securities of issuers anywhere in the world. The Fund follows an approach to investing that focuses on sustainable and responsible issuers.

Any proposed change in the fundamental investment objectives of the Fund must be approved by a majority of votes cast at meeting of Fund investors called for that purpose.

Investment Strategies

The Fund follows an approach to investing that focuses on sustainable and responsible issuers and will combine qualitative, quantitative, and fundamental research with the analysis of environmental, social, and governance (“ESG”) factors into investment selection. The integration of ESG factors into research provides additional insights into sustainability and social responsibility of issuers.

The Fund will invest in labelled green bonds, social bonds, sustainable bonds and sustainability-linked bonds as well as other debt instruments that are used to finance environmental and sustainable solutions, allocating across credit quality, yields structures, sectors, currencies, and countries.

The Fund may invest up to 100% of its fixed-income exposure in any one sector, and it can invest in all types of fixed-income securities from around the world, including but not limited to: high-yield corporate and government bonds, which are bonds that have a credit rating below investment grade (rated below “BBB-” by a recognized credit rating organization) and are sometimes non-rated, investment-

grade corporate and government bonds, and floating-rate instruments.

The Fund has obtained regulatory approval to invest up to 20% of its net assets, taken at market value at the time of purchase, in government-issued or guaranteed debt securities of any one issuer with a credit rating of “AA” or higher and, similarly, up to 35% of its net assets in government-issued or guaranteed debt securities of any one issuer with a credit rating of “AAA” or higher. These investments may increase the Fund’s exposure to concentration risk, credit risk and foreign markets risk as described under “**What are the General Risks of Investing in a Mutual Fund?**” Please see the “**Introduction to Part B – What Does the Fund Invest In?**” section of this simplified prospectus for more details regarding this regulatory approval.

The Fund may hold cash and/or short-term debt securities in anticipation of, or in response to, unfavourable market conditions; and/or for liquidity purposes.

The Fund may hold a portion of its net assets in securities of other investment funds, including ETFs, which may be managed by us, in accordance with its investment objectives. For more information see the “**Fund of Funds**” disclosure under “**Fees and Expenses**”.

In accordance with applicable securities regulations or as permitted by the exemptions from these regulations and as further described in the “**Introduction to Part B – What Does the Fund Invest In?**” section of this simplified prospectus, the Fund may

- use derivatives for hedging and non-hedging purposes;
- engage in securities lending, repurchase and reverse repurchase transactions;
- engage in short selling (the portfolio manager does not currently engage in short selling, but may do so in the future without future notice to investors); and
- invest in gold and silver, and other instruments (such as derivatives and ETFs) that provide exposure to these metals.

If the Fund employs any of these strategies, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

What are the Risks of Investing in the Fund?

This Fund invests in fixed-income securities, which subjects the Fund to market risk. This Fund is subject to a variety of risks inherent in fixed income investments, including credit risk, interest rate risk, and prepayment risk. Since the Fund invests outside of Canada, it is subject to foreign markets risk and foreign currency risk. These and other risks are described starting on page 1. As of September 3, 2021, one securityholder held 90.76% of the Fund by market value. **This may subject the Fund to Large Transaction risk.**

Who Should Invest in this Fund?

You should consider this Fund if you

- are looking for a low risk, global fixed-income fund that invests in companies focused on sustainable investing to hold as part of your portfolio,
- want a medium-term investment,
- can handle the volatility of bond markets.

Distribution Policy

Refer to the “**Introduction to Part B – Distribution Policy**” section of this simplified prospectus.

In addition, the Fund will make monthly distributions of net income. These distributions may be adjusted or discontinued at our discretion. You should not confuse these distributions with the Fund's rate of return or the yield of its portfolio. You must inform us if you wish to receive these distributions in cash, otherwise they will be reinvested, without charge, in additional securities of the series on which they were paid. You may not elect to receive these distributions in cash if your securities are held in a Mackenzie Investments-administered registered plan, unless that registered plan is a TFSA, in which case you may elect to have these distributions paid from the TFSA.

Fund Expenses Indirectly Borne by Investors

This information is not available because the Fund is new.

What Does the Fund Invest In?

Investment Objectives

The Fund aims to generate income by investing primarily in a diversified portfolio of fixed-income securities issued by companies or governments of any size, anywhere in the world.

The Fund also seeks to achieve long-term capital growth by investing in fixed-income securities and other investments.

The Fund will employ a flexible approach, allocating assets across credit quality, structures, sectors, currencies and countries.

Any proposed change in the fundamental investment objectives of the Fund must be approved by a majority of the votes cast at a meeting of the Fund's investors called for that purpose.

Investment Strategies

The investment approach follows a value investment style maximizing the relative value for risk around the world. The Fund has the flexibility to invest across all fixed-income credit qualities and can invest in a wide variety of assets from anywhere in the world including government bonds, high-yield bonds and loans. The Fund can allocate to assets across structures, sectors, currencies and countries. The Fund may invest up to 100% of its net assets in any one sector.

The Fund may invest in securities that have a credit rating below "BBB-" as rated by a recognized credit rating organization and may invest in unrated debt instruments. Where securities have a lower credit quality, a bottom-up approach including an analysis of

business, cash flows and recovery value will also be used to value the opportunity.

The Fund actively manages its foreign currency exposure but is expected to be predominantly hedged back to the Canadian dollar for the majority of the time.

The Fund has obtained regulatory approval to invest up to 20% of its net assets, taken at market value at the time of purchase, in government-issued or guaranteed debt securities of any one issuer with a credit rating of "AA" or higher and, similarly, up to 35% of its net assets in government-issued or guaranteed debt securities of any one issuer with a credit rating of "AAA" or higher. These investments may increase the Fund's exposure to concentration risk, credit risk and foreign markets risk as described under "What are the General Risks of Investing in a Mutual Fund?" Please see the "Introduction to Part B – What Does the Fund Invest In?" section of this simplified prospectus for more details regarding this regulatory approval.

The Fund may hold cash and/or short-term debt securities in anticipation of, or in response to, unfavourable market conditions; and/or for liquidity purposes.

The Fund considers material environmental, social and/or governance factors in its investment evaluation process.

Depending on market conditions, the portfolio manager's investment style may result in a higher portfolio turnover rate than less actively managed funds. Although generally the higher the Fund's portfolio turnover rate, the higher its trading expenses, in the case of this Fund, which holds fixed-income products that are traded over the counter (rather than on an exchange), there may be situations where increased turnover actually reduces trading costs. The higher the portfolio turnover rate the greater the probability that you will receive a distribution of capital gains from the Fund, which may be taxable if you hold the Fund outside a registered plan. There is no proven relationship between a high turnover rate and the performance of a mutual fund.

The Fund may hold a portion of its net assets in securities of other investment funds, including ETFs, which may be managed by us, in accordance with its investment objectives. For more information see the "Fund of Funds" disclosure under "Fees and Expenses".

The Fund may invest up to 10% of its net assets in illiquid assets, measured at the time of investment, which may include securities of a Private Vehicle offered by Northleaf and/or Sagarid.

In accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described in the "Introduction to Part B – What Does the Fund Invest In?" section of this simplified prospectus, the Fund may

- use derivatives for hedging and non-hedging purposes;
- engage in securities lending, repurchase and reverse repurchase transactions;
- engage in short selling (the portfolio manager does not currently engage in short selling but may do so in the future without further notice to investors); and
- invest in gold and silver, and other instruments (such as derivatives and ETFs) that provide exposure to these metals.

If the Fund employs any of these strategies, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

What are the Risks of Investing in the Fund?

This Fund invests in fixed-income securities, which subjects the Fund to market risk. Fixed-income securities are subject to company risk, credit risk, interest rate risk, and prepayment risk. Since the Fund invests outside of Canada, it is subject to foreign markets risk and to a lesser extent, foreign currency risk. These and other risks are described starting on page 1. The following table shows which risks apply to this Fund:

* This risk applies only to the Fixed Rate Distribution Series.

During the past year, the Fund's holdings of China Government Bond Shares exceeded 10% of the Fund's net assets at a maximum level of 10.03%. Holding in excess of 10% of a Fund's net assets in a single issuer may subject the Fund to the risks described in "Concentration Risk" on page 2.

As of September 3, 2021, one securityholder held 50.64% of the Fund by market value. **This may subject the Fund to Large Transaction risk.**

Who Should Invest in this Fund?

You should consider this Fund if you

- are looking for a low-risk, global fixed-income fund to hold as part of your portfolio,
- want a medium-term investment,
- can handle the volatility of bond markets.

You should consider the Fund's Fixed Rate Distribution Series if you want to receive a monthly cash flow.

Distribution Policy

Refer to the "Introduction to Part B – Distribution Policy" section of this simplified prospectus.

On its Fixed Rate Distribution Series, the Fund will make monthly distributions at the following rates:

Fixed Rate Distribution Series	Distribution Rate
F5	5%
PWT5	5%
S5	5%

These fixed rate distributions will consist of net income to the extent of the Fund's allocation of net income to that series for that month, and any amount of the distribution that is in excess of the net income for that series will consist of return of capital. **You should not**

confuse these distributions with the Fund's rate of return or the yield of its portfolio.

In addition, on its non-Fixed Rate Distribution Series, the Fund will make monthly distributions of net income. These distributions may be adjusted or discontinued at our discretion. **You must inform us if you wish to receive these distributions in cash, otherwise they will be reinvested, without charge, in additional securities of the series on which they were paid.** You may not elect to receive these distributions in cash if your securities are held in a Mackenzie Investments-administered registered plan, unless that registered plan is a TFSA, in which case you may elect to have these distributions paid from the TFSA.

Fund Expenses Indirectly Borne by Investors

Estimated cumulative expenses payable by each series of securities of the Fund for each \$1,000 investment (see "Introduction to Part B" for an explanation of the assumptions used in this example) for the time periods shown:

Series (\$)	For 1 Year	For 3 Years	For 5 Years	For 10 Years

What Does the Fund Invest In?

Investment Objectives

The Fund aims to generate income with an emphasis on capital preservation by investing primarily in a diversified portfolio of investment-grade fixed-income securities issued by companies or governments of any size, anywhere in the world.

Any change to the investment objectives must be approved by a majority of the votes cast at a meeting of security holders held for that reason.

Investment Strategies

The investment approach follows a value investment style maximizing the relative value for risk around the world. The Fund has the flexibility to invest across all fixed-income credit qualities and can invest in a wide variety of assets from anywhere in the world including government bonds, high-yield bonds and loans. The Fund can allocate to assets across structures, sectors, currencies and countries. The Fund may invest up to 100% of its net assets in any one sector.

The Fund may invest up to 10% of its assets in fixed-income securities of issuers rated below investment grade and will maintain an overall weighted average credit quality of "A-" or higher, as rated by a recognized credit rating organization. Below investment grade refers to a credit rating below "BBB-" as rated by a recognized credit rating organization. Where securities have a lower credit quality, a bottom-up approach including an analysis of business, cash flows and recovery value will also be used to value the opportunity.

The Fund actively manages its foreign currency exposure but is expected to be predominantly hedged back to the Canadian dollar for the majority of the time.

The Fund has obtained regulatory approval to invest up to 20% of its net assets, taken at market value at the time of purchase, in government and/or supranational agency-issued or guaranteed debt securities of any one issuer with a credit rating of "AA" or higher and, similarly, up to 35% of its net assets in government and/or supranational agency-issued or guaranteed debt securities of any one issuer with a credit rating of "AAA" or higher. These investments may increase the Fund's exposure to concentration risk, credit risk and foreign markets risk as described under "What are the General Risks of Investing in a Mutual Fund?". Please see the "Introduction to Part B – What Does the Fund Invest In?" section of this simplified prospectus for more details regarding this regulatory approval.

The Fund may hold cash and/or short-term debt securities in anticipation of, or in response to, unfavourable market conditions; and/or for liquidity purposes.

The Fund considers material environmental, social and/or governance factors in its investment evaluation process.

Depending on market conditions, the portfolio manager's investment style may result in a higher portfolio turnover rate than less actively managed funds. Although generally the higher the Fund's portfolio turnover rate, the higher its trading expenses, in the case of this Fund, which holds fixed-income products that are traded over the counter (rather than on an exchange), there may be situations where increased turnover actually reduces trading costs. The higher the portfolio turnover rate the greater the probability that you will receive a distribution of capital gains from the Fund, which may be taxable if you hold the Fund outside a registered plan. There is no proven relationship between a high turnover rate and the performance of a mutual fund.

The Fund may hold a portion of its net assets in securities of other investment funds, including ETFs, which may be managed by us, in accordance with its investment objectives. For more information see the "Fund of Funds" disclosure under "Fees and Expenses".

The Fund may invest up to 10% of its net assets in illiquid assets, measured at the time of investment, which may include securities of a Private Vehicle offered by Northleaf and/or Sargard.

In accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described in the "Introduction to Part B – What Does the Fund Invest In?" section of this simplified prospectus, the Fund may

- use derivatives for hedging and non-hedging purposes;
- engage in securities lending, repurchase and reverse repurchase transactions;
- engage in short selling (the portfolio manager does not currently engage in short selling but may do so in the future without further notice to investors); and
- invest in gold and silver, and other instruments (such as derivatives and ETFs) that provide exposure to these metals.

If the Fund employs any of these strategies, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

What are the Risks of Investing in the Fund?

This Fund invests in fixed-income securities, which subjects the Fund to market risk. Fixed-income securities are subject to company risk, credit risk, interest rate risk, and prepayment risk. Since the Fund invests outside of Canada, it is subject to foreign markets risk and to a lesser extent, foreign currency risk. These and other risks are described starting on page 1. The following table shows which risks apply to this Fund:

During the past year, the Fund's holdings of China Government Bond Shares exceeded 10% of the Fund's net assets at a maximum level of 14.15%. Holding in excess of 10% of a Fund's net assets in a single issuer may subject the Fund to the risks described in "Concentration Risk" on page 2.

As of September 3, 2021, three securityholders held 19.93%, 17.19% and 26.90%, respectively, of the Fund by market value. **This may subject the Fund to Large Transaction risk.**

Who Should Invest in this Fund?

You should consider this Fund if you

- are looking for a low-risk, global fixed-income fund to hold as part of your portfolio,
- want a short- to medium-term investment,
- can handle the volatility of bond markets.

Distribution Policy

Refer to the "Introduction To Part B – Distribution Policy" section of this simplified prospectus.

In addition, the Fund will make monthly distributions of net income. **These distributions may be adjusted or discontinued at our discretion. You should not confuse these distributions with the Fund's rate of return or the yield of its portfolio. You must inform us if you wish to receive these distributions in cash, otherwise they will be reinvested, without charge, in additional securities of the series on which they were paid.** You may not elect to receive these distributions in cash if your securities are held in a Mackenzie Investments-administered registered plan, unless that registered plan is a TFSA, in which case you may elect to have these distributions paid from the TFSA.

Fund Expenses Indirectly Borne by Investors

Estimated cumulative expenses payable by each series of securities of the Fund for each \$1,000 investment (see "Introduction to Part B" for an explanation of the assumptions used in this example) for the time periods shown:

What Does the Fund Invest In?

Investment Objectives

The Fund seeks to provide long-term capital growth by investing primarily in equity securities of companies that promote gender diversity and women's leadership, anywhere in the world.

Any proposed change in the fundamental investment objectives of the Fund must be approved by a majority of the votes cast at a meeting of the Fund's investors called for that purpose.

Investment Strategies

To achieve the investment objectives, the sub-advisor will invest in equity securities based on, but not limited to, the following criteria:

- Representation of women on board of directors;
- Representation of women in executive management;
- Female CEO;
- Female CFO;

- Signatories to Women's Empowerment Principles – which are a set of principles offering guidance on how to empower women in the workplace, marketplace and community. They are the result of a collaboration between the United Nations Entity for Gender Equality and the Empowerment of Women and the United Nations Global Compact.

The investment portfolio of the Fund will generally include equity securities that are constituents of the Impax Global Women's Leadership Index, however, the sub-advisor will seek to optimize the components of the index by overweighting exposure to companies that have, in the opinion of the sub-advisor, more highly favourable gender leadership characteristics.

The Impax Global Women's Leadership Index is a customized market-weighted index that consists of equity securities of issuers organized or operating anywhere in the world that demonstrate a commitment to advancing and empowering women through gender diversity on their boards, in management and through other policies and programs. These issuers show an understanding of the potential business advantages associated with greater gender diversity. Issuers included in the Impax Global Women's Index are selected and rated by the Sub-advisor. In addition, the companies that comprise the index are required to meet certain environmental, social and governance, and/or sustainability thresholds. These thresholds include an exclusion for companies within the tobacco industry and weapons manufacturers.

The Fund may hold cash and/or short-term debt securities in anticipation of, or in response to, unfavourable market conditions; and/or for liquidity purposes.

The Fund considers material environmental, social and/or governance factors in its investment evaluation process.

Depending on market conditions, the portfolio manager's investment style may result in a higher portfolio turnover rate than less actively managed funds. Generally, the higher the Fund's portfolio turnover rate, the higher its trading expenses, and the higher the probability that you will receive a distribution of capital gains from the Fund, which may be taxable if you hold the Fund outside a registered plan. There is no proven relationship between a high turnover rate and the performance of a mutual fund.

The Fund may hold a portion of its net assets in securities of other investment funds, including ETFs, which may be managed by us, in accordance with its investment objectives. For more information see the "Fund of Funds" disclosure under "Fees and Expenses".

In accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described in the "Introduction to Part B – What Does the Fund Invest In?" section of this simplified prospectus, the Fund may

- use derivatives for hedging and non-hedging purposes;
- engage in securities lending, repurchase and reverse repurchase transactions;
- engage in short selling (the portfolio manager does not currently engage in short selling but may do so in the future without further notice to investors); and

- invest in gold and silver, and other instruments (such as derivatives and ETFs) that provide exposure to these metals.

If the Fund employs any of these strategies, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

What are the Risks of Investing in the Fund?

This Fund invests in global equities, which subjects the Fund to market risk. Equity securities are more volatile than other types of investments, such as fixed-income investments. Since the Fund invests outside of Canada, it is subject to foreign markets risk. These and other risks are described starting on page 1. The following table shows which risks apply to this Fund:

Risk Checklist

Who Should Invest in this Fund?

You should consider this Fund if you

- are looking for a low- to medium-risk, global equity fund that invests in companies that promote gender diversity, to hold as part of your portfolio,
- want a medium- to long-term investment,
- can handle the volatility of stock markets.

You should consider the Fund's Fixed Rate Distribution Series if you want to receive a monthly cash flow.

Distribution Policy

Refer to the "Introduction to Part B – Distribution Policy" section of this simplified prospectus.

On its Fixed Rate Distribution Series, the Fund will make monthly distributions at the following rates:

Fixed Rate Distribution Series	Distribution Rate
F5	5%
F8	8%
FB5	5%
PWFB5	5%
PWT5	5%
PWT8	8%
PWX8	8%
T5	5%
T8	8%

These fixed rate distributions will consist of net income to the extent of the Fund's allocation of net income to that series for that month, and any amount of the distribution that is in excess of the net income for that series will consist of return of capital. **You should not**

confuse these distributions with the Fund's rate of return or the yield of its portfolio.

Fund Expenses Indirectly Borne by Investors

Estimated cumulative expenses payable by each series of securities of the Fund for each \$1,000 investment (see "Introduction to Part B" for an explanation of the assumptions used in this example) for the time periods shown:

What Does the Fund Invest In?

Investment Objectives

The Fund seeks to provide long-term capital appreciation by investing primarily in listed equity securities of issuers located anywhere in the world that operate in the environmental economy. The Manager seeks to achieve the Fund’s investment objective by identifying undervalued securities that will benefit from the long-term trends of changing demographics, resource scarcity, and environmental degradation.

Any proposed change in the fundamental investment objectives of the Fund must be approved by a majority of the votes cast at a meeting of the Fund’s investors called for that purpose.

Investment Strategies

To achieve the investment objectives, the portfolio manager utilizes strong fundamental analysis to identify, select and monitor investments. The Fund will generally maintain a portfolio of companies of any market capitalization, whose revenues are

generated selling environmentally superior products and services. The Fund invests primarily in environmental sectors which include:

- Clean Energy – This sector includes companies involved in power development, including the manufacturing, installation, generation, and distribution of wind, solar photovoltaic, solar thermal, geothermal, biomass, hydro power, and other non-fossil-based energy sources.
- Energy Efficiency – The energy efficiency sector consists of companies that offer products and/or services to improve the efficiency of energy use in buildings and industrial applications. The sector includes advanced lighting, heating and cooling, power management technologies, and automation and drives.
- Clean Technology – The clean technology sector consists of knowledge-based companies whose products and services reduce resource consumption and pollution. The sector includes waste management services and pollution control, software and logistics, advanced materials, advanced meters and other forms of industrial efficiency.
- Water – The water sector is comprised primarily of filtration and purification technologies, utilities, infrastructure businesses and technologies, and processes that reduce water waste and/or consumption.
- Sustainable Agriculture – This sector focuses on sustainable agriculture and food and beverage companies that use less water, energy, fertilizer, hormones, antibiotics and pesticides to grow, harvest, distribute and/or retail such food.
- Transportation – Companies related to mass transportation and transportation efficiency technologies.

The Fund may hold cash and/or short-term debt securities in anticipation of, or in response to, unfavourable market conditions; and/or for liquidity purposes.

The Fund may hold a portion of its net assets in securities of other investment funds, including ETFs, in accordance with its investment objectives. There will be no duplication of management fees, incentive fees or sales charges between the funds.

In accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described in the “**Introduction to Part B– What Does the Fund Invest In?**” section of this simplified prospectus, the Fund may:

- use derivatives for hedging and non-hedging purposes;
- engage in securities lending, repurchase and reverse repurchase transactions;
- engage in short selling (the portfolio manager does not currently engage in short selling but may do so in the future without further notice to investors); and
- invest in gold and silver, and other instruments (such as derivatives and ETFs) that provide exposure to these metals.

If the Fund employs any of these strategies, it will do so in conjunction with its other investment strategies in a manner

considered appropriate to pursuing its investment objectives and enhancing its returns.

What are the Risks of Investing in the Fund?

This Fund invests in global equities, which subjects the Fund to market risk. Equity securities are more volatile than other types of investments, such as fixed-income investments. Since the Fund invests outside of Canada, it is subject to foreign markets risk and to a lesser extent foreign currency risk. These and other risks are described starting on page 1. The following table shows which risks apply to this Fund:

Who Should Invest in this Fund?

You should consider this Fund if you

- are looking for a medium-risk, global equity fund that invests in companies that invest in the environmental economy to hold as part of your portfolio,
- want a medium- to long-term investment,
- can handle the volatility of stock markets.

You should consider the Fund's Fixed Rate Distribution Series if you want to receive a monthly cash flow.

Distribution Policy

Refer to the "Introduction to Part B – Distribution Policy" section of this simplified prospectus.

On its Fixed Rate Distribution Series, the Fund will make monthly distributions at the following rates:

Fixed Rate Distribution Series	Distribution Rate
F5	5%
F8	8%
FB5	5%
PWFB5	5%
PWX8	8%
T5	5%
T8	8%
PWT5	5%
PWT8	8%

These fixed rate distributions will consist of net income to the extent of the Fund's allocation of net income to that series for that month, and any amount of the distribution that is in excess of the net income

for that series will consist of return of capital. **You should not confuse these distributions with the Fund's rate of return or the yield of its portfolio.**

Fund Expenses Indirectly Borne by Investors

Estimated cumulative expenses payable by each series of securities of the Fund for each \$1,000 investment (see "Introduction to Part B" for an explanation of the assumptions used in this example) for the time periods shown:

Series (\$)	For 1 Year	For 3 Years	For 5 Years	For 10 Years

What Does the Fund Invest In?

Investment Objectives

The Fund seeks to provide long-term capital appreciation by investing in a combination of equity and fixed-income securities of issuers located anywhere in the world. The Fund invests primarily in the environmental economy supporting energy transition.

The Fund will pursue this objective by investing in securities directly and/or by investing in other mutual funds.

Any proposed change in the fundamental investment objectives of the Fund must be approved by a majority of votes cast at meeting of Fund investors called for that purpose.

Investment Strategies

The Fund's asset mix will generally be kept within the following ranges:

- 40-60% equity securities

- 40-60% fixed-income securities, including cash and cash equivalents.

The asset allocation portfolio manager will adjust the percentage of the Fund invested in each asset class based on changes in the market outlook for each asset class.

The equity portfolio manager employs a strong fundamental analysis to identify, select and monitor investments. The Fund will generally maintain a portfolio of mid and large capitalization companies whose revenues are generated selling environmentally superior products and services. The Fund invests primarily in environmental sectors which include:

- Clean Energy – This sector includes companies involved in power development, including the manufacturing, installation, generation, and distribution of wind, solar photovoltaic, solar thermal, geothermal, biomass, hydro power, and other non-fossil-based energy sources.
- Energy Efficiency – The energy efficiency sector consists of companies that offer products and/or services to improve the efficiency of energy use in buildings and industrial applications. The sector includes advanced lighting, heating and cooling, power management technologies, and automation and drives.
- Clean Technology – The clean technology sector consists of knowledge-based companies whose products and services reduce resource consumption and pollution. The sector includes waste management services and pollution control, software and logistics, advanced materials, advanced meters and other forms of industrial efficiency.
- Water – The water sector is comprised primarily of filtration and purification technologies, utilities, infrastructure businesses and technologies, and processes that reduce water waste and/or consumption.
- Sustainable Agriculture – This sector focuses on sustainable agriculture and food and beverage companies that use less water, energy, fertilizer, hormones, antibiotics and pesticides to grow, harvest, distribute and/or retail such food.
- Transportation – Companies related to mass transportation and transportation efficiency technologies.

The fixed-income portfolio manager will invest primarily in labelled green bonds and other debt instruments that are used to finance environmental and sustainable solutions, allocating across credit quality, yields, structures, sectors, currencies, and countries. The Fund may invest up to 100% of its fixed-income exposure in any one sector, and can invest in all types of fixed-income securities from around the world, including, but not limited to, high-yield corporate and government bonds, which are bonds that have a credit rating below investment grade (rated "BBB-" by a recognized credit rating organization) and are sometimes non-rated, investment-grade corporate and government bonds, convertible bonds, loans, and floating-rate instruments.

The Fund has received regulatory approval to invest up to 20% of its net assets, taken at market value at the time of purchase, in government-issued or guaranteed debt securities of any one issuer with a credit rating of "AA" or higher and, similarly, up to 35% of its

net assets in government-issued or guaranteed debt securities of any one issuer with a credit rating of “AAA” or higher. These investments may increase the Fund’s exposure to concentration risk, credit risk and foreign markets risk as described under “**What are the General Risks of Investing in a Mutual Fund?**” Please see the “**Introduction to Part B – What Does the Fund Invest In?**” section of this simplified prospectus for more details regarding this regulatory approval.

The Fund may hold cash and/or short-term debt securities in anticipation of, or in response to, unfavourable market conditions; and/or for liquidity purposes.

The Fund may hold a portion of its net assets in securities of other investment funds, including ETFs, in accordance with its investment objectives. There will be no duplication of management fees, incentive fees or sales charges between the funds.

In accordance with applicable securities regulations or as permitted by the exemptions from these regulations and as further described in the “**Introduction to Part B – What Does the Fund Invest In?**” section of this simplified prospectus, the Fund may

- use derivatives for hedging and non-hedging purposes;
- engage in securities lending, repurchase and reverse repurchase transactions;
- engage in short selling (the portfolio manager does not currently engage in short selling, but may do so in the future without future notice to investors); and
- invest in gold and silver, and other instruments (such as derivatives and ETFs) that provide exposure to these metals.

If the Fund employs any of these strategies, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

What are the Risks of Investing in the Fund?

This Fund invests in a combination of equity and fixed-income securities, which subjects the Fund to market risk. This combination subjects the Fund to a variety of risks inherent in both types of investments, including company risk, credit risk, interest rate risk, and prepayment risk. Since the Fund invests outside of Canada, it is subject to foreign markets risk and to a lesser extent foreign currency risk. These and other risks are described starting on page 1. The following table shows which risks apply to this Fund:

What Does the Fund Invest In?

Investment Objectives

The Fund seeks to provide long-term capital appreciation by investing in equity securities located anywhere in the world. The Fund follows a sustainable approach to investing and invests primarily in the environmental economy supporting energy transition.

The Fund will pursue this objective by investing in securities directly and/or by investing in other investment funds.

Any proposed change in the fundamental investment objectives of the Fund must be approved by a majority of the votes cast at a meeting of the Fund's investors called for that purpose.

Investment Strategies

The Fund employs a strong fundamental analysis to identify, select and monitor investments. The Fund will generally maintain a portfolio of mid and large capitalization companies whose revenues are generated selling environmentally superior products and services.

The Fund invests primarily in environmental sectors, which include

- **Clean Energy** – This sector includes companies involved in power development, including the manufacturing, installation, generation, and distribution of wind, solar photovoltaic, solar thermal, geothermal, biomass, hydro power, and other non-fossil-based energy sources.
- **Energy Efficiency** – The energy efficiency sector consists of companies that offer products and/or services to improve the efficiency of energy use in buildings and industrial applications. The sector includes advanced lighting, heating and cooling, power management technologies, and automation and drives.
- **Clean Technology** – The clean technology sector consists of knowledge-based companies whose products and services reduce resource consumption and pollution. The sector includes waste management services and pollution control, software and logistics, advanced materials, advanced meters and other forms of industrial efficiency.
- **Water** – The water sector is comprised primarily of filtration and purification technologies, utilities, infrastructure businesses and technologies, and processes that reduce water waste and/or consumption.

- **Sustainable Agriculture** – This sector focuses on sustainable agriculture and food and beverage companies that use less water, energy, fertilizer, hormones, antibiotics and pesticides to grow, harvest, distribute and/or retail such food.
- **Transportation** – Companies related to mass transportation and transportation efficiency technologies.

The Fund may hold cash and/or short-term debt securities in anticipation of, or in response to, unfavourable market conditions; and/or for liquidity purposes.

The Fund may hold a portion of its net assets in securities of other investment funds, including ETFs, which may be managed by us, in accordance with its investment objectives. For more information see the “**Fund of Funds**” disclosure under “**Fees and Expenses**”.

In accordance with applicable securities regulations or as permitted by the exemptions from these regulations and as further described in the “**Introduction to Part B – What Does the Fund Invest In?**” section of this simplified prospectus, the Fund may

- use derivatives for hedging and non-hedging purposes;
- engage in securities lending, repurchase and reverse repurchase transactions;
- engage in short selling (the portfolio manager does not currently engage in short selling, but may do so in the future without future notice to investors); and
- invest in gold and silver, and other instruments (such as derivatives and ETFs) that provide exposure to these metals.

If the Fund employs any of these strategies, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

What are the Risks of Investing in the Fund?

This Fund invests in equities, which subjects the Fund to market risk. Equity securities are more volatile than other types of investments, such as fixed-income investments, and since the Fund invests outside of Canada, it is subject to foreign markets risk and foreign currency risk. These and other risks are described starting on page 1. The following table shows which risks apply to this Fund:

What Does the Fund Invest In?

Investment Objectives

The Fund seeks to provide investors with a diversified portfolio designed to provide long-term capital appreciation and some income.

The Fund seeks to accomplish its objectives by investing primarily in exchange traded funds to gain exposure to Canadian and foreign equity and fixed-income securities and other asset categories.

The Fund may also invest in other mutual funds or invest directly in Canadian and foreign equity and fixed-income securities and other asset categories where the Fund considers it would be beneficial to unitholders to do so.

Any change to the investment objectives must be approved by a majority of votes cast at a meeting of unitholders held for that reason.

Investment Strategies

The Fund's asset mix will generally be kept within the following ranges:

- 70% - 90% equity securities

- 0% - 30% fixed-income securities.

In addition to fixed income and equity exposures, the Fund may also invest in alternative mutual funds.

The asset allocation portfolio manager employs a disciplined total portfolio management approach to constructing the Fund. The Fund is built upon long-term strategic allocations to different equity markets, fixed income markets, and other asset classes. The Fund will be allocated tactically over the short- to medium-term based on changes to the market outlook and risk assessment for each asset class.

The Fund will seek to diversify its equity and fixed-income assets in terms of one or more of these factors:

- geographic exposure
- equity factor exposure
- sector exposure
- company market capitalization
- investment style
- credit quality
- duration.

As a result of this diversification, the Fund may have exposure to securities issued by companies of any size and governments located anywhere in the world, including emerging markets.

The Fund seeks to manage currency exposure on a total portfolio basis through the use of derivatives or foreign currency cash holdings. This means that the asset allocation portfolio manager will take into account the Fund's overall currency exposure across all of its holdings.

The Fund may hold cash and/or short-term debt securities in anticipation of, or in response to, unfavourable market conditions; and/or for liquidity purposes.

The Fund considers material environmental, social and/or governance factors in its investment evaluation process.

The Fund will obtain exposure to equity securities, fixed-income securities and other asset categories primarily by investing in ETFs, managed by Mackenzie, in accordance with its investment objectives. For more information, see the "Fund of Funds" disclosure under "Fees and Expenses".

In accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described in the "Introduction to Part B – What Does the Fund Invest In?" section of this simplified prospectus, the Fund may

- use derivatives for hedging and non-hedging purposes;
- engage in securities lending, repurchase and reverse repurchase transactions;
- engage in short selling (the portfolio manager does not currently engage in short selling but may do so in the future without further notice to investors); and
- invest in gold and silver, and other instruments (such as derivatives and ETFs) that provide exposure to these

metals, and in certain other ETFs that replicate an index on a leveraged basis and/or that invest in physical commodities.

If the Fund employs any of these strategies, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

What are the Risks of Investing in the Fund?

This Fund has exposure to equity securities, which subjects the Fund to market risk, and which are more volatile than other types of investments, such as fixed-income investments. A significant portion of the Fund's exposure is to assets outside of Canada, which means that it is subject to foreign markets risk and foreign currency risk. This Fund also has exposure to fixed-income securities, subjecting it to risks including company risk, credit risk, interest rate risk, and prepayment risk. Any indirect investment in securities may subject the Fund to tracking risk. These and other risks are described starting on page 1. The following table shows which risks apply to this Fund:

Risk Checklist

Who Should Invest in this Fund?

You should consider this Fund if you

- are looking for a low- to medium-risk, managed asset portfolio fund to hold as a key part of your portfolio,
- want a medium-term investment,
- can handle the ups and downs of stock and bond markets.

You should consider the Fund's Fixed Rate Distribution Series if you want to receive a monthly cash flow.

Distribution Policy

Refer to the "Introduction to Part B – Distribution Policy" section of this simplified prospectus.

On its Fixed Rate Distribution Series, the Fund will make monthly distributions at the following rates:

Fixed Rate Distribution Series	Distribution Rate
F5	5%
F8	8%
FB5	5%
PWFB5	5%

Fixed Rate Distribution Series	Distribution Rate
PWT5	5%
PWT8	8%
PWX5	5%
T5	5%
T8	8%

These fixed rate distributions will consist of net income to the extent of the Fund's allocation of net income to that series for that month, and any amount of the distribution that is in excess of the net income for that series will consist of return of capital. **You should not confuse these distributions with the Fund's rate of return or the yield of its portfolio.**

Fund Expenses Indirectly Borne by Investors

What Does the Fund Invest In?

Investment Objectives

The Fund seeks a steady flow of income with reasonable safety of capital by investing primarily in a combination of fixed-income and equity securities of issuers anywhere in the world.

Any proposed change in the fundamental investment objectives of the Fund must be approved by a majority of votes cast at a meeting of the Fund's investors called for that purpose.

Investment Strategies

The Fund's asset mix will generally be kept within the following ranges:

- 10-40% equity securities,
- 60-90% fixed-income securities, including cash and cash-equivalents.

The asset allocation portfolio manager will adjust the percentage of the Fund invested in each asset class based on changes in the market outlook for each asset class.

The Canadian equity portfolio manager employs a value investment style, and seeks to construct a diversified equity portfolio based on a disciplined, statistically-grounded, bottom-up and value-oriented investment approach.

The foreign equity portfolio manager invests primarily in large- and mid-capitalization, publicly-traded companies, and employs a disciplined investment process to construct a portfolio of attractively valued companies that combine above-average income yields with the potential for growth.

The Fund's fixed-income investments are expected to have a weighted average credit quality of "BBB" or higher, as rated by a recognized credit rating organization.

The fixed-income portfolio manager employs a value investment style. For high-quality bonds, the fixed-income portfolio manager analyzes macroeconomic factors, such as economic growth, inflation, and monetary and fiscal policy, in order to position the maturity and credit quality of the fixed-income portfolio for different stages in the economic cycle. The fixed-income portfolio manager analyzes securities that typically have a lower credit quality, such as high-yield debt securities, using a bottom-up approach to assess their valuation. This company-specific analysis focuses on stability of cash flows and recovery value of the debt instruments.

Generally, the Fund will not invest more than 40% of its assets in foreign securities.

The Fund may hold cash and/or short-term debt securities in anticipation of, or in response to, unfavourable market conditions; and/or for liquidity purposes.

The Fund considers material environmental, social and/or governance factors in its investment evaluation process.

The Fund may hold a portion of its net assets in securities of other investment funds, including ETFs, which may be managed by us, in accordance with its investment objectives. For more information see the "Fund of Funds" disclosure under "Fees and Expenses".

The Fund may invest up to 10% of its net assets in illiquid assets, measured at the time of investment, which may include securities of a Private Vehicle offered by Northleaf and/or Sagard.

In accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described in the "Introduction to Part B – What Does the Fund Invest In?" section of this simplified prospectus, the Fund may

- use derivatives for hedging and non-hedging purposes;
- engage in securities lending, repurchase and reverse repurchase transactions;
- engage in short selling (the portfolio manager does not currently engage in short selling but may do so in the future without further notice to investors); and
- invest in gold and silver, and other instruments (such as derivatives and ETFs) that provide exposure to these metals.

If the Fund employs any of these strategies, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

What are the Risks of Investing in the Fund?

This Fund invests in a combination of equity and fixed-income securities, which subjects the Fund to market risk. This combination subjects the Fund to a variety of risks inherent in both types of investments. The Fund may also use derivatives for non-hedging purposes, which subjects it to derivatives risk. The Fund may also invest a portion of its assets outside of Canada, which means that it is subject to foreign markets risk and foreign currency risk. These and other risks are described starting on page 1. The following table shows which risks apply to this Fund:

* This risk applies only to the Fixed Rate Distribution Series.

As of September 3, 2021, one securityholder held 19.66% of the Fund by market value. **This may subject the Fund to Large Transaction risk.**

Who Should Invest in this Fund?

You should consider this Fund if you

- are looking for a low-risk, Canadian balanced income-oriented fund to hold as part of your portfolio,
- want a medium-term investment,
- can handle the volatility of stock and bond markets.

You should consider the Fund's Fixed Rate Distribution Series if you want to receive a monthly cash flow.

Distribution Policy

Refer to the "Introduction to Part B – Distribution Policy" section of this simplified prospectus.

On its Fixed Rate Distribution Series, the Fund will make monthly distributions at the following rates:

Fixed Rate Distribution Series	Distribution Rate
A	5%
D	5%
F	5%
F8	8%
FB	5%
G	5%
O	5%
PW	5%
PWFB	5%
PWT8	8%
PWX	5%
PWX8	8%
T8	8%

These fixed rate distributions will consist of net income to the extent of the Fund's allocation of net income to that series for that month, and any amount of the distribution that is in excess of the net income for that series will consist of return of capital. **You should not**

confuse these distributions with the Fund's rate of return or the yield of its portfolio.

In addition, on Series AR and PWR, the Fund will make monthly distributions of net income. These distributions may be adjusted or discontinued at our discretion.

Fund Expenses Indirectly Borne by Investors

What Does the Fund Invest In?

Investment Objectives

The Fund seeks long-term capital growth and current income by investing primarily in equity securities of companies anywhere in the world, outside of Canada and the U.S., that pay, or may be expected to pay, dividends, in addition to other types of securities that distribute, or may be expected to distribute, income.

Any proposed change to the fundamental investment objectives of the Fund must be approved by a majority of the votes cast at a meeting of the Fund's investors held for that purpose.

Investment Strategies

The investment approach follows a disciplined investment process to construct a portfolio of attractively valued companies that emphasizes investments with sustainable competitive advantages, attractive free cash flow and the capacity to pay or grow dividends. Stock selection is the primary contributor to value added, with attention paid to both upside potential and downside risk. Sector allocation is employed to manage overall portfolio risk.

As well as equity securities (including common shares and preferred shares), the Fund may invest in fixed-income securities, trust securities (including income trusts, business trusts, real estate investment trusts, royalty and resource trusts, utilities trusts and infrastructure trusts) and other securities (including convertible bonds and warrants).

The Fund will generally maintain a concentrated portfolio of less than 40 companies.

Generally, the Fund will not invest more than 25% of its assets in emerging markets.

The Fund may invest in securities of any capitalization size, although it is generally expected to invest in mid-and large-capitalization issuers, and may invest in any sector of the economy.

The Fund may hold cash and/or short-term debt securities in anticipation of, or in response to, unfavourable market conditions; and/or for liquidity purposes.

The Fund considers material environmental, social and/or governance factors in its investment evaluation process.

The Fund may hold a portion of its net assets in securities of other investment funds, including ETFs, which may be managed by us, in accordance with its investment objectives. For more information see the "Fund of Funds" disclosure under "Fees and Expenses".

In accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described in the "Introduction to Part B – What Does the Fund Invest In?" section of this simplified prospectus, the Fund may:

- use derivatives for hedging and non-hedging purposes;
- engage in securities lending, repurchase and reverse repurchase transactions;
- engage in short selling (the portfolio manager does not currently engage in short selling but may do so in the future without further notice to investors); and
- invest in gold and silver, and other instruments (such as derivatives and ETFs) that provide exposure to these metals.

If the Fund employs any of these strategies, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

What are the Risks of Investing in the Fund?

This Fund invests in international equity securities, which subjects the Fund to market risk. Equity securities are more volatile than other types of investments, such as fixed-income investments. Since the Fund invests outside of Canada, it is subject to foreign markets risk and foreign currency risk. The following table shows which risks apply to this Fund:

Risk Checklist

	Primary Risk	Secondary Risk	Low or Not a Risk

* This risk applies only to the Fixed Rate Distribution Series.

As of September 3, 2021, one securityholder held 68.79% of the Fund by market value. **This may subject the Fund to Large Transaction risk.**

Who Should Invest in this Fund?

You should consider this Fund if you

- are looking for a medium-risk, income-oriented international equity fund to hold as part of your portfolio,
- want a medium- to long-term investment,
- can handle the ups and downs of stock markets.

You should consider the Fund's Fixed Rate Distribution Series if you want to receive a monthly cash flow.

Distribution Policy

Refer to the "Introduction to Part B – Distribution Policy" section of this simplified prospectus.

On its Fixed Rate Distribution Series, the Fund will make monthly distributions at the following rates:

Fixed Rate Distribution Series	Distribution Rate
F5	5%
F8	8%
FB5	5%
PWFB5	5%
PWT5	5%
PWT8	8%
PWX8	8%
T5	5%
T8	8%

These fixed rate distributions will consist of net income to the extent of the Fund's allocation of net income, to that series for that month, and any amount of the distribution that is in excess of the net income for that series will consist of return of capital. **You should not confuse these distributions with the Fund's rate of return or the yield of its portfolio.**

Fund Expenses Indirectly Borne by Investors

Estimated cumulative expenses payable by each series of securities of the Fund for each \$1,000 investment (see "Introduction to Part B" for an explanation of the assumptions used in this example)

for the time periods shown:

Registered Plan Qualified	Yes

What Does the Fund Invest In?

Investment Objectives

The Fund seeks to generate current income.

The Fund invests primarily in (i) investment-grade floating rate debt obligations and other floating rate debt instruments of issuers located anywhere in the world and/or (ii) investment-grade debt obligations and other debt instruments that deliver a fixed rate of income while using interest rate swaps to deliver a floating rate of income.

Any proposed change in the fundamental investment objectives of the Fund must be approved by a majority of the votes cast at a meeting of the Fund's investors called for that purpose.

Investment Strategies

The Fund may invest in debt instruments of issuers rated below investment grade, as long as the overall weighted average credit quality of the Fund's investments is "A-" or higher as rated by a recognized credit rating organization. The portfolio manager may vary the weighted average credit quality.

The investment approach employs fundamental analysis to select investments for the Fund, by reviewing the values of the Fund's investments on an ongoing basis, paying particular attention to credit quality.

Most floating rate debt instruments pay interest at an established base lending rate that resets periodically plus a fixed percentage rate. The base lending rate may be Secured Overnight Financing Rate (SOFR) or any applicable Alternative Replacement Rate, BA,

a prime rate, or another base lending rate used by commercial banks or lenders.

Generally, the Fund will not invest more than 30% of its assets in foreign securities.

The Fund may hold cash and/or short-term debt securities in anticipation of, or in response to, unfavourable market conditions; and/or for liquidity purposes.

The Fund considers material environmental, social and/or governance factors in its investment evaluation process.

Depending on market conditions, the portfolio manager's investment style may result in a higher portfolio turnover rate than less actively managed funds. Although generally the higher the Fund's portfolio turnover rate, the higher its trading expenses, in the case of this Fund, which holds fixed-income products that are traded over the counter (rather than on an exchange), there may be situations where increased turnover actually reduces trading costs. The higher the portfolio turnover rate the greater the probability that you will receive a distribution of capital gains from the Fund, which may be taxable if you hold the Fund outside a registered plan. There is no proven relationship between a high turnover rate and the performance of a mutual fund.

The Fund may hold a portion of its net assets in securities of other investment funds, including ETFs, which may be managed by us, in accordance with its investment objectives. For more information see the "Fund of Funds" disclosure under "Fees and Expenses".

In accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described in the "Introduction to Part B – What Does the Fund Invest In?" section of this simplified prospectus, the Fund may

- use derivatives for hedging and non-hedging purposes;
- engage in securities lending, repurchase and reverse repurchase transactions;
- engage in short selling (the portfolio manager does not currently engage in short selling but may do so in the future without further notice to investors); and
- invest in gold and silver, and other instruments (such as derivatives and ETFs) that provide exposure to these metals.

If the Fund employs any of these strategies, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

What are the Risks of Investing in the Fund?

This Fund invests in debt instruments, which subjects the Fund to market risk. Floating or fixed rate instruments are subject to company risk, credit risk, interest rate risk, and prepayment risk. These and other risks are described starting on page 1. The following table shows which risks apply to this Fund:

Who Should Invest in this Fund?

You should consider this Fund if you

- are looking for the income potential of floating rate instruments linked to interest rate changes,
- are looking for a low-risk, current income fund to hold as part of your portfolio,
- are looking to diversify your fixed-income holdings,
- want a short- to medium-term investment,
- can handle the volatility of bond markets.

Distribution Policy

Refer to the “**Introduction to Part B – Distribution Policy**” section of this simplified prospectus.

In addition, the Fund will make monthly distributions of net income. **These distributions may be adjusted or discontinued at our discretion. You should not construe these distributions with the Fund’s rate of return or the yield of its portfolio. You must inform us if you wish to receive these distributions in cash, otherwise they will be reinvested, without charge, in additional securities of the series on which they were paid.** You may not elect to receive these distributions in cash if your securities are held in a Mackenzie Investments-administered registered plan, unless that registered plan is a TFSA, in which case you may elect to have these distributions paid from the TFSA.

Fund Expenses Indirectly Borne by Investors

Estimated cumulative expenses payable by each series of securities of the Fund for each \$1,000 investment (see “**Introduction to Part B**” for an explanation of the assumptions used in this example) for the time periods shown:

What Does the Fund Invest In?

Investment Objectives

The Fund seeks capital growth and current income by investing primarily in a combination of Canadian equity and fixed-income securities.

Any proposed change in the fundamental investment objectives of the Fund must be approved by a majority of the votes cast at a meeting of the Fund's investors called for that purpose.

Investment Strategies

The Fund's asset mix will generally be kept within the following ranges:

- 60-90% equity securities

- 10-40% fixed-income securities, including cash and cash equivalents.

The asset allocation portfolio manager will adjust the percentage of the Fund invested in each asset class based on changes in the market outlook for each asset class.

The equity portfolio manager employs a blended growth and value investment style. The equity portfolio manager seeks companies having the greatest prospects for long-term growth, but also gives strong consideration to the investment's intrinsic worth relative to its stock price. The equity portfolio manager's review process includes analysis of the company's competitive position, management strengths, expected profitability and financial position.

The fixed-income portfolio manager employs a value investment style. For high-quality bonds, the fixed-income portfolio manager analyzes macroeconomic factors, such as economic growth, inflation, and monetary and fiscal policy, in order to position the maturity and credit quality of the fixed-income portfolio for different stages in the economic cycle. The fixed-income portfolio manager analyzes securities that typically have a lower credit quality, such as high-yield debt securities, using a bottom-up approach to assess their valuation. This company-specific analysis focuses on stability of cash flows and recovery value of the debt instruments.

Generally, the Fund will not invest more than 40% of its assets in foreign securities.

The Fund considers material environmental, social and/or governance factors in its investment evaluation process.

The Fund may hold a portion of its net assets in securities of other investment funds, including ETFs, which may be managed by us, in accordance with its investment objectives. For more information see the "Fund of Funds" disclosure under "Fees and Expenses".

The Fund may invest up to 10% of its net assets in illiquid assets, measured at the time of investment, which may include securities of a Private Vehicle offered by Northleaf and/or Sagard.

In accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described in the "Introduction to Part B – What Does the Fund Invest In?" section of this simplified prospectus, the Fund may

- use derivatives for hedging and non-hedging purposes;
- engage in securities lending, repurchase and reverse repurchase transactions;
- engage in short selling (the portfolio manager does not currently engage in short selling but may do so in the future without further notice to investors); and
- invest in gold and silver, and other instruments (such as derivatives and ETFs) that provide exposure to these metals.

If the Fund employs any of these strategies, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

What are the Risks of Investing in the Fund?

This Fund invests in a combination of equity and fixed-income securities, which subjects the Fund to market risk. This combination subjects the Fund to a variety of risks inherent in both types of investments, including company risk, credit risk, interest rate risk, and prepayment risk. The Fund may also invest a portion of its assets outside of Canada, which means that it is subject to foreign markets risk and foreign currency risk. These and other risks are described starting on page 1. The following table shows which risks apply to this Fund:

Risk Checklist

	Primary Risk	Secondary Risk	Low or Not a Risk

Who Should Invest in this Fund?

You should consider this Fund if you

- are looking for a low- to medium-risk, Canadian balanced fund to hold as part of your portfolio,
- want a medium-term investment,
- can handle the volatility of stock and bond markets.

You should consider the Fund's Fixed Rate Distribution Series if you want to receive a monthly cash flow.

Distribution Policy

Refer to the "Introduction to Part B – Distribution Policy" section of this simplified prospectus.

On its Fixed Rate Distribution Series, the Fund will make monthly distributions at the following rates:

Fixed Rate Distribution Series	Distribution Rate
F5	5%
F8	8%
FB5	5%
O5	5%
PWFB5	5%
PWT5	5%
PWT8	8%
PWX8	8%
T5	5%
T8	8%

These fixed rate distributions will consist of net income to the extent of the Fund's allocation of net income, to that series for that month, and any amount of the distribution that is in excess of the net income for that series will consist of return of capital. **You should not confuse these distributions with the Fund's rate of return or the yield of its portfolio.**

What Does the Fund Invest In?

Investment Objectives

The Fund pursues long-term capital growth, while maintaining a commitment to protection of its capital.

The Fund invests mainly in equity securities of high-quality large-capitalization Canadian companies.

During periods of high market valuations, the Fund may maintain a significant portion of its assets in Canadian and U.S. short-term fixed-income securities to provide capital protection while awaiting more favourable investment conditions.

Any proposed change in the fundamental investment objectives of the Fund must be approved by a majority of the votes cast at a meeting of the Fund's investors called for that purpose.

Investment Strategies

The investment approach follows a blended growth and value investment style, by seeking companies having the greatest prospects for long-term growth. Strong consideration is also placed on assessing the investment's intrinsic worth relative to its stock price. The review process includes analysis of the company's competitive position, management strengths, expected profitability and financial position.

For the purposes of this Fund, the portfolio manager generally interprets "**large capitalization**" as meaning market capitalization of CDN \$1 billion or more at the time of investment.

Generally, once an investment is made, the Fund expects to be a patient, long-term investor.

Generally, the Fund will not invest more than 49% of its assets in foreign securities.

The Fund considers material environmental, social and/or governance factors in its investment evaluation process.

As part of the Ivy investment process, the Fund may hold a large portion of cash and/or short-term debt securities in anticipation of, or in response to, unfavourable market conditions, including where the portfolio manager believes the market is overvalued.

The Fund may hold a portion of its net assets in securities of other investment funds, including ETFs, which may be managed by us, in accordance with its investment objectives. For more information see the "**Fund of Funds**" disclosure under "**Fees and Expenses**".

In accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described in the "**Introduction to Part B – What Does the Fund Invest In?**" section of this simplified prospectus, the Fund may

- use derivatives for hedging and non-hedging purposes;
- engage in securities lending, repurchase and reverse repurchase transactions;
- engage in short selling (the portfolio manager does not currently engage in short selling but may do so in the future without further notice to investors); and
- invest in gold and silver, and other instruments (such as derivatives and ETFs) that provide exposure to these metals.

If the Fund employs any of these strategies, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

What are the Risks of Investing in the Fund?

This Fund invests in Canadian equities, which subjects the Fund to market risk. Equity securities are more volatile than other types of investments, such as fixed-income investments and the Canadian economy is more dependent on a small number of industries than other global economies. The Fund may also invest a significant portion of its assets outside of Canada, which means that it is subject to foreign markets risk and foreign currency risk. These and other

risks are described starting on page 1. The following table shows which risks apply to this Fund:

Risk Checklist

	Primary Risk	Secondary Risk	Low or Not a Risk

* This risk applies only to the Fixed Rate Distribution Series.

Who Should Invest in this Fund?

You should consider this Fund if you

- are looking for a low- to medium-risk, Canadian equity fund to hold as part of your portfolio,
- want a medium- to long-term investment,
- can handle the volatility of stock markets.

You should consider the Fund's Fixed Rate Distribution Series if you want to receive a monthly cash flow.

Distribution Policy

Refer to the "Introduction to Part B – Distribution Policy" section of this simplified prospectus.

On its Fixed Rate Distribution Series, the Fund will make monthly distributions at the following rates:

Fixed Rate Distribution Series	Distribution Rate
F5	5%
F8	8%
FB5	5%
PWFB5	5%
PWT5	5%
PWT8	8%
PWX8	8%
T5	5%
T8	8%

These fixed rate distributions will consist of net income to the extent of the Fund's allocation of net income to that series for that month, and any amount of the distribution that is in excess of the net income for that series will consist of return of capital. **You should not confuse these distributions with the Fund's rate of return or the yield of its portfolio.**

Fund Expenses Indirectly Borne by Investors

Estimated cumulative expenses payable by each series of securities of the Fund for each \$1,000 investment (see "Introduction to Part B" for an explanation of the assumptions used in this example) for the time periods shown:

Effective December 11, 2017, Series G securities was closed to any new investment, except that investors that hold Series G securities as of this date, and continue to hold these securities, are permitted to make additional purchases.

What Does the Fund Invest In?

Investment Objectives

The Fund pursues long-term capital growth, consistent with protection of capital.

The Fund invests in equity securities worldwide, emphasizing companies that operate globally.

The Fund's investments are not limited geographically but generally do not include investments in emerging markets.

Any change to the investment objectives of the Fund must be approved by a majority of votes cast at a meeting of securityholders held for that reason.

Investment Strategies

The investment approach follows a blended growth and value investment style, by seeking companies having the greatest prospects for long-term growth. Strong consideration is also placed on assessing the investment's intrinsic worth relative to its stock price. The review process includes analysis of the company's competitive position, management strengths, expected profitability and financial position.

The percentage of the Fund's assets invested in securities of U.S. companies will usually exceed the percentage of the Fund's assets invested in securities of companies from any other geographic area. The Fund may, however, invest a lesser percentage of its assets in securities of U.S. companies when the portfolio manager believes it would be beneficial to the Fund's investors to do so.

The Fund may invest in emerging markets when the portfolio manager believes it would be beneficial to the Fund's investors to do so.

The Fund may also invest in fixed-income securities.

Generally, once an investment is made, the Fund expects to be a patient, long-term investor.

The Fund has obtained regulatory approval to invest up to 20% of its net assets, taken at market value at the time of purchase, in cash equivalent government issued or guaranteed debt securities of any one issuer with a credit rating of "AA" or higher and, similarly, up to 35% of its net assets in cash equivalent government issued or guaranteed debt securities of any one issuer with a credit rating of "AAA" or higher. Please see the "Introduction to Part B – What Does the Fund Invest In?" section of this simplified prospectus for more details.

As part of the Ivy investment process, the Fund may hold a large portion of cash and/or short-term debt securities in anticipation of, or in response to, unfavourable market conditions, including where the portfolio manager believes the market is overvalued.

The Fund considers material environmental, social and/or governance factors in its investment evaluation process.

The Fund may hold a portion of its net assets in securities of other investment funds, including ETFs, which may be managed by us, in accordance with its investment objectives. For more information see the "Fund of Funds" disclosure under "Fees and Expenses".

In accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described in the "Introduction to Part B – What Does the Fund Invest In?" section of this simplified prospectus, the Fund may

- use derivatives for hedging and non-hedging purposes;
- engage in securities lending, repurchase and reverse repurchase transactions;
- engage in short selling (the portfolio manager does not currently engage in short selling but may do so in the future without further notice to investors); and
- invest in gold and silver, and other instruments (such as derivatives and ETFs) that provide exposure to these metals.

If the Fund employs any of these strategies, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

What are the Risks of Investing in the Fund?

This Fund invests in global equity securities, which subjects the Fund to market risk. Equity securities are more volatile than other types of investments, such as fixed-income investments. Since the Fund invests outside of Canada, it is subject to foreign markets risk and foreign currency risk. These and other risks are described starting on page 1. The following table shows which risks apply to this Fund:

Who Should Invest in this Fund?

You should consider this Fund if you

- are looking for a low- to medium-risk, global equity fund to hold as part of your portfolio,
- want a medium- to long-term investment,
- can handle the volatility of stock markets.

You should consider the Fund's Fixed Rate Distribution Series if you want to receive a monthly cash flow.

Distribution Policy

Refer to the "Introduction to Part B – Distribution Policy" section of this simplified prospectus.

On its Fixed Rate Distribution Series, the Fund will make monthly distributions at the following rates:

Fixed Rate Distribution Series	Distribution Rate
F5	5%
F8	8%
FB5	5%
O5	5%
PWFB5	5%
PWT5	5%
PWT8	8%
PWX8	8%
T5	5%
T8	8%

These fixed rate distributions will consist of net income to the extent of the Fund's allocation of net income to that series for that month, and any amount of the distribution that is in excess of the net income for that series will consist of return of capital. **You should not**

confuse these distributions with the Fund's rate of return or the yield of its portfolio.

Fund Expenses Indirectly Borne by Investors

Estimated cumulative expenses payable by each series of securities of the Fund for each \$1,000 investment (see "Introduction to Part B" for an explanation of the assumptions used in this example) for the time periods shown:

Series (\$)	For 1 Year	For 3 Years	For 5 Years	For 10 Years

What Does the Fund Invest In?

Investment Objectives

The Fund seeks capital growth and current income by investing primarily in a combination of equity and fixed-income securities of issuers located anywhere in the world.

Any change to the fundamental investment objectives of the Fund must be approved by a majority of the votes cast at a meeting of securityholders held for that reason.

Investment Strategies

The Fund's asset mix will generally be kept within the following ranges:

- 60-90% equity securities
- 10-40% fixed-income securities, including cash and cash equivalents.

The asset allocation portfolio manager will adjust the percentage of the Fund invested in each asset class based on changes in the market outlook for each asset class.

The equity portfolio manager employs a blended growth and value investment style. The equity portfolio manager seeks companies having the greatest prospects for long-term growth, but also gives strong consideration to the investment's intrinsic worth relative to its stock price. The equity portfolio manager's review process includes analysis of the company's competitive position, management strengths, expected profitability and financial position.

The fixed-income portfolio manager employs a value investment style. For high-quality bonds, the fixed-income portfolio manager analyzes macroeconomic factors, such as economic growth, inflation, and monetary and fiscal policy, in order to position the maturity and credit quality of the fixed-income portfolio for different stages in the economic cycle. The fixed-income portfolio manager analyzes securities that typically have a lower credit quality, such as high-yield debt securities, using a bottom-up approach to assess their valuation. This company-specific analysis focuses on stability of cash flows and recovery value of the debt instruments.

The Fund has obtained regulatory approval to invest up to 20% of its net assets, taken at market value at the time of purchase, in cash equivalent government issued or guaranteed debt securities of any one issuer with a credit rating of "AA" or higher and, similarly, up to 35% of its net assets in cash equivalent government issued or guaranteed debt securities of any one issuer with a credit rating of "AAA" or higher. Please see the "Introduction to Part B – What Does the Fund Invest In?" section of this simplified prospectus for more details.

The Fund considers material environmental, social and/or governance factors in its investment evaluation process.

Depending on market conditions, the portfolio manager's investment style may result in a higher portfolio turnover rate than less actively managed funds. Generally, the higher the Fund's portfolio turnover rate, the higher its trading expenses, and the higher the probability that you will receive a distribution of capital gains from the Fund, which may be taxable if you hold the Fund outside a registered plan. There is no proven relationship between a high turnover rate and the performance of a mutual fund.

The Fund may hold a portion of its net assets in securities of other investment funds, including ETFs, which may be managed by us, in accordance with its investment objectives. For more information see the "Fund of Funds" disclosure under "Fees and Expenses".

The Fund may invest up to 10% of its net assets in illiquid assets, measured at the time of investment, which may include securities of a Private Vehicle offered by Northleaf and/or Sagard.

In accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described in the "Introduction to Part B – What Does the Fund Invest In?" section of this simplified prospectus, the Fund may

- use derivatives for hedging and non-hedging purposes;
- engage in securities lending, repurchase and reverse repurchase transactions;
- engage in short selling (the portfolio manager does not currently engage in short selling but may do so in the future without further notice to investors); and

- invest in gold and silver, and other instruments (such as derivatives and ETFs) that provide exposure to these metals.

If the Fund employs any of these strategies, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

What are the Risks of Investing in the Fund?

This Fund invests in a combination of equity and fixed-income securities, which subjects the Fund to market risk. This combination subjects the Fund to a variety of risks inherent in both types of investments, including company risk, credit risk, interest rate risk, and prepayment risk. Since the Fund invests outside of Canada, it is subject to foreign markets risk and foreign currency risk. These and other risks are described starting on page 1. The following table shows which risks apply to this Fund:

Risk Checklist

	Primary Risk	Secondary Risk	Low or Not a Risk

* This risk applies only to the Fixed Rate Distribution Series.

Who Should Invest in this Fund?

You should consider this Fund if you

- are looking for a low- to medium-risk, global balanced fund to hold as part of your portfolio,
- want a medium-term investment,
- can handle the volatility of stock and bond markets.

You should consider the Fund's Fixed Rate Distribution Series if you want to receive a monthly cash flow.

Distribution Policy

Refer to the "Introduction to Part B – Distribution Policy" section of this simplified prospectus.

On its Fixed Rate Distribution Series, the Fund will make monthly distributions at the following rates:

Fixed Rate Distribution Series	Distribution Rate
F5	5%
F8	8%
FB5	5%
PWFB5	5%
PWT5	5%
PWT8	8%
PWX8	8%
T5	5%
T8	8%

These fixed rate distributions will consist of net income to the extent of the Fund's allocation of net income to that series for that month, and any amount of the distribution that is in excess of the net income for that series will consist of return of capital. **You should not**

confuse these distributions with the Fund's rate of return or the yield of its portfolio.

Fund Expenses Indirectly Borne by Investors

Estimated cumulative expenses payable by each series of securities of the Fund for each \$1,000 investment (see "Introduction to Part B" for an explanation of the assumptions used in this example) for the time periods shown:

What Does the Fund Invest In?

Investment Objectives

The Fund employs a global investment strategy to achieve capital growth over the longer term, consistent with preservation of invested capital.

The investments are primarily equity securities of companies located in the following three principal market regions: (i) the United Kingdom and Europe; (ii) Asia and the Far East; and (iii) Australia and New Zealand. To a lesser extent, the investments may also include equity securities of issuers located in other global markets.

Any change to the fundamental investment objectives of the Fund must be approved by a majority of the votes cast at a meeting of securityholders held for that reason.

Investment Strategies

The investment approach follows a blended growth and value investment style, by seeking companies having the greatest prospects for long-term growth. Strong consideration is also placed on assessing the investment's intrinsic worth relative to its stock price. The review process includes analysis of the company's

competitive position, management strengths, expected profitability and financial position.

The Fund primarily invests in developed markets but may also invest in emerging markets when the portfolio manager believes it would be beneficial to the Fund's investors to do so.

The Fund may also invest in fixed-income securities.

Generally, once an investment is made, the Fund expects to be a patient, long-term investor.

As part of the investment process, the Fund may hold a large portion of cash and/or short-term debt securities in anticipation of, or in response to, unfavourable market conditions, including where the portfolio manager believes the market is overvalued.

The Fund considers material environmental, social and/or governance factors in its investment evaluation process.

The Fund may hold a portion of its net assets in securities of other investment funds, including ETFs, which may be managed by us, in accordance with its investment objectives. For more information see the "Fund of Funds" disclosure under "Fees and Expenses".

In accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described in the "Introduction to Part B – What Does the Fund Invest In?" section of this simplified prospectus, the Fund may

- use derivatives for hedging and non-hedging purposes;
- engage in securities lending, repurchase and reverse repurchase transactions;
- engage in short selling (the portfolio manager does not currently engage in short selling but may do so in the future without further notice to investors); and
- invest in gold and silver, and other instruments (such as derivatives and ETFs) that provide exposure to these metals.

If the Fund employs any of these strategies, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

What are the Risks of Investing in the Fund?

This Fund invests in global equity securities, which subjects the Fund to market risk, including equities belonging to specific regions. Equity securities are more volatile than other types of investments, such as fixed-income investments, and regional equity Funds are subject to greater volatility. Since the Fund invests outside of Canada, it is subject to foreign markets risk and foreign currency risk. These and other risks are described starting on page 1. The following table shows which risks apply to this Fund:

Risk Checklist

* This risk only applies to the Fixed Rate Distribution Series.

As of September 3, 2021, one securityholder held 36.09% of the Fund by market value. **This may subject the Fund to Large Transaction risk.**

Who Should Invest in this Fund?

You should consider this Fund if you

- are looking for a low- to medium-risk, international equity fund to hold as part of your portfolio,
- want a medium- to long-term investment,
- can handle the volatility of stock markets.

You should consider the Fund's Fixed Rate Distribution Series if you want to receive a monthly cash flow.

Distribution Policy

Refer to the "Introduction to Part B – Distribution Policy" section of this simplified prospectus.

On its Fixed Rate Distribution Series, the Fund will make monthly distributions at the following rates:

Fixed Rate Distribution Series	Distribution Rate
F5	5%
F8	8%
FB5	5%
PWFB5	5%
PWT5	5%
PWT8	8%
PWX8	8%
T5	5%
T8	8%

These fixed rate distributions will consist of net income to the extent of the Fund's allocation of net income to that series for that month, and any amount of the distribution that is in excess of the net income for that series will consist of return of capital. **You should not confuse these distributions with the Fund's rate of return or the yield of its portfolio.**

What Does the Fund Invest In?

Investment Objectives

The Fund seeks long-term capital growth by investing in equity securities located in the following three principal market regions: (i) the United Kingdom and Europe; (ii) Asia and the Far East; and (iii) Australia and New Zealand. The Fund will invest in a manner that aims to enhance the diversification of its investments.

The Fund will pursue this objective by investing all or a portion of its assets in a manner that tracks the TOBAM Maximum Diversification All World Developed ex North America Index (the "TOBAM Index"), or a substantially similar index, and may also invest in other securities and/or investment funds.

Any proposed change in the fundamental investment objectives of the Fund must be approved by a majority of the votes cast at a meeting of the Fund's investors called for that purpose.

Investment Strategies

The Fund will generally invest substantially all its assets in a manner that tracks the TOBAM Index. Currently, the Fund intends to track the TOBAM Index by investing in Mackenzie Maximum

Diversification All World Developed ex North America Index ETF and/or by investing in the constituent securities of the TOBAM Index in approximately the same proportion as they are reflected in the TOBAM Index. The TOBAM Index aims to create a more diversified emerging markets equity portfolio relative to a market capitalization weighted benchmark by employing a mathematical definition of diversification, which TOBAM defines as the "Diversification Ratio®". Securities eligible for inclusion in the TOBAM Index are drawn from the "TOBAM Universe", which comprises all equities that are listed on a regulated exchange from the applicable countries and are subject to TOBAM's market capitalization threshold and liquidity rules. The securities included in the TOBAM Index are then selected by applying TOBAM's Diversification Ratio®. This ratio is designed to enhance diversification by selecting securities that have a low correlation to each other, subject to certain constraints. These constraints include, but are not limited to, weighting caps at the security and regional level relative to the weightings in the TOBAM Universe. Please see www.tobam.fr for more detailed information on the TOBAM Index methodology.

In addition, or in the alternative, the Fund may, in certain circumstances and at the discretion of the Manager, employ a sampling methodology. It is expected that the Manager will use this sampling methodology where it is difficult to acquire the constituent securities of the TOBAM Index, where the asset levels of the Fund do not allow for the holding of all of the constituent securities or where it is otherwise beneficial to the Fund to do so. Sampling involves the use of quantitative techniques to select either a subset of the constituent securities from the TOBAM Index or a combination of some or all the constituent securities from the TOBAM Index and other securities that are not part of the TOBAM Index. In either case, the representative sample of securities selected by the Manager should have, in the aggregate, similar investment characteristics to the TOBAM Index, based on factors such as the Diversification Ratio® used in constructing the TOBAM Index, industry weightings, country weightings, key risk factors and performance attributes. In certain circumstances, the Manager may obtain exposure to one or more securities using derivatives as part of the sampling methodology.

Generally, the Fund will be fully invested. However, the Fund may hold cash and/or short-term debt securities in anticipation of, or in response to, unfavourable market conditions; and/or for liquidity purposes.

The Fund considers material environmental, social and/or governance factors in its investment evaluation process.

The Fund may hold a portion of its net assets in securities of other investment funds, including ETFs, which may be managed by us, in accordance with its investment objectives. For more information see the "Fund of Funds" disclosure under "Fees and Expenses".

In accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described in the "Introduction to Part B – What Does the Fund Invest In?" section of this simplified prospectus, the Fund may

- use derivatives for hedging and non-hedging purposes;
- engage in securities lending, repurchase and reverse repurchase transactions; and

- engage in short selling (the portfolio manager does not currently engage in short selling but may do so in the future without further notice to investors).

If the Fund employs any of these strategies, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

What are the Risks of Investing in the Fund?

This Fund invests in global equity securities, which subjects the Fund to market risk, including equities belonging to specific regions. Equity securities are more volatile than other types of investments, such as fixed-income investments, and regional equity Funds are subject to greater volatility. Since the Fund invests outside of Canada, it is subject to foreign markets risk and foreign currency risk. These and other risks are described starting on page 1. The following table shows which risks apply to this Fund:

Who Should Invest in this Fund?

You should consider this Fund if you

- are looking for a medium-risk, international equity fund to hold as a key part of your portfolio,
- want a medium- to long-term investment,
- can handle the volatility of stock markets.

You should consider the Fund's Fixed Rate Distribution Series if you want to receive a monthly cash flow.

Distribution Policy

Refer to the "Introduction to Part B – Distribution Policy" section of this simplified prospectus.

On its Fixed Rate Distribution Series, the Fund will make monthly distributions at the following rates:

Fixed Rate Distribution Series	Distribution Rate
F5	5%
F8	8%
FB5	5%
PWFB5	5%
PWT5	5%
PWT8	8%
PWX5	5%
T5	5%
T8	8%

These fixed rate distributions will consist of net income to the extent of the Fund's allocation of net income to that series for that month, and any amount of the distribution that is in excess of the net income for that series will consist of return of capital. **You should not**

confuse these distributions with the Fund's rate of return or the yield of its portfolio.

Fund Expenses Indirectly Borne by Investors

Estimated cumulative expenses payable by each series of securities of the Fund for each \$1,000 investment (see "Introduction to Part B" for an explanation of the assumptions used in this example) for the time periods shown:

Series (\$)	For 1 Year	For 3 Years	For 5 Years	For 10 Years

What Does the Fund Invest In?

Investment Objectives

The Fund seeks long-term capital growth by investing in equity securities of global companies. The Fund will invest in a manner that aims to enhance the diversification of its investments.

The Fund will pursue this objective by investing all or a portion of its assets in a manner that tracks the TOBAM Maximum Diversification All World Developed Index (the "TOBAM Index"), or a substantially similar index, and may also invest in other securities and/or investment funds.

Any proposed change in the fundamental investment objectives of the Fund must be approved by a majority of the votes cast at a meeting of the Fund's investors called for that purpose.

Investment Strategies

The Fund will generally invest substantially all its assets in a manner that tracks the TOBAM Index. Currently, the Fund intends to track the TOBAM Index by investing in Mackenzie Maximum Diversification All World Developed Index ETF and/or by investing in the constituent securities of the TOBAM Index in approximately the

same proportion as they are reflected in the TOBAM Index. The TOBAM Index aims to create a more diversified emerging markets equity portfolio relative to a market capitalization weighted benchmark by employing a mathematical definition of diversification, which TOBAM defines as the "Diversification Ratio®". Securities eligible for inclusion in the TOBAM Index are drawn from the "TOBAM Universe", which comprises all equities that are listed on a regulated exchange from the applicable countries and are subject to TOBAM's market capitalization threshold and liquidity rules. The securities included in the TOBAM Index are then selected by applying TOBAM's Diversification Ratio®. This ratio is designed to enhance diversification by selecting securities that have a low correlation to each other, subject to certain constraints. These constraints include, but are not limited to, weighting caps at the security and regional level relative to the weightings in the TOBAM Universe. Please see www.tobam.fr for more detailed information on the TOBAM Index methodology.

In addition, or in the alternative, the Fund may, in certain circumstances and at the discretion of the Manager, employ a sampling methodology. It is expected that the Manager will use this sampling methodology where it is difficult to acquire the constituent securities of the TOBAM Index, where the asset levels of the Fund do not allow for the holding of all of the constituent securities or where it is otherwise beneficial to the Fund to do so. Sampling involves the use of quantitative techniques to select either a subset of the constituent securities from the TOBAM Index or a combination of some or all the constituent securities from the TOBAM Index and other securities that are not part of the TOBAM Index. In either case, the representative sample of securities selected by the Manager should have, in the aggregate, similar investment characteristics to the TOBAM Index, based on factors such as the Diversification Ratio® used in constructing the TOBAM Index, industry weightings, country weightings, key risk factors and performance attributes. In certain circumstances, the Manager may obtain exposure to one or more securities using derivatives as part of the sampling methodology.

Generally, the Fund will be fully invested. However, the Fund may hold cash and/or short-term debt securities in anticipation of, or in response to, unfavourable market conditions; and/or for liquidity purposes.

The Fund considers material environmental, social and/or governance factors in its investment evaluation process.

The Fund may hold a portion of its net assets in securities of other investment funds, including ETFs, which may be managed by us, in accordance with its investment objectives. For more information see the "Fund of Funds" disclosure under "Fees and Expenses".

In accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described in the "Introduction to Part B – What Does the Fund Invest In?" section of this simplified prospectus, the Fund may

- use derivatives for hedging and non-hedging purposes;
- engage in securities lending, repurchase and reverse repurchase transactions; and
- engage in short selling (the portfolio manager does not currently engage in short selling but may do so in the future without further notice to investors).

If the Fund employs any of these strategies, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

What are the Risks of Investing in the Fund?

This Fund invests in global equity securities, which subjects the Fund to market risk. Equity securities are more volatile than other types of investments, such as fixed-income investments. Since the Fund invests outside of Canada, it is subject to foreign markets risk and foreign currency risk. These and other risks are described starting on page 1. The following table shows which risks apply to this Fund:

Who Should Invest in this Fund?

You should consider this Fund if you

- are looking for a low- to medium-risk, global equity fund to hold as part of your portfolio,
- want a medium- to long-term investment,
- can handle the volatility of stock markets.

You should consider the Fund's Fixed Rate Distribution Series if you want to receive a monthly cash flow.

Distribution Policy

Refer to the "Introduction to Part B – Distribution Policy" section of this simplified prospectus.

On its Fixed Rate Distribution Series, the Fund will make monthly distributions at the following rates:

Fixed Rate Distribution Series	Distribution Rate
F5	5%
F8	8%
FB5	5%
PWFB5	5%
PWT5	5%
PWT8	8%
PWX5	5%
T5	5%
T8	8%

These fixed rate distributions will consist of net income to the extent of the Fund's allocation of net income to that series for that month, and any amount of the distribution that is in excess of the net income for that series will consist of return of capital. **You should not confuse these distributions with the Fund's rate of return or the yield of its portfolio.**

What Does the Fund Invest In?

Investment Objectives

The Fund seeks long-term capital growth by investing in equity securities of companies in developed European markets. The Fund will invest in a manner that aims to enhance the diversification of its investments.

The Fund will pursue this objective by investing all or a portion of its assets in a manner that tracks the TOBAM Maximum Diversification Developed Europe Index (the “**TOBAM Index**”), or a substantially similar index, and may also invest in other securities and/or investment funds.

Any proposed change in the fundamental investment objectives of the Fund must be approved by a majority of the votes cast at a meeting of the Fund’s investors called for that purpose.

Investment Strategies

The Fund will generally invest substantially all its assets in a manner that tracks the TOBAM Index. Currently, the Fund intends to track the TOBAM Index by investing in Mackenzie Maximum Diversification Developed Europe Index ETF and/or by investing in

the constituent securities of the TOBAM Index in approximately the same proportion as they are reflected in the TOBAM Index. The TOBAM Index aims to create a more diversified emerging markets equity portfolio relative to a market capitalization weighted benchmark by employing a mathematical definition of diversification, which TOBAM defines as the “Diversification Ratio®”. Securities eligible for inclusion in the TOBAM Index are drawn from the “TOBAM Universe”, which comprises all equities that are listed on a regulated exchange from the applicable countries and are subject to TOBAM’s market capitalization threshold and liquidity rules. The securities included in the TOBAM Index are then selected by applying TOBAM’s Diversification Ratio®. This ratio is designed to enhance diversification by selecting securities that have a low correlation to each other, subject to certain constraints. These constraints include, but are not limited to, weighting caps at the security and regional level relative to the weightings in the TOBAM Universe. Please see www.tobam.fr for more detailed information on the TOBAM Index methodology.

In addition, or in the alternative, the Fund may, in certain circumstances and at the discretion of the Manager, employ a sampling methodology. It is expected that the Manager will use this sampling methodology where it is difficult to acquire the constituent securities of the TOBAM Index, where the asset levels of the Fund do not allow for the holding of all of the constituent securities or where it is otherwise beneficial to the Fund to do so. Sampling involves the use of quantitative techniques to select either a subset of the constituent securities from the TOBAM Index or a combination of some or all the constituent securities from the TOBAM Index and other securities that are not part of the TOBAM Index. In either case, the representative sample of securities selected by the Manager should have, in the aggregate, similar investment characteristics to the TOBAM Index, based on factors such as the Diversification Ratio® used in constructing the TOBAM Index, industry weightings, country weightings, key risk factors and performance attributes. In certain circumstances, the Manager may obtain exposure to one or more securities using derivatives as part of the sampling methodology.

Generally, the Fund will be fully invested. However, the Fund may hold cash and/or short-term debt securities in anticipation of, or in response to, unfavourable market conditions; and/or for liquidity purposes.

The Fund considers material environmental, social and/or governance factors in its investment evaluation process.

The Fund may hold a portion of its net assets in securities of other investment funds, including ETFs, which may be managed by us, in accordance with its investment objectives. For more information see the “**Fund of Funds**” disclosure under “**Fees and Expenses**”.

In accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described in the “**Introduction to Part B – What Does the Fund Invest In?**” section of this simplified prospectus, the Fund may

- use derivatives for hedging and non-hedging purposes;
- engage in securities lending, repurchase and reverse repurchase transactions;

- engage in short selling (the portfolio manager does not currently engage in short selling but may do so in the future without further notice to investors).

If the Fund employs any of these strategies, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

What are the Risks of Investing in the Fund?

This Fund invests in European equity securities, which subjects the Fund to market risk. As a specialized regional equity fund, the Fund may be subject to greater volatility and concentration risk. Since the Fund invests outside of Canada, it is subject to foreign markets risk and foreign currency risk. These and other risks are described starting on page 1. The following table shows which risks apply to this Fund:

Who Should Invest in this Fund?

You should consider this Fund if you

- are looking for a medium-risk, European equity fund to hold as a key part of your portfolio,
- want a medium- to long-term investment,
- can handle the volatility of stock markets.

You should consider the Fund's Fixed Rate Distribution Series if you want to receive a monthly cash flow.

Distribution Policy

Refer to the "Introduction to Part B – Distribution Policy" section of this simplified prospectus.

On its Fixed Rate Distribution Series, the Fund will make monthly distributions at the following rates:

Fixed Rate Distribution Series	Distribution Rate
F5	5%
F8	8%
FB5	5%
PWFB5	5%
PWT5	5%
PWT8	8%
PWX5	5%
T5	5%
T8	8%

These fixed rate distributions will consist of net income to the extent of the Fund's allocation of net income to that series for that month, and any amount of the distribution that is in excess of the net income for that series will consist of return of capital. **You should not confuse these distributions with the Fund's rate of return or the yield of its portfolio.**

What Does the Fund Invest In?

Investment Objectives

The Fund seeks long-term capital growth by investing in equity securities of companies in emerging markets. The Fund will invest in a manner that aims to enhance the diversification of its investments.

The Fund will pursue this objective by investing all or a portion of its assets in a manner that tracks the TOBAM Maximum Diversification Emerging Index (the "TOBAM Index"), or a substantially similar index, and may also invest in other securities and/or investment funds.

Any proposed change in the fundamental investment objectives of the Fund must be approved by a majority of the votes cast at a meeting of the Fund's investors called for that purpose.

Investment Strategies

The Fund will generally invest substantially all its assets in a manner that tracks the TOBAM Index. Currently, the Fund intends to track the TOBAM Index by investing in Mackenzie Maximum Diversification Emerging Markets Index ETF and/or by investing in

the constituent securities of the TOBAM Index in approximately the same proportion as they are reflected in the TOBAM Index. The TOBAM Index aims to create a more diversified emerging markets equity portfolio relative to a market capitalization weighted benchmark by employing a mathematical definition of diversification, which TOBAM defines as the "Diversification Ratio®". Securities eligible for inclusion in the TOBAM Index are drawn from the "TOBAM Universe", which comprises all equities that are listed on a regulated exchange from the applicable countries and are subject to TOBAM's market capitalization threshold and liquidity rules. The securities included in the TOBAM Index are then selected by applying TOBAM's Diversification Ratio®. This ratio is designed to enhance diversification by selecting securities that have a low correlation to each other, subject to certain constraints. These constraints include, but are not limited to, weighting caps at the security and regional level relative to the weightings in the TOBAM Universe. Please see www.tobam.fr for more detailed information on the TOBAM Index methodology.

In addition, or in the alternative, the Fund may, in certain circumstances and at the discretion of the Manager, employ a sampling methodology. It is expected that the Manager will use this sampling methodology where it is difficult to acquire the constituent securities of the TOBAM Index, where the asset levels of the Fund do not allow for the holding of all of the constituent securities or where it is otherwise beneficial to the Fund to do so. Sampling involves the use of quantitative techniques to select either a subset of the constituent securities from the TOBAM Index or a combination of some or all the constituent securities from the TOBAM Index and other securities that are not part of the TOBAM Index. In either case, the representative sample of securities selected by the Manager should have, in the aggregate, similar investment characteristics to the TOBAM Index, based on factors such as the Diversification Ratio® used in constructing the TOBAM Index, industry weightings, country weightings, key risk factors and performance attributes. In certain circumstances, the Manager may obtain exposure to one or more securities using derivatives as part of the sampling methodology.

Generally, the Fund will be fully invested. However, the Fund may hold cash and/or short-term debt securities in anticipation of, or in response to, unfavourable market conditions; and/or for liquidity purposes.

The Fund considers material environmental, social and/or governance factors in its investment evaluation process.

The Fund may hold a portion of its net assets in securities of other investment funds, including ETFs, which may be managed by us, in accordance with its investment objectives. For more information see the "Fund of Funds" disclosure under "Fees and Expenses".

In accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described in the "Introduction to Part B – What Does the Fund Invest In?" section of this simplified prospectus, the Fund may

- use derivatives for hedging and non-hedging purposes;
- engage in securities lending, repurchase and reverse repurchase transactions; and

- engage in short selling (the portfolio manager does not currently engage in short selling but may do so in the future without further notice to investors).

If the Fund employs any of these strategies, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

What are the Risks of Investing in the Fund?

This Fund invests in securities of emerging market countries, which subjects the Fund to market risk. Emerging market securities may be traded less frequently and price movements may be more volatile than in developed countries. Since the Fund invests outside of Canada, it is subject to foreign markets risk and foreign currency risk. These and other risks are described starting on page 1. The following table shows which risks apply to this Fund:

Who Should Invest in this Fund?

You should consider this Fund if you

- are looking for a medium-risk, emerging markets global equity fund to hold as a key part of your portfolio,
- want a medium- to long-term investment,
- can handle the volatility of stock and emerging markets.

You should consider the Fund's Fixed Rate Distribution Series if you want to receive a monthly cash flow.

Distribution Policy

Refer to the "Introduction to Part B – Distribution Policy" section of this simplified prospectus.

On its Fixed Rate Distribution Series, the Fund will make monthly distributions at the following rates:

Fixed Rate Distribution Series	Distribution Rate
F5	5%
F8	8%
FB5	5%
PWFB5	5%
PWT5	5%
PWT8	8%
PWX5	5%
T5	5%
T8	8%

These fixed rate distributions will consist of net income to the extent of the Fund's allocation of net income to that series for that month, and any amount of the distribution that is in excess of the net income for that series will consist of return of capital. **You should not confuse these distributions with the Fund's rate of return or the yield of its portfolio.**

Fund Expenses Indirectly Borne by Investors

Estimated cumulative expenses payable by each series of securities of the Fund for each \$1,000 investment (see “**Introduction to Part B**” for an explanation of the assumptions used in this example) for the time periods shown:

Series (\$)	For 1 Year	For 3 Years	For 5 Years	For 10 Years

What Does the Fund Invest In?

Investment Objectives

The Fund seeks to provide capital growth and generate current income with reduced volatility by investing primarily in a combination of equity and fixed-income securities of issuers located anywhere in the world. The Fund will invest in a manner that aims to enhance the diversification of its investments.

The Fund will pursue this objective by investing in securities directly and/or by investing in other investment funds.

Any change to the investment objectives must be approved by a majority of votes cast at a meeting of security holders held for that reason.

Investment Strategies

Currently, the Fund invests in Mackenzie Maximum Diversification and Anti-Benchmark Funds and ETFs ("Mackenzie TOBAM Funds") as well as third-party funds. The Fund and underlying funds aim to enhance the diversification of the Fund and gain exposure to

Canadian and foreign fixed-income and equity securities, as well as cryptocurrencies.

The strategic long-term asset mix may change in reaction to, or anticipation of, market changes. However, it will generally be kept within the following ranges:

- 40-60% fixed-income securities;
- 40-60% equity securities;
- 0-10% cryptocurrencies, specifically Bitcoin and Ethereum, through investment funds that invest in cryptocurrencies, which may be managed by us or third parties.

The TOBAM methodology aims to create a more diversified multi-asset portfolio relative to a market capitalization weighted benchmark by employing a mathematical definition of diversification, which TOBAM defines as the "Diversification Ratio®". Securities eligible for inclusion are drawn from the "TOBAM Universe", which comprises all equities and fixed income securities that are listed on a regulated exchange from the applicable countries and are subject to TOBAM's market capitalization threshold, liquidity rules, and selection criteria. The securities included in the underlying Mackenzie TOBAM Funds are then selected by applying TOBAM's Diversification Ratio®. This ratio is designed to enhance diversification by selecting securities that have a low correlation to each other, subject to certain constraints. These constraints include, but are not limited to, weighting caps at the security and regional level relative to the weightings in the TOBAM Universe. The "Diversification Ratio®" is optimized (a) within the underlying Mackenzie TOBAM Funds and (b) at the Fund level in determining allocations to the underlying Mackenzie TOBAM Funds. The allocation to cryptocurrencies will be made to further enhance the diversification of the Fund.

Generally, the Fund will be fully invested. However, the Fund may hold cash and/or short-term debt securities in anticipation of, or in response to, unfavorable market conditions; and/or for liquidity purposes.

The Fund considers material environmental, social and/or governance factors in its investment evaluation process.

Generally, the Fund will obtain exposure to these securities primarily by investing in other investment funds, including ETFs, which may be managed by us, in accordance with its investment objectives. For more information see the "Fund of Funds" disclosure under "Fees and Expenses".

In accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described in the "Introduction to Part B – What Does the Fund Invest In?" section of this simplified prospectus, the Fund may

- use derivatives for hedging and non-hedging purposes;
- engage in securities lending, repurchase and reverse repurchase transactions; and
- engage in short selling (the portfolio manager does not currently engage in short selling but may do so in the future without further notice to investors).

If the Fund employs any of these strategies, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

What are the Risks of Investing in the Fund?

This Fund invests in a combination of cryptocurrencies, equity and fixed-income securities which subjects the Fund to market risk. This combination subjects the Fund to a variety of risks inherent to these types of investments. The Fund will make use of derivatives and is also subject to derivatives risk. Since the Fund invests outside of Canada, it is subject to foreign markets risk and foreign currency risk. These and other risks are described starting on page 2. The following table shows which risks apply to this Fund:

Who Should Invest in this Fund?

You should consider this Fund if you

- are looking for a low to medium risk, multi-asset fund that includes cryptocurrencies to hold as part of your portfolio,
- want a medium- to long- term investment,
- can handle the volatility of stock markets, bond markets, and cryptocurrencies.

You should consider the Fund's Fixed Rate Distribution Series if you want to receive a monthly cash flow.

Distribution Policy

Refer to the "Introduction to Part B – Distribution Policy" section of this simplified prospectus.

On its Fixed Rate Distribution Series, the Fund will make monthly distributions at the following rates:

Fixed Rate Distribution Series	Distribution Rate
F5	5%
F8	8%
FB5	5%
PWFB5	5%
PWT5	5%
PWT8	8%
PWX5	5%
T5	5%
T8	8%

These fixed rate distributions will consist of net income to the extent of the Fund's allocation of net income to that series for that month, and any amount of the distribution that is in excess of the net income for that series will consist of return of capital. **You should not confuse these distributions with the Fund's rate of return or the yield of its portfolio.**

Fund Expenses Indirectly Borne by Investors

This information is not available because the Fund is new.

What Does the Fund Invest In?

Investment Objectives

The Fund seeks long-term capital growth by investing in equity securities of US companies. The Fund will invest in a manner that aims to enhance the diversification of its investments.

The Fund will pursue this objective by investing all or a portion of its assets in a manner that tracks the TOBAM Maximum Diversification USA Index (the "TOBAM Index"), or a substantially similar index, and may also invest in other securities and/or investment funds.

Any proposed change in the fundamental investment objectives of the Fund must be approved by a majority of the votes cast at a meeting of the Fund's investors called for that purpose.

Investment Strategies

The Fund will generally invest substantially all its assets in a manner that tracks the TOBAM Index. Currently, the Fund intends to track the TOBAM Index by investing in Mackenzie Maximum Diversification US Index ETF and/or by investing in the constituent securities of the TOBAM Index in approximately the same proportion as they are reflected in the TOBAM Index. The TOBAM Index aims

to create a more diversified emerging markets equity portfolio relative to a market capitalization weighted benchmark by employing a mathematical definition of diversification, which TOBAM defines as the "Diversification Ratio®". Securities eligible for inclusion in the TOBAM Index are drawn from the "TOBAM Universe", which comprises all equities that are listed on a regulated exchange from the applicable countries and are subject to TOBAM's market capitalization threshold and liquidity rules. The securities included in the TOBAM Index are then selected by applying TOBAM's Diversification Ratio®. This ratio is designed to enhance diversification by selecting securities that have a low correlation to each other, subject to certain constraints. These constraints include, but are not limited to, weighting caps at the security and regional level relative to the weightings in the TOBAM Universe. Please see www.tobam.fr for more detailed information on the TOBAM Index methodology.

In addition, or in the alternative, the Fund may, in certain circumstances and at the discretion of the Manager, employ a sampling methodology. It is expected that the Manager will use this sampling methodology where it is difficult to acquire the constituent securities of the TOBAM Index, where the asset levels of the Fund do not allow for the holding of all of the constituent securities or where it is otherwise beneficial to the Fund to do so. Sampling involves the use of quantitative techniques to select either a subset of the constituent securities from the TOBAM Index or a combination of some or all the constituent securities from the TOBAM Index and other securities that are not part of the TOBAM Index. In either case, the representative sample of securities selected by the Manager should have, in the aggregate, similar investment characteristics to the TOBAM Index, based on factors such as the Diversification Ratio® used in constructing the TOBAM Index, industry weightings, country weightings, key risk factors and performance attributes. In certain circumstances, the Manager may obtain exposure to one or more securities using derivatives as part of the sampling methodology.

Generally, the Fund will be fully invested. However, the Fund may hold cash and/or short-term debt securities in anticipation of, or in response to, unfavourable market conditions; and/or for liquidity purposes.

The Fund considers material environmental, social and/or governance factors in its investment evaluation process.

The Fund may hold a portion of its net assets in securities of other investment funds, including ETFs, which may be managed by us, in accordance with its investment objectives. For more information see the "Fund of Funds" disclosure under "Fees and Expenses".

In accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described in the "Introduction to Part B – What Does the Fund Invest In?" section of this simplified prospectus, the Fund may

- use derivatives for hedging and non-hedging purposes;
- engage in securities lending, repurchase and reverse repurchase transactions; and
- engage in short selling (the portfolio manager does not currently engage in short selling but may do so in the future without further notice to investors).

If the Fund employs any of these strategies, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

What are the Risks of Investing in the Fund?

This Fund invests in U.S. equity securities, which subjects the Fund to market risk. Equity securities are more volatile than other types of investments, such as fixed-income investments. Since the Fund invests outside of Canada, it is subject to foreign markets risk and foreign currency risk. These and other risks are described starting on page 1. The following table shows which risks apply to this Fund:

Who Should Invest in this Fund?

You should consider this Fund if you

- are looking for a medium-risk, U.S. equity fund to hold as a key part of your portfolio,
- want a medium- to long-term investment,
- can handle the volatility of stock markets.

You should consider the Fund's Fixed Rate Distribution Series if you want to receive a monthly cash flow.

Distribution Policy

Refer to the "Introduction to Part B – Distribution Policy" section of this simplified prospectus.

On its Fixed Rate Distribution Series, the Fund will make monthly distributions at the following rates:

Fixed Rate Distribution Series	Distribution Rate
F5	5%
F8	8%
FB5	5%
PWFB5	5%
PWT5	5%

What Does the Fund Invest In?

Investment Objectives

The Fund seeks to provide investors with a diversified portfolio designed to provide a balance between long-term capital appreciation and income, with an emphasis on long-term capital appreciation.

The Fund seeks to accomplish its objectives by investing primarily in exchange traded funds to gain exposure to Canadian and foreign equity and fixed-income securities and other asset categories.

The Fund may also invest in other mutual funds or invest directly in Canadian and foreign equity and fixed-income securities and other asset categories where the Fund considers it would be beneficial to unitholders to do so.

Any change to the investment objectives must be approved by a majority of votes cast at a meeting of unitholders held for that reason.

Investment Strategies

The Fund's asset mix will generally be kept within the following ranges:

- 50% - 70% equity securities
- 20% - 50% fixed-income securities.

In addition to fixed income and equity exposures, the Fund may also invest in alternative mutual funds.

The asset allocation portfolio manager employs a disciplined total portfolio management approach to constructing the Fund. The Fund is built upon long-term strategic allocations to different equity markets, fixed income markets, and other asset classes. The Fund will be allocated tactically over the short- to medium-term based on changes to the market outlook and risk assessment for each asset class.

The Fund will seek to diversify its equity and fixed-income assets in terms of one or more of these factors:

- geographic exposure
- equity factor exposure
- sector exposure
- company market capitalization
- investment style
- credit quality
- duration.

As a result of this diversification, the Fund may have exposure to securities issued by companies of any size and governments located anywhere in the world, including emerging markets.

The Fund seeks to manage currency exposure on a total portfolio basis through the use of derivatives or foreign currency cash holdings. This means that the asset allocation portfolio manager will take into account the Fund's overall currency exposure across all of its holdings.

The Fund may hold cash and/or short-term debt securities in anticipation of, or in response to, unfavourable market conditions; and/or for liquidity purposes.

The Fund considers material environmental, social and/or governance factors in its investment evaluation process.

The Fund will obtain exposure to equity securities, fixed-income securities and other asset categories primarily by investing in ETFs, managed by Mackenzie, in accordance with its investment objectives. For more information, see the "Fund of Funds" disclosure under "Fees and Expenses".

In accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described in the "Introduction to Part B – What Does the Fund Invest In?" section of this simplified prospectus, the Fund may

- use derivatives for hedging and non-hedging purposes;
- engage in securities lending, repurchase and reverse repurchase transactions;
- engage in short selling (the portfolio manager does not currently engage in short selling but may do so in the future without further notice to investors); and

- invest in gold and silver, and other instruments (such as derivatives and ETFs) that provide exposure to these metals, and in certain other ETFs that replicate an index on a leveraged basis and/or that invest in physical commodities.

If the Fund employs any of these strategies, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

What are the Risks of Investing in the Fund?

This Fund has exposure to equity securities, which subjects the Fund to market risk, and which are more volatile than other types of investments, such as fixed-income investments. A significant portion of the Fund's exposure is to assets outside of Canada, which means that it is subject to foreign markets risk and foreign currency risk. This Fund also has exposure to fixed-income securities, subjecting it to risks including company risk, credit risk, interest rate risk, and prepayment risk. Any indirect investment in securities may subject the Fund to tracking risk. These and other risks are described starting on page 1. The following table shows which risks apply to this Fund:

Risk Checklist

	Primary Risk	Secondary Risk	Low or Not a Risk

* This risk applies only to the Fixed Rate Distribution Series.

As of September 3, 2021, one securityholder held 14.53% of the Fund by market value. **This may subject the Fund to Large Transaction risk.**

Who Should Invest in this Fund?

You should consider this Fund if you

- are looking for a low- to medium-risk, managed asset portfolio fund to hold as a key part of your portfolio,
- want a medium to long-term investment,
- can handle the ups and downs of stock and bond markets.

You should consider the Fund's Fixed Rate Distribution Series if you want to receive a monthly cash flow.

Distribution Policy

Refer to the "Introduction to Part B – Distribution Policy" section of this simplified prospectus.

On its Fixed Rate Distribution Series, the Fund will make monthly distributions at the following rates:

Fixed Rate Distribution Series	Distribution Rate
F5	5%

Fixed Rate Distribution Series	Distribution Rate
F8	8%
FB5	5%
PWFB5	5%
PWT5	5%
PWT8	8%
PWX5	5%
T5	5%
T8	8%

These fixed rate distributions will consist of net income to the extent of the Fund's allocation of net income to that series for that month, and any amount of the distribution that is in excess of the net income for that series will consist of return of capital. **You should not confuse these distributions with the Fund's rate of return or the yield of its portfolio.**

Fund Expenses Indirectly Borne by Investors

What Does the Fund Invest In?

Investment Objectives

The Fund seeks to provide investors with a diversified portfolio designed to provide a balance of income and long-term capital appreciation with reduced volatility.

The Fund will pursue this objective by investing in other mutual funds and/or by investing in securities directly to gain exposure to Canadian and foreign fixed-income and equity securities and other asset categories. It may also use derivatives.

Any change to the investment objectives must be approved by a majority of votes cast at a meeting of security holders held for that reason.

Investment Strategies

The Fund's current asset mix is 57% equity and 42% fixed-income assets. The Fund will also allocate a small portion of its portfolio to cash and/or commodities. The strategic long-term asset mix may change in reaction to, or in anticipation of, market changes. However, it will generally be kept within the following ranges:

- 40-60% equity securities;
- 25-60% fixed-income securities.

In addition to fixed income and equity exposures, the Fund may also invest in alternative mutual funds.

The asset allocation portfolio manager will rebalance the percentage of the Fund invested in each asset class.

The Fund will gain exposure to fixed-income securities anywhere in the world, including sovereign debt securities that have an average credit quality of "BBB" or higher as rated by a recognized credit rating organization. The Fund's fixed-income exposure may also include exposure to real return bonds or to fixed-income securities that are hedged against the risk that inflation presents to bond funds.

The Fund will gain exposure to equities anywhere in the world by employing a variety of investment styles, specializations and geographic focuses. It seeks exposure to equities that provide a higher dividend yield compared to the broad global equity market.

The Fund may, directly or indirectly through investments in other mutual funds, use derivative instruments to reduce overall volatility with a focus on mitigating downside risk. For example, the Fund may employ a collar strategy which involves buying put options and selling call options. Buying put options mitigates negative returns during down markets, while selling call options typically pays for a portion of the put option cost and mitigates negative returns through the collection of premiums, but also limits the upside return potential of the Fund. The Fund will employ a flexible approach to its use of derivative instruments and has the ability to opportunistically use options, swaps, futures and forward contracts for hedging or non-hedging purposes under different market conditions. The Fund may use derivative instruments where the underlying interest of the derivative is an ETF.

Generally, the Fund will obtain exposure to these securities primarily by investing in other investment funds, including ETFs, which may be managed by us, in accordance with its investment objectives. For more information see the "Fund of Funds" disclosure under "Fees and Expenses".

The Fund may hold cash and/or short-term debt securities in anticipation of, or in response to, unfavourable market conditions; and/or for liquidity purposes.

The Fund considers material environmental, social and/or governance factors in its investment evaluation process.

In accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described in the "Introduction to Part B – What Does the Fund Invest In?" section of this simplified prospectus, the Fund may

- in addition to the derivatives use described above, use derivatives for other hedging and non-hedging purposes;
- engage in securities lending, repurchase and reverse repurchase transactions;
- engage in short selling (the portfolio manager does not currently engage in short selling but may do so in the future without further notice to investors); and
- invest in gold and silver, and other instruments (such as derivatives and ETFs) that provide exposure to these metals.

If the Fund employs any of these strategies, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

What are the Risks of Investing in the Fund?

This Fund invests in a combination of equity and fixed-income securities, which subjects the Fund to market risk. This combination subjects the Fund to a variety of risks inherent in both types of investments. Any indirect investment in securities may subject the Fund to tracking risk. The Fund will make extensive use of derivatives and is also subject to derivatives risk. Since the Fund invests outside of Canada, it is subject to foreign markets risk and foreign currency risk. These and other risks are described starting on page 1. The following table shows which risks apply to this Fund:

Who Should Invest in this Fund?

You should consider this Fund if you

- are looking for a low-risk, managed asset portfolio fund to hold as part of your portfolio,
- want a medium-term investment,
- can handle the volatility of stock and bond markets.

You should consider the Fund's Fixed Rate Distribution Series if you want to receive a monthly cash flow.

Distribution Policy

Refer to the "Introduction to Part B – Distribution Policy" section of this simplified prospectus.

On its Fixed Rate Distribution Series, the Fund will make monthly distributions at the following rates:

Fixed Rate Distribution Series	Distribution Rate
A	4%
D	4%
F	4%
F8	8%
FB	4%
O	4%
PW	4%
PWFB	4%
PWT8	8%
PWX	4%
PWX8	8%
T8	8%

These fixed rate distributions will consist of net income to the extent of the Fund's allocation of net income to that series for that month, and any amount of the distribution that is in excess of the net income for that series will consist of return of capital. **You should not confuse these distributions with the Fund's rate of return or the yield of its portfolio.**

In addition, on Series AR and PWR, the Fund will make monthly distributions of net income. These distributions may be adjusted or discontinued at our discretion.

Fund Expenses Indirectly Borne by Investors

Estimated cumulative expenses payable by each series of securities of the Fund for each \$1,000 investment (see “**Introduction to Part B**” for an explanation of the assumptions used in this example) for the time periods shown:

Series (\$)	For 1 Year	For 3 Years	For 5 Years	For 10 Years
Series A	22	69	121	275
Series AR	22	70	122	279

What Does the Fund Invest In?

Investment Objectives

The Fund seeks to provide investors with a diversified portfolio designed to provide a steady stream of income with some long-term capital appreciation with reduced volatility.

The Fund will pursue this objective by investing in other mutual funds and/or by investing in securities directly to gain exposure to Canadian and foreign fixed-income and equity securities and other asset categories. It may also use derivatives.

Any change to the investment objectives must be approved by a majority of votes cast at a meeting of security holders held for that reason.

Investment Strategies

The Fund's current asset mix is 34% equity and 65% fixed-income assets. The Fund will also allocate a small portion of its portfolio to cash and/or commodities. The strategic long-term asset mix may change in reaction to, or in anticipation of, market changes. However, it will generally be kept within the following ranges:

- 10-40% equity securities;
- 45-90% fixed-income securities.

In addition to fixed income and equity exposures, the Fund may also invest in alternative mutual funds.

The Fund will also allocate a small portion of its portfolio to cash and/or commodities.

The Fund will gain exposure to fixed-income securities anywhere in the world, including sovereign debt securities that have an average credit quality of "BBB" or higher as rated by a recognized credit rating organization. The Fund's fixed-income exposure may also include exposure to real return bonds or to fixed-income securities that are hedged against the risk that inflation presents to bond funds.

The Fund will gain exposure to equities anywhere in the world by employing a variety of investment styles, specializations and geographic focuses. It seeks exposure to equities that provide a higher dividend yield compared to the broad global equity market.

The Fund may directly, or indirectly through investments in other mutual funds, use derivative instruments to reduce overall volatility with a focus on mitigating downside risk. For example, the Fund may employ a collar strategy which involves buying put options and selling call options. Buying put options mitigates negative returns during down markets, while selling call options typically pays for a portion of the put option cost and mitigates negative returns through the collection of premiums, but also limits the upside return potential of the Fund. The Fund will employ a flexible approach to its use of derivative instruments, and has the ability to opportunistically use options, swaps, futures and forward contracts for hedging or non-hedging purposes under different market conditions. The Fund may use derivative instruments where the underlying interest of the derivative is an ETF.

Generally, the Fund will obtain exposure to these securities primarily by investing in other investment funds, including ETFs, which may be managed by us, in accordance with its investment objectives. For more information see the "Fund of Funds" disclosure under "Fees and Expenses".

The Fund may hold cash and/or short-term debt securities in anticipation of, or in response to, unfavourable market conditions; and/or for liquidity purposes.

The Fund considers material environmental, social and/or governance factors in its investment evaluation process.

In accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described in the "Introduction to Part B – What Does the Fund Invest In?" section of this simplified prospectus, the Fund may

- in addition to the derivatives use described above, use derivatives for other hedging and non-hedging purposes;
- engage in securities lending, repurchase and reverse repurchase transactions;
- engage in short selling (the portfolio manager does not currently engage in short selling but may do so in the future without further notice to investors); and
- invest in gold and silver, and other instruments (such as derivatives and ETFs) that provide exposure to these metals.

If the Fund employs any of these strategies, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

What are the Risks of Investing in the Fund?

This Fund invests in a combination of equity and fixed-income securities, which subjects the Fund to market risk. This combination subjects the Fund to a variety of risks inherent in both types of investments. Any indirect investment in securities may subject the Fund to tracking risk. The Fund will make extensive use of derivatives and is also subject to derivatives risk. Since the Fund invests outside of Canada, it is subject to foreign markets risk and foreign currency risk. These and other risks are described starting on page 1. The following table shows which risks apply to this Fund:

Who Should Invest in this Fund?

You should consider this Fund if you

- are looking for a low-risk, managed asset portfolio fund to hold as part of your portfolio,
- want a medium-term investment,
- can handle the volatility of stock and bond markets.

You should consider the Fund's Fixed Rate Distribution Series if you want to receive a monthly cash flow.

Distribution Policy

Refer to the "Introduction to Part B – Distribution Policy" section of this simplified prospectus.

On its Fixed Rate Distribution Series, the Fund will make monthly distributions at the following rates:

Fixed Rate Distribution Series	Distribution Rate
A	4%
D	4%
F	4%
F8	8%
FB	4%
O	4%
PW	4%
PWFB	4%
PWT8	8%
PWX	4%
PWX8	8%
T8	8%

These fixed rate distributions will consist of net income to the extent of the Fund's allocation of net income to that series for that month, and any amount of the distribution that is in excess of the net income for that series will consist of return of capital. **You should not confuse these distributions with the Fund's rate of return or the yield of its portfolio.**

In addition, on Series AR and PWR, the Fund will make monthly distributions of net income. These distributions may be adjusted or discontinued at our discretion.

What Does the Fund Invest In?

Investment Objectives

The Fund seeks to provide investors with a diversified portfolio designed to provide capital growth and a steady stream of income with reduced volatility.

The Fund will pursue this objective by investing in other investment funds and/or by investing in securities directly to gain exposure to Canadian and foreign fixed-income and equity securities and other asset categories. It may also use derivatives.

Any change to the investment objectives must be approved by a majority of votes cast at a meeting of security holders held for that reason.

Investment Strategies

The strategic long-term asset mix may change in reaction to, or in anticipation of, market changes. However, it will generally be kept within the following ranges:

- 60-90% equity securities;
- 0-40% fixed-income securities.

In addition to fixed income and equity exposures, the Fund may also invest in alternative mutual funds.

The asset allocation portfolio manager will rebalance the percentage of the Fund invested in each asset class.

The Fund will gain exposure to fixed-income securities anywhere in the world, including sovereign debt securities that have an average credit quality of “BBB” or higher as rated by a recognized credit rating organization. The Fund’s fixed-income exposure may also include exposure to real return bonds or to fixed-income securities that are hedged against the risk that inflation presents to bond funds.

The Fund will gain exposure to equities anywhere in the world by employing a variety of investment styles, specializations and geographic focuses. It seeks exposure to equities that provide a higher dividend yield compared to the broad global equity market.

The Fund may, directly or indirectly through investments in other mutual funds, use derivative instruments to reduce overall volatility with a focus on mitigating downside risk. For example, the Fund may employ a collar strategy which involves buying put options and selling call options. Buying put options mitigates negative returns during down markets, while selling call options typically pays for a portion of the put option cost and mitigates negative returns through the collection of premiums, but also limits the upside return potential of the Fund. The Fund will employ a flexible approach to its use of derivative instruments, and has the ability to opportunistically use options, swaps, futures and forward contracts for hedging or non-hedging purposes under different market conditions. The Fund may use derivative instruments where the underlying interest of the derivative is an ETF.

Generally, the Fund will obtain exposure to these securities primarily by investing in other investment funds, including ETFs, which may be managed by us, in accordance with its investment objectives. For more information see the “Fund of Funds” disclosure under “Fees and Expenses”.

The Fund may hold cash and/or short-term debt securities in anticipation of, or in response to, unfavourable market conditions; and/or for liquidity purposes.

The Fund considers material environmental, social and/or governance factors in its investment evaluation process.

In accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described in the “Introduction to Part B – What Does the Fund Invest In?” section of this simplified prospectus, the Fund may

- in addition to the derivatives use described above, use derivatives for other hedging and non-hedging purposes;
- engage in securities lending, repurchase and reverse repurchase transactions;
- engage in short selling (the portfolio manager does not currently engage in short selling but may do so in the future without further notice to investors); and
- invest in gold and silver, and other instruments (such as derivatives and ETFs) that provide exposure to these metals.

If the Fund employs any of these strategies, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

What are the Risks of Investing in the Fund?

This Fund invests in a combination of equity and fixed-income securities, which subjects the Fund to market risk. This combination subjects the Fund to a variety of risks inherent in both types of investments. Any indirect investment in securities may subject the Fund to tracking risk. The Fund will make extensive use of derivatives and is also subject to derivatives risk. Since the Fund invests outside of Canada, it is subject to foreign markets risk and foreign currency risk. What Does the Fund Invest In?

Investment Objectives

The Fund seeks to generate above-average income with potential for long-term capital growth by investing primarily in higher yielding fixed-income securities of corporate issuers.

Any proposed change in the fundamental investment objectives of the Fund must be approved by a majority of the votes cast at a meeting of the Fund's investors called for that purpose.

Investment Strategies

The Fund will generally invest more than 40% of its assets in fixed income securities that have a credit rating below "BBB-" as rated by a recognized credit rating organization and may invest in unrated debt instruments. Where securities have a lower credit quality, a bottom-up approach including an analysis of business, cash flows and recovery value will also be used to value the opportunity. In addition, the Fund may invest a portion of its assets, which from time to time could be material, in investment-grade fixed-income securities.

The Fund may also invest in mortgage- and asset-backed securities, preferred shares, convertible securities and floating-rate debt instruments such as leveraged loans. These floating-rate debt instruments are generally below investment grade and pay interest at rates that are variable or reset periodically at a margin above a

recognized base lending rate such as the prime rate or Secured Overnight Financing Rate (SOFR) or any applicable Alternative Replacement Rate (ARR).

The portfolio manager may vary the weighted average credit quality of the Fund from time to time, but the average credit quality is expected to remain below investment grade.

The investment approach follows a fundamental analysis to identify, select and monitor investments, by reviewing the values of individual securities on an ongoing basis, paying particular attention to credit quality. The Fund seeks to diversify the portfolio by industry sector, size of issuer and credit rating.

A portion of the Fund may be invested in debt securities issued or guaranteed by governments or their agencies.

Generally, the Fund will not invest more than 10% of its assets in equity securities, in addition to any preferred shares it may hold.

The Fund may hold cash and/or short-term debt securities in anticipation of, or in response to, unfavourable market conditions; and/or for liquidity purposes.

The Fund considers material environmental, social and/or governance factors in its investment evaluation process.

The Fund may hold a portion of its net assets in securities of other investment funds, including ETFs, which may be managed by us, in accordance with its investment objectives. For more information see the "Fund of Funds" disclosure under "Fees and Expenses".

The Fund may invest up to 10% of its net assets in illiquid assets, measured at the time of investment, which may include securities of a Private Vehicle offered by Northleaf and/or Sagard.

In accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described in the "Introduction to Part B – What Does the Fund Invest In?" section of this simplified prospectus, the Fund may

- use derivatives for hedging and non-hedging purposes;
- engage in securities lending, repurchase and reverse repurchase transactions;
- engage in short selling (the portfolio manager does not currently engage in short selling but may do so in the future without further notice to investors); and
- invest in gold and silver, and other instruments (such as derivatives and ETFs) that provide exposure to these metals.

If the Fund employs any of these strategies, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

What are the Risks of Investing in the Fund?

This Fund invests in fixed-income securities, which subjects the Fund to market risk. Fixed-income securities are subject to company risk, credit risk, interest rate risk, and prepayment risk. Since the Fund invests outside of Canada, it is subject to foreign markets risk and to a lesser extent foreign currency risk. These and other risks

are described starting on page 1. The following table shows which risks apply to this Fund:

Risk Checklist

* This risk applies only to the Fixed Rate Distribution Series.

As of September 3, 2021, four securityholders held 18.19%, 11.14%, 11.07% and 10.78% of the Fund by market value. **This may subject the Fund to Large Transaction risk.**

Who Should Invest in this Fund?

You should consider this Fund if you

- are looking for a low- to medium-risk, North American fixed-income fund to hold as part of your portfolio,
- want a medium-term investment,
- can handle the volatility of bond markets.

You should consider the Fund's Fixed Rate Distribution Series if you want to receive a monthly cash flow.

Distribution Policy

Refer to the "Introduction to Part B – Distribution Policy" section of this simplified prospectus.

On its Fixed Rate Distribution Series, the Fund will make monthly distributions at the following rates:

Fixed Rate Distribution Series	Distribution Rate
F5	5%
PWT5	5%
S5	5%
T5	5%

These fixed rate distributions will consist of net income to the extent of the Fund's allocation of net income to that series for that month, and any amount of the distribution that is in excess of the net income for that series will consist of return of capital. **You should not confuse these distributions with the Fund's rate of return or the yield of its portfolio.**

In addition, on its non-Fixed Rate Distribution Series, the Fund will make monthly distributions of net income. These distributions may be adjusted or discontinued at our discretion. **You must inform us if you wish to receive these distributions in cash, otherwise they will be reinvested, without charge, in additional securities of the series on which they were paid.** You may not elect to receive these distributions in cash if your securities are held in a Mackenzie Investments-administered registered plan, unless that registered plan is a TFSA, in which case you may elect to have these distributions paid from the TFSA.

Fund Expenses Indirectly Borne by Investors

What Does the Fund Invest In?

Investment Objectives

The Pool seeks to provide investors with long-term capital appreciation by investing mainly in Canadian equity securities. Investments in Canadian issuers will constitute the majority of the Pool's invested portfolio.

The Pool will pursue this objective by investing in securities directly and/or by investing in other mutual funds.

Any change to the investment objectives must be approved by a majority of votes cast at a meeting of security holders held for that reason.

Investment Strategies

The Pool will invest in a diversified portfolio of Canadian and foreign equity securities.

The Pool uses a multi-manager investment strategy, employing multiple portfolio management teams to manage its investments.

The asset allocation portfolio manager constructs the Pool based on long-term strategic allocations to different equity markets and other asset classes. The Pool may be allocated tactically over the short-to medium-term based on changes to the market outlook and risk assessment for each asset class. In determining manager allocations, the asset allocation manager employs a thorough manager evaluation process.

The Pool will seek to diversify its equity holdings in terms of one or more of these factors:

- geographic exposure
- sector exposure,
- company market capitalization
- portfolio manager style

As a result of this diversification, the Pool may have exposure to securities issued by companies of any size and governments located anywhere in the world, including emerging markets.

Generally, the Pool will not invest more than 49% of its assets in foreign securities.

The Pool seeks to manage currency exposure on a total portfolio basis through the use of derivatives or foreign currency cash holdings. This means that the asset allocation portfolio manager will take into account the Pool's overall currency exposure across all of its holdings.

The Pool will obtain exposure to equity securities and other asset categories primarily by investing in other funds, including ETFs, which may be managed by us, in accordance with its investment objectives. For more information, see the "Fund of Funds" disclosure under "Fees and Expenses".

The Pool may hold cash and/or short-term debt securities in anticipation of, or in response to, unfavourable market conditions; and/or for liquidity purposes.

The Pool considers material environmental, social and/or governance factors in its investment evaluation process.

In accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described in the "Introduction to Part B – What Does the Fund Invest In?" section of this simplified prospectus, the Pool may

- use derivatives for hedging and non-hedging purposes;
- engage in securities lending, repurchase and reverse repurchase transactions;
- engage in short selling (the portfolio manager does not currently engage in short selling but may do so in the future without further notice to investors); and
- invest in gold and silver, and other instruments (such as derivatives and ETFs) that provide exposure to these metals.

If the Pool employs any of these strategies, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

What are the Risks of Investing in the Fund?

This Pool invests in equities, which subjects the Pool to market risk. Equity securities are more volatile than other types of investments, such as fixed-income investments, and the Canadian economy is more dependent on a small number of industries than other global economies. The Pool invests a significant portion of its assets outside of Canada, which means that it is subject to foreign markets risk and foreign currency risk. This Pool invests in emerging market countries. Emerging market securities may be traded less frequently,

and price movements may be more volatile than in developed countries. These and other risks are described starting on page 1. The following table shows which risks apply to this Pool:

Who Should Invest in this Fund?

You should consider this Pool if you

- are looking for a low- to medium-risk, Canadian equity fund to hold as a key part of your portfolio,
- want a medium- to long-term investment,
- can handle the volatility of stock markets.

You should consider the Pool's Fixed Rate Distribution Series if you want to receive a monthly cash flow.

Distribution Policy

Refer to the "Introduction to Part B – Distribution Policy" section of this simplified prospectus.

On its Fixed Rate Distribution Series, the Pool will make monthly distributions at the following rates:

Fixed Rate Distribution Series	Distribution Rate
PWF5	5%
PWF8	8%
PWFB5	5%
PWT5	5%
PWT8	8%
PWX5	5%
PWX8	8%

These fixed rate distributions will consist of net income to the extent of the Fund's allocation of net income to that series for that month, and any amount of the distribution that is in excess of the net income for that series will consist of return of capital. **You should not confuse these distributions with the Fund's rate of return or the yield of its portfolio.**

Fund Expenses Indirectly Borne by Investors

Estimated cumulative expenses payable by each series of securities of the Pool for each \$1,000 investment (see "Introduction to Part B" for an explanation of the assumptions used in this example) for the time periods shown:

Series (\$)	For 1 Year	For 3 Years	For 5 Years	For 10 Years
Series O	0	0	0	0

What Does the Fund Invest In?

Investment Objectives

The Pool seeks to generate income with the potential for some long-term capital growth by investing primarily in fixed-income and income-oriented equity securities issued by companies or governments of any size, anywhere in the world.

The Pool will pursue this objective by investing in securities directly and/or by investing in other mutual funds.

Any change to the investment objectives must be approved by a majority of votes cast at a meeting of security holders held for that reason.

Investment Strategies

The Pool uses a multi-manager investment strategy, employing multiple portfolio management teams to manage its investments.

The Pool's asset mix will generally be kept within the following ranges:

- 20-40% equity securities;
- 50-80% fixed-income securities.

In addition to fixed income and equity exposures, the Fund may also invest in alternative mutual funds.

The asset allocation portfolio manager constructs the Pool based on upon long-term strategic allocations to different equity markets, fixed-income markets and other asset classes. The Pool will be allocated tactically over the short- to medium-term based on changes to the market outlook and risk assessment for each asset class. In determining manager allocations, the asset allocation manager employs a thorough manager evaluation process.

The Pool will seek to diversify its equity and fixed-income holdings in terms of one or more of these factors:

- geographic exposure
- sector exposure
- company market capitalization
- portfolio manager style
- credit quality
- duration

The Pool seeks to manage currency exposure on a total portfolio basis through the use of derivatives or foreign currency cash holdings. This means that the asset allocation portfolio manager will take into account the Pool's overall currency exposure across all of its holdings.

The Pool will obtain exposure to equity securities, fixed-income securities and other asset categories primarily by investing in other funds, including ETFs, which may be managed by us, in accordance with its investment objectives. For more information, see the "Fund of Funds" disclosure under "Fees and Expenses".

The Pool has obtained regulatory approval to invest up to 20% of its net assets, taken at market value at the time of purchase, in government and/or supranational agency-issued or guaranteed debt securities of any one issuer with a credit rating of "AA" or higher and, similarly, up to 35% of its net assets in government and/or supranational agency-issued or guaranteed debt securities of any one issuer with a credit rating of "AAA" or higher. These investments may increase the Pool's exposure to concentration risk, credit risk and foreign markets risk as described under "What are the General Risks of Investing in a Mutual Fund?". Please see the "Introduction to Part B – What Does the Fund Invest In?" section of this simplified prospectus for more details regarding this regulatory approval.

The Pool may hold cash and/or short-term debt securities in anticipation of, or in response to, unfavourable market conditions; and/or for liquidity purposes.

The Pool considers material environmental, social and/or governance factors in its investment evaluation process.

In accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described in the "Introduction to Part B – What Does the Fund Invest In?" section of this simplified prospectus, the Pool may

- use derivatives for hedging and non-hedging purposes;
- engage in securities lending, repurchase and reverse repurchase transactions;
- engage in short selling (the portfolio manager does not currently engage in short selling but may do so in the future without further notice to investors); and
- invest in gold and silver, and other instruments (such as derivatives and ETFs) that provide exposure to these metals.

If the Pool employs any of these strategies, it will do so in conjunction with its other investment strategies in a manner considered

appropriate to pursuing its investment objectives and enhancing its returns.

What are the Risks of Investing in the Fund?

This Pool invests in a combination of equity and fixed-income securities, which subjects the Pool to market risk. This combination subjects the Pool to a variety of risks inherent in both types of investments, including company risk, credit risk, interest rate risk, and prepayment risk. The Pool also invests a significant portion of its assets outside of Canada, which means that it is subject to foreign markets risk and foreign currency risk. These and other risks are described starting on page 1. The following table shows which risks apply to this Pool:

What Does the Fund Invest In?

Investment Objectives

The Pool seeks to provide investors with long-term capital appreciation by investing primarily in equity securities of international companies, including North American companies.

The Pool will pursue this objective by investing in securities directly and/or by investing in other mutual funds.

Any change to the investment objectives must be approved by a majority of votes cast at a meeting of security holders held for that reason.

Investment Strategies

The Pool will invest in a diversified portfolio of global equity securities.

The Pool uses a multi-manager investment strategy, employing multiple portfolio management teams to manage its investments.

The asset allocation portfolio manager constructs the Pool based on long-term strategic allocations to different equity markets and other asset classes. The Pool may be allocated tactically over the short-to medium-term based on changes to the market outlook and risk assessment for each asset class. In determining manager allocations, the asset allocation manager employs a thorough manager evaluation process.

The Pool will seek to diversify its equity holdings in terms of one or more of these factors:

- geographic exposure

- sector exposure
- company market capitalization
- portfolio manager style.

As a result of this diversification, the Pool may have exposure to securities issued by companies of any size and governments located anywhere in the world, including emerging markets.

The Pool seeks to manage currency exposure on a total portfolio basis through the use of derivatives or foreign currency cash holdings. This means that the asset allocation portfolio manager will take into account the Pool's overall currency exposure across all of its holdings.

The Pool will obtain exposure to equity securities and other asset categories primarily by investing in other funds, including ETFs, which may be managed by us, in accordance with its investment objectives. For more information, see the "Fund of Funds" disclosure under "Fees and Expenses".

The Pool may hold cash and/or short-term debt securities in anticipation of, or in response to, unfavourable market conditions; and/or for liquidity purposes.

The Pool considers material environmental, social and/or governance factors in its investment evaluation process.

Depending on market conditions, the portfolio manager's investment style may result in a higher portfolio turnover rate than less actively managed funds. Generally, the higher the Fund's portfolio turnover rate, the higher its trading expenses, and the higher the probability that you will receive a distribution of capital gains from the Fund, which may be taxable if you hold the Fund outside a registered plan. There is no proven relationship between a high turnover rate and the performance of a mutual fund.

In accordance with applicable securities regulations or as permitted by the exemptions from these regulations described in the "Introduction to Part B – What Does the Fund Invest In?" section of this simplified prospectus, the Pool may

- use derivatives for hedging and non-hedging purposes;
- engage in securities lending, repurchase and reverse repurchase transactions;
- engage in short selling (the portfolio manager does not currently engage in short selling but may do so in the future without further notice to investors); and
- invest in gold and silver, and other instruments (such as derivatives and ETFs) that provide exposure to these metals.

If the Pool employs any of these strategies, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

What are the Risks of Investing in the Fund?

This Pool invests in global equity securities, which subjects the Pool to market risk. Equity securities are more volatile than other types of investments, such as fixed-income investments. The Pool invests a significant portion of its assets outside of Canada, which means

that it is subject to foreign markets risk and foreign currency risk. This Pool invests in emerging market countries and in small companies, which subjects the Pool to market risk. Emerging market securities may be traded less frequently, and price movements may be more volatile than in developed countries. Small companies are more volatile. These and other risks are described starting on page 1. The following table shows which risks apply to this Pool:

What Does the Fund Invest In?

Investment Objectives

The Pool seeks income with some emphasis on capital preservation by investing primarily in a diversified portfolio of fixed-income securities issued by companies or governments of any size, anywhere in the world.

The Pool will pursue this objective by investing in securities directly and/or by investing in other mutual funds.

Any change to the investment objectives must be approved by a majority of votes cast at a meeting of security holders held for that reason.

Investment Strategies

The Pool uses the full breadth of the fixed income portfolio management team to manage its investments.

The Pool's asset mix will include a diversified portfolio of global fixed-income securities, and will generally be kept within the following ranges:

- 60-100% investment-grade securities;
- 0-40% non-investment-grade securities.

The portfolio manager constructs the Pool based on long-term strategic allocations to different segments of the fixed income markets. The Pool will be allocated tactically over the short- to medium-term based on changes to the market outlook and risk assessment for each fixed income asset class.

The Pool has the flexibility to invest in a wide variety of assets from anywhere in the world including government bonds, corporate bonds, high-yield bonds, loans and securitized assets.

The Pool may invest in securities that have a credit rating below "BBB-", as rated by a recognized credit rating organization and may invest in unrated debt instruments. The portfolio manager will maintain a minimum average credit rating of "A-".

The Pool follows a value investment style. For high-quality government bonds an analysis of macroeconomic factors, such as economic growth, inflation, and monetary and fiscal policy, is done in order to position the maturity and credit quality of the portfolio for different stages in the business cycle. Securities that have a lower credit quality, such as corporate bonds, are analyzed using a bottom-up approach to determine their valuation. This company-specific analysis focuses on stability of cash flows and recovery value of the bonds.

The Pool's foreign currency exposure will be actively managed but is expected to be predominantly hedged back to the Canadian dollar for the majority of the time. The portfolio manager may hold some foreign currency positions based on their tactical outlook for valuations and macro trends. Unhedged currency positions may be held as a possible source of return generation or to add diversity to the portfolio.

The Pool's investments in fixed-income securities may include trust securities and other securities (including convertible bonds and warrants).

The Pool will obtain exposure to fixed-income securities and other asset categories primarily by investing in other funds, including ETFs, which may be managed by us, in accordance with its investment objectives. For more information, see the "Fund of Funds" disclosure under "Fees and Expenses".

The Pool has obtained regulatory approval to invest up to 20% of its net assets, taken at market value at the time of purchase, in government and/or supranational agency-issued or guaranteed debt securities of any one issuer with a credit rating of "AA" or higher and, similarly, up to 35% of its net assets in government and/or supranational agency-issued or guaranteed debt securities of any one issuer with a credit rating of "AAA" or higher. These investments may increase the Pool's exposure to "concentration risk, credit risk and foreign markets risk as described under "What are the General Risks of Investing in a Mutual Fund?". Please see the "Introduction to Part B – What Does the Fund Invest In?" section of this simplified prospectus for more details regarding this regulatory approval.

The Pool may hold cash and/or short-term debt securities in anticipation of, or in response to, unfavourable market conditions; and/or for liquidity purposes.

The Pool considers material environmental, social and/or governance factors in its investment evaluation process.

In accordance with applicable securities regulations or as permitted by the exemptions from these regulations described in the "Introduction to Part B – What Does the Fund Invest In?" section of this simplified prospectus, the Pool may

- use derivatives for hedging and non-hedging purposes;

- engage in securities lending, repurchase and reverse repurchase transactions;
- engage in short selling (the portfolio manager does not currently engage in short selling but may do so in the future without further notice to investors); and
- invest in gold and silver, and other instruments (such as derivatives and ETFs) that provide exposure to these metals.

If the Pool employs any of these strategies, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

What are the Risks of Investing in the Fund?

This Pool invests in fixed-income securities, which subjects the Pool to market risk. Fixed-income securities are subject to company risk, credit risk, interest rate risk, and prepayment risk. These and other risks are described starting on page 1. The following table shows which risks apply to this Pool:

* This risk applies only to the Fixed Rate Distribution Series.

As of September 3, 2021, one securityholder held 11.90% the Fund by market value. **This may subject the Fund to Large Transaction risk.**

Who Should Invest in this Fund?

You should consider this Pool if you

- are looking for a low-risk, global fixed-income fund to hold as part of your portfolio,
- want a short- to medium-term investment,
- can handle the volatility of bond markets.

You should consider the Pool's Fixed Rate Distribution Series if you want to receive a monthly cash flow.

What Does the Fund Invest In?

Investment Objectives

The Pool seeks to generate income with the potential for long-term capital growth by investing primarily in fixed-income and income-oriented equity securities issued by companies or governments of any size, anywhere in the world.

The Pool will pursue this objective by investing in securities directly and/or by investing in other mutual funds.

Any change to the investment objectives must be approved by a majority of votes cast at a meeting of security holders held for that reason.

Investment Strategies

The Pool uses a multi-manager investment strategy, employing multiple portfolio management teams to manage its investments.

The Pool's asset mix will generally be kept within the following ranges:

- 45-75% equity securities,
- 15-55% fixed-income securities.

In addition to fixed income and equity exposures, the Fund may also invest in alternative mutual funds.

The asset allocation portfolio manager constructs the Pool based on upon long-term strategic allocations to different equity markets, fixed-income markets and other asset classes. The Pool will be allocated tactically over the short- to medium-term based on changes to the market outlook and risk assessment for each asset class. In determining manager allocations, the asset allocation manager employs a thorough manager evaluation process.

The Pool will seek to diversify its equity and fixed-income holdings in terms of one or more of these factors:

- geographic exposure
- sector exposure
- company market capitalization
- portfolio manager style
- credit quality
- duration

The Pool seeks to manage currency exposure on a total portfolio basis through the use of derivatives or foreign currency cash holdings. This means that the asset allocation portfolio manager will take into account the Pool's overall currency exposure across all of its holdings.

The Pool will obtain exposure to equity securities, fixed-income securities and other asset categories primarily by investing in other funds, including ETFs, which may be managed by us, in accordance with its investment objectives. For more information, see the "Fund of Funds" disclosure under "Fees and Expenses".

The Pool has obtained regulatory approval to invest up to 20% of its net assets, taken at market value at the time of purchase, in government and/or supranational agency-issued or guaranteed debt securities of any one issuer with a credit rating of "AA" or higher and, similarly, up to 35% of its net assets in government and/or supranational agency-issued or guaranteed debt securities of any one issuer with a credit rating of "AAA" or higher. These investments may increase the Pool's exposure to concentration risk, credit risk and foreign markets risk as described under "What are the General Risks of Investing in a Mutual Fund?". Please see the "Introduction to Part B – What Does the Fund Invest In?" section of this simplified prospectus for more details regarding this regulatory approval.

The Pool may hold cash and/or short-term debt securities in anticipation of, or in response to, unfavourable market conditions; and/or for liquidity purposes.

The Pool considers material environmental, social and/or governance factors in its investment evaluation process.

In accordance with applicable securities regulations or as permitted by the exemptions from these regulations described in the "Introduction to Part B – What Does the Fund Invest In?" section of this simplified prospectus, the Pool may

- use derivatives for hedging and non-hedging purposes;
- engage in securities lending, repurchase and reverse repurchase transactions;
- engage in short selling (the portfolio manager does not currently engage in short selling but may do so in the future without further notice to investors); and
- invest in gold and silver, and other instruments (such as derivatives and ETFs) that provide exposure to these metals.

If the Pool employs any of these strategies, it will do so in conjunction with its other investment strategies in a manner considered

appropriate to pursuing its investment objectives and enhancing its returns.

What are the Risks of Investing in the Fund?

This Pool invests in a combination of equity and fixed-income securities, which subjects the Pool to market risk. This combination subjects the Pool to a variety of risks inherent in both types of investments, including company risk, credit risk, interest rate risk, and prepayment risk. The Pool also invests a significant portion of its assets outside of Canada, which means that it is subject to foreign markets risk and foreign currency risk. These and other risks are described starting on page 1. The following table shows which risks apply to this Pool:

Who Should Invest in this Fund?

You should consider this Pool if you

- are looking for a low- to medium-risk, global income-oriented balanced fund to hold as a key part of your portfolio,
- want a medium-term investment,
- can handle the volatility of stock and bond markets.

You should consider the Pool's Fixed Rate Distribution Series if you want to receive a monthly cash flow.

Distribution Policy

Refer to the "Introduction to Part B – Distribution Policy" section of this simplified prospectus.

On its Fixed Rate Distribution Series, the Pool will make monthly distributions at the following rates:

Fixed Rate Distribution Series	Distribution Rate
O	4%
PW	4%
PWF	4%
PWF8	8%
PWFB	4%
PWT8	8%
PWX	4%
PWX8	8%

These fixed rate distributions will consist of net income to the extent of the Fund's allocation of net income to that series for that month, and any amount of the distribution that is in excess of the net income for that series will consist of return of capital. **You should not confuse these distributions with the Fund's rate of return or the yield of its portfolio.**

Fund Expenses Indirectly Borne by Investors

Estimated cumulative expenses payable by each series of securities of the Pool for each \$1,000 investment (see “**Introduction to Part B**” for an explanation of the assumptions used in this example) for the time periods shown:

Series (\$)	For 1 Year	For 3 Years	For 5 Years	For 10 Years
Series O	0	0	0	0
Series PW	20	64	113	257
Series PWF	9	29	50	114
Series PWF8	9	29	51	117

Series (\$)	For 1 Year	For 3 Years	For 5 Years	For 10 Years
Series PWFB	9	28	50	113
Series PWT8	21	65	115	261
Series PWX	0	0	0	0
Series PWX8	0	0	0	0

What Does the Fund Invest In?

Investment Objectives

The Pool seeks to generate income with the potential for long-term capital growth. The Pool invests mainly in a combination of Canadian fixed-income securities and income-oriented equity securities. Investments in Canadian issuers will constitute the majority of the Pool's invested portfolio.

The Pool will pursue this objective by investing in securities directly and/or by investing in other mutual funds.

Any change to the investment objectives must be approved by a majority of votes cast at a meeting of security holders held for that reason.

Investment Strategies

The Pool uses a multi-manager investment strategy, employing multiple portfolio management teams to manage its investments.

The Pool's asset mix will generally be kept within the following ranges:

- 45-75% equity securities,
- 15-55% fixed-income securities.

In addition to fixed income and equity exposures, the Fund may also invest in alternative mutual funds.

The asset allocation portfolio manager constructs the Pool based on upon long-term strategic allocations to different equity markets, fixed-income markets and other asset classes. The Pool will be allocated tactically over the short- to medium-term based on changes to the market outlook and risk assessment for each asset class. In determining manager allocations, the asset allocation manager employs a thorough manager evaluation process.

The Pool will seek to diversify its equity and fixed-income holdings in terms of one or more of these factors:

- geographic exposure
- sector exposure
- company market capitalization
- portfolio manager style
- credit quality
- duration

Generally, the Pool will not invest more than 45% of its assets in foreign securities.

The Pool's investments in fixed-income securities may include trust securities and other securities (including convertible bonds and warrants).

The Pool seeks to manage currency exposure on a total portfolio basis through the use of derivatives or foreign currency cash holdings. This means that the asset allocation portfolio manager will take into account the Pool's overall currency exposure across all of its holdings.

The Pool will obtain exposure to equity securities, fixed-income securities and other asset categories primarily by investing in other funds, including ETFs, which may be managed by us, in accordance with its investment objectives. For more information, see the "Fund of Funds" disclosure under "Fees and Expenses".

The Pool may hold cash and/or short-term debt securities in anticipation of, or in response to, unfavourable market conditions; and/or for liquidity purposes.

The Pool considers material environmental, social and/or governance factors in its investment evaluation process.

In accordance with applicable securities regulations or as permitted by the exemptions from these regulations described in the "Introduction to Part B – What Does the Fund Invest In?" section of this simplified prospectus, the Pool may

- use derivatives for hedging and non-hedging purposes;
- engage in securities lending, repurchase and reverse repurchase transactions; and
- engage in short selling (the portfolio manager does not currently engage in short selling but may do so in the future without further notice to investors); and
- invest in gold and silver, and other instruments (such as derivatives and ETFs) that provide exposure to these metals.

If the Pool employs any of these strategies, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

What are the Risks of Investing in the Fund?

This Pool invests in a combination of equity and fixed-income securities, which subjects the Pool to market risk. This combination

subjects the Pool to a variety of risks inherent in both types of investments, including company risk, credit risk, interest rate risk, and prepayment risk. The Pool also invests a significant portion of its assets outside of Canada, which means that it is subject to foreign markets risk and foreign currency risk. These and other risks are described starting on page 1. The following table shows which risks apply to this Pool:

What Does the Fund Invest In?

Investment Objectives

The Pool pursues long-term capital growth by investing primarily in a diversified portfolio of equity securities of U.S. companies.

The Pool will pursue this objective by investing in securities directly and/or by investing in other mutual funds.

Any change to the investment objectives must be approved by a majority of votes cast at a meeting of security holders held for that reason.

Investment Strategies

The Pool will invest in a diversified portfolio of US equity securities.

The Pool uses a multi-manager investment strategy, employing multiple portfolio management teams to manage its investments.

In determining manager allocations, the asset allocation manager employs a thorough manager evaluation process.

The Pool will seek to diversify its equity holdings in terms of one or more of these factors:

- sector exposure
- company market capitalization
- portfolio manager style

The Pool seeks to manage currency exposure on a total portfolio basis through the use of derivatives or foreign currency cash holdings. This means that the asset allocation portfolio manager will

take into account the Pool's overall currency exposure across all of its holdings.

The Pool may hold cash and/or short-term debt securities in anticipation of, or in response to, unfavourable market conditions; and/or for liquidity purposes.

The Pool considers material environmental, social and/or governance factors in its investment evaluation process.

Depending on market conditions, the portfolio manager's investment style may result in a higher portfolio turnover rate than less actively managed funds. Generally, the higher the Fund's portfolio turnover rate, the higher its trading expenses, and the higher the probability that you will receive a distribution of capital gains from the Fund, which may be taxable if you hold the Fund outside a registered plan. There is no proven relationship between a high turnover rate and the performance of a mutual fund.

The Pool will obtain exposure to equity securities and other asset categories primarily by investing in other funds, including ETFs, which may be managed by us, in accordance with its investment objectives. For more information, see the "Fund of Funds" disclosure under "Fees and Expenses".

In accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described in the "Introduction to Part B – What Does the Fund Invest In?" section of this simplified prospectus, the Pool may

- use derivatives for hedging and non-hedging purposes;
- engage in securities lending, repurchase and reverse repurchase transactions;
- engage in short selling (the portfolio manager does not currently engage in short selling but may do so in the future without further notice to investors); and
- invest in gold and silver, and other instruments (such as derivatives and ETFs) that provide exposure to these metals.

If the Pool employs any of these strategies, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

What are the Risks of Investing in the Fund?

This Pool invests in U.S. equities, which subjects the Pool to market risk. Equity securities are more volatile than other types of investments, such as fixed-income investments. The Pool may also invest a portion of its assets outside of Canada, which means that it is subject to foreign markets risk and foreign currency risk. These and other risks are described starting on page 1. The following table shows which risks apply to this Pool:

Risk Checklist

Who Should Invest in this Fund?

You should consider this Pool if you

- are looking for a medium-risk, U.S. equity fund to hold as a key part of your portfolio,

- want a medium to long-term investment,
- can handle the volatility of stock markets.

You should consider the Pool's Fixed Rate Distribution Series if you want to receive a monthly cash flow.

Distribution Policy

Refer to the "Introduction to Part B – Distribution Policy" section of this simplified prospectus.

On its Fixed Rate Distribution Series, the Pool will make monthly distributions at the following rates:

Fixed Rate Distribution Series	Distribution Rate
PWF5	5%
PWF8	8%
PWFB5	5%
PWT5	5%
PWT8	8%
PWX5	5%
PWX8	8%

These fixed rate distributions will consist of net income to the extent of the Fund's allocation of net income to that series for that month, and any amount of the distribution that is in excess of the net income for that series will consist of return of capital. **You should not confuse these distributions with the Fund's rate of return or the yield of its portfolio.**

Fund Expenses Indirectly Borne by Investors

What Does the Fund Invest In?

Investment Objectives

The Fund seeks to provide a steady flow of income by investing primarily in Canadian government and corporate fixed-income instruments and asset-backed securities with maturities of more than one year.

Preservation of capital is an important factor in the selection of portfolio investments.

Any proposed change in the fundamental investment objectives of the Fund must be approved by a majority of the votes cast at a meeting of the Fund's investors called for that purpose.

Investment Strategies

The Fund may invest up to 25% of its assets in securities that have a credit rating below "BBB-" as rated by a recognized credit rating organization and intends to maintain an average credit rating of "BBB-" or higher. The Fund may also invest in unrated debt instruments and preferred shares.

Portfolio maturities are adjusted to take advantage of different stages in the economic cycle: longer maturities will be used when interest rates are low or falling and shorter maturities will be used in periods of high or rising rates. The portfolio manager's ability to select appropriate maturities to adjust to interest rate changes, along with other yield enhancement strategies, will have a significant effect on Fund performance.

The investment approach follows a value investment style. For high-quality bonds an analysis of macroeconomic factors such as economic growth, inflation, and monetary and fiscal policy is done in order to position the maturity and credit quality of the portfolio for different stages in the economic cycle. Securities that typically have a lower credit quality, such as high-yield debt securities, are analyzed using a bottom-up approach to assess their valuation. This company-specific analysis focuses on stability of cash flows and recovery value of the debt instruments.

Generally, the Fund will not invest more than 30% of its assets in foreign securities.

The Fund may hold cash and/or short-term debt securities in anticipation of, or in response to, unfavourable market conditions; and/or for liquidity purposes.

The Fund considers material environmental, social and/or governance factors in its investment evaluation process.

Depending on market conditions, the portfolio manager's investment style may result in a higher portfolio turnover rate than less actively managed funds. Although generally the higher the Fund's portfolio turnover rate, the higher its trading expenses, in the case of this Fund, which holds fixed-income products that are traded over the counter (rather than on an exchange), there may be situations where increased turnover actually reduces trading costs. The higher the portfolio turnover rate the greater the probability that you will receive a distribution of capital gains from the Fund, which may be taxable if you hold the Fund outside a registered plan. There is no proven relationship between a high turnover rate and the performance of a mutual fund.

The Fund may hold a portion of its net assets in securities of other investment funds, including ETFs, which may be managed by us, in accordance with its investment objectives. For more information see the "Fund of Funds" disclosure under "Fees and Expenses".

The Fund may invest up to 10% of its net assets in illiquid assets, measured at the time of investment, which may include securities of a Private Vehicle offered by Northleaf and/or Sagard.

In accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described in the "Introduction to Part B – What Does the Fund Invest In?" section of this simplified prospectus, the Fund may

- use derivatives for hedging and non-hedging purposes;
- engage in securities lending, repurchase and reverse repurchase transactions;
- engage in short selling (the portfolio manager does not currently engage in short selling but may do so in the future without further notice to investors); and
- invest in gold and silver, and other instruments (such as derivatives and ETFs) that provide exposure to these metals.

If the Fund employs any of these strategies, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

What are the Risks of Investing in the Fund?

This Fund invests in fixed-income securities and other debt instruments, which subjects the Fund to market risk. These instruments are subject to company risk, credit risk, interest rate risk, and prepayment risk. These and other risks are described starting on page 1. The following table shows which risks apply to this Fund.

* This risk applies only to the Fixed Rate Distribution Series.

As of September 3, 2021, one securityholder held 14.54% of the Fund by market value. **This may subject the Fund to Large Transaction risk.**

Who Should Invest in this Fund?

You should consider this Fund if you

- are looking for a low risk, Canadian bond fund to hold as part of your portfolio
- want a short- to medium-term investment
- are looking to diversify your fixed-income holdings
- can handle the volatility of bond markets.

You should consider the Fund's Fixed Rate Distribution Series if you want to receive a monthly cash flow.

Distribution Policy

Refer to the "Introduction to Part B – Distribution Policy" section of this simplified prospectus.

On its Fixed Rate Distribution Series, the Fund will make monthly distributions at the following rates:

Fixed Rate Distribution Series	Distribution Rate
F5	5%
PWT5	5%
S5	5%
T5	5%

These fixed rate distributions will consist of net income to the extent of the Fund's allocation of net income to that series for that month, and any amount of the distribution that is in excess of the net income for that series will consist of return of capital. **You should not confuse these distributions with the Fund's rate of return or the yield of its portfolio.**

In addition, on its non-Fixed Rate Distribution Series, the Fund will make monthly distributions of net income. These distributions may be adjusted or discontinued at our discretion. **You must inform us if you wish to receive these distributions in cash, otherwise they will be reinvested, without charge, in additional securities of the series on which they were paid.** You may not elect to receive these distributions in cash if your securities are held in a Mackenzie Investments-administered registered plan, unless that registered plan is a TFSA, in which case you may elect to have these distributions paid from the TFSA.

Fund Expenses Indirectly Borne by Investors

Estimated cumulative expenses payable by each series of securities of the Fund for each \$1,000 investment (see “**Introduction to Part B**” for an explanation of the assumptions used in this example) for the time periods shown:

What Does the Fund Invest In?

Investment Objectives

The Fund seeks income with the potential for long-term capital growth by investing primarily in fixed-income and/or income-oriented equity securities.

Any change to the fundamental investment objectives must be approved by a majority of votes cast at a meeting of investors held for that reason.

Investment Strategies

The Fund will pursue a flexible approach to investing in fixed-income and/or equity asset classes anywhere in the world. Currently, it invests primarily in North America. The Fund will generally invest 30% to 70% of its assets in any one asset class, but it may invest 0% to 100% of its assets in any one asset class. Allocations between asset classes are based on economic conditions and/or the portfolio managers' assessment of relative valuations.

The Fund's investments in Canadian or U.S. dollar denominated corporate bonds are generally expected to have a weighted average credit quality of "BB" or higher, as rated by a recognized credit rating organization.

The investment approach follows a fundamental analysis to identify, select and monitor investments, by performing industry analysis and

specific company analysis, including reviewing financial statements and other relevant factors.

Fixed-income investments may include, but are not limited to, fixed-income securities, corporate bonds (investment-grade and non-investment-grade), convertible bonds, and/or government bonds.

Income-oriented equity securities in which the Fund may invest may include, but are not limited to, dividend-paying common shares, preferred shares and convertible preferred shares and trusts (including income trusts, business trusts, real estate investment trusts (REITs), royalty and resource trusts, utilities and infrastructure trusts).

The Fund has obtained regulatory approval to invest up to 20% of the proportion of its net assets then invested in evidences of indebtedness, taken at market value at the time of purchase, in government-issued or guaranteed debt securities of any one issuer with a credit rating of "AA" or higher and, similarly, up to 35% of the proportion of its net assets then invested in evidences of indebtedness, taken at market value at the time of purchase, in government issued or guaranteed debt securities of any one issuer with a credit rating of "AAA" or higher. Please see the "Introduction to Part B – What Does the Fund Invest In?" section of this simplified prospectus for more details.

The Fund may hold cash and/or short-term debt securities in anticipation of, or in response to, unfavourable market conditions; and/or for liquidity purposes.

The Fund considers material environmental, social and/or governance factors in its investment evaluation process.

The Fund may hold a portion of its net assets in securities of other investment funds, including ETFs, which may be managed by us, in accordance with its investment objectives. For more information see the "Fund of Funds" disclosure under "Fees and Expenses".

The Fund may invest up to 10% of its net assets in illiquid assets, measured at the time of investment, which may include securities of a Private Vehicle offered by Northleaf and/or Sagard.

In accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described in the "Introduction to Part B – What Does the Fund Invest In?" section of this simplified prospectus, the Fund may

- use derivatives for hedging and non-hedging purposes;
- engage in securities lending, repurchase and reverse repurchase transactions;
- engage in short selling (the portfolio manager does not currently engage in short selling but may do so in the future without further notice to investors); and
- invest in gold and silver, and other instruments (such as derivatives and ETFs) that provide exposure to these metals.

If the Fund employs any of these strategies, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

What are the Risks of Investing in the Fund?

This Fund invests in a combination of equity and fixed-income securities, which subjects the Fund to market risk. This combination subjects the Fund to a variety of risks inherent in both types of investments, including company risk, credit risk, interest rate risk, and prepayment risk. Since the Fund invests outside of Canada, it is subject to foreign markets risk and foreign currency risk. These and other risks are described starting on page 1. The following table shows which risks apply to this Fund:

Who Should Invest in this Fund?

You should consider this Fund if you

- are looking for a low- to medium-risk, income-oriented global balanced fund to hold as part of your portfolio,
- want a medium-term investment,
- can handle the volatility of stock and bond markets.

You should consider the Fund's Fixed Rate Distribution Series if you want to receive a monthly cash flow.

Distribution Policy

Refer to the "Introduction to Part B – Distribution Policy" section of this simplified prospectus.

On its Fixed Rate Distribution Series, the Fund will make monthly distributions at the following rates:

Fixed Rate Distribution Series	Distribution Rate
A	5%
D	5%
F	5%
F8	8%
FB	5%
O	5%
PW	5%
PWFB	5%
PWT8	8%
PWX	5%
PWX8	8%
T8	8%

These fixed rate distributions will consist of net income to the extent of the Fund's allocation of net income to that series for that month, and any amount of the distribution that is in excess of the net income for that series will consist of return of capital. **You should not confuse these distributions with the Fund's rate of return or the yield of its portfolio.**

In addition, on Series AR, B, PWR and PWB, the Fund will make monthly distributions of net income. **These distributions may be adjusted or discontinued at our discretion. You should not confuse these distribution rates with the Fund's rate of return or the yield of its portfolio. You must inform us if you wish to receive these distributions in cash, otherwise they will be reinvested, without charge, in additional securities of the series on which they were paid.** You may not elect to receive these distributions in cash if your securities are held in a Mackenzie Investments-administered registered plan, unless that registered plan is a TFSA, in which case you may elect to have these distributions paid from the TFSA.

Fund Expenses Indirectly Borne by Investors

Estimated cumulative expenses payable by each series of securities of the Fund for each \$1,000 investment (see "Introduction to Part B" for an explanation of the assumptions used in this example) for the time periods shown:

* A Fixed Rate Distribution Series.

What Does the Fund Invest In?

Investment Objectives

The Fund aims to provide a positive total return over a market cycle, regardless of market conditions, by investing primarily in fixed-income securities of issuers anywhere in the world and derivative instruments.

Any change to the investment objectives must be approved by a majority of votes cast at a meeting of security holders held for that reason.

Investment Strategies

The Fund's investments may include investment-grade bonds; lower quality fixed-income investments, which may include instruments that have a weighted average credit quality below investment grade (rated below "BBB-" by a recognized credit rating organization) or that are unrated; mortgage- and asset-backed securities; preferred shares; floating-rate debt instruments and other floating securities. Floating rate debt instruments generally pay interest at rates that are variable or reset periodically at a margin above a generally recognized base lending rate such as the prime rate or the Secured Overnight Financing Rate (SOFR) or any Applicable Replacement Rate (ARR). The Fund is expected to hold a large portion of its assets in high-yield debt securities. The portfolio manager may vary the weighted average credit quality.

Generally, the Fund will not invest more than 5% of its assets in equity investments, in addition to any preferred shares it may hold.

The investment approach follows a macro and fundamental analysis to select investments for the Fund, by reviewing the values of the Fund's investments on an ongoing basis, paying particular attention to credit quality and interest rate risk.

The Fund will use equity and/or fixed-income derivative instruments to reduce overall volatility with a focus on mitigating downside risk. For example, the Fund may employ a collar strategy which involves buying put options and selling call options. Buying put options mitigates negative returns during down markets, while selling call options typically pays for a portion of the put option cost and mitigates negative returns through the collection of premiums, but also limits the upside return potential of the Fund. The Fund will employ a flexible approach to its use of derivative instruments, and has the ability to opportunistically use options, swaps, futures and forward contracts for hedging or non-hedging purposes under different market conditions. The Fund may use derivative instruments where the underlying interest of the derivative is an ETF.

The Fund may invest in all types of government and corporate fixed-income securities and instruments. It will employ a flexible approach, investing across various fixed-income credit ratings, duration, structures, sectors, currencies and countries, and may, at any time, invest a significant portion of its net assets in any one area noted above.

The Fund may hold cash and/or short-term debt securities in anticipation of, or in response to, unfavourable market conditions; and/or for liquidity purposes.

The Fund considers material environmental, social and/or governance factors in its investment evaluation process.

The Fund may hold a portion of its net assets in securities of other investment funds, including ETFs, which may be managed by us, in accordance with its investment objectives. For more information see the "Fund of Funds" disclosure under "Fees and Expenses".

The Fund may invest up to 10% of its net assets in illiquid assets, measured at the time of investment, which may include securities of a Private Vehicle offered by Northleaf and/or Sagard.

In accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described in the "Introduction to Part B – What Does the Fund Invest In?" section of this simplified prospectus, the Fund may

- in addition to the derivatives use described above, use derivatives for other hedging and non-hedging purposes;
- engage in securities lending, repurchase and reverse repurchase transactions;
- engage in short selling (the portfolio manager does not currently engage in short selling but may do so in the future without further notice to investors); and
- invest in gold and silver, and other instruments (such as derivatives and ETFs) that provide exposure to these metals.

If the Fund employs any of these strategies, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

What are the Risks of Investing in the Fund?

This Fund invests in fixed-income securities, which subjects the Fund to market risk. Fixed-income securities are subject to company risk, credit risk, interest rate risk, and prepayment risk. Since the Fund invests outside of Canada, it is subject to foreign markets risk and, to a lesser extent, foreign currency risk. The Fund will make extensive use of derivatives and is also subject to derivatives risk. These and other risks are described starting on page 1. The following table shows which risks apply to this Fund:

* This risk applies only to the Fixed Rate Distribution Series.

As of September 3, 2021, three securityholders held 11.68%, 16.25% and 10.51% of the Fund by market value. **This may subject the Fund to Large Transaction risk.**

Although the Fund's objective is to seek a positive total return regardless of market conditions over a market cycle, there is no guarantee the Fund will realize a positive return in any given year or over any time period.

Who Should Invest in this Fund?

You should consider this Fund if you

- are looking for a low-risk fund to hold as part of your portfolio,
- want a medium-term investment,
- are seeking an investment to diversify a traditional portfolio of fixed-income and equity investments,
- can handle the volatility of bond markets.

You should consider the Fund's Fixed Rate Distribution Series if you want to receive a monthly cash flow.

Distribution Policy

Refer to the "Introduction to Part B – Distribution Policy" section of this simplified prospectus.

On its Fixed Rate Distribution Series, the Fund will make monthly distributions at the following rates:

Fixed Rate Distribution Series	Distribution Rate
F8	8%
PWT8	8%
S8	8%
T8	8%

These fixed rate distributions will consist of net income to the extent of the Fund's allocation of net income to that series for that month, and any amount of the distribution that is in excess of the net income for that series will consist of return of capital. **You should not confuse these distributions with the Fund's rate of return or the yield of its portfolio.**

In addition, on its non-Fixed Rate Distribution Series, the Fund will make monthly distributions of net income. These distributions may be adjusted or discontinued at our discretion. **You must inform us if you wish to receive these distributions in cash, otherwise they**

will be reinvested, without charge, in additional securities of the series on which they were paid. You may not elect to receive these distributions in cash if your securities are held in a Mackenzie Investments-administered registered plan, unless that registered plan is a TFSA, in which case you may elect to have these distributions paid from the TFSA.

Fund Expenses Indirectly Borne by Investors

What Does the Fund Invest In?

Investment Objectives

The Fund seeks to achieve long-term growth of capital by investing primarily in common shares of U.S. companies of any size, from larger, well-established companies to smaller, emerging growth companies.

Any proposed change in the fundamental investment objectives of the Fund must be approved by a majority of the votes cast at a meeting of the Fund's investors called for that purpose.

Investment Strategies

The investment approach follows a growth investment style, by investing mainly in common stocks of U.S. companies of any size, with a focus on growth stocks. Growth stocks are issued by companies whose earnings are expected to grow faster than those of similar firms, and whose business growth and other characteristics may lead to an increase in stock price. Among other factors, a company's valuation, financial strength, growth potential, competitive position in its industry, projected future earnings, cash

flows and dividends are considered when deciding whether to buy or sell investments.

The Fund may invest up to 30% of its assets in securities of non-U.S. issuers.

The Fund may hold cash and/or short-term debt securities in anticipation of, or in response to, unfavourable market conditions; and/or for liquidity purposes.

The Fund considers material environmental, social and/or governance factors in its investment evaluation process.

Depending on market conditions, the portfolio manager's investment style may result in a higher portfolio turnover rate than less actively managed funds. Generally, the higher the Fund's portfolio turnover rate, the higher its trading expenses, and the higher the probability that you will receive a distribution of capital gains from the Fund, which may be taxable if you hold the Fund outside a registered plan. There is no proven relationship between a high turnover rate and the performance of a mutual fund.

The Fund may hold a portion of its net assets in securities of other investment funds, including ETFs, which may be managed by us, in accordance with its investment objectives. For more information see the "Fund of Funds" disclosure under "Fees and Expenses".

In accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described in the "Introduction to Part B – What Does the Fund Invest In?" section of this simplified prospectus, the Fund may

- use derivatives for hedging and non-hedging purposes;
- engage in securities lending, repurchase and reverse repurchase transactions;
- engage in short selling (the portfolio manager does not currently engage in short selling but may do so in the future without further notice to investors); and
- invest in gold and silver, and other instruments (such as derivatives and ETFs) that provide exposure to these metals.

If the Fund employs any of these strategies, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

What are the Risks of Investing in the Fund?

This Fund invests in U.S. equities, which subjects the Fund to market risk. Equity securities are more volatile than other types of investments. Since the Fund invests outside of Canada, it is subject to foreign markets risk and foreign currency risk. These and other risks are described starting on page 1. The following table shows which risks apply to this Fund:

Who Should Invest in this Fund?

You may not purchase securities using the U.S. Dollar Settlement Option if you hold these securities within a Mackenzie Investments-administered registered plan.

You should consider this Fund if you

- are looking for a medium-risk, U.S. equity fund to hold as part of your portfolio,
- want a medium- to long-term investment,
- can handle the volatility of stock markets.

You should consider the Fund's Fixed Rate Distribution Series if you want to receive a monthly cash flow.

Distribution Policy

Refer to the "Introduction to Part B – Distribution Policy" section of this simplified prospectus.

On its Fixed Rate Distribution Series, the Fund will make monthly distributions at the following rates:

Fixed Rate Distribution Series	Distribution Rate
F5	5%
F8	8%
FB5	5%
PWFB5	5%
PWT5	5%
PWT8	8%
PWX8	8%
T5	5%
T8	8%

These fixed rate distributions will consist of net income to the extent of the Fund's allocation of net income to that series for that month, and any amount of the distribution that is in excess of the net income for that series will consist of return of capital. **You should not confuse these distributions with the Fund's rate of return or the yield of its portfolio.**

Fund Expenses Indirectly Borne by Investors

What Does the Fund Invest In?

Investment Objectives

The Fund seeks long-term capital growth and current income by investing primarily in U.S. equity securities that pay, or may be expected to pay, dividends.

The Fund may also invest in other types of securities that distribute, or may be expected to distribute, income.

Any proposed change in the fundamental investment objectives of the Fund must be approved by a majority of the votes cast at a meeting of the Fund's investors called for that purpose.

Investment Strategies

The investment approach follows a disciplined investment process to construct a portfolio of attractively valued companies that combines above-average yield with the potential for growth. Stock selection is the primary contributor to value added, with attention paid to both upside potential and downside risk. Sector allocation is employed to manage overall portfolio risk.

As well as equity securities (including common shares and preferred shares), the Fund may invest in fixed-income securities, trust

securities (including income trusts, business trusts, real estate investment trusts, royalty and resource trusts, utilities trusts and infrastructure trusts) and other securities (including convertible bonds, and warrants).

The Fund may invest in securities of any capitalization size, although it is generally expected to invest in mid-and large-capitalization issuers, and it may invest in any sector of the economy.

The Fund may hold cash and/or short-term debt securities in anticipation of, or in response to, unfavourable market conditions; and/or for liquidity purposes.

The Fund considers material environmental, social and/or governance factors in its investment evaluation process.

Depending on market conditions, the portfolio manager's investment style may result in a higher portfolio turnover rate than less actively managed funds. Generally, the higher the Fund's portfolio turnover rate, the higher its trading expenses, and the higher the probability that you will receive a distribution of capital gains from the Fund, which may be taxable if you hold the Fund outside a registered plan. There is no proven relationship between a high turnover rate and the performance of a mutual fund.

The Fund may hold a portion of its net assets in securities of other investment funds, including ETFs, which may be managed by us, in accordance with its investment objectives. For more information see the "Fund of Funds" disclosure under "Fees and Expenses".

In accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described in the "Introduction to Part B – What Does the Fund Invest In?" section of this simplified prospectus, the Fund may

- use derivatives for hedging and non-hedging purposes;
- engage in securities lending, repurchase and reverse repurchase transactions;
- engage in short selling (the portfolio manager does not currently engage in short selling but may do so in the future without further notice to investors); and
- invest in gold and silver, and other instruments (such as derivatives and ETFs) that provide exposure to these metals.

If the Fund employs any of these strategies, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

What are the Risks of Investing in the Fund?

This Fund invests in U.S. equities, which subjects the Fund to market risk. Equity securities are more volatile than other types of investments, such as fixed-income investments. Since the Fund invests outside of Canada, it is subject to foreign markets risk and foreign currency risk. These and other risks are described starting on page 1. Who Should Invest in this Fund?

You should consider this Fund if you

- are looking for a medium-risk, U.S. equity fund that provides dividend income,
- want a medium- to long-term investment,
- can handle the volatility of stock markets.

You should consider the Fund's Fixed Rate Distribution Series if you want to receive a monthly cash flow.

You should not hold this Fund's securities within a DPSP, or a registered plan, whose plan holders are residents of Canada or the U.S. for tax purposes.

Distribution Policy

Refer to the "Introduction to Part B – Distribution Policy" section of this simplified prospectus.

On its Fixed Rate Distribution Series, the Fund will make monthly distributions at the following rates:

Fixed Rate Distribution Series	Distribution Rate
F5	5%
F8	8%
FB5	5%
PWFB5	5%
PWT5	5%
PWT8	8%
PWX8	8%
T5	5%
T8	8%

These fixed rate distributions will consist of net income to the extent of the Fund's allocation of net income to that series for that month, and any amount of the distribution that is in excess of the net income for that series will consist of return of capital. **You should not confuse these distributions with the Fund's rate of return or the yield of its portfolio.**

In addition, on its non-Fixed Rate Distribution Series, the Fund will make monthly distributions of net income. These distributions may be adjusted or discontinued at our discretion. **You must inform us if you wish to receive these distributions in cash, otherwise they will be reinvested, without charge, in additional securities of the series on which they were paid.** You may not elect to receive these distributions in cash if your securities are held in a Mackenzie Investments-administered registered plan, unless that registered plan is a TFSA, in which case you may elect to have these distributions paid from the TFSA.

Fund Expenses Indirectly Borne by Investors

What Does the Fund Invest In?

Investment Objectives

The Fund seeks to provide long-term capital growth and a reasonable rate of return by investing primarily in equity securities of mid-capitalization companies in the United States.

The Fund will pursue this objective by investing in securities directly and/or by investing in other investment funds.

The Fund seeks to eliminate substantially all of its foreign currency exposure.

Any proposed change in the fundamental investment objectives of the Fund must be approved by a majority of votes cast at meeting of Fund investors called for that purpose.

Investment Strategies

The Fund seeks companies with strong management, good growth prospects and attractive financial metrics. Emphasis is also placed on paying reasonable prices for the growth that companies in the portfolio are expected to achieve.

The Fund will primarily invest in mid-capitalization companies. A portion of the Fund also may be invested in small-cap companies and/or companies based outside of the United States.

The Fund will seek to hedge substantially all of its foreign currency exposure. However, the Fund's hedging activity may not precisely offset its foreign currency exposure at all times.

The Fund may also hold cash and/or short-term debt securities in anticipation of, or in response to, unfavourable market conditions; and/or for liquidity purposes.

The Fund considers material environmental, social and/or governance factors in its investment evaluation process.

Depending on market conditions, the portfolio manager's investment style may result in a higher portfolio turnover rate than less actively managed funds. Generally, the higher the Fund's portfolio turnover rate, the higher its trading expenses, and the higher the probability that you will receive a distribution of capital gains from the Fund, which may be taxable if you hold the Fund outside a registered plan. There is no proven relationship between a high turnover rate and the performance of a mutual fund.

The Fund may hold a portion of its net assets in securities of other investment funds, including ETFs, in accordance with its investment objectives. There will be no duplication of management fees, incentive fees or sales charges between the funds.

In accordance with applicable securities regulations or as permitted by the exemptions from these regulations and as further described in the **"Introduction to Part B – What Does the Fund Invest In?"** section of this simplified prospectus, the Fund may:

- use derivatives for hedging and non-hedging purposes;
- engage in securities lending, repurchase and reverse repurchase transactions;
- engage in short selling (the portfolio manager does not currently engage in short selling but may do so in the future without future notice to investors); and
- invest in gold and silver, and other instruments (such as derivatives and ETFs) that provide exposure to these metals.

If the Fund employs any of these strategies, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

What are the Risks of Investing in the Fund?

This Fund invests in U.S. equities, which subjects the Fund to market risk. Equity securities are more volatile than other types of investments, such as fixed-income investments. Since the Fund invests outside of Canada, it is subject to foreign markets risk and foreign currency risk. These and other risks are described on page 1. The following table shows which risks apply to this Fund:

Who Should Invest in this Fund?

You should consider this Fund if you

- are looking for a medium- to high-risk, currency-neutral, U.S. equity fund to hold as part of your portfolio,
- want a medium to long-term investment,
- can handle the ups and downs of stock markets.

You should consider the Fund's Fixed Rate Distribution Series if you want to receive a monthly cash flow.

Distribution Policy

Refer to the “**Introduction to Part B – Distribution Policy**” section of this simplified prospectus.

On its Fixed Rate Distribution Series, the Fund will make monthly distributions at the following rates:

Fixed Rate Distribution Series	Distribution Rate
F5	5%
F8	8%
FB5	5%
PWFB5	5%
PWT5	5%
PWT8	8%
PWX8	8%
T5	5%
T8	8%

These fixed rate distributions will generally consist of return of capital. **You should not confuse these distributions with the Fund's rate of return or the yield of its portfolio.**

Fund Expenses Indirectly Borne by Investors

Estimated cumulative expenses payable by each series of securities of the Fund for each \$1,000 investment (see “**Introduction to Part B**” for an explanation of the assumptions used in this example) for the time periods shown:

What Does the Fund Invest In?

Investment Objectives

The Fund seeks to provide long-term capital growth and a reasonable rate of return by investing primarily in equity securities of mid-capitalization companies in the United States.

The Fund will pursue this objective by investing in securities directly and/or by investing in other mutual funds.

Any proposed change in the fundamental investment objectives of the Fund must be approved by a majority of votes cast at meeting of Fund investors called for that purpose.

Investment Strategies

The Fund seeks companies with strong management, good growth prospects and attractive financial metrics. Emphasis is also placed on paying reasonable prices for the growth that companies in the portfolio are expected to achieve.

The Fund will primarily invest in mid-capitalization companies. A portion of the Fund also may be invested in small-cap companies and/or companies based outside of the United States.

The Fund may also hold cash and/or short-term debt securities in anticipation of, or in response to, unfavourable market conditions; and/or for liquidity purposes.

The Fund considers material environmental, social and/or governance factors in its investment evaluation process.

The Fund may hold a portion of its net assets in securities of other investment funds, including ETFs, in accordance with its investment objectives. There will be no duplication of management fees, incentive fees or sales charges between the funds.

In accordance with applicable securities regulations or as permitted by the exemptions from these regulations and as further described in the “**Introduction to Part B – What Does the Fund Invest In?**” section of this simplified prospectus, the Fund may:

- use derivatives for hedging and non-hedging purposes;
- engage in securities lending, repurchase and reverse repurchase transactions;
- engage in short selling (the portfolio manager does not currently engage in short selling but may do so in the future without future notice to investors); and
- invest in gold and silver, and other instruments (such as derivatives and ETFs) that provide exposure to these metals.

If the Fund employs any of these strategies, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

What are the Risks of Investing in the Fund?

This Fund invests in U.S. equities, which subjects the Fund to market risk. Equity securities are more volatile than other types of investments, such as fixed-income investments. Since the Fund invests outside of Canada, it is subject to foreign markets risk and foreign currency risk. These and other risks are described on page 1. As of September 3, 2021, one securityholder held 34.26% of the Fund by market value. **This may subject the Fund to Large Transaction risk.**

Who Should Invest in this Fund?

You should consider this Fund if you

- are looking for a medium-risk, U.S. equity fund to hold as part of your portfolio,
- want a medium to long-term investment,
- can handle the ups and downs of stock markets.

You should consider the Fund's Fixed Rate Distribution Series if you want to receive a monthly cash flow.

Distribution Policy

Refer to the "Introduction to Part B – Distribution Policy" section of this simplified prospectus.

On its Fixed Rate Distribution Series, the Fund will make monthly distributions at the following rates:

* A Fixed Rate Distribution Series.

What Does the Fund Invest In?

Investment Objectives

The Fund seeks income with the potential for long-term capital growth in U.S. dollars by investing primarily in fixed-income and/or income-oriented equity securities of issuers anywhere in the world.

Any change to the investment objectives must be approved by a majority of the votes cast at a meeting of security holders held for that reason.

Investment Strategies

The Fund will pursue a flexible approach to investing in fixed-income and/or equity asset classes anywhere in the world. The Fund will generally invest 30% to 70% of its assets in any one asset class but may invest 0% to 100% of its assets in any one asset class. Allocations between asset classes are based on economic conditions and/or the portfolio managers' assessment of relative valuations.

The Fund will employ a flexible approach to meet its fixed-income objectives, allocating assets across credit quality, yields, structures, sectors, currencies and countries. The Fund may invest up to 100% of its fixed-income exposure in any one sector and can invest in all types of fixed-income securities from around the world, including, but not limited to, high-yield corporate and government bonds, which are bonds that have a credit rating below investment grade (rated below "BBB-" by a recognized credit rating organization) and are sometimes non-rated, investment-grade corporate and government bonds, and floating-rate instruments.

The investment approach follows a fundamental analysis to identify, select and monitor investments, by performing industry analysis and specific company analysis, including reviewing financial statements and other relevant factors.

Income-oriented equity securities in which the Fund may invest may include, but are not limited to, dividend-paying common shares, preferred shares and convertible preferred shares and trusts (including income trusts, business trusts, real estate investment trusts ("REITs"), royalty and resource trusts, utilities and infrastructure trusts). Depending on market conditions, the Fund may also invest a portion of its assets in equity securities that are not income oriented.

Depending on the portfolio manager's currency outlook, the Fund's non-U.S. currency exposure may be hedged back to U.S. dollars. As of the date of this simplified prospectus, the portfolio manager expects to hedge substantially all of the Fund's non-U.S. currency exposure to U.S. dollars.

The Fund has obtained regulatory approval to invest up to 20% of its net assets, taken at market value at the time of purchase, in government or supranational agency-issued or guaranteed debt securities of any one issuer with a credit rating of "AA" or higher and, similarly, up to 35% of its net assets in government or supranational agency-issued or guaranteed debt securities of any one issuer with a credit rating of "AAA" or higher. These investments may increase the Fund's exposure to concentration risk, credit risk and foreign markets risk as described under "What are the General Risks of Investing in a Mutual Fund?". Please see the "Introduction to Part B – What Does the Fund Invest In?" section of this simplified prospectus for more details regarding this regulatory approval.

The Fund may hold cash and/or short-term debt securities in anticipation of, or in response to, unfavourable market conditions; and/or for liquidity purposes.

The Fund considers material environmental, social and/or governance factors in its investment evaluation process.

The Fund may invest up to 10% of its net assets in illiquid assets, measured at the time of investment, which may include securities of a Private Vehicle offered by Northleaf and/or Sagard.

In accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described in the "Introduction to Part B – What Does the Fund Invest In?" section of this simplified prospectus, the Fund may

- in addition to the derivatives use described above, use derivatives for other hedging and non-hedging purposes;
- engage in securities lending, repurchase and reverse repurchase transactions;
- engage in short selling (the portfolio manager does not currently engage in short selling but may do so in the future without further notice to investors); and
- invest in gold and silver, and other instruments (such as derivatives and ETFs) that provide exposure to these metals.

If the Fund employs any of these strategies, it will do so in conjunction with its other investment strategies in a manner

considered appropriate to pursuing its investment objectives and enhancing its returns.

What are the Risks of Investing in the Fund?

This Fund invests in a combination of equity and fixed-income securities, which subjects the Fund to market risk. This combination subjects the Fund to a variety of risks inherent in both types of investments, including company risk, credit risk, interest rate risk, and prepayment risk. Since the Fund invests outside of Canada, it is subject to foreign markets risk and to a lesser extent, foreign currency risk. These and other risks are described starting on page 1. The following table shows which risks apply to this Fund:

Who Should Invest in this Fund?

You may not purchase securities of this Fund if you hold these securities within a Mackenzie Investments-administered registered plan.

You should consider this Fund if you

- are looking for a low- to medium-risk, U.S.-dollar denominated global balanced fund to hold as part of your portfolio,
- want a short- to medium-term investment,
- can handle the volatility of stock and bond markets.

You should consider the Fund's Fixed Rate Distribution Series if you want to receive a monthly cash flow.

Distribution Policy

Refer to the “Introduction to Part B – Distribution Policy” section of this simplified prospectus.

On its Fixed Rate Distribution Series, the Fund will make monthly distributions at the following rates:

Fixed Rate Distribution Series	Distribution Rate
A	5%
D	5%
F	5%
F8	8%
FB	5%
PW	5%
PWFB	5%
PWT8	8%
PWX	5%
PWX8	8%
T8	8%

These fixed rate distributions will consist of net income to the extent of the Fund's allocation of net income to that series for that month, and any amount of the distribution that is in excess of the net income for that series will consist of return of capital. **You should not**

confuse these distributions with the Fund's rate of return or the yield of its portfolio.

Fund Expenses Indirectly Borne by Investors (U.S. Dollars)

Estimated cumulative expenses payable by each series of the securities of the Fund for each \$1,000 investment (see "Introduction to Part B" for an explanation of the assumptions used in this example) for the time periods shown:

All units are denominated in U.S. dollars.

What Does the Fund Invest In?

Investment Objectives

The Fund aims to generate income in U.S. dollars with an emphasis on capital preservation, by investing primarily in short-term high-quality corporate and government fixed-income securities issued in the U.S. These securities will generally have a duration of between zero and eighteen months.

Any change to the investment objectives must be approved by a majority of the votes cast at a meeting of security holders held for that reason.

Investment Strategies

The Fund may invest up to 10% of its assets in fixed-income securities of issuers rated below investment grade, as long as the overall weighted average credit quality of the Fund's investments is "A" or higher, as rated by a recognized credit rating organization. The portfolio manager may vary the weighted average credit quality.

In order to limit price volatility, the Fund will generally have a duration of zero to eighteen months, but it will manage this in a flexible manner to react to or anticipate changing market opportunities and risks.

Depending on the portfolio manager's currency outlook, the Fund's non-U.S. currency exposure may be hedged back to U.S. dollars. As of the date of this simplified prospectus, the portfolio manager expects to hedge substantially all of the Fund's non-U.S. currency exposure to U.S. dollars.

The Fund may hold cash and/or short-term debt securities in anticipation of, or in response to, unfavourable market conditions; and/or for liquidity purposes.

The Fund considers material environmental, social and/or governance factors in its investment evaluation process.

Depending on market conditions, the portfolio manager's investment style may result in a higher portfolio turnover rate than less actively managed funds. Although generally the higher the Fund's portfolio turnover rate, the higher its trading expenses, in the case of this Fund, which holds fixed-income products that are traded over the counter (rather than on an exchange), there may be situations where increased turnover actually reduces trading costs. The higher the portfolio turnover rate the greater the probability that you will receive a distribution of capital gains from the Fund, which may be taxable if you hold the Fund outside a registered plan. There is no proven relationship between a high turnover rate and the performance of a mutual fund.

The Fund may hold a portion of its net assets in securities of other investment funds, including ETFs, which may be managed by us, in accordance with its investment objectives. For more information see the "Fund of Funds" disclosure under "Fees and Expenses".

In accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described in the "Introduction to Part B – What Does the Fund Invest In?" section of this simplified prospectus, the Fund may

- in addition to the derivatives use described above, use derivatives for other hedging and non-hedging purposes;
- engage in securities lending, repurchase and reverse repurchase transactions;
- engage in short selling (the portfolio manager does not currently engage in short selling but may do so in the future without further notice to investors); and
- invest in gold and silver, and other instruments (such as derivatives and ETFs) that provide exposure to these metals.

If the Fund employs any of these strategies, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

What are the Risks of Investing in the Fund?

This Fund invests in fixed-income securities, which subjects the Fund to market risk. Fixed-income securities are subject to company risk, credit risk, interest rate risk, and prepayment risk. Since the Fund invests outside of Canada, it is subject to foreign markets risk and to a lesser extent, foreign currency risk. These and other risks are described starting on page 1. As of September 3, 2021, one securityholder held 15.97% of the Fund by market value. **This may subject the Fund to Large Transaction risk.**

Who Should Invest in this Fund?

You may not purchase securities of this Fund if you hold these securities within a Mackenzie Investments-administered registered plan.

You should consider this Fund if you

- are looking for a low-risk, fixed-income U.S.-dollar denominated fund to hold as part of your portfolio,
- want a short-term investment,
- can handle the volatility of bond markets.

Distribution Policy

Refer to the “**Introduction to Part B – Distribution Policy**” section of this simplified prospectus.

On all series, the Fund will make monthly distributions of net income. **These distributions may be adjusted or discontinued at our discretion. You should not confuse these distributions with the Fund’s rate of return or the yield of its portfolio. You must inform us if you wish to receive these distributions in cash, otherwise they will be reinvested, without charge, in additional securities of the series on which they were paid.**

Fund Expenses Indirectly Borne by Investors (U.S. Dollars)

Estimated cumulative expenses payable by each series of the securities of the Fund for each \$1,000 investment (see “**Introduction to Part B**” for an explanation of the assumptions used in this example) for the time periods shown:

Series PW	May 20, 2015
Series PWFB	April 3, 2017
Series PWX	July 9, 2015
Series SC	May 20, 2015
Registered Plan Qualified	Yes

All units are denominated in U.S. dollars.

What Does the Fund Invest In?

Investment Objectives

The Fund aims to provide a positive total return over a market cycle in U.S. dollars, regardless of market conditions, by investing primarily in fixed-income securities of issuers anywhere in the world and derivative instruments.

Any change to the investment objectives must be approved by a majority of votes cast at a meeting of security holders held for that reason.

Investment Strategies

The Fund's investments may include investment-grade bonds; lower quality fixed-income investments, which may include instruments that have a weighted average credit quality below investment grade (rated below "BBB-" by a recognized credit rating organization) or that are unrated; mortgage- and asset-backed securities; preferred shares; floating-rate debt instruments and other floating securities. Floating rate debt instruments generally pay interest at rates that are variable or reset periodically at a margin above a generally recognized base lending rate such as the prime rate or the Secured Overnight Financing Rate (SOFR) or any applicable Alternative Replacement Rate (ARR). The Fund is expected to hold a large portion of its assets in high-yield debt securities. The portfolio manager may vary the weighted average credit quality.

Generally, the Fund will not invest more than 5% of its assets in equity investments, in addition to any preferred shares it may hold.

The investment approach follows a macro and fundamental analysis to select investments for the Fund, by reviewing the values of the Fund's investments on an ongoing basis, paying particular attention to credit quality and interest rate risk.

The Fund will use equity and/or fixed-income derivative instruments to reduce overall volatility with a focus on mitigating downside risk. For example, the Fund may employ a collar strategy which involves buying put options and selling call options. Buying put options mitigates negative returns during down markets, while selling call options typically pays for a portion of the put option cost and mitigates negative returns through the collection of premiums, but also limits the upside return potential of the Fund. The Fund will employ a flexible approach to its use of derivative instruments, and has the ability to opportunistically use options, swaps, futures and forward contracts for hedging or non-hedging purposes under different market conditions. The Fund may use derivative instruments where the underlying interest of the derivative is an ETF.

The Fund may invest in all types of government and corporate fixed-income securities and instruments. It will employ a flexible approach, investing across various fixed-income credit ratings, duration, structures, sectors, currencies and countries, and may, at any time, invest a significant portion of its net assets in any one area noted above.

The Fund actively manages its non-U.S. currency exposure but is expected to be predominantly hedged back to the U.S. dollar for the majority of the time.

The Fund may hold cash and/or short-term debt securities in anticipation of, or in response to, unfavourable market conditions; and/or for liquidity purposes.

The Fund considers material environmental, social and/or governance factors in its investment evaluation process.

Depending on market conditions, the portfolio manager's investment style may result in a higher portfolio turnover rate than less actively managed funds. Although generally the higher the Fund's portfolio turnover rate, the higher its trading expenses, in the case of this Fund, which holds fixed-income products that are traded over the counter (rather than on an exchange), there may be situations where increased turnover actually reduces trading costs. The higher the portfolio turnover rate the greater the probability that you will receive a distribution of capital gains from the Fund, which may be taxable if you hold the Fund outside a registered plan. There is no proven relationship between a high turnover rate and the performance of a mutual fund.

The Fund may hold a portion of its net assets in securities of other investment funds, including ETFs, which may be managed by us, in accordance with its investment objectives. For more information see the "Fund of Funds" disclosure under "Fees and Expenses".

The Fund may invest up to 10% of its net assets in illiquid assets, measured at the time of investment, which may include securities of a Private Vehicle offered by Northleaf and/or Sagard.

In accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described in the "Introduction to Part B – What Does the Fund Invest In?" section of this simplified prospectus, the Fund may

- in addition to the derivatives use described above, use derivatives for other hedging and non-hedging purposes;
- engage in securities lending, repurchase and reverse repurchase transactions;

- engage in short selling (the portfolio manager does not currently engage in short selling but may do so in the future without further notice to investors); and
- invest in gold and silver, and other instruments (such as derivatives and ETFs) that provide exposure to these metals.

If the Fund employs any of these strategies, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

What are the Risks of Investing in the Fund?

This Fund invests in fixed-income securities, which subjects the Fund to market risk. Fixed-income securities are subject to company risk, credit risk, interest rate risk, and prepayment risk. Since the Fund invests outside of Canada, it is subject to foreign markets risk and to a lesser extent, foreign currency risk. These and other risks are described starting on page 1. The following table shows which risks apply to this Fund:

During the past year, the Fund's holdings of China Government Bond Shares exceeded 10% of the Fund's net assets at a maximum level of 12.90%. Holding in excess of 10% of a Fund's net assets in a single issuer may subject the Fund to the risks described in "Concentration Risk" on page 2.

Who Should Invest in this Fund?

You may not purchase securities of this Fund if you hold these securities within a Mackenzie Investments-administered registered plan.

You should consider this Fund if you

- are looking for a low-risk, U.S.-dollar denominated global fixed-income fund to hold as part of your portfolio,
- want a medium-term investment,
- are seeking an investment to diversify a traditional portfolio of fixed-income and equity investments,
- can handle the volatility of bond markets.

Distribution Policy

Refer to the "Introduction to Part B – Distribution Policy" section of this simplified prospectus.

In addition, the Fund will make monthly distributions of net income. These distributions may be adjusted or discontinued at our discretion. **You must inform us if you wish to receive these distributions in cash, otherwise they will be reinvested, without charge, in additional securities of the series on which they were paid.**

Fund Expenses Indirectly Borne by Investors (U.S. Dollars)

Estimated cumulative expenses payable by each series of the securities of the Fund for each \$1,000 investment (see “**Introduction to Part B**” for an explanation of the assumptions used in this example) for the time periods shown:

What Does the Fund Invest In?

Investment Objectives

The Fund seeks to provide investors with a diversified portfolio designed to provide a balance of income and long-term capital appreciation.

The Fund seeks to accomplish its objectives by investing primarily in securities of other mutual funds to gain exposure to Canadian and foreign equity and fixed-income securities and other asset categories.

The Fund may also invest directly in Canadian and foreign equity and fixed-income securities and other asset categories where the Fund considers it would be beneficial to unitholders to do so.

Any change to the investment objectives must be approved by a majority of votes cast at a meeting of unitholders held for that reason.

Investment Strategies

The Fund's asset mix will generally be kept within the following ranges:

- 40% - 60% equity securities
- 30% - 60% fixed-income securities

In addition to fixed income and equity exposures, the Fund may also invest in alternative mutual funds.

The asset allocation portfolio manager employs a disciplined total portfolio management approach to constructing the Fund. The Fund is built upon long-term strategic allocations to different equity markets, fixed income markets, and other asset classes. The Fund will be allocated tactically over the short- to medium-term based on changes to the market outlook and risk assessment for each asset class. In determining manager allocations, the asset allocation manager employs an extensive and thorough manager evaluation process.

The Fund will seek to diversify its equity and fixed-income assets in terms of one or more of these factors:

- geographic exposure
- equity factor exposure
- sector exposure
- company market capitalization
- portfolio manager style
- credit quality
- duration.

As a result of this diversification, the Fund may have exposure to securities issued by companies of any size and governments located anywhere in the world, including emerging markets.

The Fund's fixed-income allocation will seek to maintain an overall investment-grade rating. The securities to which the Fund's fixed-income portfolio has exposure will consist primarily of securities rated "BBB-" or better by a recognized credit rating organization.

The Fund seeks to manage currency exposure on a total portfolio basis through the use of derivatives or foreign currency cash holdings. This means that the asset allocation portfolio manager will take into account the Fund's overall currency exposure across all of its holdings.

The Fund may hold cash and/or short-term debt securities in anticipation of, or in response to, unfavourable market conditions; and/or for liquidity purposes.

The Fund considers material environmental, social and/or governance factors in its investment evaluation process.

The Fund will obtain exposure to equity securities, fixed-income securities and other asset categories primarily by investing in other funds, including ETFs, which may be managed by us, in accordance with its investment objectives. For more information, see the "Fund of Funds" disclosure under "Fees and Expenses".

In accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described

in the “Introduction to Part B – What Does the Fund Invest In?” section of this simplified prospectus, the Fund may

- use derivatives for hedging and non-hedging purposes;
- engage in securities lending, repurchase and reverse repurchase transactions;
- engage in short selling; and
- invest in gold and silver, and other instruments (such as derivatives and ETFs) that provide exposure to these metals, and in certain other ETFs that replicate an index on a leveraged basis and/or that invest in physical commodities.

If the Fund employs any of these strategies, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

What are the Risks of Investing in the Fund?

This Fund has exposure to equity securities, which subjects the Fund to market risk, and which are more volatile than other types of investments, such as fixed-income investments. A significant portion of the Fund’s exposure is to assets outside of Canada, which means that it is subject to foreign markets risk and foreign currency risk. This Fund also has exposure to fixed-income securities, subjecting it to risks including company risk, credit risk, interest rate risk, and prepayment risk. Any indirect investment in securities may subject the Fund to tracking risk. These and other risks are described starting on page 1. The following table shows which risks apply to this Fund:

Risk Checklist

Who Should Invest in this Fund?

You should consider this Fund if you

- are looking for a low- to medium-risk, managed asset portfolio fund to hold as a key part of your portfolio,
- want a medium-term investment,
- can handle the volatility of stock and bond markets.

You should consider the Fund’s Fixed Rate Distribution Series if you want to receive a monthly cash flow.

Distribution Policy

Refer to the “Introduction to Part B – Distribution Policy” section of this simplified prospectus.

On its Fixed Rate Distribution Series, the Fund will make monthly distributions at the following rates:

Fixed Rate Distribution Series	Distribution Rate
F5	5%
F8	8%
FB5	5%

Fixed Rate Distribution Series	Distribution Rate
O5	5%
PWFB5	5%
PWT5	5%
PWT8	8%
PWX8	8%
T5	5%
T8	8%

These fixed rate distributions will consist of net income to the extent of the Fund's allocation of net income to that series for that month, and any amount of the distribution that is in excess of the net income for that series will consist of return of capital. **You should not confuse these distributions with the Fund's rate of return or the yield of its portfolio.**

Fund Expenses Indirectly Borne by Investors

Estimated cumulative expenses payable by each series of securities of the Fund for each \$1,000 investment (see "Introduction to Part B" for an explanation of the assumptions used in this example) for the time periods shown:

What Does the Fund Invest In?

Investment Objectives

The Fund seeks to provide investors with a diversified portfolio designed to provide a steady stream of income and some long-term capital appreciation.

The Fund seeks to accomplish its objectives by investing primarily in securities of other mutual funds to gain exposure to Canadian and foreign fixed-income and equity securities and other asset categories.

The Fund may also invest directly in Canadian and foreign fixed-income and equity securities and other asset categories where the Fund considers it would be beneficial to unitholders to do so.

Any change to the investment objectives must be approved by a majority of votes cast at a meeting of unitholders held for that reason.

Investment Strategies

The Fund's asset mix will generally be kept within the following ranges:

- 15% - 35% equity securities
- 55% - 85% fixed-income securities.

In addition to fixed income and equity exposures, the Fund may also invest in alternative mutual funds.

In addition to fixed income and equity exposures, the Fund may also invest in alternative mutual funds.

The asset allocation portfolio manager employs a disciplined total portfolio management approach to constructing the Fund. The Fund is built upon long-term strategic allocations to different equity markets, fixed income markets, and other asset classes. The Fund will be allocated tactically over the short- to medium-term based on changes to the market outlook and risk assessment for each asset class. In determining manager allocations, the asset allocation manager employs an extensive and thorough manager evaluation process.

The Fund will seek to diversify its equity and fixed-income assets in terms of one or more of these factors:

- geographic exposure
- equity factor exposure
- sector exposure
- company market capitalization
- portfolio manager style
- credit quality
- duration.

As a result of this diversification, the Fund may have exposure to securities issued by companies of any size and governments located anywhere in the world, including emerging markets.

The Fund's fixed-income allocation will seek to maintain an overall investment-grade rating. The securities to which the Fund's fixed-income portfolio has exposure will consist primarily of securities rated "BBB-" or better by a recognized credit rating organization.

The Fund seeks to manage currency exposure on a total portfolio basis through the use of derivatives or foreign currency cash holdings. This means that the asset allocation portfolio manager will take into account the Fund's overall currency exposure across all of its holdings.

The Fund may hold cash and/or short-term debt securities in anticipation of, or in response to, unfavourable market conditions; and/or for liquidity purposes.

The Fund considers material environmental, social and/or governance factors in its investment evaluation process.

The Fund will obtain exposure to equity securities, fixed-income securities and other asset categories primarily by investing in other funds, including ETFs, which may be managed by us, in accordance with its investment objectives. For more information, see the "Fund of Funds" disclosure under "Fees and Expenses".

In accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described in the “Introduction to Part B – What Does the Fund Invest In?” section of this simplified prospectus, the Fund may

- use derivatives for hedging and non-hedging purposes;
- engage in securities lending, repurchase and reverse repurchase transactions;

What Does the Fund Invest In?

Investment Objectives

The Fund seeks to provide investors with a diversified portfolio designed to provide a steady stream of income and some long-term capital appreciation.

The Fund seeks to accomplish its objectives by investing primarily in securities of other mutual funds to gain exposure to Canadian and foreign fixed-income and equity securities and other asset categories.

The Fund may also invest directly in Canadian and foreign fixed-income and equity securities and other asset categories where the Fund considers it would be beneficial to unitholders to do so.

Any change to the investment objectives must be approved by a majority of votes cast at a meeting of unitholders held for that reason.

Investment Strategies

The Fund's asset mix will generally be kept within the following ranges:

- 25% - 45% equity securities
- 45% - 75% fixed-income securities.

In addition to fixed income and equity exposures, the Fund may also invest in alternative mutual funds.

In addition to fixed income and equity exposures, the Fund may also invest in alternative mutual funds.

The asset allocation portfolio manager employs a disciplined total portfolio management approach to constructing the Fund. The Fund is built upon long-term strategic allocations to different equity markets, fixed income markets, and other asset classes. The Fund will be allocated tactically over the short- to medium-term based on changes to the market outlook and risk assessment for each asset class. In determining manager allocations, the asset allocation manager employs an extensive and thorough manager evaluation process.

The Fund will seek to diversify its equity and fixed-income assets in terms of one or more of these factors:

- geographic exposure
- equity factor exposure
- sector exposure
- company market capitalization
- portfolio manager style
- credit quality
- duration.

As a result of this diversification, the Fund may have exposure to securities issued by companies of any size and governments located anywhere in the world, including emerging markets.

The Fund's fixed-income allocation will seek to maintain an overall investment-grade rating. The securities to which the Fund's fixed-income portfolio has exposure will consist primarily of securities rated "BBB-" or better by a recognized credit rating organization.

The Fund seeks to manage currency exposure on a total portfolio basis through the use of derivatives or foreign currency cash holdings. This means that the asset allocation portfolio manager will take into account the Fund's overall currency exposure across all of its holdings.

The Fund may hold cash and/or short-term debt securities in anticipation of, or in response to, unfavourable market conditions; and/or for liquidity purposes.

The Fund considers material environmental, social and/or governance factors in its investment evaluation process.

The Fund will obtain exposure to equity securities, fixed-income securities and other asset categories primarily by investing in other funds, including ETFs, which may be managed by us, in accordance with its investment objectives. For more information, see the "Fund of Funds" disclosure under "Fees and Expenses".

In accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described in the “**Introduction to Part B – What Does the Fund Invest In?**” section of this simplified prospectus, the Fund may

- use derivatives for hedging and non-hedging purposes;
- engage in securities lending, repurchase and reverse repurchase transactions;
- engage in short selling; and
- invest in gold and silver, and other instruments (such as derivatives and ETFs) that provide exposure to these metals, and in certain other ETFs that replicate an index on a leveraged basis and/or that invest in physical commodities.

If the Fund employs any of these strategies, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

What are the Risks of Investing in the Fund?

This Fund has exposure to equity securities, which subjects the Fund to market risk, and which are more volatile than other types of investments, such as fixed-income investments. A significant portion of the Fund’s exposure is to assets outside of Canada, which means that it is subject to foreign markets risk and foreign currency risk. This Fund also has exposure to fixed-income securities, subjecting it to risks including company risk, credit risk, interest rate risk, and prepayment risk. Any indirect investment in securities may subject the Fund to tracking risk. These and other risks are described starting on page 1. The following table shows which risks apply to this Fund:

Who Should Invest in this Fund?

You should consider this Fund if you

- are looking for a low-risk, managed asset portfolio fund to hold as a key part of your portfolio,
- want a medium-term investment,
- can handle the volatility of stock and bond markets.

You should consider the Fund’s Fixed Rate Distribution Series if you want to receive a monthly cash flow.

Distribution Policy

Refer to the “**Introduction to Part B – Distribution Policy**” section of this simplified prospectus.

On its Fixed Rate Distribution Series, the Fund will make monthly distributions at the following rates:

Fixed Rate Distribution Series	Distribution Rate
F5	5%

Fixed Rate Distribution Series	Distribution Rate
F8	8%
FB5	5%
PWFB5	5%
PWT5	5%
PWT8	8%
PWX8	8%
T5	5%
T8	8%

These fixed rate distributions will consist of net income to the extent of the Fund's allocation of net income to that series for that month, and any amount of the distribution that is in excess of the net income for that series will consist of return of capital. **You should not confuse these distributions with the Fund's rate of return or the yield of its portfolio.**

What Does the Fund Invest In?

Investment Objectives

The Fund seeks to provide investors with a diversified portfolio designed to provide a steady stream of income and some long-term capital appreciation.

The Fund seeks to accomplish its objectives by investing primarily in securities of one or more mutual funds to gain exposure to Canadian and foreign fixed-income securities and other asset categories. Preservation of capital is an important factor in the selection of portfolio investments.

The Fund may also invest directly in Canadian and foreign fixed-income securities and other asset categories where the Fund considers it would be beneficial to unitholders to do so.

Any change to the investment objectives must be approved by a majority of votes cast at a meeting of unitholders held for that reason.

Investment Strategies

The Fund will typically allocate substantially all of its investment exposure to fixed income securities, including fixed-income-like securities, such as trusts.

The asset allocation portfolio manager employs a disciplined total portfolio management approach to constructing the Fund. The Fund is built upon long term strategic allocations to different fixed income markets and other asset classes. The Fund will be allocated tactically over the short to medium term based on changes to the market outlook and risk assessment for each asset class. In

determining manager allocations, the asset allocation manager employs an extensive and thorough manager evaluation process.

The Fund will seek to diversify its fixed-income portfolio in terms of one or more of these factors:

- geographic exposure
- sector exposure
- portfolio manager style
- credit quality
- duration.

As a result of this diversification, the Fund may have exposure to debt securities issued by companies of any size and governments located anywhere in the world, including emerging markets.

The Fund will seek to maintain an investment-grade portfolio. The securities to which the Fund has exposure will consist primarily of securities rated “BBB-” or better by a recognized credit rating organization.

The Fund seeks to manage currency exposure on a total portfolio basis through the use of derivatives or foreign currency cash holdings. This means that the asset allocation portfolio manager will take into account the Fund’s overall currency exposure across all of its holdings.

The Fund may hold cash and/or short-term debt securities in anticipation of, or in response to, unfavourable market conditions; and/or for liquidity purposes.

The Fund considers material environmental, social and/or governance factors in its investment evaluation process.

The Fund will obtain exposure to fixed-income securities and other asset categories primarily by investing in other funds, including ETFs, which may be managed by us, in accordance with its investment objectives. For more information, see the “Fund of Funds” disclosure under “Fees and Expenses”.

In accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described in the “Introduction to Part B – What Does the Fund Invest In?” section of this simplified prospectus, the Fund may

- use derivatives for hedging and non-hedging purposes;
- engage in securities lending, repurchase and reverse repurchase transactions;
- engage in short selling; and
- invest in gold and silver, and other instruments (such as derivatives and ETFs) that provide exposure to these metals, and in certain other ETFs that replicate an index on a leveraged basis and/or that invest in physical commodities.

If the Fund employs any of these strategies, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

What are the Risks of Investing in the Fund?

This Fund has exposure to fixed-income securities, subjecting it to risks including company risk, credit risk, interest rate risk, market risk and prepayment risk. A significant portion of the Fund's exposure is to assets outside of Canada, which means that it is subject to foreign markets risk and foreign currency risk. Any indirect investment in securities may subject the Fund to tracking risk. These and other risks are described starting on page 1. The following table shows which risks apply to this Fund:

Who Should Invest in this Fund?

You should consider this Fund if you

- are looking for a low-risk, managed asset portfolio fund to hold as part of your portfolio,
- want a short- to medium-term investment,
- can handle the volatility of bond markets.

You should consider the Fund's Fixed Rate Distribution Series if you want to receive a monthly cash flow.

Distribution Policy

Refer to the "Introduction to Part B – Distribution Policy" section of this simplified prospectus.

On its Fixed Rate Distribution Series, the Fund will make monthly distributions at the following rates:

Fixed Rate Distribution Series	Distribution Rate
F5	5%
PWT5	5%
T5	5%

These fixed rate distributions will consist of net income to the extent of the Fund's allocation of net income to that series for that month, and any amount of the distribution that is in excess of the net income for that series will consist of return of capital. **You should not confuse these distributions with the Fund's rate of return or the yield of its portfolio.**

What Does the Fund Invest In?

Investment Objectives

The Fund seeks to provide investors with a diversified portfolio designed to provide long-term capital appreciation and some income.

The Fund seeks to accomplish its objectives by investing primarily in securities of other mutual funds to gain exposure to Canadian and foreign equity and fixed-income securities and other asset categories.

The Fund may also invest directly in Canadian and foreign equity and fixed-income securities and other asset categories where the Fund considers it would be beneficial to unitholders to do so.

Any change to the investment objectives must be approved by a majority of votes cast at a meeting of unitholders held for that reason.

Investment Strategies

The Fund's asset mix will generally be kept within the following ranges:

- 65% - 85% equity securities
- 5% - 35% fixed-income securities.

In addition to fixed income and equity exposures, the Fund may also invest in alternative mutual funds.

In addition to fixed income and equity exposures, the Fund may also invest in alternative mutual funds.

The asset allocation portfolio manager employs a disciplined total portfolio management approach to constructing the Fund. The Fund is built upon long-term strategic allocations to different equity markets, fixed income markets, and other asset classes. The Fund will be allocated tactically over the short- to medium-term based on changes to the market outlook and risk assessment for each asset class. In determining manager allocations, the asset allocation manager employs an extensive and thorough manager evaluation process.

The Fund will seek to diversify its equity and fixed-income assets in terms of one or more of these factors:

- geographic exposure
- equity factor exposure
- sector exposure
- company market capitalization
- portfolio manager style
- credit quality
- duration.

As a result of this diversification, the Fund may have exposure to securities issued by companies of any size and governments located anywhere in the world, including emerging markets.

The Fund's fixed-income allocation will seek to maintain an overall investment-grade rating. The securities to which the Fund's fixed-income portfolio has exposure will consist primarily of securities rated "BBB-" or better by a recognized credit rating organization.

The Fund seeks to manage currency exposure on a total portfolio basis through the use of derivatives or foreign currency cash holdings. This means that the asset allocation portfolio manager will take into account the Fund's overall currency exposure across all of its holdings.

The Fund may hold cash and/or short-term debt securities in anticipation of, or in response to, unfavourable market conditions; and/or for liquidity purposes.

The Fund considers material environmental, social and/or governance factors in its investment evaluation process.

The Fund will obtain exposure to equity securities, fixed-income securities and other asset categories primarily by investing in other funds, including ETFs, which may be managed by us, in accordance with its investment objectives. For more information, see the "Fund of Funds" disclosure under "Fees and Expenses".

In accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described in the “**Introduction to Part B – What Does the Fund Invest In?**” section of this simplified prospectus, the Fund may

- use derivatives for hedging and non-hedging purposes;
- engage in securities lending, repurchase and reverse repurchase transactions;
- engage in short selling; and
- invest in gold and silver, and other instruments (such as derivatives and ETFs) that provide exposure to these metals, and in certain other ETFs that replicate an index on a leveraged basis and/or that invest in physical commodities.

If the Fund employs any of these strategies, it will do so in conjunction with its other investment strategies in a manner **considered appropriate to pursuing its investment objectives and enhancing its returns.**

What are the Risks of Investing in the Fund?

This Fund has exposure to equity securities, which subjects the Fund to market risk, and which are more volatile than other types of investments, such as fixed-income investments. A significant portion of the Fund’s exposure is to assets outside of Canada, which means that it is subject to foreign markets risk and foreign currency risk. This Fund also has exposure to fixed-income securities, subjecting it to risks including company risk, credit risk, interest rate risk, and prepayment risk. What Does the Fund Invest In?

Investment Objectives

The Fund seeks to provide investors with a diversified portfolio designed to provide a balance between long-term capital appreciation and income, with an emphasis on long-term capital appreciation.

The Fund seeks to accomplish its objectives by investing primarily in securities of other mutual funds to gain exposure to Canadian and foreign equity and fixed-income securities and other asset categories.

The Fund may also invest directly in Canadian and foreign equity and fixed-income securities and other asset categories where the Fund considers it would be beneficial to unitholders to do so.

Any change to the investment objectives must be approved by a majority of votes cast at a meeting of unitholders held for that reason.

Investment Strategies

The Fund's asset mix will generally be kept within the following ranges:

- 50% - 70% equity securities
- 20% - 50% fixed-income securities.

In addition to fixed income and equity exposures, the Fund may also invest in alternative mutual funds.

In addition to fixed income and equity exposures, the Fund may also invest in alternative mutual funds.

The asset allocation portfolio manager employs a disciplined total portfolio management approach to constructing the Fund. The Fund is built upon long-term strategic allocations to different equity markets, fixed income markets, and other asset classes. The Fund will be allocated tactically over the short- to medium-term based on changes to the market outlook and risk assessment for each asset class. In determining manager allocations, the asset allocation manager employs an extensive and thorough manager evaluation process.

The Fund will seek to diversify its equity and fixed-income assets in terms of one or more of these factors:

- geographic exposure
- equity factor exposure
- sector exposure
- company market capitalization
- portfolio manager style
- credit quality
- duration.

As a result of this diversification, the Fund may have exposure to securities issued by companies of any size and governments located anywhere in the world, including emerging markets.

The Fund's fixed-income allocation will seek to maintain an overall investment-grade rating. The securities to which the Fund's fixed-income portfolio has exposure will consist primarily of securities rated "BBB-" or better by a recognized credit rating organization.

The Fund seeks to manage currency exposure on a total portfolio basis through the use of derivatives or foreign currency cash holdings. This means that the asset allocation portfolio manager will take into account the Fund's overall currency exposure across all of its holdings.

The Fund may hold cash and/or short-term debt securities in anticipation of, or in response to, unfavourable market conditions; and/or for liquidity purposes.

The Fund considers material environmental, social and/or governance factors in its investment evaluation process.

The Fund will obtain exposure to equity securities, fixed-income securities and other asset categories primarily by investing in other

funds, including ETFs, which may be managed by us, in accordance with its investment objectives. For more information, see the “**Fund of Funds**” disclosure under “**Fees and Expenses**”.

In accordance with applicable securities regulations or as permitted by the exemptions from these regulations, and as further described in the “**Introduction to Part B – What Does the Fund Invest In?**” section of this simplified prospectus, the Fund may

- use derivatives for hedging and non-hedging purposes;
- engage in securities lending, repurchase and reverse repurchase transactions;
- engage in short selling; and
- invest in gold and silver, and other instruments (such as derivatives and ETFs) that provide exposure to these metals, and in certain other ETFs that replicate an index on a leveraged basis and/or that invest in physical commodities.

If the Fund employs any of these strategies, it will do so in conjunction with its other investment strategies in a manner considered appropriate to pursuing its investment objectives and enhancing its returns.

What are the Risks of Investing in the Fund?

This Fund has exposure to equity securities, which subjects the Fund to market risk, and which are more volatile than other types of investments, such as fixed-income investments.
